| HDTV analysis | No | No | Yes (option) | Yes (option) |
| Advanced waveform math | No | No | Standard | Standard |
| Connectivity | Standard USB 2.0 | Standard USB 2.0 (LAN/ Video option) (GPIB option) | Standard USB2.0 (LAN/ Video option) (GPIB option) | Standard USB2.0, LAN, video out (GPIB option) |
| | | | | |

^{1.} The digital channels and serial protocol analysis cannot be used simultaneously on 2000 X-Series.

Want to Touch operation to Discover and Solve your problem?

See the InfiniiVision 3000T X-Series.

- First in class 8.5-inch capacitive touch display
- Zone touch trigger capability
- 100 MHz to 1 GHz DSO and MSO models
- > 1,000,000 wfms/sec
- Standard segmented memory
- Fully upgradable 6 instrument in 1
 - Digital channels (MSO)
 - Protocol analysis including new CAN-FD and SENT bus support
 - 20 MHz WaveGen with arbitrary waveform and modulation support
 - 3-digit digital voltmeter (DVM)
 - 5-digit counter/8-digit totalizer
- N7020A Power Rail Probe and N2820A High Sensitivity Current Probe support
- Standard time gated FFT feature

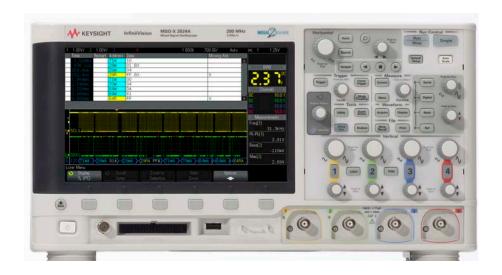

See www.keysight.com/find/3000TX-Series for more details.

More Scope

The InfiniiVision 2000 X-Series offers entry-level price points to fit your budget with superior performance and optional capabilities that are not available in any other oscilloscope in its class. This Keysight Technologies, Inc. breakthrough technology delivers more scope for the same budget.

With more scope, you can:

- See more of your signal more of the time with the largest screen in its class, the deepest memory and the fastest waveform update rates
- Do more with the power of 5 instruments in 1:
 Oscilloscope, logic timing analyzer, WaveGen built-in
 20 MHz function generator (optional), serial protocol triggering and decode (optional), and digital voltmeter (optional)
- Get more investment protection with the classes only fully upgradable scope, including memory and bandwidth, and a standard 5 year warranty.
- 1. 5-year warranty applies to all orders on or after 1/1/2013.

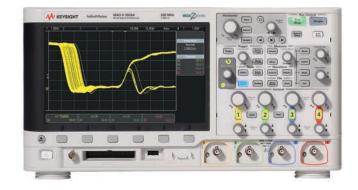

See More Of Your Signal, More Of The Time

Largest display

Engineering for the best signal visibility starts with the largest display. Our 8.5-inch WVGA display offers 50% more viewing area with 3.5 times the resolution (WVGA 800×480 versus 7-inch WQVGA 480×234).

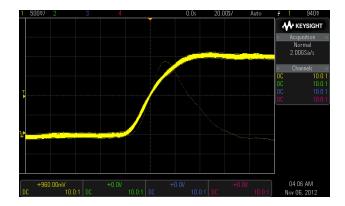

Notice that the Keysight 2000 X-Series allows you to see more of your signals, and captures the infrequent glitch that you are unable to see on other oscilloscopes in this class.

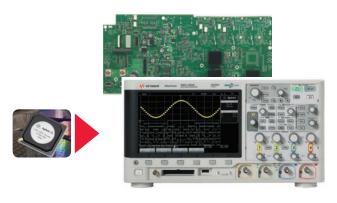

Fastest update rate

With Keysight-designed *MegaZoom IV* custom ASIC technology, the InfiniiVision 2000 X-Series family delivers up to 50,000 waveforms per second. With this speed you can see signal detail and infrequent anomalies more of the time.

How does Keysight do that?

