

**Wiha tools for
electricians**

Wiha – Our goal: Your success

- **Guaranteed quality for you**
Manufacturing Excellence
award winner 2014 – Germany's
best SME.
- **Reliable and trusted**
Family owned German company
for more than 75 years.
- **Your benefit**
Providing problem solvers for professionals.
- **Leading**
Award-winning innovations appreciated
globally by professionals.

What makes your work easier? Tools that increase your efficiency, reduce costs, and preserve your health. Wiha therefore develops, designs and manufactures products which meet the highest demands of functionality, durability and ergonomics.

Founded over 75 years ago as a small, family-run business for standard parts and screws, today Wiha is a global company with production and assembly premises all over Europe, Asia, and the United States – and is still managed and owned by the Hahn family.

Wiha offers the professional an extensive range of high-quality premium tools, characterized by the use of the latest manufacturing technologies, application-oriented innovations, ergonomic superiority, the highest quality, absolute reliability and long lifespan. In short: Tools that make your jobs noticeably easier – tools that work for you.

VDE-insulated tools from Wiha: To work safer, more efficiently and with less strain on the body.

Certified safety – from our own safety testing procedure according to IEC standards.

Voltage testing: All Wiha VDE-tools, which have special markings, are individually tested at 10,000 VAC and are approved for 1,000 VAC and 1,500 VDC.

Cold shock test: Cooling down to -25° C. The skinning material must retain its toughness, so that it doesn't break when subjected to shock and knocks.

Test of electrical skinning properties: 24 hours storage in water, then 3 minutes test at 10,000 VAC. There must neither be flashover nor disruptive discharge.

Test of the adhesion of the skinning material coating: 168 hours storage at 70° C, then test of adhesion at 500 N.

Pressure tests: Test at 20 N pressure load, 70° C temperature and 5,000 VAC test voltage. No disruptive discharge may occur.

Test of combustion behaviour: The tools are subjected to a flame for 10 seconds. The skinning material must then extinguish and not continue to burn.

Protective measures: See page 89

Ergonomic excellence! Wiha is the world's first hand tool manufacturer to receive the AGR seal for its Inomic® pliers and ergonomic handle design on screwdrivers. Only particularly back-friendly furniture, shoes and useful objects receive this distinction, which enjoys a high level of prestige in the medical sector.

As an internationally recognized institute, the VDE is responsible for the testing and certification of electrotechnical products. Wiha provides the professional with a broad range of VDE products, developed and continuously optimized specifically for electricians, which also provide application-oriented solutions for everyday use.

The Wiha quality-management system according to ISO 9001:2008 ensures that only first-class products are manufactured – and that you can work with products of excellent quality. To ensure maximum safety for the user, the entire Wiha VDE range must undergo the most stringent inspections and individual tests. All Wiha VDE-tools hold multiple certifications: The VDE-GS mark stands for safety with regard to any risk, from electrical right up to radiological. Products labelled with a double triangle and a voltage range are suitable for work with live parts.

The international standard IEC 60900 defines the construction, safety as well as single, series, and random testing of insulated tools. But with Wiha you don't just work safer, but also healthier and more efficiently. Specially developed ergonomic geometries ensure comfortable handling that protects the body from strain. The result: easier work, less signs of fatigue, more efficiency.

Increases your efficiency

A comprehensive tool assortment, always providing you with the right tool when it is needed.

Protects your health

The patented and multiple award-winning Wiha SoftFinish® handle size concept prevents occupational illnesses as it protects the hands and muscles from strain.

Increases your safety

Wiha slim tools ensure full and fully-insulated access to low-lying screws.

Offers you full protection

International award-winning VDE-insulated tools, each individually tested at 10,000 V AC.

1. The Range: Cases that really deliver.

The professional often has reservations about conventional tool boxes: too inaccessible, little storage space, not robust enough. Deficiencies that Wiha has taken to heart – and eliminated – in the development of its case sets.

Wiha cases therefore combine many good qualities: Stable inline rollers allow easy and stress-free transportation of tools. The durable PP-plastic with reinforced plastic elements ensures a long lifespan. Gas-filled shock absorbers hold the cover in all positions and reduce the risk of injury when closing. Tool trays ensure quick and easy access to the tool, the case itself provides a lot of extra storage space for small items and machines. And, last but not least, you can easily access the right tool, whenever it is needed.

