

Reliable detection of difficult workpieces helps reduce line commissioning time and contributes to better facility "operation rates".

E3AS Series changes the “way of using” reflective photoelectric sensors

Production lines have become more advanced and complex, and skilled production workers are hard to come by. In order to increase equipment design flexibility and reduce sensor installation time, there is a growing need for reflective photoelectric sensors that require no receivers or reflectors. OMRON's E3AS Series offers new ways of using reflective photoelectric sensors to reduce line commissioning time and increases uptime,

TOF Laser Sensor

Antifouling coated sensing surface reduces false detections

Mass production

Antifouling coating on sensing surface ensures stable operation even in harsh environments P.8

Reliable detection of difficult workpieces reduces equipment design

When difficult-to-detect workpieces (curved, glossy, or casting surfaces) cannot be detected correctly, sensors need to be reselected or adjusted. The E3AS Series provides reliable detection with less effect of curved, glossy, or casting surfaces, reducing design and commissioning time.

E3AS-HL for workpieces with curved or irregular surfaces and glossy workpieces

Reliable detection of metal workpieces with curved or irregular surfaces

With spot beam, detection is unstable since the reflected light does not reach the sensor depending on the profile of the surface.

With the line beam of the E3AS-HL Sensor, detection is less affected by the profile of the surface since the reflected light reaches the sensor from any part of the surface. Glossy objects such as oily metal workpieces also hardly affect detection.

Reliable detection of various colored or glossy workpieces

Level differences between low-reflective thin workpieces and the background sometimes cannot be detected. E3AS-HL Sensors, hardly affected by material type or color, can detect level differences.

Detection is prone to be unstable because the sensing distance varies depending on the workpiece material and color. E3AS-HL Sensors, hardly affected by material type or color, requires no adjustment for each workpiece.

CMOS sensing with built-in lens alignment technology minimizes the influence of material properties

PATENT PENDING *1

From Material properties greatly affect the detection due to blurred received light spot on CMOS as a result of low position adjustment accuracy of the receiver lens.

To Material properties hardly affect the detection since the receiver lens position is automatically adjusted to the micrometer level to minimize the received light spot.

and commissioning time

E3AS-F for large workpieces with various colors or rough surfaces

Reliable detection of metal workpieces with rough surfaces

With spot beam, detection is unstable since the reflected light does not reach the sensor depending on the profile of the workpiece surface. With the large spot of the E3AS-F Sensor, detection is less affected by the surface roughness since the reflected light reaches the sensor.

Reliable detection of workpieces in various colors

Detection is prone to be unstable because the sensing distance varies depending on the workpiece color. E3AS-F Sensors using the TOF technology is less likely to be affected by changes in color, providing stable detection for different colored containers or engine blocks without changing the set distance.

TOF detects varying workpieces and measures distance

In the TOF (Time of Flight) method, the distance is measured based on the elapsed time instead of the amount of incident light received. Measurements therefore are not affected by changes in the color or material of the workpiece. This means that low-reflective workpieces, such as black rubber, can be detected from the same set distances.

*1. "PATENT PENDING" means that we applied for a patent in Japan. (As of September 2020)

Flexible installation saves design time

Sensor space limitations make equipment design and retrofit work complicated, resulting in time-consuming work. The E3AS Series can be installed in challenging locations, which reduces design and commissioning time.

E3AS-HL for inclined and close mounting

Install regardless of workpiece shape and angle

Curved surfaces of metal workpieces tend to affect detection, and it is time consuming to design the mounting angle. E3AS-HL Sensors can be mounted at a wide angle, making setup easy.

Curved surfaces of low-reflective workpieces tend to affect detection, and it is time consuming to design the mounting angle. E3AS-HL Sensors can be mounted at a wide angle, making setup easy.

Install in confined spaces or near lights

Interference with other sensors must be considered during design. E3AS-HL Sensors prevent mutual interference between up to 4 sensors, allowing close installation for applications like item identification from hole positions.

Effects of lights for cameras and sunlight must be considered during design. E3AS-HL Sensors can be operated under ambient illumination of 20,000 lx, which reaches the best in class level ^{*2}. This allows you to install the sensors in the vicinity of lights.

Sensing algorithm detects minimal reflected light from curved surface

Industry First ^{*1} **PATENT PENDING** ^{*2}

The E3AS-HL Sensor is the industry-first laser Class 1 CMOS laser sensor that comes equipped with an FPGA. It performs high-speed sampling of received light waveforms at 10,000 times per second and OMRON's unique accumulation processing, significantly increasing its sensitivity. It amplifies the slightest amount of light to reliably detect workpieces with glossy surfaces, complex shaped workpieces, black rubber, or other workpieces from which it is difficult to receive reflected light.

