

## Roll Control Core and sheet width harmonisation

WYPALL\* L Wipers provide the ideal solution for mopping up spills, cleaning hands and wiping surfaces. Our unique AIRFLEX\* Fabric structure provides superior strength and absorption.

Our Roll Control systems offer hygienic, single sheet dispensing ideal for both your light and medium duty tasks. Harmonising our roll core and sheet width provides many additional benefits to all.

### What has Changed?

Core sheet and width harmonisation:

- **Core diameter**  
Reduced core diameter moving from 76 to 60mm
- **Roll height/Sheet width**  
Sheet width moving from 206 to 185mm
- **Roll length & Sheet count**  
Increased roll length and more sheets per roll improves utility
- **Dispensing Performance**  
The dispensing performance remains unchanged

**WYPALL**  
BRAND

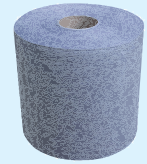

## End User benefits

- Better cost per metre
- Less frequent dispenser refill
- Less storage space required
- Same level of utility

## Distributor benefits

- Significantly more length per case
- Less pallets required
- Lower distribution costs and less storage space required

## Our Dispensing systems are still available

### Centrefeed Roll / Roll Control System

#### Hygienic, single sheet dispensing, ideal for food areas

- Patented roll design eliminates waste often caused by wiper streaming, saving you money
- Easy, quick front loading and hygienic wipe clean surface that complies with HACCP
- Giving added assurance in busy food areas