“A case with all major Wiha tools and innovations – Christmas for the electrician!”

Rolf Muschal

**Your entire workshop –
now you can take it with you!**

Whether next door or at the most remote site: It's great if the tool you need is quickly at hand. Compact, handy and robust, the Wiha toolbox set ensures access to the tools you require, at any time and in any situation.

Specially compiled according to varying requirements and applications, the Wiha toolbox sets have one thing in common: All include high-quality tools in proven Wiha quality, guaranteeing easy and efficient working.

Ergonomic in design, durable in material and processing, and safe thanks to rigorous and extensive safety test procedures, Wiha tools prove to be a practical and indispensable companion for the electrician, especially in their toolbox set.

- **Increases your efficiency**

A wide range of tools – so the right one is always to hand when you need it.

- **Satisfies your requirements**

Large, robust, sturdy and safe thanks to its lid-lock function.

- **Reduces your costs**

Using the right tool helps protect against damage and rework.

- **Protects your health**

Wiha pliers require less force, reducing wrist strain. The ergonomic handle design makes working easier while helping prevent occupational illnesses.

- **Offers you full protection**

Internationally award winning VDE-insulated tools, each of which is individually tested at 10,000 V AC.

Satisfies your requirements: Large, robust, sturdy and safe thanks to its lid-lock function. **Reduces your costs:** The right torque protects you from damaging materials and avoids subsequent work. **Protects your health:** Wiha pliers require less force, reducing wrist strain. The ergonomic handle design makes working easier while helping prevent occupational illnesses. **Increases your efficiency:** A wide range of tools – so the right one is always to hand when you need it. **Offers you full protection:** Internationally award-winning VDE-insulated tools, each of which is individually tested at 10,000 VAC.

Protects your health

Wiha pliers protect the muscles from strain and are ergonomic to work with, permanently reducing strain to the wrists.

Increases your efficiency

Wiha combination pliers: perfect adaptation to all situations by integration of multiple operations in a single tool.

Offers you full protection

International award-winning VDE-insulated tools, each individually tested at 10,000 V AC.

2. Cutting to length: A cut above the rest with Wiha.

A precise cut at the right time – no problem for Wiha diagonal cutters, heavy-duty diagonal cutters, cable cutters, cable shears and combination pliers. With the perfect combination of high-quality materials and ergonomic comfort, Wiha VDE-tools withstand the toughest demands. Production is in accordance to the state-of-the-art quality management guidelines. A special heat treatment and inductive hardening of the parts under high stress ensure a long lifespan. The precise interaction of the joints and the exacting quality workmanship of the blades and gripping surfaces ensure the highest level of functionality.

All Wiha products have been designed according to the latest findings in ergonomics. Ergonomic handles and well thought-out soft and hard zone distribution makes for work that protects the hands from strain and is comfortable.

**“With BiCut®, I always
have sufficient
power when cutting –
and without
aching fingers.”**

Timo Schweitzer

**Double your power
at the push of a button.**

Precise and safe work – at double the power: no problem for the Wiha BiCut® Professional electric diagonal cutters. If there is not enough power when cutting, or if cutting is laborious, a simple push of a button is all that is required and the cutting power is doubled. Another push of the button, and the power is halved again – easy! This significantly reduces the risk of cramp or slippage when applying too much force. The extra-wide back for the handle, with perfectly distributed soft and hard zones, ensures the optimum ergonomics. The new generation of Wiha pliers has already been awarded with the “reddot award 2014 winner” for outstanding design quality.

Double your power at the push of a button.

- **Increases your efficiency**
Two cutters combined into one – 200 % power at the push of a button, available when ever needed.
- **Protects your health**
Less force is required, reducing strain on joints.
- **Offers you full protection**
Internationally award-winning VDE-insulated tools, each of which is individually tested at 10,000 V AC.

reddot award 2014
winner

Protects your health: Requires less effort and reduces wrist strain. **Increases your efficiency:** Two cutters combined into one – 200 % power at the push of a button, available when ever needed. **Offers you full protection:** Every individual tool tested at 10,000 VAC.

Protects your health

Wiha pliers protect the muscles from injury and their ergonomic design permanently reduces wrist strain.

Reduces your costs

Thanks to the integration and combination of several operations in one tool, this removes the need for several tools.

