Product code: 50382

Standard: USB

Type: USB 3.1 typ C M / HDMI F | USB F | RJ-45 F | SD | MICRO SD | PD

About the product

The adapter allowed you to connect with more devices and media at the same time from one device. By the HDMI input, the adapter converts the digital signal into an analog signal, allows you to connect a monitor or projector to the device. The adapter displays exactly what we have on our device (all activities, desktop, photos, videos, games, Internet, etc ...). By an SD and microSD card slot allows you to operate cards and works as a card reader. The RJ-45 input is the most often used to connect some types of modems. The USB 3.0 input allows us to connect virtually any device (e.g. video camera, camera, mobile phone, scanner, keyboard, Pendrive, etc.) Thanks to the Plug & Play interface, the device immediately works without installing drivers. The product perfectly adapts to your device. Its lightness and handiness allow you to have the device always with you. The adapter has been designed based on a modern, minimalist design.

Mains Features

- 6in1 device,
- Plug & Play interface,
- solid performance,