E3AS-F for long-distance sensing

Install reflective sensors instead of through-beam sensors

Reflective E3AS-F Sensors for long-distance sensing can be installed outside the working area, which is difficult with through-beam sensors. They use the TOF method to detect workpieces only and ignore workers.

Installation almost unaffected by background

Reflectors are required behind workpieces to avoid effects of the background.

The TOF method that measures distance based on the elapsed time is hardly affected by the background, making design easy.

More flexible mounting with flexible mounting bracket PATENT PENDING *2

Optical axis can be easily adjusted in three directions: vertical, horizontal, and angular. This bracket can be mounted to any photoelectric sensor with a 25.4 mm mounting hole pitch as well as the E3AS Sensors.

*1. The reference values were measured using the OMRON standard sensing object. *2. Based on OMRON investigation in September 2019.

*3. "PATENT PENDING" means that we applied for a patent in Japan. (As of September 2020) 7

No special safety measures required for Class 1 laser

The E3AS Series is classified as Class 1, so laser safety measures are not required.

Antifouling coating on sensing surface ensures stable operation even

When a sensor malfunction or breakage due to the environment causes a line stoppage during mass production, it can take a long time to restart. With the protected sensing surface, the E3AS Series helps minimize line downtime and maximize uptime.

Antifouling coating on sensing surface reduces false detection and cleaning frequency

Industry First *1 **PATENT PENDING** *2

A dirty sensing surface can cause false detection due to the principle of photoelectric sensors. The E3AS Series has an industry-first antifouling coating on the sensing surface which prevents soot and dust from sticking to the sensing surface and keeps the lens from fogging as well. This reduces false detection and sensing surface cleaning frequency.

Water

Cutting oil

Dust

Water vapor

Air blow unit enhances the effectiveness of antifouling coating

PATENT PENDING *2

Using an air blow unit greatly reduces the frequency of false detections since it prevents the sensing surface of sensors installed in confined, difficult to clean locations from becoming contaminated. It can be mounted to any photoelectric sensor with a 25.4 mm mounting hole pitch as well as the E3AS Sensors.

Can be mounted on either side of the sensor

Air inlet position can be inverted

in harsh environments

Front protection cover reduces sensor failures

Welding spatter on the sensing surface or collision during operation can cause a sensor failure, and the sensor sometimes need to be replaced. Mounting the front protection cover prevents sensor failures. When any problems occur with the front protection cover, just replace it. There is no need to replace the sensor and rewire it.

Unique case design reduces the frequency of replacements caused by failure

The sensor case is made of stainless steel (SUS316L). OMRON's unique laser welding technology for different materials enhances the sealing and adhesion between the stainless steel and resin. The laser welding technology for metals are used to weld the case and cover of the E3AS-F Sensor for secure sealing and adhesion between the stainless steel.

resistance

Laser welding technology for different materials PATENTED *2

It is a technology to weld different materials, resin and metal, using laser beams. Tiny holes are bored into the metal case, then the resin part is melted in by a laser for secure sealing and adhesion.

Laser welding technology for different metals TOF E3AS-F

The metal case and cover are welded by a laser beam to seal the gaps. This ensures higher airtightness compared to adhesives, keeping out water and oil to reduce failures.

*1. Based on OMRON investigation in September 2019.
*2. "PATENT PENDING" means that we applied for a patent in Japan, and "PATENTED" means that we obtained a patent in Japan. (As of September 2020)

OLED display and teaching enable easy, quick, and optimal setting

E3AS Sensors allow virtually anyone to set optimal settings on the easy-to-read OLED display using the teaching method. Moreover, easy-to-standardize operability makes remote instructions simple.

Easy-to-read, easy-to-understand OLED display

CMOS E3AS-HL

Displaying the threshold level and detected value on the same screen makes threshold level setting easy. In addition, wide viewing angle and display inverting allow on-site workers to easily see the display.

Detected value and threshold level at a glance

Detection display switching based on purpose

Bar display to grasp detection margin at a glance

ON/OFF display to easily check control output status

Easy-to-read setup menu display

Wide viewing angle allows reading from an angle

Invert display depending on sensor installation orientation

Inverting: Disabled

Inverting: Enabled

Single teach button prevents inconsistent settings

Easily and consistently set the optimal threshold level using the teach button.

Background teaching

Set the threshold level at a point before the background (reference surface).

Hold teach button

Two-point teaching

Set the threshold level at a value halfway between when a workpiece is present and when one is not.

Press the teach button each time with or without workpiece in place

Key locking

The key locking function prevents operation mistakes after setting.