Offers you full protection

International award-winning VDE-insulated tools, each individually tested at 10,000 V AC.

3. Skinning: Comfortable and with less body fatigue.

Skinning, stripping and crimping – three operations that require a high degree of precision, from both the craftsman and his instruments. Wiha also offers the right tools here to make work easier. Ergonomically designed and in quality workmanship, they aid comfortable work with less body fatigue, making work more efficient.

The special highlight in our range of stripping tools, needle nose pliers, stripping pliers and crimping tools is the Wiha TriCut professional electric installation pliers, suitable for multiple operations: With their help, it is possible to cut, skin and strip cable. These extremely robust, long-life pliers are characterized by their high-quality materials, a wear-free joint and their ergonomic design – a must for Wiha.

**“Thanks to TriCut
I save on weight
and space –
and can even work
in an installation
socket.”**

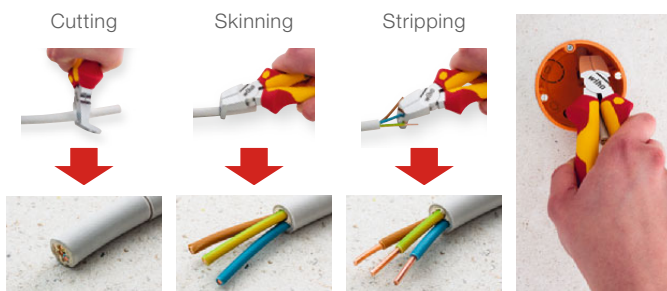

Rolf Muschal

Three in one.

Less tools means less weight, better handling and more efficient work. The Wiha Professional electric TriCut installation pliers combine three tools in one, ideal for the three operations cutting-to-length, stripping and skinning. And it does all this while saving you energy: Due to an ergonomically shaped, specifically angled plier head forged from high-quality steel. The low-wear, inlaid joint with heavy-duty riveting makes the pliers particularly robust and durable, and production and testing according to IEC 60900, VDE/GS certification and individual piece testing at 10,000 VAC ensures uncompromising safety.

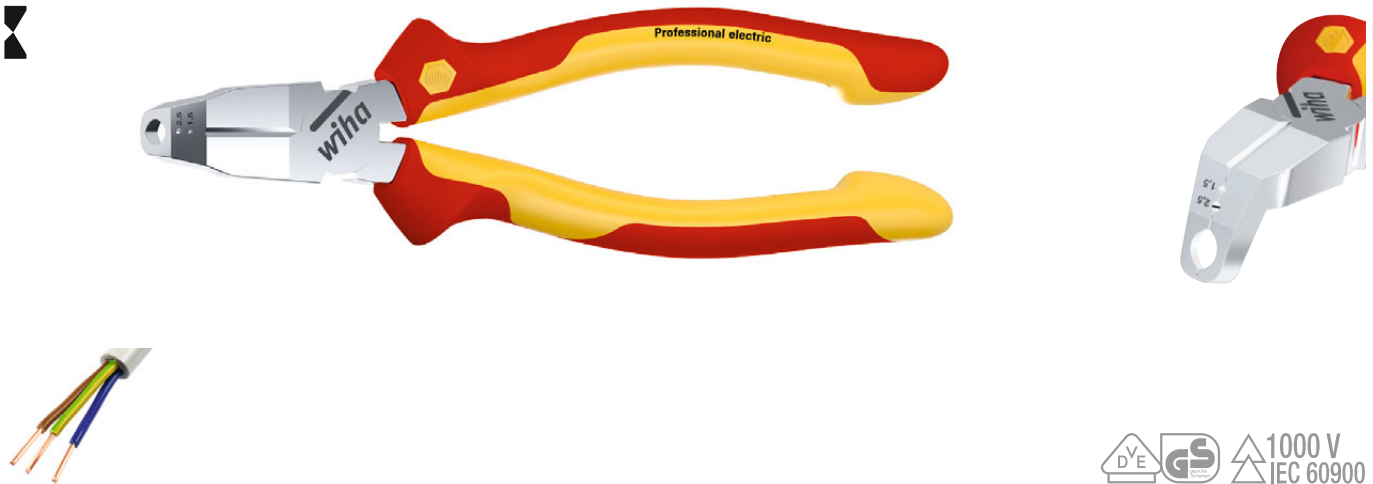

- **Increases your efficiency**
Three tools in one. Saves 60 % volume and 50 % weight for 100 % efficiency!
- **Reduces your costs**
Wiha TriCut pliers replaces need for three tools due to its trimming, dismantling and stripping functions.
- **Simplifies your work**
The angled shape of the head allows work to be performed in hard-to-reach spaces such as installation boxes.
- **Offers you full protection**
Every individual tool tested at 10,000 VAC.

