Lowers your costs: The correct torque protects you from warranty claims.

Application: For applications where recommended torque settings are important. Use in combination with a Wiha torque interchangeable blade.

Extra: Incl. works inspection protocol.

Extra: Delivered in practical plastic box.

The TorqueVario®-S torque screwdriver set provides the right torque for process safety. The tool set contains an ergonomically shaped torque screwdriver with an integrated numeric scale, 10 standard bits for all applications, a bit holder and an adjusting tool. All components are arranged practically in a high-grade, sturdy box, where they are easy to identify. The torque screwdriver covers a wide variety of applications with a torque range between 0.8 and 5.0 Nm. A clearly audible, physically perceptible signal emitted when the torque is produced guarantees process safe torque mechanics, protecting against damage to materials and eliminating the need for retouching. With a release accuracy of +/- 6%, the torque tool complies with EN ISO 6789 requirements.

For applications in mechanics

Bit holders or blades are not included in delivery.
