

NEW FOR 2017
SIMPLE CONVENIENT CONTROL

THE CL160

Introducing the CL160, the newest edition to the CL100 range.

The mechanical lock provides simple 'on-the-door' code change, bringing significant benefits to the user. It can also be retrofitted to the existing CL155 prep as well as other, similar products. Staying in control has never been easier. CL160 locks can be used to restrict access in the home on doors, garages and garden sheds, and at work in offices, workshops and showrooms.

- Easy to fit
- Simple, convenient control
- Stylish, silver finish
- 4-6-digit code length
- 1000+ code combinations
- On door code change
- **EASYCODE** & **QUICKCODE** Function
- Choice of three latch sizes
- "Hold Open" Function
- 12 button keypad
- Non-handed
- Suitable for internal applications
- Suited for doors where regular code changes are required

FEATURES & BENEFITS

EASYCODE

The EasyCode function requires the lock to be removed from the door to change the code. This ensures a level of control by management over who can change the code.

QUICKCODE

QuickCode is an optional function that allows the code to be changed while the lock is fitted to the door, by any person who knows the code. A convenient option in which code holders can be trusted.
