Description

Littelfuse AC series two-electrode line protectors provide a high degree of surge protection in AC line applications. The two models, AC120 and AC240 are designed for use with 120VAC and 240VAC lines respectively. They are able to extinguish AC follow-on currents of at least 200A.

Littelfuse CG3 two electrode high voltage (1.0 - 7.5 KV) devices are designed for surge protection and high isolation applications, and for applications for which bias voltages or signal levels of several hundred volts are normally present.

Features

- Rugged ceramic-metal construction
- Low capacitance (<1.5 pF)
- Available in tape-andreel packaging
- Available with or without leads

Applications

AC Series:

- Long branch circuits (AC wall outlet)
- Short branch circuits (at breaker box, computer, etc)

CG3 Series:

- CRT terminals
- CATV equipment
- Antennas

- Power supplies
- Test equipment
- Submersible pumps
- Medical electronics
- Power supplies
- Medical electronics