Keysight-designed *MegaZoom IV* custom ASIC technology combines the capabilities of an oscilloscope, logic analyzer, and WaveGen built-in function generator in a compact form factor at an affordable price. 4th generation *MegaZoom* technology enables the industry's fastest waveform update rate with responsive deep memory acquisitions.

Do More With The Power Of 5 Instruments In 1

Best-in-class oscilloscope

The InfiniiVision 2000 X-Series features Keysight's patented MegaZoom IV smart memory technology that is always enabled and always responsive providing the industry's fastest update rate at up to 50,000 waveforms per second, with no compromise if you turn on measurements or add digital channels. In addition, the 2000 X-Series offers 23 automated measurements such as voltage, time, and frequency as well as five waveform math functions including add, subtract, multiply, divide, and FFT.

Industry's first economy-class mixed signal oscilloscope (MSO)

The 2000 X-Series is the first instrument in its class to offer an integrated logic timing analyzer. Digital content is everywhere in today's designs and with an additional 8 integrated digital timing channels, you now have up to 12 channels of time-correlated triggering, acquisition and viewing on the same instrument. Buy a 2 or 4 channel DSO and at any time, upgrade it yourself to a MSO with a license to turn on those integrated 8 digital timing channels.

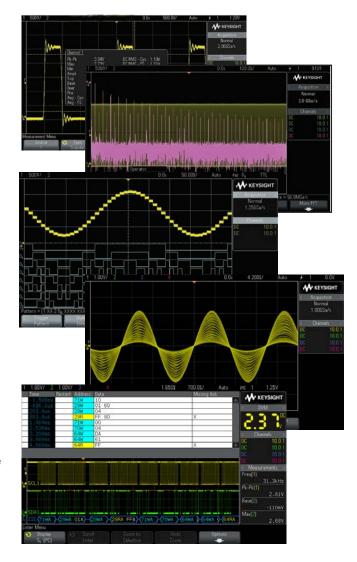

Industry's first WaveGen built-in 20 MHz function generator with a modulation capability

An industry first, the 2000 X-Series offers an integrated 20 MHz function generator, now available with the signal modulation capability. Ideal for educational or design labs where bench space and budget are at a premium, the integrated function generator provides stimulus output of sine, square, ramp, pulse, DC and noise waveforms to your device under test. No need to buy a separate function generator when you can get one integrated in your new oscilloscope. Turn on WaveGen at any time by ordering the DSOX2WAVEGEN option and install the license yourself.

Hardware-based serial protocol decode and triggering

- Embedded serial triggering and analysis (I2C, SPI)
- Computer serial triggering and analysis (RS232/422/485/UART)
- Automotive and industrial serial triggering and analysis (CAN, LIN)

Keysight's InfiniiVision Series oscilloscopes are the industry's first scopes to use hardware-based serial protocol decoding. Other vendors' oscilloscopes use software post-processing techniques that slow down both waveform and decode update rate. That's especially true when using deep memory, which is often required to capture multiple packetized serial bus signals. Faster decoding with hardware-based technology enhances scope usability and, more importantly, the probability of capturing infrequent serial communication errors.

After capturing a serial bus communication, you can easily perform a search-and-navigation operation based on specific criteria of your interest. Note, the digital channels and serial protocol analysis cannot be used simultaneously.

Integrated digital voltmeter

An industry first, the 2000 X-Series offers an integrated 3-digit voltmeter (DVM) and 5-digit frequency counter inside the oscilloscopes. The voltmeter operates through the same probes as the oscilloscope channels, however, the measurements are de-coupled from the oscilloscope triggering system so that both the DVM and triggered oscilloscope measurements can be made with the same connection. The voltmeter results are always displayed, keeping these quick characterization measurements at your fingertips. Turn on DVM at any time by ordering the free DSOXDVM option.

Get More Investment Protection with the Industry's Only Fully Upgradable Oscilloscope

Upgradability

Project needs change, but traditional oscilloscopes are fixed – you get what you pay for at the time of purchase. With the 2000 X-Series, your investment is protected. If you need more bandwidth (up to 200 MHz), digital channels, memory, WaveGen, integrated digital voltmeter, or measurement applications in the future, you can easily add them all after the fact.

