

The following Safety Data Sheet (SDS) refers to the ink (in bulk form) that is contained within the pen, and not to the pen itself.

According to the REACH Regulation, ordinary writing and marker pens are defined as 'articles' and therefore do not require Safety Data Sheets.

The regulatory definition of an 'article' is:

An object which during production is given a special shape, surface or design, which determines its function to a greater degree than does its chemical composition.
