PSOC® 3 DEVELOPMENT KIT QUICK START GUIDE

Remove the PSoC 3 Development Kit from the package.

Plug the USB cable into your PC and the onboard programming USB port (11).

Insert the PSoC 3 Development Kit CD.
Install PSoC Creator and the kit software.

Plug the LCD module into port P8.

Vary the R56 potentiometer. The voltage is displayed with a 20-bit resolution on the LCD module.

Launch PSoC Creator.

Open the code examples from the Start Page.
