LIN Serial Analyzer   Buy Now

Part Number: APGDT001

Documentation & Software

Share

The LIN Serial Analyzer development tool enables the user to monitor and communicate to a LIN (Local Interface Network) bus using a Personal Computer (PC). This is a powerful tool which can be used to send messages, monitor the bus traffic, perform errors checks and filter messages amongst many other features, allowing the user to develop and debug the system implementation.

Features   Package Contents

- The user interface program runs on Microsoft® Windows® operating system compatible computers via the USB port.
