8-Bit Shift and Store Register with LSTTL Compatible Inputs

High-Performance Silicon-Gate CMOS

The MC74HCT4094A is a high speed CMOS 8-bit serial shift and storage register. This device consists of an 8-bit shift register and latch with 3-state output buffers. Data is shifted on positive clock (CP) transitions. The data in the shift register is transferred to the storage register when the Strobe (STR) input is high. The output buffers are enabled when the Output Enable (OE) input is set high. Two serial outputs (QS₁, QS₂) are available for cascading multiple devices.

The MC74HCT4094A can be used to interface TTL or CMOS outputs to high speed CMOS inputs.

Features

- Wide Operating Voltage Range: 4.5 to 5.5 V
- Low Power Dissipation: $I_{CC} = < 10 \,\mu A$
- In Compliance with the Requirements Defined by JEDEC Standard No. 7A
- These are Pb–Free Devices

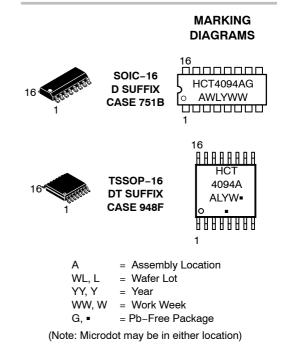

Typical Applications

- Serial-to-Parallel Conversion
- Remote Control Storage Register

This device contains protection circuitry to guard against damage due to high static voltages or electric fields. However, precautions must be taken to avoid applications of any voltage higher than maximum rated voltages to this high-impedance circuit. For proper operation, V_{in} and V_{out} should be constrained to the range GND $\leq (V_{in} \text{ or } V_{out}) \leq V_{CC}$.

Unused inputs must always be tied to an appropriate logic voltage level (e.g., either GND or V_{CC}). Unused outputs must be left open.

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

2. C_{PD} is defined as the value of the IC's equivalent capacitance from which the operating current can be calculated from: I_{CC} (operating) $\approx C_{PD} \times V_{CC} \times f_{IN} \times N_{SW}$ where N_{SW} = total number of outputs switching and f_{IN} = switching frequency.
