

## Plastic and Multilayer Tube Cutters

- | For cutting compound tubes and flexible protective tubes
- | Improved cutting geometry for simple cutting and higher operating times
- | Opening of the blade in each position possible
- | With tool-free quick-change system of the blade
- | With optimum leverage for easy and effortless work
- | Made of magnesium die casting, very light and robust
- | , tempered and coated

SKU: 397-35

### Safety Notes

Use tools for indicated purposes only.  
Before using the cutting tools please wear body protection such as safety mask, safety glasses and hand protection.  
Beware of wire ends flying off!

## General Information

### Plastic Pipe and Hose Cutters

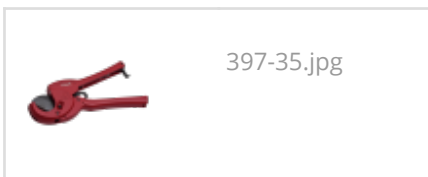

The optimised geometrical shape of the cutters enables distortion-free cuts through plastic pipes and hoses. This is not just due to the shape of the cutting edges - the transmission of muscle force to the cutters is crucial.

### Connecting to the future

Solar energy is a clean alternative source of electricity. To make sure it is also a safe source, junction box and switch cabinet wiring has to be properly stripped, crimped and connected up. Using NWS wire stripping and crimping tools, electricians can handle wires and cables in line with all the applicable regulations and down to the millimetre. In this way, whether private houses, factory roofs or photovoltaic installations, they all become clean and safe players in the transition to renewable energy sources.
