

Key Features

AEC-Q200 Qualified

Thin film technology

Excellent overall stability

Sn termination on Ni barrier layer

Tight tolerance down to $\pm 0.1\%$

Extremely low TCR down to ± 10 PPM/ $^{\circ}\text{C}$

SMD enabled structure

Lead-free and RoHS compliant

Type SMA-A series

Applications

Automotive (Non-safety parts)

Industrial

Telecommunication

Medical Equipment

Measurement/Testing Equipment

The SMA-A series is a metal film precision MELF resistor with an SMD enabled structure tight tolerance and low TCR. A sister to our SMA series the SMA-A series is AEC-Q200 qualified

It comes in three sizes and six power ratings to 1W, is lead free and RoHS compliant.

Technical Specifications

Description	SMA-A0102		SMA-A0204		SMA-A0207	
Resistance range	1 Ω -1M Ω ; 0 Ω		0.1 Ω -3.4M Ω ; 0 Ω		0.1 Ω -3.4M Ω ; 0 Ω	
Resistance tolerance	See below					
Temperature coefficient	See below					
Operation mode	Standard	High Power	Standard	High Power	Standard	High Power
Power rating P ₇₀	0.2W	0.3W	0.25W	0.4W	0.5W	1W
Operating voltage U _{max}	200V	200V	200V	200V	300V	350V
Operating temperature range	-55 $^{\circ}\text{C}$ ~155 $^{\circ}\text{C}$					
Max. resistance change at P ₇₀ for resistance range, $\Delta R/R$ max., after 1000 h	$\leq 0.5\%$		$\leq 0.5\%$		$\leq 0.5\%$

Operating Voltage= $\sqrt{P \cdot R}$ or Max. Operating Voltage listed above, whichever is lower
 Overload Voltage= $2.5 \cdot \sqrt{P \cdot R}$ or Max. Overload Voltage listed above, whichever is lower.
 RCWV(Rated Continuous Working Voltage)= $\sqrt{P \cdot R}$ or Max. Operating Voltage whichever is lower.
 Operating temperature range - -55°C~155°C

Pulse withstanding capacity

The single impulse graph is the result of 50 impulses of rectangular shape applied at one-minute intervals. The limit of acceptance was a shift in resistance of less than 1% from the initial value. The power applied was subject to the restrictions of the maximum permissible impulse voltage graph shown

SMA-A Series Single Pulse(100 Ohm)

SMA-A0102 Series Single Pulse

Continuous Pulse

The continuous load graph was obtained by applying repetitive rectangular pulses where the pulse period was adjusted so that the average power dissipated in the resistor was equal to its rated power at 70°C. Again the limit of acceptance was a shift in resistance of less than 1% from the initial value

SMA-A0102 Pulse Voltage (100 Ohm)

Frequency behaviour

Resistors are designed to function according to ohmic laws. This is basically true of resistors for frequencies up to 100kHz. At higher frequencies, there is an additional contribution to the impedance by an ideal resistor switched in series with a coil and both switched parallel to a capacitor. The values of the capacitance and inductance are mainly determined by the dimensions of the terminations and the conductive path length.

The environment surrounding components has a large influence on the behaviour of the component on the printed-circuit board.

SMA-A0207

Lightning Surge

Resistors are tested in accordance with IEC 60115-1 using both 1.2/50us and 10/700us pulse shapes. The limit of acceptance is a shift in resistance of less than 0.5% from the initial value.

1.2/50µs Lightning Surge