Object teaching for easy setting to detect workpieces within specified range

CMOS E3AS-HL

Object teaching allows you to easily set upper and lower threshold levels just by holding the button. This teaching is ideal for presence detection of workpieces without the background or within the specified distance range.

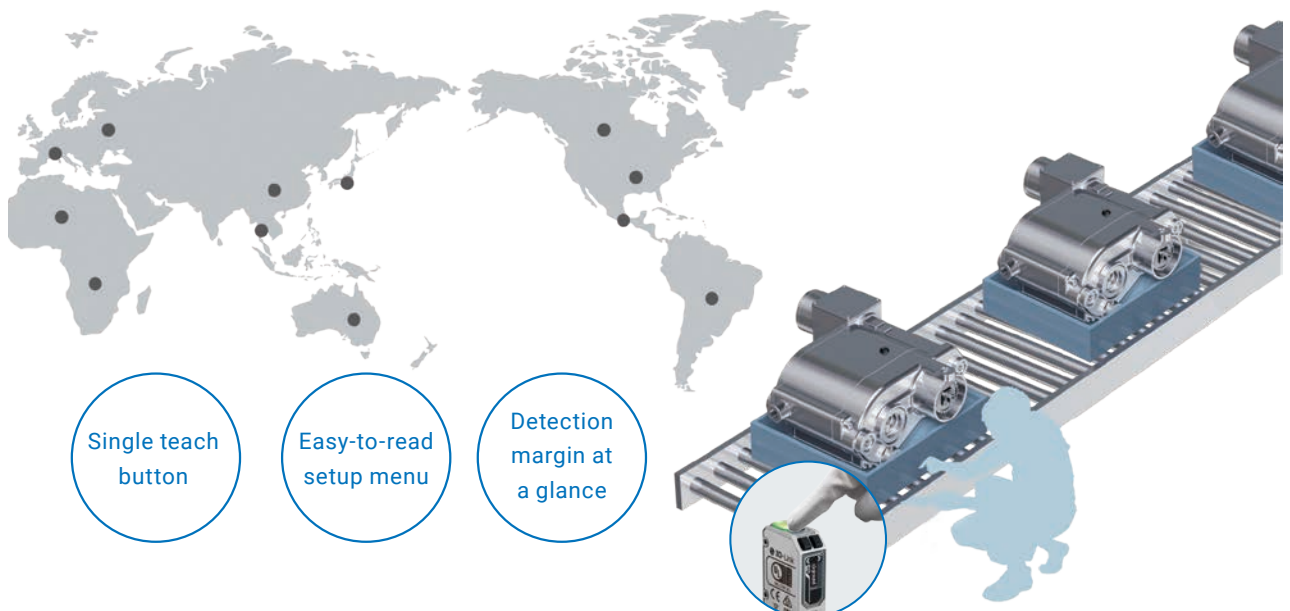

Just hold the button to set the threshold levels on the near and far sides of the workpiece position (reference position) at the same time. This teaching is used for presence detection of workpieces in the predetermined position.

Easy-to-standardize operations reduce commissioning time

When manufactures set up local production lines, the setup of sensors sometimes requires the experience and finesse of skilled workers and on-site instruction. The teaching method common to the E3AS Series enables you to standardize the operation procedures, facilitating remote instruction easier.

Line commissioning and maintenance with less people in less time with IO-Link

With IO-Link, reduce commissioning time by batch-setting the sensors and cut troubleshooting time during mass production by utilizing field data.

