## 600W Transient Voltage Suppressor

## FEATURES

- Glass passivated junction
- 600W peak pulse power capability on 10/1000 us waveform
- Excellent clamping capability
- Low-Incremental surge resistance
- Fast response time: Typically less than 1.0 ps from 0 V to BV minimum for unidirectional and 5.0 ns for bidirectional
- Typical $I_{R}$ less than $1 \mu \mathrm{~A}$ above 10 V
- UL certificate \#E258596

## SMB/DO-214AA

Band denotes cathode on unidirectional devices only. No band on bi-directional devices. Bi-directional types have CA suffix where electrical chatacteristics apply in both directions suitable for bi-directional applications.

## ABSOLUTE MAXIMUM RATINGS

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only. Values are at $\mathrm{TA}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise noted.