Stripping / Stripping / Crimping

Increases your efficiency

Wiha screwdrivers offer an optimal balance between power and control thanks to their unique handle-length concept.

Saves money

By using the correct torque value, torque tools protect from material damage and reworking.

Increases your safety

Wiha slim tools ensure full and fully-insulated access to low-lying screws.

Protects your health

The patented and multiple award-winning Wiha SoftFinish® handle size concept prevents occupational illnesses thanks to work that protects the hands and muscles from strain.

Offers you full protection

International award-winning VDE-insulated tools, each individually tested at 10,000 V AC.

4. Fastening:

We have the know-how at the tip of our fingers.

The ergonomic quality of a tool is never quite so apparent as when fastening and clamping. Under the motto “A grasp on turning” Wiha presents an innovative handle size concept which breaks new ground in terms of individual user comfort.

Many commonly available screwdrivers are not designed to meet the needs of users. This results in disadvantages in guiding the tool as well as in transmitting force while fastening. In contrast, the Wiha SoftFinish® concept works with four different handle sizes: Thus, each handle has a perfectly correlated ratio of guidance, speed and torque for any task.

The Wiha slimTECHNOLOGY offers additional comfort, permitting unrestricted access to each screw with 33 % slimmer blades.

“The idea of integrating the insulation in the blade in slimFix is fantastic. For me, this means I can work more efficiently and safely.”

Andreas Heizmann

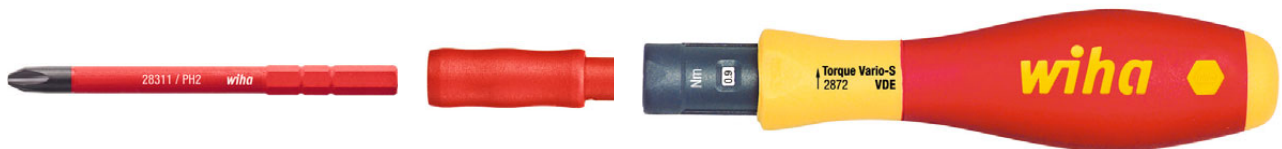

**There are moments when
you need to control your power.**

Power is good. Controlled power is better. The fully certified Wiha VDE torque screwdriver systems TorqueVario®-S and TorqueVario®-S TR combine precision with safety: With a distinctly audible and perceptible click signal when the torque value is reached. With a release accuracy of $\pm 6\%$ of the set scale value, Wiha VDE screwdrivers meet the accuracy requirements of EN ISO 6789, BS EN 26789, ASME B107.14M. Uncompromising safety is ensured in production and testing according to IEC 60900, VDE/GS certification and individual product testing at 10,000 VAC.

- **Increases your efficiency**
Using the correct torque prevents from rework and damaged material.
- **Reduces your costs**
The right torque protects your against warranty and claims.
- **Increases your safety**
Wiha slimBits grant unhindered, fully insulated access to deep lying screws.
- **Offers you full protection**
Every individual tool tested at 10,000 VAC.

The Wiha VDE torque screwdriver systems are available in variants of 0.6–8 Nm.

Reduces your costs: The right torque protects you against warranty claims. **Increases your safety:** Wiha slimBits grant unhindered, fully insulated access to deep lying screws. **Increases your efficiency:** The right torque protects you from damaging materials and avoids subsequent work. **Offers you full protection:** Every individual tool tested at 10,000 V AC.

**INFOBOX:
Torque TR.**

Wiha Torque TR.

