## Tork Cleaning Cloth

W1 - Wipers wall/floor /standard system, W2 - Wipers combi roll system, W3 - Wiper pak system

Article	510137
System	W1 - Wipers wall/floor /standard system, W2 - Wipers combi roll system, W3 - Wiper pak system
Colour	White
Core inside diameter	7.1 cm
Embossing	No
Number of sheets	400
Ply	1
Print	No
Roll diameter	25 cm
Roll length	152 m
Roll width	31.5 cm
Sheet length	38 cm

The multipurpose Tork Cleaning Cloth is soft and flexible, yet strong. It is ideal for most lighter cleaning tasks, and quickly absorbs both oils and liquids, which makes your cleaning efforts easier. This cloth can be used in either the Tork Floor or Wall Stand dispensers, which are developed for safety, efficiency and reliability or the Tork Maxi Centerfeed or Boxed Combi Roll Dispenser, which are designed for smoother single hand dispensing.

### Key benefits:

- Excellent oil and water absorption, easily lifts grease and grime
- Compatible with most chemical solvents: Picks up and releases solvents more efficiently than textile products thereby reducing consumption
- Reusable, strong, durable wipe - excellent rental towel and rag replacement

## Environmental

### Tork exelCLEAN® cloths

This product does not contain any silicone.

Cellulose Pulp  
Polyester  
Polypropylene  
Functional agents or additives

### Raw materials

#### Cellulose Pulp

Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

#### Polyester

Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibers are then cut to intended fiber length.

#### Polypropylene

Polypropylene or polypropene is a thermoplastic polymer made from oil. The molten resin is spun to endless fibres through spinnerets and cooled by air. The fibres form a web.

#### Functional agents and additives

Functional additives could be wet strength agent, antistatic agent and wetting additives/tensides.

#### Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

#### Packaging

Fulfillment of Packaging and Packaging Waste Directive (94/62/EC): Yes

#### Article creation date and latest article revision

Date of issue: 04-06-2021  
Revision date: 25-08-2022

#### Production

This product is produced at SUAMEER mill, NL and certified according to ISO 9001 and ISO 14001 (Environmental management systems).

#### Disposal/destruction of used product

This product is mainly used for industrial processes. When used in industrial processes the product might through use be contaminated with different substances. This will determine how the used product will be handled/disposed of/destroyed. The product itself is suitable for incineration. If used in industrial processes contact local authorities before destruction.