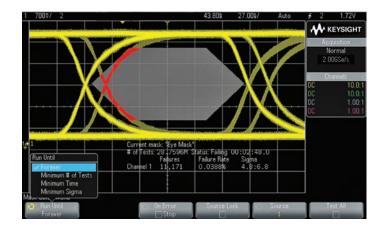

See page 21 for more information on upgradable products.

Add at the time of your purchase or upgrade later:

- Bandwidth
- Digital channels (MSO)
- Memory
- WaveGen built-in 20 MHz function generator
- Integrated digital voltmeter (DVM)
- Serial protocol analysis
- Measurement applications
 - Mask testing
 - Segmented memory
 - Educators' lab kit

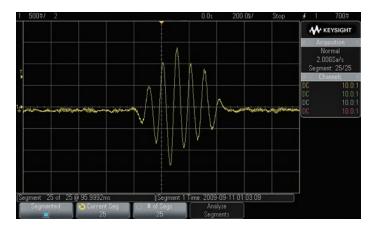

Mask testing

Whether performing pass/fail tests to specified standards in manufacturing or testing for infrequent signal anomalies in R&D debug, the mask test option can be a valuable productivity tool. The 2000 X-Series features hardware-based mask testing and can perform up to 50,000 tests per second.

Segmented memory

When capturing low-duty cycle pulses or data bursts, you can use segmented memory acquisition to optimize acquisition memory. Segmented memory acquisition lets you selectively capture and store important segments of signals without capturing unimportant signal idle/dead-time. Segmented memory acquisition is ideal for applications including packetized serial pulses, pulsed laser, radar bursts and high-energy physics experiments. Up to 250 segments can be captured on the 2000 X-Series models with a minimum re-arm time under 19 µs.

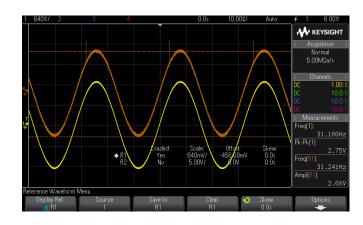

30-day trial license

The 2000 X-Series comes with a one-time 30-day all-optional-features trial license. You can choose to start the 30-day trial at any time. In addition you can redeem individual optional feature 30-day trial licenses at any time by visiting www.keysight.com/find/30daytrial. This enables you to receive in effect 60 days of trial license of each optional feature.

Other Productivity Tools

Reference waveforms

Store up to two waveforms in the scope's non-volatile reference waveform memory locations. Compare these reference waveforms with live waveforms, and perform post analysis and measurements of stored data. You can also store waveform data on a removable USB memory device that can be recalled back into one of the available two reference memories of the scope for full waveform measurement and analysis. Save and/or transfer waveforms as XY data pairs in a comma-separated values format (*.csv) for PC analysis. Save screen images to a PC for documentation purposes in a variety of formats including: 8-bit bitmaps (*.bmp), 24-bit bitmaps (*.bmp), and PNG 24-bit images (*.png).

Localized GUI and help

Operate the scope in the language most familiar to you. The graphical user interface, built-in help system, front panel overlays, and user's manual are available in 13 languages. Choose from: English, Japanese, simplified Chinese, traditional Chinese, Korean, German, French, Spanish, Russian, Portuguese, Thai, Polish and Italian. During operation, access the built-in help system just by pressing and holding any button.

Probe solutions

Get the most out of your 2000 X-Series scope, by using the right probes and accessories for your application. Keysight offers a complete family of innovative probes and accessories for the InfiniiVision 2000 X-Series scopes. For the most up-to-date and complete information about Keysight's probes and accessories, please visit our Web site at www.keysight.com/find/scope_probes.

Autoscale

Quickly display any active signals and automatically set the vertical, horizontal and trigger controls for optimal viewing with the press of the autoscale button. (This feature can be disabled or enabled for the education environment via a USB thumb drive file with a SCPI remote comand).

