

### SP0504S Series 0.85pF Diode Array

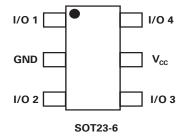

### **Description**

The SP0504S integrates low capacitance rail-to-rail diodes with an integrated proprietary avalanche breakdown diode that protects applications against ESD, EFT and low surge events. This component is rated for the maximum IEC 61000-4-2 ESD (level 4) contact and air discharge events. Their very low off-state capacitance also makes them ideal for protecting high speed signal pins such as HDMI, DVI, USB2.0, and IEEE 1394.

### Application Example

A single 4 channel SP0504S component can be used to protect four of the data lines in a HDMI/DVI interface. Two (2) SP0504S components provide protection for the main data lines. Low voltage ASIC HDMI/DVI drivers can also be protected with the SP0504S, the  $+V_{cc}$  pins on the SP0504S can be substituted with a suitable bypass capacitor or in some backdrive applications the  $+V_{cc}$  of the SP0504S can be floated or NC.
