### DESCRIPTION

## DESCRIPTION

Its a Wave shield party pack! Just add an Arduino to create your own iPod-killer, audio art, sound-effects box...

Comes with:

- Latest [Wave shield kit](#), works with more SD cards and with older NG Arduinos!
- Unassembled
- 1 or 2 GB SD card (brand or size may change, but we test one of each kind to verify it works well)
- [Speaker](#) - 3" diameter (77mm), 8 ohm impedance, good response between 200Hz to 10KHz (10KHz is the max frequency the Wave shield can make). The speaker is rated for 1W so if you want you can even stick a small amp between the shield and the speaker to boost up the volume
- Some wire for connecting up the speaker
- **The Wave Shield is not Mega or Leonardo compatible!**

## LEARN

[Babel Fish](#)  
RFID language learning toy  
with sound

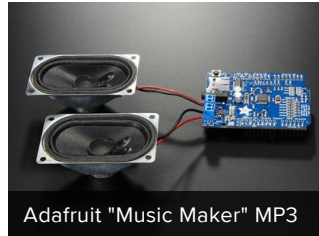

[Wave Shield Voice Changer](#)  
Speak like everyone's favorite  
baritone Sith lord or sing  
along with the Lollipop Guild!

[Wave Shield](#)  
Add music to your Arduino

## MAY WE ALSO SUGGEST...

Stereo 3.7W Class D Audio

Adafruit "Music Maker" MP3

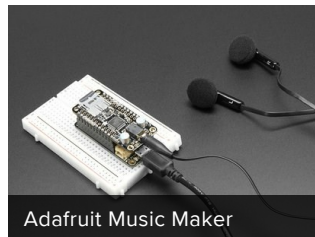

3.5mm Stereo to RCA

Adafruit "Music Maker" MP3

Stereo 2.1W Class D Audio

Adafruit Music Maker

GEMMA Talking Toy Guts
