TECHNICAL DETAILS

DESCRIPTION

This **2x16 (32 pin - 0.1 spaced) IDC Breadboard Helper** is great in conjunction with any 32-pin IDC cables. It comes in two parts, a 'pin-through' socket and a male header. The socket straddles the center of a breadboard or Perma Proto and then header plugs into the top of the

socket. Since IDC cables are so standard, but a royal pain to use with breadboards, this is a good and cheap hack for prototyping. Works best when soldered in place. We have used these to prototype on a solderless breadboard but some customers report their breadboards don't play nice with the shorter pins so your mileage may vary

Each order comes with one socket and one header. Breadboard, Perma Proto and IDC cable not included!

We also have helpers for:

- 2x20 Pins
- 2x13 Pins
- 2x8 Pins
- 2x5 Pins
- 2x3 Pins

New Products 11/12/2014

TECHNICAL DETAILS

- Dimensions (assembled): 41mm x 8mm x 17mm / 1.6" x 0.3" x 0.7"
- Dimensions (header): 40mm x 5mm x 12mm / 1.6" x 0.2" x 0.5"
- Dimensions (socket): 41mm x 8mm x 8mm / 1.6" x 0.3" x 0.3"
- Weight (assembled): 4g
