

Part Number: DFR0094

Description: Gravity: Digital IR Receiver Module

INTRODUCTION

Infrared devices are widely used, and often for remote controlled devices. With this IR receiver, your Arduino project is now able to receive command from any IR remote controller.

Well, it will be also easy to make your own IR controller using IR transmitter.

SPECIFICATION

- Power Supply:5V
- Interface:Digital
- Modulate Frequency:38Khz

SHIPPING LIST

- Digital IR Receiver Module(Arduino Compatible) x1
- Digital Cable
