

SERIES: VMS-300A | **DESCRIPTION:** AC-DC POWER SUPPLY**FEATURES**

- up to 300W continuous power
- universal input voltage range
- industry standard 3" x 5" footprint
- power factor correction
- remote voltage sense & on/off control
- fan & 5 Vdc aux outputs
- covered and open-frame configurations
- over voltage, over current, over temperature, and short circuit protections
- medical 60601-1 (4th edition) safety approvals
- designed for 2 x MOPP applications
- efficiency up to 94%

Notes:

1. Maximum output power of 300 W (5 W for Vstb) with 10 CFM forced air, 200 W (3 W for Vstb) with convection cooling.
2. At full load, nominal input, 20 MHz bandwidth oscilloscope, output terminated with 10 μ F electrolytic and 0.1 μ F ceramic capacitors.
3. At full load, 25°C, 230 Vac input.
4. Standby output voltage. Present on all models.
5. All specifications are measured at $T_a=25^\circ\text{C}$, 230 Vac input voltage, and 60% rated output load unless otherwise specified.

INSTALLATION INSRUCTIONS

The VMS-300A series has (4) 4 mm diameter mounting holes that can be used in (3) types of installations.

Type 1

Mounting from top with spacers (required to meet vibration specifications)

Spacer: 4 mm diameter max, 8 mm high minimum

Screw Size: (4) M3X0.5

Mounting torque: 3 kgf-cm

Type 2

Mounting from top without spacers

Screw Size: (4) M3X0.5

Mounting torque: 3 kgf-cm

Type 3

Mounting from bottom

Screw Size: (4) M4X0.7

Mounting torque: 7 kgf-cm

Output Terminals

Mate with round or Y terminals with max OD of 6.75 mm and max ID of 3.9 mm

Terminal Size: (2) M3

Torque: 3 kgf-cm

Mounting Clearance

Allow at least 4 mm side clearance and 5 mm height clearance. If clearances aren't met, the isolation and withstand specifications may not be met.

Field Ground

Should be connected to the earth (ground) terminal of the apparatus otherwise conducted noise and output noise will increase.

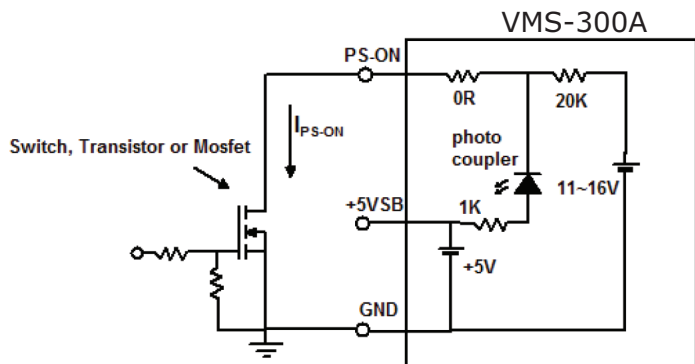

APPLICATION NOTES

On/off Remote Control

A PS On/Off remote control is provided in CN4. See Figure 1 for the PS-ON diagram and control function.

Figure 1

Note: Power on: $V_{PS-ON} \leq 2V$, $I_{PS-ON} \geq 2\text{ mA}$
 (PS-ON and GND short, $I_{PS-ON} = 4.5\text{ mA}$ typical)
 Power off: Open circuit, $V_{PS-ON} = 11\sim 16\text{ V}$
 When the PS On/off remote control function is not used, connect a short circuit between the PS-ON control & the signal GND.

Output Remote Sensing

The VMS-300A series can remotely sense both lines of the output. The feature moves the effective voltage regulation point from the output of the unit to the point of connection of the remote sense pins. This feature automatically adjusts the real output in order to compensate for voltage drops in distribution and maintain a regulated voltage at the point of load. The remote sense voltage range is as follows:

$$[(+V_{out}) - (-V_{out})] - [(+Sense) - (-Sense)] \leq 10\% V_{o_nominal}$$

If the remote sense is not used, the sense pins should be connected locally to the respective Vout pins. The remote sense pins are located on CN5.
