

Miniature Interface Coaxial Switch, DC to 10 GHz

MS-162 Series

Overview

Designed to be used as the interface antenna connection for portable terminal devices as well as circuit testing on microwave boards (DC to 10GHz) the coaxial switch offers high performance, low loss, extremely high durability and reliability, in a small and lightweight package.

Normally closed, the circuit is re-directed to the plug side by the mating of the plug with the receptacle.

Features

1. Low insertion loss

- 0.08 dB typical at 1 GHz
- 0.12 dB typical at 2 GHz
(not mated with the plug)

2. Space-saving design

- 3.5 mm x 3.1 mm occupied board space.

3. Low profile

- 2.5 mm max. protrusion above the board.

4. Lightweight

- 0.044 g total weight

5. Durability

- 12, 000 mating/unmating cycles, with corresponding plug.

6. Critical area protection

- MS-162 (Receptacle) contact has nickel plating areas to prevent solder wicking into critical areas.

7. Board placement with automatic equipment.

- Packaged on tape-and-reel.

8. Self alignment

- When mating, plug and receptacle will self align in horizontal axis within 0.5mm.

9. RoHS compliant

- All components and materials comply with the requirements of the EU Directive 2002/95/EC.

Applications

- *Wireless communication modules (Bluetooth, WLAN, UWB, ZigBee)
- *Portable terminals, notebook computers, ETC, POS terminals, GPS terminals, PDA, and any small devices requiring verification of antenna/circuit performance and re-direction of the transmission.