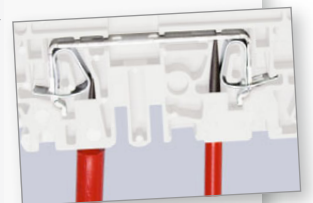

- A switching angle of only 5° enables very precise and cramped working
- The torque values can be set continuously between 2 and 8 Nm
- Overtightening the screw isn't possible due to the reliable torque technology
- Distinctly audible and perceptible click signal
- The ergonomic soft zones enable comfortable and effortless power transmission, even at higher torque values
- Suitable even for magnetic or machining environments thanks to mechanical locking
- Broad selection of interchangeable blades and adapter blades

**INFOBOX:
slimTECHNOLOGY**

Wiha SoftFinish® electric slimFix

- Unlimited access
- Blades up to 33% narrower due to integrated insulation
- Tool for spring clips (wedge-profiled blade geometry)

**All bits in the handle,
always and everywhere.**

Why make things complicated, when they can be compact?

The practical Wiha LiftUp electric magazine bit holder accommodates up to six common insulated slimBits – and is therefore the ideal portable companion for every electrician. The bit magazine is unlocked at the touch of a button on the two rockers, and the slimBits can easily be removed and re-inserted. A reliably locked magazine prevents anything from being lost when on the move. The rotating cap is used to make working easier: Additional axial force can be exerted by pressing strongly with the hand against the cap, while rotating around the longitudinal axis with the other hand. Uncompromising safety is ensured in production and testing according to IEC 60900, VDE/GS certification and individual part testing at 10,000 VAC.

- **Increases your efficiency**
Wiha LiftUp electric, saves 75 % volume and 50 % less weight for 100 % efficiency.
- **Protects your health**
No risk of injury as all blades are safely stored away in the handle.
- **Increases your safety**
Wiha slimBits grant unhindered, fully insulated access to deep lying screws.
- **Offers you full protection**
Internationally award-winning VDE-insulated tools, every individual tool tested at 10,000 VAC.

The Wiha LiftUp electric magazine bit holder is available in two varying bit compositions (SL/PH or SL/PH/XENO PZ)

INFOBOX: VDE interchangeable bit system

slim Vario

LiftUp electric

slim Torque

VDE interchangeable bit system

- Compact VDE bit sets: holder + slimBit (length 75 mm)
- 35 % lighter than comparable sets
- Maximum service life: metal locking mechanism
- Precise work – additional guidance with free-running sleeve

VDE torque system

- Controlled tightening of electrical screw connections with slimBits

Can be used with these bits

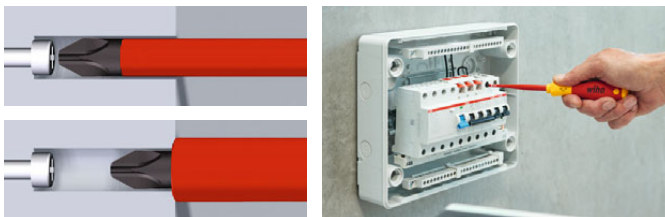

**The right tool.
When it really matters.**

Wiha slimTECHNOLOGY enables blades to be up to 33 % slimmer due to the integrated insulation in the blade. Low-lying screw and spring elements in the critical working area can therefore be reached easily. The high-quality blade insulation guarantees safe work in on live parts up to 1,000 VAC/1,500 VDC. Additional safety is assured as each individual screwdriver is tested in a water bath at 10,000 VAC in accordance with IEC 60900.

Roll-off protection, the patented, SoftFinish® handle design that protects the hands and muscles from strain, and the unique handle-length concept for optimal balance between power and control all ensure healthier and more efficient work.

- **Increases your safety**
Wiha slim blades grant unhindered, fully insulated access to low lying screws.
- **Increases your efficiency**
Unique Wiha handle-size concept for optimum balance of torque and control.
- **Protects your health**
Patented ergonomic SoftFinish® handle design for more gain with less pain.
- **Offers you full protection**
Internationally award-winning VDE-insulated tools, each piece individually tested at 10,000 VAC.

The system for every electrician. Available as a screwdriver or as an interchangeable bit system

INFOBOX: VoltDetector

Wiha Volt Detector.
Testing pen for AC voltages.

- Testing pen detects AC voltages from 230 to 1,000 V AC
- A bright red LED indicates AC voltages
- A current flow through the user's body is not necessary
- Complies with IEC 61010-1 safety standard: Measuring category CAT III 1,000 V AC
- Detects AC voltages within a field of 4 mm
- CE compliant

INFOBOX:
SoftFinish®
Steel cap

The convenient expert for dry applications.