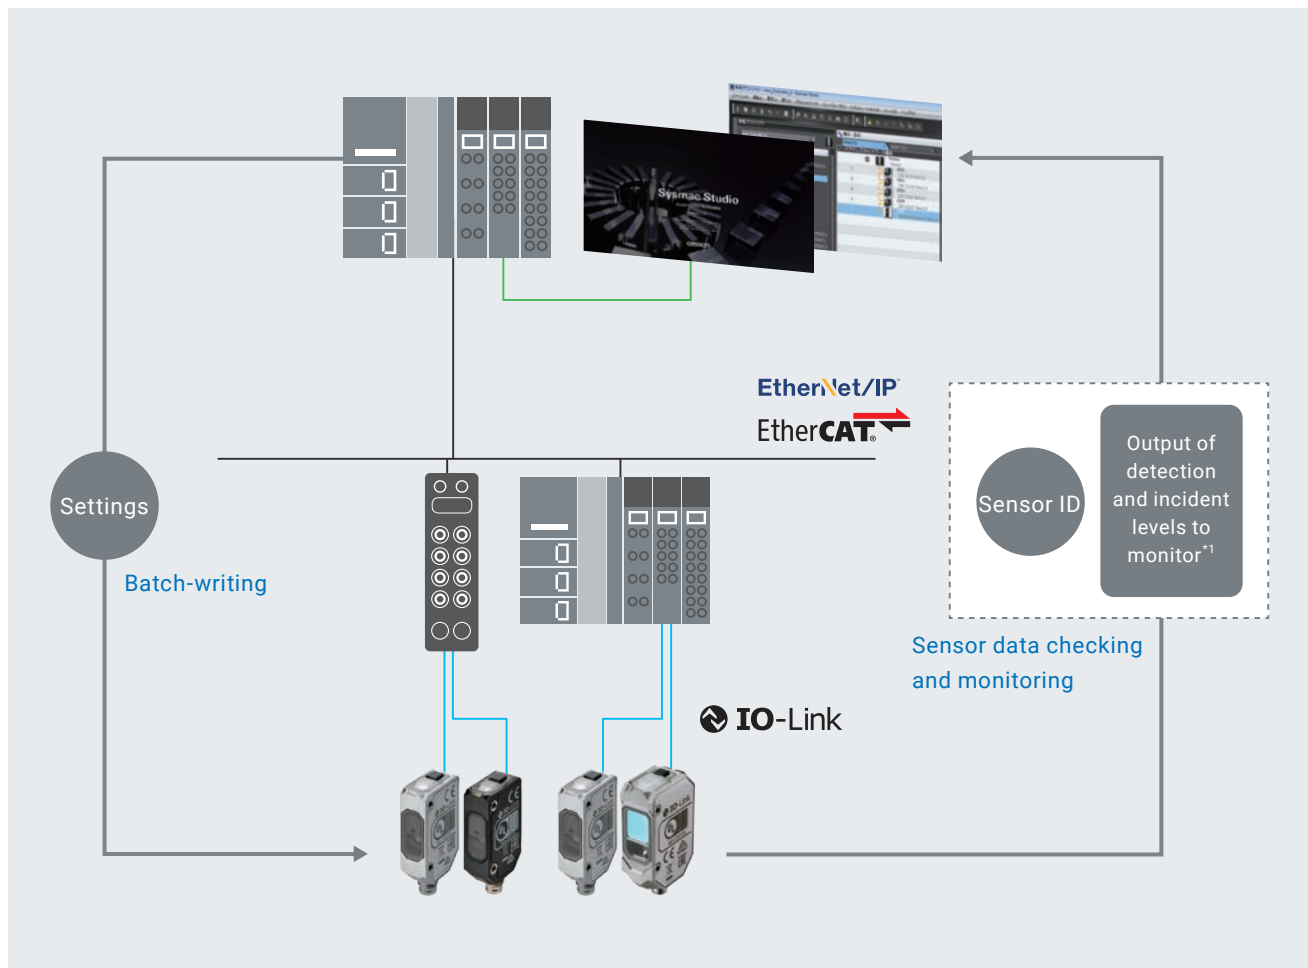

Reduce commissioning time by batch-writing settings from IO-Link device configuration tool

Setting information can be batch-written to thousands of sensors on a line, effectively reducing commissioning time and inconsistent settings.

Predictive monitoring and quick recovery by checking and monitoring sensor data

The monitor shows light intensity decrease due to sensing surface contamination or other reason, allowing users to take proactive actions to prevent potential false detections. This reduces the frequency of unexpected failures.

Model lineup

	E3AS-HL		E3AS-F	
Appearance				
Case	SUS316L		SUS316L	PBT/PC
Sensing distance	35 to 500 mm 35 to 150 mm		50 to 1500 mm 50 to 1000 mm	50 to 1500 mm 50 to 1000 mm
Standard detectable difference (mm)/ differential travel (%)	35 to 50 mm: 1 mm 50 to 100 mm: 2 mm 100 to 150 mm: 4 mm (E3AS-HL150: When response time is 10 ms)		15% max.	15% max.

Antifouling coating	✓		✓	✓
Mutual interference prevention function	Up to 4 units		—	—
Degree of protection	IP67/69K/67G/Ecolab			

Short-distance sensing models also available
OMRON's unique light emitting element for stable detection of workpieces with low reflectivity

Distance-settable Photoelectric Sensors E3AS-L
Sensing range: 10 to 80 mm/10 to 200 mm

Accessories enhance sensor usability

The E3AS Series comes with a lineup of accessories that shorten sensor adjustment time upon commissioning and reduce the frequency of false detections during production. They can be used with non-E3AS sensors with a standard mounting hole pitch of 25.4 mm as well.

PATENT PENDING *2

Flexible Mounting Bracket

Optical axis can be adjusted in three directions: vertical, horizontal, and angular.