Other Productivity Tools (Continued)

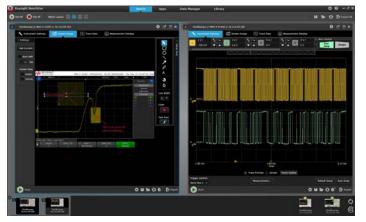

Connectivity and LXI compatibility

Built-in USB host (one front, one back) and USB device ports make PC connectivity easy. Operate the scope from your PC and save and recall stored waveforms as well as set-up files via LAN. An optional LAN/VGA module gives you network connectivity and complete LXI class C support as well as the ability to connect to an external monitor. An optional GPIB module is also available. Only one module may be used at a time.

BenchVue Software with the BV0004B BenchVue Oscilloscope app lets you control and visualize the 2000 X-Series and multiple measurements simultaneously. Build automated test sequences just as easy as using your front panel. Save time with the ability to export measurement data to Excel, Word and MATLAB in three clicks. Monitor and control your 2000 X-Series with a mobile device from anywhere. Simplify your testing with BenchVue software. Learn more at www.keysight.com/find/BenchVue.

View Scope enables simple and free time-correlated me asurements between a 2000 X-Series oscilloscope and a Keysight 16900 or 16800 Series logic analyzer.

Virtual front panel

In addition to the traditional VNC virtual front panel remote operation through your favorite PC Web browser, the InfiniiVision X-Series supports remote oscilloscope control from your tablet devices. The tablet virtual front panel looks and acts as the real front panel on the oscilloscope. Control the setting, save/recall data, get image, and more.

Secure erase

The secure erase feature comes standard with all InfiniiVision X-Series models. At the press of a button, internal nonvolatile memory is clear of all setup, reference waveforms, and user preferences, ensuring the highest level of security in compliance with National Industrial Security Program Operation Manual (NISPOM) Chapter 8 requirements.

Other Productivity Tools (Continued)

Infiniium Offline oscilloscope analysis software (N8900A)

Keysight's Infiniium Offline PC-based analysis oscilloscope software allows you to do additional signal viewing, analysis and documentation tasks away from your scope. Capture waveforms on your scope, save to a file, and recall the waveforms into Infiniium Offline. The application supports a variety of popular waveform formats from multiple oscilloscope vendors and includes the following features:

Navigate

- Pan and zoom to anywhere in the data record. Navigate in time, or between bookmarks.

View

Up to 8 waveforms simultaneously, 1, 2, or 4 grids (stacked, side by side, custom layout, zoom)

Measurements

- Over 50 automated measurements
- View up to 20 simultaneously
- User-customizable result window (size, position, information)
- X & Y markers with dynamic delta values

Analyze

- 20 math operators including FFT and filters
- Up to four independent/cascaded math functions
- Measurement histogram

View windows

Analog, math, spectral, measurement results (simultaneous, tabbed, or undocked)

Documentation

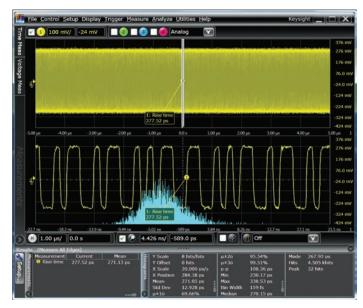

- Right-click to copy
- Up to 100 bookmarks
- Annotated axis values
- Markers with dynamic delta value updates when moved
- One step save/load setup and all waveforms

Analysis upgrades (optional)

- Protocol decode for I2C/SPI, RS232/UART, CAN/ LIN/ FlexRay, SATA, 8B/10B, digRF v4, JTAG, MIPI® D-PHYSM, SVID, Ethernet 10G KR, PCIe 1, 2, 3, USB 2, 3, HSIC
- Jitter analysis
- Serial data analysis

View and analyze away from your scope and target system

Use familiar scope controls to quickly navigate and zoom in to any event of interest.

Add bookmarks and call outs to produce friendly and useful documentation.

