Air performance measured as per: ISO 5801, Installation category A, without accidental contact. Noise: Total sound power level L<sub>W</sub>A ISO 103002 measured on half-sphere of 2 m; Sound pressure level  $L_pA$  measured at 1 m distance to fan axis. The acoustic values are only valid for the described measurement

set-up and may vary depending on the installation situation. In case of any deviation to the standard setup, the values have to be checked and reviewed once installed or fitted. For detailed information see http://www.ebmpapst.com/general conditions