PATENT PENDING *2

Air Blow Unit

Blows soot and dust off the sensing surface.

Front Protection Cover^{*3}

Protects the sensing surface from welding spatter and collisions with robot arms.

*1. E3AS-HL and E3AS-F only *2. "PATENT PENDING" means that we applied for a patent in Japan. (As of September 2020)

*3. E3AS-HL only. Note: For details on ratings and specifications, refer to the *Ratings and Specifications* in this catalog.

Applications and target workpieces

For workpieces with curved or irregular surfaces and Low-reflective, glossy workpieces
CMOS Laser Sensor E3AS-HL

Presence detection of crankshafts

Presence detection of needle bearings

Presence detection of hoods

Parts identification using hole positions

Presence detection of interior decoration parts

Presence detection of pins

Presence detection of tires before building

Presence detection of green tires

For large workpieces in various colors or with rough surfaces

TOF Laser Sensor E3AS-F

Presence detection of engine blocks

Presence detection of pallets

Presence detection of parts

Reliable operation even in harsh environments such as soot and dust

Environment with oily smoke and dust

Antifouling coating

Cutting oil

Antifouling coating

Dust

Environment with welding spatter scatters

Reduce cost by replacing only the dirty cover

Distance-settable Photoelectric Sensors

E3AS Series

E3AS Series changes the “way of using” reflective photoelectric sensors

- Complete lineup of photoelectric sensors for various applications
- Teaching method allows anyone to set optimal threshold values
- Antifouling coating prevents contamination on the sensing surface
- Ecolab certified in addition to IP67/69K/67G protection
- All models with IO-Link connectivity (NPN type excluded)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

E3AS Series

Accessories (Sold Separately)

Sensor I/O Connectors (Sockets on One Cable End)

(Models for Connectors / Pre-wired Connectors)

A Sensor I/O Connector is not provided with the Sensor. It must be ordered separately as required.

Round Water-resistant Connectors XS3F-M8 series

Appearance	Cable specification	Cable diameter (mm)	Cable connection direction	Cable length (m)	Sensor I/O Connector model number
M8 Connector Straight type  Right-angle type 	PVC cable	5 dia.	Straight	2	XS3F-M421-402-R
				5	XS3F-M421-405-R
			Right-angle	2	XS3F-M422-402-R
				5	XS3F-M422-405-R

Note: 1. The XS3W (Socket and Plug on Cable Ends) is also available. Refer to *XS3 Series Datasheet* (Cat. No. G147).

2. The connectors will not rotate after they are connected.

3. The cable is fixed at an angle of 180° from the sensor emitter/receiver surface.

Round Water-resistant Connectors XS5 series

Appearance	Cable specification	Cable diameter (mm)	Cable connection direction	Cable length (m)	Sensor I/O Connector model number
M12 Smartclick Connector Straight type  Right-angle type 	PVC robot cable	6 dia.	Straight	2	XS5F-D421-D80-F
				5	XS5F-D421-G80-F
			Right-angle	2	XS5F-D422-D80-F
				5	XS5F-D422-G80-F

Note: 1. The XS5W (Socket and Plug on Cable Ends) is also available. Refer to *XS5* on your OMRON website for details.

2. The connectors will not rotate after they are connected.

3. The cable is fixed at an angle of 180° from the sensor emitter/receiver surface.

Mounting Brackets

A Mounting Bracket is not enclosed with the Sensor. Order a Mounting Bracket separately if required.

For E3AS-HL series [Refer to *Dimensions* on page 43]

Appearance	Model (material)	Pre-wired	M12 Pre-wired Smartclick Connector	M8 Connector
L-shaped Mounting Bracket 	E39-L221 (SUS304)	Yes	Yes	---
Horizontal Protective Cover Bracket 	E39-L222 (SUS304)	Yes	Yes	---
Rear Mounting Bracket 	E39-L223 (SUS304)	Yes	Yes	Yes *2
Robust Mounting Bracket 	E39-L224 (SUS304)	Yes	Yes	---

Threshold setting method		Teaching method / Manual Operations / IO-Link communications					
Mutual interference prevention		4 units max. (when using the mutual interference prevention function)					
Ambient illumination		Receiver surface illuminance: Incandescent lamp: 20,000 lx max., Sunlight: 25,000 lx max. at distance of 250 mm Incandescent lamp: 5,000 lx max., Sunlight: 10,000 lx max. at distance of 500 mm				Receiver surface illuminance: Incandescent lamp: 8,000 lx max., Sunlight: 16,000 lx max.	

*1. Measured with OMRON's standard workpiece (White ceramic).

