AUTOMATE™

Enhanced Mini-FAKRA Automotive Connector Series

TYPE A

Overview

The AUTOMATE® Mini-FAKRA connector series, the latest in automotive interconnect technology, is a space-conscious, high-performance interface central to the next generation of vehicle applications. Supporting up to 20 Gbps data transmission, AUTOMATE connectors reduce installation space requirements by up to 80% compared to previous FAKRA products. Color coded housings provide visual guidance during the assembly process and mechanical keying options prevent mis-mating of connectors.

This compact automotive solution is available in single, dual and quad-port configurations in a variety of standard key codes. These connectors are intermateable with all industry standard options.
