## Description

Littelfuse's highly reliable CG/CG2 Series GDTs provide a high degree of surge protection in a small size ideal for board level circuit protection.

GDTs function as switches which dissipate a minimum amount of energy and therefore handle currents that far surpass other types of transient voltage protection. Their gas-filled, rugged ceramic metal construction make them well suited to adverse environments.

The CG/CG2 series comes in a variety of forms including surface mount, core, straight and shaped leads, to serve a variety of mounting methods.

The CG Series $(75 \mathrm{~V}-110 \mathrm{~V})$ is ideal for protection of test and communication equipment and other devices in which low voltage limits and extremely low arc voltages are required.

The CG2 Series ( $145 \mathrm{~V}-1000 \mathrm{~V}$ ) is ideal for protecting equipment where higher voltage limits and holdover voltages are necessary.

## Features

- RoHS and Lead-free compliant
- Rugged Ceramic-Metal construction
- Low Capacitance (<1.5pf)

## Applications

- Communication lines and equipment
- CATV equipment
- Test equipment
- Data lines
- Power supplies
- Meets REA PE-80
- Available in surface mount, and a variety of lead options options
- RoHS Compliant and Lead-Free
- Instrumentation circuits
- Medical electronics
- ADSL equipment
- Telecom SLIC protection

## Examples:

CG75 -- A non-leaded 75 V device
CG2230L -- A leaded 230V device
CG2800LTR -- A leaded 800V device, tape-and-reel (per EIA standard RS-296-D)

## Notes:

CG/CG2 devices with other breakdown voltages in the 75-1000 V range are available upon request.

## Option Code*

SN = may have different DC Breakover Voltage Limit. Please refer to Electrical Characteristics table for additional information.

## Packaging Option Code

(Blank) $=$ No Leads / Core, Bulk Bag - 400 pcs
L (Blank) $=$ Straight Lead, Tray -50 pcs
LTR = Straight Lead, Tape \& Reel per EIA RS-296-E - 500 per reel
LS(Blank) $=$ Shaped Lead (see LS dimensions), Tape \& Reel - 500 per reel