Other Productivity Tools (Continued)

Keysight Spectrum Visualizer (ASV) software

This PC-based software package connects to the scope via USB or ethernet connection and uses the Keysight I/O libraries to communicate. It provides advanced FFT frequency domain analysis at a cost-effective price as well as spectrum and spectrogram analysis with an intuitive user interface that RF engineers are familiar with. Tools include:

Spectrum measurements

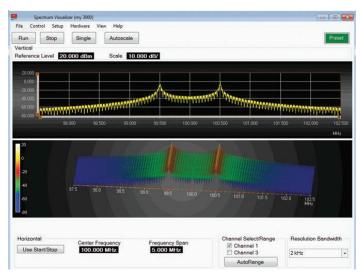

- Power (dBm) vs. frequency
- Horizontal (x-axis): Specify center frequency and frequency span, or start and stop frequencies
- Vertical (y-axis): Specify reference level (dBm) and scale (dB/div)
- Settable resolution bandwidth
- Flat top, Gaussian, or Hanning windows applied to the time domain data for the FFT analysis
- Marker to peak amplitude, and marker to center frequency
- Marker peak search can be enabled for time-varying signals
- Multiple marker, with delta X and delta Y readouts

Acquisition and display modes

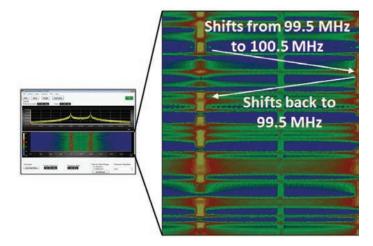

- Free Run (continuous), Triggered, Stop, Single, Preset
- Triggered mode: specify trigger power level (dBm), single or continuous sweep
- Enable/disable y-axis label
- Enable/disable main trace display
- Max hold display mode
- Gated Measurements
- Multiple viewing options
 - Spectrogram
 - Waterfall
 - 3D
- Changeable scaling settings on main window
- Local language support
- Multiple oscilloscopes can be configured to allow user to rapidly switch between multiple instruments

Arbitrary waveform generator source control

- 20 MHz sine wave
- 10 MHz square wave
- Pulsed waveform
- WaveGen source settings can be altered while ASV is running for interactive signal source and analysis capability

Waterfall View for ASV Spectrogram Measurement

Close-Up Detail on Frequency Shift Keying (FSK) Characteristics with the ASV Spectrogram Measurement

Designed With Education In Mind

Quickly and easily set up or upgrade a teaching lab

Teach your students what an oscilloscope is and how to perform basic measurements with the Educator's Oscilloscope Training Kit (DSOXEDK). It includes training tools created specifically for electrical engineering and physics undergraduate students and professors. It contains an array of built-in training signals, a comprehensive oscilloscope lab guide and tutorial written specifically for the undergraduate student, and an oscilloscope fundamentals PowerPoint slide set for professors and lab assistants. For more information, refer to www.keysight.com/find/EDK. Also available are DreamCatcher's full semester application–specific courseware written around Keysight test and measurement equipment: www.dreamcatcher. asia/cw. With features such as the ability to disable autoscale and the $50-\Omega$ input data path, the InfiniiVision X–Series is a perfect choice for education.

Intuitive localized front panel design with pushable knobs for quick access to commonly used oscilloscope functions helps students spend more time learning the concepts and less time learning how to use the oscilloscope. Enable your students to answer their own questions with the localized built-in help system that provides quick access by simply pressing and holding any button.

Stretch your budget over the long term

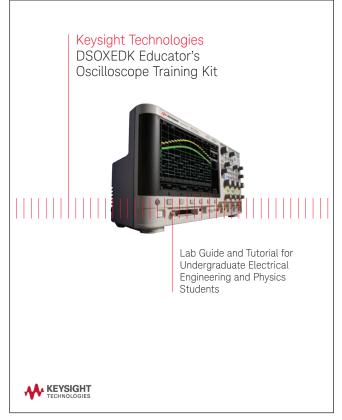

Save money with an industry-exclusive built-in 20 MHz WaveGen, instead of a separate function generator. Buy what you need today and protect your investment in the future with the only oscilloscopes in this class with upgradable bandwidth, 8 digital channels (MSO), WaveGen, integrated digital voltmeter and measurement applications. Get long scope life and keep repair costs to a minimum with a standard 5-year warranty ¹, and an instrument reliability you've come to expect from the leader in test and measurement equipment.

