Embossing	No
Folded length	10.5 cm
Folded width	35.5 cm
Ply	1
Print	No
Unfolded length	61.5 cm
Unfolded width	35.5 cm

Get tough on dirt and make hard-to-reach spaces sparkle with our Tork Heavy-Duty Cleaning Cloth. This thick disposable cleaning cloth is strong and absorbent enough to tackle liquids, oil and grease. Use with most solvents for added ease, while helping the environment and staff health with the exelCLEAN® material – it uses up to 41% less solvent than rags. Plus, we've lowered the CO2 emissions for Tork exelCLEAN® by 28% since 2011*. Your team will also appreciate time saved with the lightweight and portable Tork Handy Box. Cut waste too, with the one-at-a-time dispensing. *(Life Cycle Analysis) LCA conducted by Essity and IVL Svenska Miljöinstitutet in April 2021

Key benefits:

- Quickly and easily get hold of cleaning cloths and save time as the Handy Box's large opening means cloths are easy to access.
- Optimise consumption and minimise waste of cleaning cloths with the one-at-a-time dispensing feature.
- The Handy Box's large opening means cloths are easy to access, even when wearing gloves.
- Improve your operation's sustainability - this product packaging is made from 100% recycled fibres.

Environmental

Tork exelCLEAN® cloths

This product does not contain any silicone.

Cellulose Pulp
Polyester
Polypropylene
Functional agents or additives

Raw materials

Cellulose Pulp

Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

Polyester

Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibers are then cut to intended fiber length.

Polypropylene

Polypropylene or polypropene is a thermoplastic polymer made from oil. The molten resin is spun to endless fibres through spinnerets and cooled by air. The fibres form a web.

Functional agents and additives

Functional additives could be wet strength agent, antistatic agent and wetting additives/tensides.

Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

Packaging

Fulfillment of Packaging and Packaging Waste Directive (94/62/EC): Yes
