

PIC24FJ256GB410 Plug-In Module (PIM) Information Sheet

Overview

The PIC24FJ256GB410 Plug-in Module is designed to demonstrate the capabilities of the PIC24FJ256GB410 family using the Explorer 16 and LCD Explorer Demonstration Boards. Most of the pins from the device are mapped directly to the PIM connector (100-Pin ICE). The exceptions are those pins that are remapped to provide remappable functionality to the pins in the PICtail™ Plus socket. [Table 1](#) below shows the exceptions of the PIC24FJ256GB410 pins that are not directly connected to the ICE connector.

Pin Mapping

There are several device pins that don't have a one-to-one connection to the ICE connector. Some are hard-wired to a certain location, while others are mapped to the connector through jumpers.

[Table 1](#) summarizes the device pins that don't have one-to-one connections.

Jumpers

[Table 2](#) is the jumper table on the silkscreen of the PIM. This table uses schematic net names rather than the fill pin function.