*2. Defined by D4σ method at the maximum sensing distance. Detection may be influenced if there is light leakage outside the defined region and the surroundings of the target object have a high reflectance in comparison to the target object. Also, when detecting a workpiece that is smaller than the spot size, a correct value may not be obtained.

E3AS-F models

Item	Model	Sensing method		TOF (Time of flight)	
		Type		Metal case (□: M), Plastic case (□: P)	
		NPN output	PNP output/ COM3	E3AS-F1500I□N	E3AS-F1000I□N
				E3AS-F1500I□T	E3AS-F1000I□T
Sensing distance		50 mm to the set distance (White paper or black paper 200 × 200 mm)		50 mm to the set distance (White paper or black paper 200 × 200 mm)	
Setting range		100 to 1,500 mm (White paper 200 × 200 mm) 100 to 1,000 mm (Black paper 200 × 200 mm)		100 to 1,000 mm (White paper 200 × 200 mm) 100 to 500 mm (Black paper 200 × 200 mm)	
Spot diameter (reference value)		95 mm dia. (at distance of 1,000 mm)			
Differential travel		15% max. of set distance (Set distance 200 mm min.)			
Reflectivity characteristic (black/white error)		10% max. of set distance (Set distance 200 mm min.)			
Light source (wavelength)		Infrared laser (940 nm) Class1 (IEC/EN60825-1:2014)			
Power supply voltage		10 to 30 VDC (including 10% ripple (p-p)), Class2			
Current consumption		30 mA max.			
Input/ output	Control output		Load power supply voltage: 30 VDC max., Class2, Load current: 100 mA max. (Residual voltage: Load current of less than 10 mA: 1 V max. Load current of 10 to 100 mA: 2 V max.) Open-collector output (NPN/PNP output depending on model)		
	NPN		OUTPUT 1: NO (Normally open), OUTPUT 2: NC (Normally closed)		
	PNP/COM3		OUTPUT 1: NO (Normally open)/COM□, OUTPUT 2: NC (Normally closed)		
Response time		Operate or reset: 150 ms max.		Operate or reset: 90 ms max.	
Threshold setting method		Teaching method/IO-Link communications			
Ambient illumination		Incandescent lamp: 3,000 lx max., Sunlight: 10,000 lx max.			

E3AS-L models

	Model	NPN Output	E3AS-L200MN	E3AS-L80MN
		PNP Output/COM3	E3AS-L200MT	E3AS-L80MT
Sensing distance		10 mm to the set distance (White paper or black paper 100 × 100 mm)		
Setting range		40 to 200 mm (White paper or black paper 100 × 100 mm)		20 to 80 mm (White paper or black paper 100 × 100 mm)
Spot diameter (reference value)		25 × 25 mm at distance of 200 mm		4 mm dia. (at distance of 80 mm)
Differential travel		10% max. of set distance		White paper: 2% max. of set distance Black paper: 5% max. of set distance
Reflectivity characteristic (black/white error)		10% max. of set distance		5% max. of set distance
Light source (wavelength)		Red LED (624 nm)		Red LED (650 nm)
Power supply voltage		10 to 30 VDC (including 10% ripple (p-p)), Class2		
Current consumption		35 mA max.		
Input/output	Control output		Load power supply voltage: 30 VDC max., Class2, Load current: 100 mA max. (Residual voltage: Load current of less than 10 mA: 1 V max. Load current of 10 to 100 mA: 2 V max.) Open-collector output (NPN/PNP output depending on model)	
	NPN		OUTPUT 1: NO (Normally open), OUTPUT 2: NC (Normally closed)	
	PNP/COM3		OUTPUT 1: NO (Normally open)/COM□, OUTPUT 2: NC (Normally closed)	
Response time		Operate or reset: 1 ms max.		
Threshold setting method		Teaching method/IO-Link communications		
Ambient illumination		Incandescent lamp: 3,000 lx max., Sunlight: 10,000 lx max.		

