

LENOX Tri-Fold™ Saw with two blades

1769340

- Over-molded rubberized grip for a comfortable and secure grip while working
- Aluminium 3 position locking mechanism prevents blade from being removed during use
- Ideal for flush cutting applications or when a hacksaw is not available
- Ideal for flush cutting applications or when a hacksaw is not available

Description:

The LENOX Tri-Fold™ Saw with two blades has been made from durable aluminum for lightweight and durability. Ideal for cutting various materials using the plaster and general recip blades supplied. The reinforced locking mechanism holds the blade securely and prevents the blade from pulling out or retracting during use. The rubberized overmould provides a secure and comfortable grip which helps reduce fatigue during application.
