MCU CARD 10 FOR STM32 STM32F107VC

🖱️ Hover to zoom

Architecture	MCU Memory	Vendor	Pin count	RAM (Bytes)	Microc
ARM Cortex-M3	256	STMicroelectronics	100	65536	STM32

MCU Card is a standardized add-on board, which allows very simple installation and replacement of the microcontroller unit (MCU) on a development board equipped with the MCU Card socket. By introducing the new MCU Card standard, we have ensured the absolute compatibility between the development board and any of the supported MCUs, regardless of their pin number and compatibility. MCU Cards are equipped with two 168-pin mezzanine connectors, allowing them to support even MCUs with extremely high pin count. Their clever design allows very simple usage, following the well-established plug & play concept of the Click board™ line of product.

PID: MIKROE-3731 Weight: 18 g