Common to E3AS series

Series	E3AS-HL	E3AS-F	E3AS-L	
Protection circuits	Power supply reverse polarity protection, Output short-circuit protection, and Output reverse polarity protection			
Ambient temperature range	Operating: -10 to 50°C, Storage: -25 to 70°C (with no icing or condensation)	Operating: -20 to 55°C, Storage: -40 to 70°C (with no icing or condensation)	Operating: -25 to 55°C, Storage: -40 to 70°C (with no icing or condensation)	
Ambient humidity range	Operating: 35% to 85%, Storage: 35% to 95% (with no condensation)			
Insulation resistance	20 MΩ min. at 500 VDC			
Dielectric strength	1,000 VAC, 50/60 Hz for 1 min			
Vibration resistance	10 to 55 Hz with a 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions			
Shock resistance	500 m/s ² for 3 times each in X, Y, and Z directions			
Degree of protection	IP67 (IEC60529) and IP67G *1 (JIS C 0920 Annex 1), IP69K (ISO20653)			
Indicators	OLED Display (White), Power/Communication indicator (Green*), Operation indicator (Orange) * IO-Link Communication mode: blinking	Operation indicator (orange), Stability & Communication indicator (green*) * IO-Link Communication mode: blinking		
Connection method	Pre-wired (standard cable length: 2 m), M8 Connector, M12 Pre-wired Smartclick Connector (standard cable length: 0.3m)			
Weight (packed state/Sensor only)	Pre-wired (2 m)	Approx. 180 g/approx. 110 g	Metal case type: Approx. 135 g/approx. 90 g Plastic case type: Approx. 115 g/approx. 70 g	Approx. 135 g/approx. 90 g
	M8 Connector	Approx. 120 g/approx. 50 g	Metal case type: Approx. 75 g/approx. 30 g Plastic case type: Approx. 60 g/approx. 15 g	Approx. 75 g/approx. 30 g
	M12 Pre-wired Smartclick Connector (0.3m)	Approx. 150 g/approx. 80 g	Metal case type: Approx. 95 g/approx. 50 g Plastic case type: Approx. 75 g/approx. 30 g	Approx. 95 g/approx. 50 g
Materials	Case	Stainless steel (SUS316L)	Metal case type: Main unit/mounting part/connector part Stainless steel (SUS316L) Plastic case type: Main unit Polybutylene terephthalate (PBT) / polycarbonate (PC), Mounting part/connector part Nickel-plated brass	Stainless steel (SUS316L)
	Lens cover and Display	Methacrylic resin (PMMA) (Lens cover: Antifouling coating)		
	Indicator	Polyamide 11 (PA11)	Metal case type: Polyamide 11 (PA11) Plastic case type: Polyethersulfone (PES)	Polyamide 11 (PA11)
Main IO-Link functions	Operation mode switching between NO and NC, execution of teaching (2-point teaching, Background teaching), setup of the threshold, timer function of the control output and timer time selecting, Restore Factory Settings, Key Lock (Unlock, Lock, Lock (No Button)), monitor output* (Detection level, Incident light level) * Only for E3AS-HL and E3AS-F			
IO-Link Communication specifications	IO-Link specification	Ver. 1.1		
	Baud rate	COM3 (230.4 kbps)		
	Data length	PD size: 4 bytes, OD size: 1 byte (M-sequence type: TYPE_2_V)	PD size: 1 byte, OD size: 1 byte (M-sequence type: TYPE_2_1)	
	Minimum cycle time	COM3: 1.2 ms		
Accessories	Instruction manual, compliance sheet, index list (attached for IO-Link type only) E3AS-HL: FDA certification label and Warning label E3AS-F: FDA certification label Note: Mounting Brackets must be ordered separately.			

*1. The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards).

The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.

Safety Precautions

Be sure to read the precautions for all models in the website at: <http://www.ia.omron.com/>.

Warning Indications

 WARNING	Warning level Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.
 CAUTION	Caution level Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury or in property damage.
Precautions for Safe Use	Supplementary comments on what to do or avoid doing, to use the product safely.
Precautions for Correct Use	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.

Meaning of Product Safety Symbols

	General prohibition Indicates the instructions of unspecified prohibited action
	Caution, fire Indicates the possibility of fires under specific conditions.
	General caution Indicates unspecified general alert.
	Caution, explosion Indicates the possibility of explosion under specific conditions
	Laser Caution Indicates information related to laser safety
	Disassembly prohibited Prohibit the disassembly of a device because of the possibility of injuries due to electric shock.

WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes. 

Do not use it exceeding the rated voltage. There is a possibility of failure and fire. 

CAUTION

Its component may be damaged and/or degree of protection may be degraded. Please do not apply high pressure water intensively at one place during cleaning. 

Never use the product with an AC power supply. Otherwise, explosion may result. 

E3AS-HL and E3AS-F models

To safely use laser products

WARNING

Do not expose your eyes to the laser beam either directly or indirectly (i.e., after reflection from a mirror or shiny surface). The laser beam has a high power density and exposure may result in loss of sight. 

Do not disassemble this product. Doing so may cause exposure to the built-in light source which can damage eyes and skin. Never disassemble it. 

Laser safety measures for laser equipment are stipulated by the country of use. Follow the instructions described below categorized in four cases.

1. Usage in Japan

The JIS C6802:2014 standard stipulates the safety precautions that users must take according to the class of the laser product. This product is classified into class 1 defined by this standard.

