

DEWALT Aluminum Cutting Circular Saw Blade –

140mm 30T

DT1910 -QZ

- Backed by an ultra-thin kerf blade for fast cutting and helps to increase battery life, DeWALT Metal Cutting™ saw blades are built to power through aluminum and non-ferrous metals, including brass and copper.
- Heavy-duty tungsten carbide tips maintain a sharp edge for long life, and an anti-stick rim helps to reduce friction and gum-up.

Description:

The range of metal cutting blades are optimised for cutting steel, aluminum or stainless steel. Through a proprietary in-house process tooth alignment has reached a level to give a smooth accurate cut, minimizing vibration and burring.

Specifications	
Diameter	140mm
Bore Size	20mm
Plate Thickness	0.99mm
Kerf Thickness	1.49mm
Tooth Count	30
Grind	Flat Top
Rake Angle	3 °
Tooth Direction	Clockwise
