

LASER VISION

Laser Enhancement & Safety Glasses

Lightweight wraparound design, ideal for use with all laser measures & laser levels. These Laser Glasses visibly enhance the brightness of the laser light making it easier to see in bright sunlight or over longer distances. An ideal accessory to enhance the laser dot.

As safety glasses, provide protection for woodworking & machining with power tools & on construction sites.

Comes with:

- Microfibre bag (can also be used for cleaning)
- Instructions for cleaning & using safety glasses

APPROVED USES FOR EYEWEAR PROTECTORS:

Can be used for woodworking and machining with power tools or on construction sites. Lenses offer 99% protection against harmful UV rays. For complete listing of approved uses refer to ANSI Z87.1-2015 Annex 1, CSA Z94.3-07 Annex A, or CE EN 166.

LIMITATIONS OF SAFETY GLASSES:

Do not use when torch welding, torch cutting, electrical arc welding or any other operation which produces infrared radiation unless the protector has special markings that indicate that they are approved for these applications. These protectors are not shatterproof. Tinted lenses provide sunglare protection only. Do not use for simulated war games including paintball or laser tag. Not intended to protect against laser light. Not recommended for racket sports.