2. Usage in U.S.

This product is subjected to the U.S. FDA (Food and Drug Administration) laser regulations. This product is classified into Class 1 by the IEC 60825-1:2014 standard according to the regulations of Laser Notice No.56 of the FDA standard. This product is already reported to CDRH (Center for Devices and Radiological Health).

Accession Number: 1920014-001

When using a device equipped with the product in the U.S., attach an FDA certification label near the sensor mounted on customer equipment.

FDA certification label

This laser product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007
OMRON Corporation
Shikokji Horikawa, Shimogyo-ku,
Kyoto 600-8530 JAPAN
Place of manufacture:
Shanghai Factory, OMRON Corp.
Manufactured in

3. Usage in China

This product is classified into Class 2 by the GB7247.1:2012 (IEC60825-1:2007) standard.

When using a device equipped with the product in China, attach a Warning label near the sensor mounted on customer equipment.

Warning label

4. Usage in countries other than U.S. and China

This product is classified into Class 1 by the IEC/EN 60825-1:2014 standard.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

1. Do not reverse the power supply connection or connect to an AC current.
2. Do not short the load.
3. Be sure that before making supply the supply voltage is less than the maximum rated supply voltage (30 VDC).
4. Do not use the product in environments subject to flammable or explosive gases.
5. Do not use the product under a chemical or an oil environment without prior evaluation.
6. Do not attempt to modify the product.
7. Do not touch the metal surface with your bare hands when the temperature is low. Touching the surface may result in a cold burn.
8. Burn injury may occur. The product surface temperature rises depending on application conditions, such as the ambient temperature and the power supply voltage. Attention must be paid during operation or cleaning.

Precautions for Correct Use

1. Do not hit the product using a hammer for installation.
2. The product must be installed with the specified torque or less. For M8 connector, the proper tightening torque is from 0.3 to 0.4 N·m. In case of M12 smartclick connector, manually tighten the connector.
3. Tightening torque for the mounting hole is 0.6 N·m or less (M3 screw).
4. Do not use the product in any atmosphere or environment that exceeds the ratings.
5. Output pulses may occur when the power supply is turned OFF. We recommend that you turn OFF the power supply to the load or load line first.
6. Use an extension cable less than 100 m long for Standard I/O mode and less than 20 m for IO-Link Communication mode.
7. Do not pull on the cable with excessive strength.
8. Be sure to turn off the power supply when connecting or disconnecting the cable.
9. Please wait for at least 600 ms (E3AS-HL), 500 ms (E3AS-F), 100 ms (E3AS-L) after turning on the product's power until it is available for use.
10. Though this is type IP67, do not use in the water, rain or outdoors.
11. If the Sensor wiring is placed in the same conduits or ducts as high-voltage or high-power lines, inductive noise may cause malfunction or damage. Wire the cables separately or use a shielded cable.
12. Do not use the product in locations subject to direct sunlight.
13. Do not use the product where humidity is high and dew condensation may occur.
14. Do not use the product where corrosive gases may exist.
15. If high-pressure washing water and so on hits the button, it might lead to malfunctioning. So, consider use of the key lock function.
16. Do not apply high-pressure washing water directly to the sensor's light emitting / receiving surface from a short distance. As the antifouling feature may be impaired, keep a sufficient distance from the light emitting / receiving surface.
17. Do not use the product at a location subject to shock or vibration.
18. To use a commercially available switching regulator, FG (frame ground) must be grounded.
19. Do not use organic solvents (e.g. paint thinner and alcohol) for cleaning. Otherwise optical properties and protective structure may deteriorate.
20. Be sure to check the influence caused by surrounding environments such as background objects and LED lighting before using the product.
21. Do not exceed 100,000 writing operations of the EEPROM (non-volatile memory). Setting information is written to the EEPROM when a threshold value change, teaching, or zero reset is executed.
22.  Please dispose in accordance with applicable regulations.

Accessories (Sold Separately)

Mounting Brackets

For E3AS-HL models

E39-L221

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L222

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L223

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E3AS Series

E39-L224

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories
2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L231

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories
2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L232

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L234

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E3AS Series

E39-E19

Photoelectric Sensor
Accessory are installed
(Example of E3AS-HL500□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L10 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

For E3AS-F/L models

E39-L201

Photoelectric Sensor
Accessory are installed
(Example of E3AS-L200□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L12 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L202

Photoelectric Sensor
Accessory are installed
(Example of E3AS-L200□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L12 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

E39-L203

Photoelectric Sensor
Accessory are installed
(Example of E3AS-L200□)

Material: Stainless steel (SUS304)

* Accessories

2-M3-L12 Cross Recessed Pan Head Screws (Attached to SW+JIS W)

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
