Custom capabilities

Eaton's leadership in custom solutions is derived from our in-depth understanding of applications, modeling tools, and customer needs to maximize device performance. We offer transformers, inductors, and planar form factors which can be built to print or fully designed by our team.

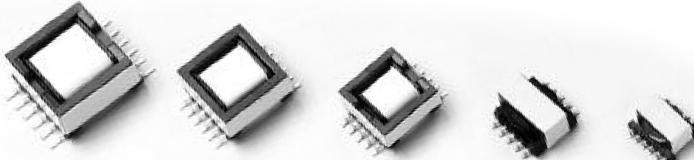

Standard geometry custom inductors

- Power range from 1 Watt to 120 Watts
- Frequency range from 20 kHz to 500 kHz
- High power density and low radiated noise
- Ferrite core material

Standard geometries sizes 1 to 9 core and bobbin parameters

- Standard geometries sizes 1 through 5 are gull wing style devices offering very low product profiles
- Standard geometries sizes 6 through 9 are J-lead style devices offering smaller product footprints but with increased product height

Custom form factor inductors and transformers

- Optimized performance
- Traditional wire wound, planar and integrated options
- Broad range of material solutions