Optimize lab bench space

With 5 instruments in 1, you will save on precious lab bench space by getting an oscilloscope, logic timing analyzer, serial protocol analyzer, WaveGen function generator and integrated digital voltmeter all in one innovative instrument with a footprint that is only 5.57 inches deep. With the large 8.5-inch WVGA display, you can easily view all signals on one screen with enough viewing area for more than one student to view.

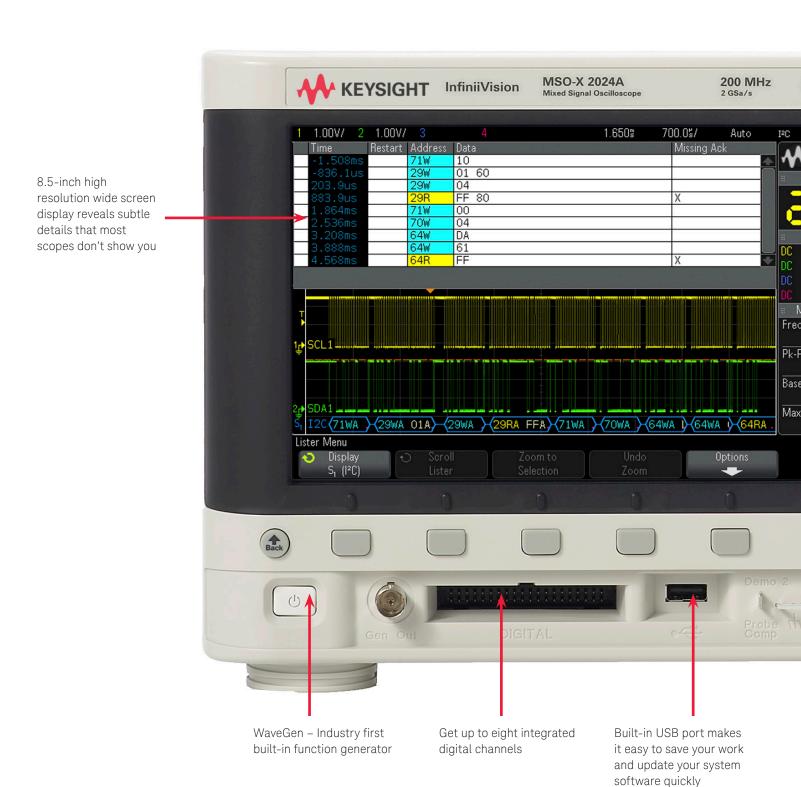

1. Applies to all orders on or after 1/1/2013.

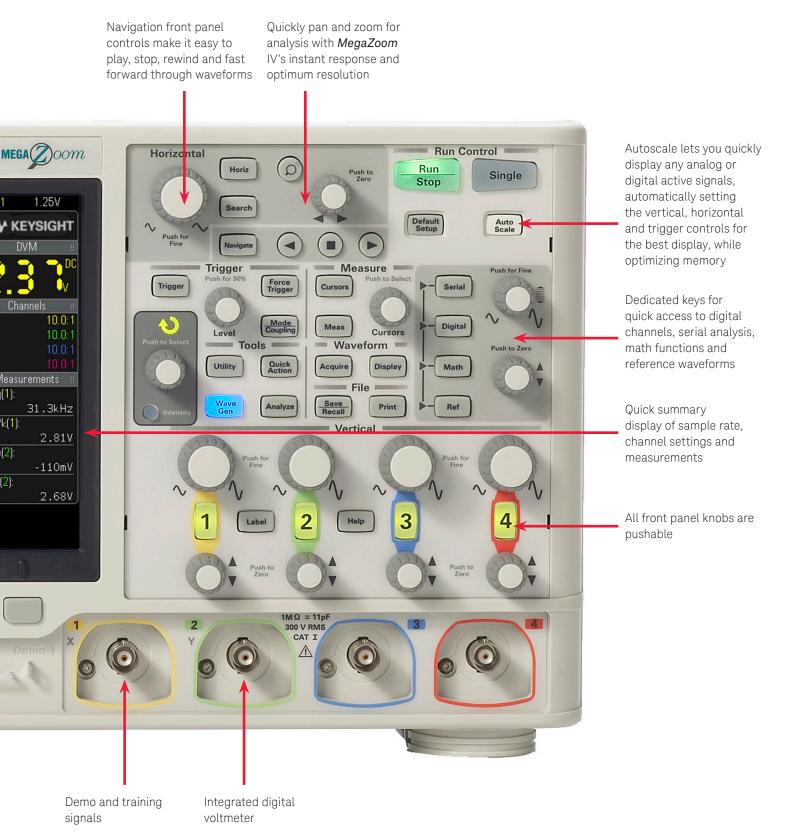

Oscilloscope Shown Actual Size

Configuring Your InfiniiVision X-Series Oscilloscope

Step 1. Choose your bandwidth and channel count

| InfiniiVision 2000 X-Series scopes | | | | | | | |
|------------------------------------|-----------------|--------|-------|----------|-------|-----------|-------|
| | | 2002A | 2004A | 2012A | 2014A | 2022A | 2024A |
| Bandwidth 1 (-3 o | dB) | 70 MHz | | 100 MHz | | 200 MHz | |
| Calculated rise ti | ime (10 to 90%) | ≤5ns | | ≤ 3.5 ns | | ≤ 1.75 ns | |
| Input channels | DSOX | 2 | 4 | 2 | 4 | 2 | 4 |
| _ | MSOX | 2 + 8 | 4 + 8 | 2 + 8 | 4 + 8 | 2 + 8 | 4 + 8 |

Step 2. Tailor your scope with measurement applications to save time and money ²

| Application | 2000 X-Series |
|---|-------------------------------|
| 1 Megapoint memory upgrade | DSOX2MEMUP (-010) |
| Embedded serial triggering and analysis (I ² C, SPI) | DSOX2EMBD (-LSS) ³ |
| Computer serial triggering and analysis (RS232/422/485/UART) | DSOX2COMP (-232) ³ |
