## 1.27 mm Connectors

---

# SMC - SMALL GRID, BIG POSSIBILITIES

Limited space and high performance demands are characteristics of many modern electronic systems, all of which the connectors must accommodate. There is a corresponding demand for compact, secure, and reliable connectors, with high signal integrity and a relatively high current-carrying capacity.

The comprehensive SMC range helps meet these requirements. The high-performance SMT connectors come in a number of different designs, heights, and contact densities in a 1.27 mm grid.

The basic design criteria for the SMC series include double-sided spring contacts for top-rate contact properties and maximum contact reliability, a high-temperature resistant insulator with polarization and insertion chamfers, and a very high mating reliability.

The contact design exhibits a virtually continuous impedance profile and enables secure data transmission rates of up to 3 Gbit/s (differential) if the system is suitably designed.

## FEATURES

Pitch	1.27 mm
No. of Pins	12, 16, 20, 26, 32, 40, 50, 68, 80
Termination technology	SMT, individual variants in pressfit technology
Applications	Data rate up to 3 Gbit/s Current rating up to 1.7 A per contact Board-to-Board connections: - stacked (Mezzanine) - orthogonal - coplanar Wire-to-Board connections (ribbon cable): - pluggable - permanent
Variants	Male connectors, vertical and right angle Female connectors, vertical and right angle Board-to-Board adapter Board-on IDC Cable assembly: - Female connectors IDC, right angle
Special versions	Lockable connectors Pressfit male connectors Reduced locating pegs / without pegs First mate/early break contacts

## CAPABILITIES

Stacked boards (Mezzanine)

Board-to-Board adapter: enhanced board-to-Board heights

Extender card (coplanar)

Orthogonal boards

Wire-to-Board (pluggable)

Wire-to-Board (permanent): Board-on IDC

## ADVANTAGES

### High Reliable Contact Design

- reliable, dual-beam female contact
- twisted contact tulip (90°)
- rolled, homogeneous surface, provides for more secure contact mating
- wide contact surfaces between the mated pairs
- extremely low surface roughness significantly reduces abrasion
- low contact resistance

### Polarization / Mating Face

- mating face polarization guards against mismatching and incorrect connection
- more secure mating due to insertion chamfers in the capture range
- distinctive guide elements for precise insertion

### Robust Solder Clips

- outstanding retention forces on the circuit board
- soldering brackets absorb mechanical stress and are able to withstand high shock and vibration loads
- documented shear and tear-off forces build trust in surface-mounted connectors (e.g., shear force: min. 1000 N; tear-off force: min. 100 N)

## ADVANTAGES

### Interlocking Snap-In

- lockable printed circuit board (PCB) and cable connectors
- secured against heavy vibration and shock loads
- snap-in: locking when mating; can only be released with tools
- cable connector: integrated locking lever; can be manually released without tools
- protection against accidental release of Wire-to-Board connections
- cable guide provides for strain relief

### Snap-In B-to-B Adapter

- single-sided locking of Board-to-Board adapters on low-profile female connectors
- enables the mating and release of two boards always on one specified side

### Locating Pegs

- geometrically heterogeneous locating pegs for precise positioning on the circuit board
- enables excellent compensation of PCB holes for both positive and negative tolerances

## PROCESSING

### Tape and Reel Packaging

- transport safe packaging
- automatic assembly

### Automatic Assembly and Reflow Soldering

- for efficient processing on modern assembly lines

### Backside Reflow Soldering

- capable of two sided reflow soldering

### Permanent Wire-to-Board Connection (Board-on IDC)

- automated and cost-efficient assembly of ribbon cables

## BOARD-ON IDC

### Automated Assembly

### Feeding of the Ribbon Cable and Cable Guide

### Press-in without Special Tool

### Processed Connection

## MATING CONDITIONS

### Allowed Inclination for a more Secure Self-Centering

\*1) depends on no. of pins and misalignment tolerance

### Allowed Misalignment Tolerances for a more Secure Self-Centering

Air- and creepage distance		contact - contact min. 0.4 mm		
Operating voltage	IEC 60664	The permissible operating voltages depend on the customer application and on the applicable or specified safety requirements. Insulation coordination according to IEC 60664-1 has to be regarded for the complete electrical device. Therefore, the maximum creepage and clearance distances of the mated connectors are specified for consideration as a part of the whole current path. In practice, reductions in creepage or clearance distances may occur due to the conductive pattern of the printed board or the wiring used, and have to be taken into account separately. As a result the creepage and clearance distances for the application may be reduced compared to those of the connector.

## Product Specific Technical Notes

- intended use: the offered products, i.e. cable assemblies, are components used in devices for internal wiring in non-critical industrial applications
- not intended to be used in live-support applications, no safety-classified applications, not intended for automotive use, not intended for applications with danger to life and limb
- desired audience: (professional) company customers who assume the full responsibility for their products including the ERNI cable assembly product under consideration
- customer has to carefully check the product's appropriateness for the desired use (application) with the help of its technical specifications and additionally verify that the operation of the product in said application is in agreement with all requirements that may be applicable under the scope of the actual application (applicable regulation, law, and whatever more)
- product solely ERNI-internally sampled and released - customer FAI report will not be provided (also includes PPaPs, CofCs, acceptance test certificates and IMDS Data)
- ERNI may change suppliers or mix materials from various sources as long as the specification laid out here will be maintained (assumption of fit-form-function)
- outside these product offerings customer-specific assemblies to be inquired separately
