

Reimagining the User Experience

Touch Encoder

KEY FEATURES

- Replaces many traditional user input devices (such as switches, keypads, pushbuttons, displays, etc.) with a simple, easy to use device
- Optimal front panel footprint
- Supported gestures: Tap + Swipe + Turn
- High resolution display: 330 PPI (320 X 300)
- Quick user interface development
 - Intuitive tablet based development platform
 - Library of configurable standard widgets
- Stores hundreds of screens (32MB memory)
- Incorporates pictures: PNG, JPEG, etc.
- Field upgradable application and firmware
- Robust: sealed to IP67, high impact strength, chemical resistant
- 1,000,000 encoder cycles
- USB 2.0 or CAN J1939 communications with host device

MATERIALS

- Cover lens: polyester
- Knob: 304 stainless steel with optional black chrome finish or silicone grip
- Rear housing: nylon
- Mounting nut: nylon
- RoHS 2018/863 compliant

TOUCHSCREEN/DISPLAY

- Optically bonded display and touchscreen for excellent sunlight readability
- Touchscreen construction: high resolution PCAP ITO

General

Device Diameter (O.D.): 2.200 in (55.88 mm) Nominal
Display Diameter (V.A.): 1.320in (33.50 mm) Nominal
Touchscreen: Projected Capacitive
Display - Type: Round Color TFT LCD, 320 X 300
Display - Brightness: 200 Cd/m2
Positions/Revolution: 32
Connector Style: M12 5-Pin Connector or PC Board Connector

Environmental

Operating Temp. Range: -20 to 65 °C
Storage Temperature: -30 to 70 °C
Humidity: 95% @ 65 °C
Mechanical Shock: ANSI EP455 5.14.1
Seal (Electronics): IP67
Radiated Immunity: IEC 61000-4-3 80 - 2700 MHz 10 V/M
Conducted Immunity: IEC 61000-4-6 LEVEL 2 - 130 dBµV, 150 KHz to 80 MHz
ESD: IEC 61000-4-2: 8 kV Contact; 15 kV Air
Vibration (Random): 50 - 2000 Hz, 2hr Each Axis ANSI EP455 5.15.2
Chemical Resistance: Designed to survive repeated exposure to most chemicals found in Medical, Off-Highway, and Industrial applications
Solar Radiation: ISO 4892.2 Method B
Power Frequency Magnetic Field: Meets IEC 61000-4-8, 100 A/m
Electrical Fast Transient/Burst: IEC 61000-4-4 ±1kV Coupling Clamp
Conducted Emissions: EN 55011, EN55032 Class B
Radiated Emissions: EN 55011, EN55032 FCC Part 15 Class B

Part Numbers

Software Development Kit P/N: **TE-M321-SDK (without iPad) & TE-M321-SDKT (with iPad)** * iPad is a registered trade mark of Apple Corporation

Inside the Kit:

- Touch Encoder Development Module
- CANbus Interface Cable
- Red Programming Cable
- Power to USB Cable
- Power Supply Wall Mount
- Thumb drive
- White USB Micro B to USB Type A Adapter Cable

Simple, Intuitive Application Development using Grayhill GIIB App

Create & store multiple projects

Simulate your program on the iPad before downloading it to the Touch Encoder

Create individual screens using any combination of widgets (from the widget library), pictures and graphics

Scroll up and down to see all of the screens on your workspace

Add in touch zones; Tap anywhere on the screen to define size and location

Drag and drop screens from your workspace into N,S,E,W swipe zones

Drag and drop screens from your workspace to define what happens when the knob is rotated

Fully Customizable Standard Widgets

Select icon from Menu

Change colors

Determine values/increments for rotary movements

Pin Numbering Detail

CONNECTOR OUTPUT		
PIN #	USB	CAN
1	MODE	MODE
2	VIN	VIN
3	GND	GND
4	USB_D+	CAN_H
5	USB_D-	CAN_L

To put device in programming mode:
Connect mode pin #1 to GND at power up.
Leave mode pin #1 open for run mode
(normal operation)

Mode Pin Truth Table @ Power up

Program Mode	GND
Run Mode	Open
