

# **Multilayer Ceramic Chip Capacitor**

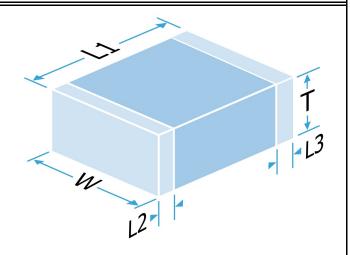

Part Number: 2220Y1K00474KXTWS2

**Description:** 2220 1000V 470nF ±10% X7R (2R1)

A range of X7R MLC capacitors to suit a variety of applications. In a wide selection of chip sizes, rated voltages and terminations, including FlexiCap™, the world's first commercially available flexible termination.

WS2 and WS3 parts use StackiCap™ patented construction technology.

Suffix code PXX or PX mandates the use of precious metal electrode (PME) materials. This may incur additional costs.

## **Mechanical Specification**

Size Code

Length (L1) in mm (")

Width (W) in mm (")

Thickness (T) in mm (")

Minimum Termination Band (L2,L3) in mm (")

Maximum Termination Band (L2,L3) in mm (")

**Termination Material** 

Solderability

Packaging

**Conformal Coating** 

2220

#### **Environmental**

RoHS Compliant to 2011/65/EC as amended by 2015/863/EU

Compliant

**REACH Compliant** 

209 compliant

California Proposition 65

No exposure risk

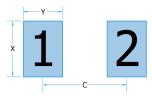

## **Board Layout**

Knowles' conventional 2-terminal chip capacitors can generally be mounted using pad designs in accordance with international specification IPC-7351, Generic Requirements for Surface Mount Design and Land Pattern Standards, but there are some other factors that have been shown to reduce mechanical stress, such as reducing the pad width to less than the chip width. In addition, the position of the chip on the board should be considered.

Some high voltage parts may require modifications to the board layout and/or the addition of a conformal coating to prevent flashover. Refer to application note AN0043 for further information.

### IPC-7351 pad design

	2220	
С	5.30mm	0.209"
Υ	1.50mm	0.059"
X	5.40mm	0.213"

## **Packaging**

Tape packaging information for tape-and-reel parts:

Tape and reel packing of surface mounting chip capacitors for automatic placement are in accordance with IEC60286-3.

### Soldering

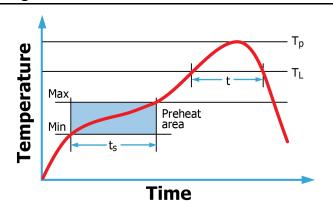

Reflow solder in accordance with IPC-A-610. Recommended reflow profile as laid down in IPC/JEDEC J-STD-020.

Wave soldering is also possible, but care must be taken for case sizes 1210 and larger and component thickness >1.0mm. Trials are encouraged.

Hand soldering is not recommended and can lead to component damage through thermal shock.

PdAg terminations are primarily intended for conductive epoxy attachment - they may be suitable for soldering but trials are recommended.

DLI

Application notes with mounting and handling guidance are available on request.