- The solid steel cap at the end of the SoftFinish® handle allows controlled hammer blows, for example, when loosening a tight screw
- Due to the solid steel cap and hex blade extending through the handle, there is no loss of impact energy when a precise hammer blow is applied
- Blade with hex bolster for designed for spanners to be used on particularly tight screws

Bit set for switch cabinet construction, 14 pcs

79187 T01

Increases your efficiency: Optimum access to low-lying screws thanks to extra-long 90 mm bits.

**INFOBOX:
KombiProfil**

Xeno Plus/Minus.

- The special slotted/ Phillips or slotted/ Pozidriv profile of the Xeno is optimally suited for terminal screws
- The combination profile reduces slipping and ensures greater torque transfer

Fastening / Clamping

**Perfect order
when fast work is required.**

Perfect order and easy handling – the ErgoStar L-key holder provides both: Rotating a single L-key in the holder means that all other keys rotate at the same angle! Keys sitting next to each other no longer need to be disentangled. Instead, all keys are ready for removal with one turn – as fast and easy as never before. The keys of the ErgoStar also help to make work significantly easier: The Wiha L-key set of the 369R series, made of fully hardened chrome vanadium steel, includes an innovation that will convince everyone. A spring steel ring holds hexagon screws reliably.

- **Simplifies your work**

The ball end facilitates access to screws and enables operation at angles of up to 25°.

- **Facilitates your handling**

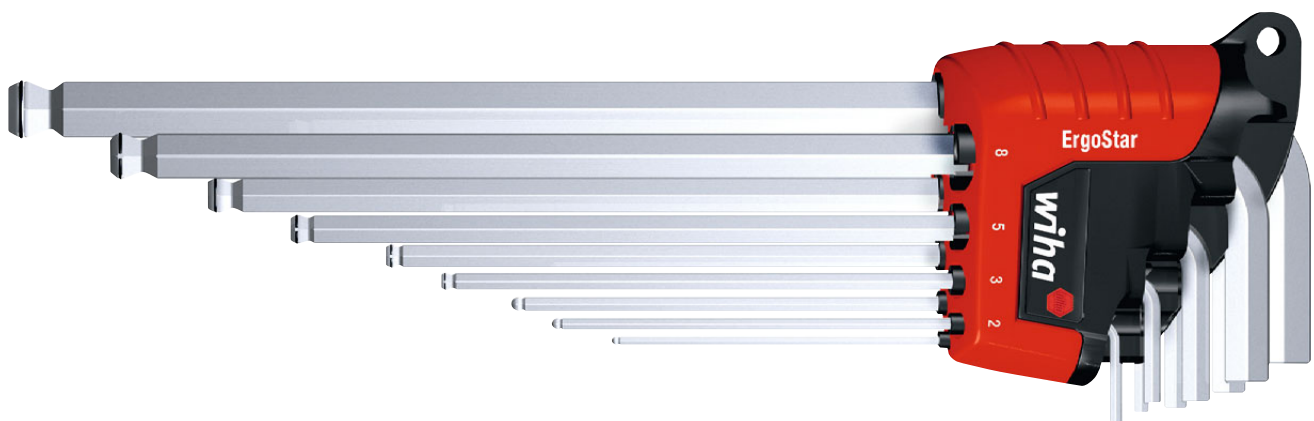

The right key to hand when you need it.

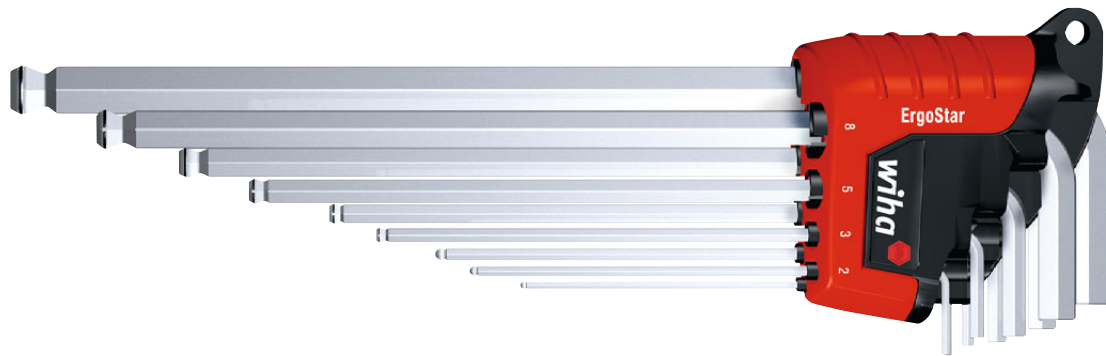

- **Saves time**

Ensures tidiness: removal and the targeted insertion into the holder are child's play.

