# 59150 Flange Mount Sensor Flange Mounting Sensor 

RoHS c $\mathrm{H}_{\text {us }}$

## Additional Information

Resources

Accessories

Samples

## Dimensions

Dimensions in mm (inch)
Tolerances are +/- 0.25 (0.010) Unless otherwise noted. (Actuator sold separately)

Table 1

## Description

The 59150 is a flange mounting reed sensor $28.57 \mathrm{~mm} \times 19.05 \mathrm{~mm}$ $\times 6.35 \mathrm{~mm}\left(1.125^{\prime \prime} \times 0.750^{\prime \prime} \times 0.250^{\prime \prime}\right)$ with a choice of normally open, normally open high voltage, normally closed or changeover contacts. The case design enables mounting with M3 screw with washer at 1 Nm torque maximum or adhesive mounting. The wires exit from the left-hand side, see Drawing 2. It is also available with right-hand exit - see 59145 series. The 59150 series is capable of switching up to $265 \mathrm{Vac} / 300 \mathrm{Vdc}$ at 10 VA . It is well suited for use in a wide range of industrial, appliances, or loT proximity sensing applications.

The 59150 functions best with the matching actuator 57150-000.

## Features and Benefits

- Non-contact switching solution for wet \& harsh environments
- Housing design for optimum adjustability
- Available in select sensitivities (operating distances)
- Standard cable configurations; customization options available
- Hermetically sealed, IP67 rated; UL and REACH
- Can operate through non-ferrous materials (for example, wood, plastic or aluminium)
- Helps implement efficient proximity/access and energy management systems
- Compact size and easy installation and effective concealment in many applications compliant
- No leakage current in 'open' state-ideal for batterypowered loT applications

## Applications

| $■$ Security and access control | $■$ Major appliances |
| :--- | :--- |
| $■$ Factory automation | Small appliances |
| $\square$ Process equipment | $■$ Proximity and limit sensing |

Notes:

1. Contact rating - Product of the switching voltage and current should never exceed the wattage rating. Contact Littelfuse for additional load/life information.
2. When switching inductive and/or capacitive loads, the effects of transient voltages and/or currents should be considered. Refer to Application Notes AN108A and AN107 for details.
3. Breakdown Voltage - per MIL-STD-202, Method 301
4. Breakdown Voltage - per Mictral Load Life Expectancy - Contact Littelfuse with voltage, current values along with type of load.
5. This resistance value is for 300 mm wire length. Resistance changes when wire lengthens
6. Operate (including bounce)/Release Time - per EIA/NARM RS-421-A, diode suppressed coil (Coil II).
7. Shock and Vibration - per EIA/NARM RS-421-A and MIL-STD-202.
8. For custom modifications to the wire length or size, or adding a special connector, please contact Littelfuse

[^0]:    Note: Contact Littelfuse for specific agency approval ratings.

[^1]:    Note:

    1. Pull-In AT Range: These AT values are the bare reed switch AT before modification.
    2. The activation distance is average value on the final sensor assembly.
