## NOTE

## 1. Packing style

1) As shown in the diagram below, the relays are presented in tube packages with pins 1 and 10 on the left. Be sure to maintain relays in the correct orientation when mounting on PC boards.

## 2. Automatic insertion

To maintain the internal function of the relay, the chucking pressure should not exceed the values below.
Chucking pressure in the direction A : $4.9 \mathrm{~N}\{500 \mathrm{gf}\}$ or less
Chucking pressure in the direction B : $4.9 \mathrm{~N}\{500 \mathrm{gf}\}$ or less
Chucking pressure in the direction C : $4.9 \mathrm{~N}\{500 \mathrm{gf}\}$ or less

Avoid chucking the center of the relay. In addition, excessive chucking pressure to the pinpoint of the relay should be avoided.