- **Increases your efficiency**

Wiha MagicRing® retaining function holds all screws firmly in place – without any magnets.

Simplifies your work: The ball end facilitates access to screws and enables operation at angles of up to 25°. **Facilitates your handling:** The right key to hand when you need it. **Saves time:** Ensures tidiness: removal and the targeted insertion into the holder are child's play. **Increases your efficiency:** Wiha MagicRing® retaining function holds all screws firmly in place – without any magnets.

INFOBOX:
TORX® ball end

With elongated TORX® profile behind ball end.

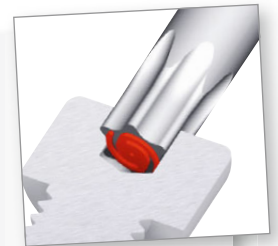

Wiha TORX®-ball end

- With optimised TORX® ball end geometry
- Increased strength thanks to the special cold forming on a system developed by Wiha especially for this purpose
- Enables fastening and unfastening at angles up to 25°
- Simple insertion of the tool/bit and fastening/unfastening, especially in hard-to-reach positions
- Broad product range: As an L-key, as a bit and as a SoftFinish® screwdriver

INFOBOX:
MagicSpring®

Wiha TORX® MagicSpring®

- TORX® and TORX PLUS® screws are held securely in place
- An innovation, which will convince each user

Reduces your costs

Wiha circlip pliers with special fastening feature in their tips keep circlips stable and tight, preventing damage in the working environment.

Increases your efficiency

Wiha gripping pliers enable safe, non-slip gripping in all work situations.

Offers you full protection

International award-winning VDE-insulated tools, each individually tested at 10,000 VAC.

5. Supplying:

Supplying – completely relaxed.

In the supplying and holding working procedures, Wiha pliers prove to be clever helpers for relaxed and efficient work. For instance, the OptiGrip of the combination and high-leverage combination pliers ensure optimal and secure holding using an innovative gripping surface: The unique 'triple-point support' protects the work piece from twisting or slipping. The circlip pliers from the Classic Series with their MagicTips® precision tips made of high-performance steel offer considerable additional safety and stability. Their special latching function is especially useful against in preventing the circlips jumping off. The Wiha Inomic® VDE product range, with their angled plier head protect the joints, muscles and tendons of the user from strain. You can also work with force for hours, without tiring or any joint pain.

**“You only have
to lose a circlip,
and then you
realize the benefits
of Wiha pliers!”**

Frank Scheck

**For those situations
where a good grip is essential.**

They make our circlip pliers for the Classic series head and shoulders above the rest: MagicTips®, the precision tips made of high-performance steel. Additionally hardened, they offer a high level of resistance to wear and therefore ensure a long shelf-life. The special latching feature is as unique as it is useful, and prevents jumping of the circlips – and therefore any reworking in the motor or working space caused by lost circlips. And thanks to the non-slip pliers handle, precise work is also guaranteed in unfavourable situations. Hard as nails, durable, safe, accurate: These qualities make Wiha MagicTips® circlip pliers useful and indispensable helpers during day-to-day work.

- **Saves time**
Circlip securely and firmly under control.
- **Reduces your costs**
Avoids damage from lost circlips in the working environment.

MagicTips® circlip pliers set, 4 pcs.

Reduces your costs: Avoids damage from lost circlips in the working environment. **Saves time:** Circlip securely and firmly under control.

Set 4 pcs.

Protective measures

For all work on or near live parts, use the following required for the respective work

- skinning personal safety equipment,
- skinning safety equipment and
- insulated tools.

Work should generally not be carried out on live active parts of electrical systems and electrical equipment. As a result, the electrical power should be switched off before starting work and this state must be ensured for the duration of the work. This is done by complying with the five safety rules.

Before beginning work:

- isolate
- protect against being switched on again
- check no voltage is present
- earth and short-circuit
- cover or block access to neighbouring live parts.