| Automotive serial triggering and analysis (CAN, LIN) | DSOX2AUTO (-AMS) ³ |
| WaveGen (built-in function generator) | DSOX2WAVEGEN (-001) |
| Integrated digital voltmeter | DSOXDVM (-DVM) |
| Educator's kit | DSOXEDK (-EDK) |
| Mask testing | DSOX2MASK (-LMT) |
| Segmented memory | DSOX2SGM (-SGM) |
| InfiniView oscilloscope analysis software | N8900A |
| Keysight spectrum visualizer (ASV) | 64997A |

Step 3. Choose your probes ⁴

| Probes | 2000 X-Series |
|---|--|
| N2862B 150 MHz 10:1 passive probe | Standard one per channel for 70 and 100 MHz models |
| N2863B 300 MHz, 10:1 passive probe | Standard one per channel for 200 MHz models |
| N2755A 8-channel logic probe and accessory kit | Standard on MSO models or with DSOX2MSO upgrade |
| N2889A 350 MHz 10:1/1:1 passive probe | Optional |
| 10070D 20 MHz 1:1 passive probe with probe ID | Optional |
| 10076A 250 MHz 100:1, 4 kV high-voltage passive probe with probe ID | Optional |
| N2791A 25 MHz, ± 700 V high-voltage differential probe | Optional |
| 1146A 100 kHz, 100 A, AC/DC current probe | Optional |

Step 4. Add the final touches

| Recommended accessories | 2000 X-Series |
|--|----------------------|
| LAN/VGA connection module | DSOXLAN |
| GPIB connection module | DSOXGPIB |
| Rack mount kit | N6456A |
| Soft carrying case and front panel cover | N6457A |
| Hard copy manual | N6458A |
| Front panel cover (only) | N2747A |
| ANSI Z540-1-1994 Calibration | MSOX or DSOX2000-A6J |
| BenchVue Oscilloscope application | BV0004B |

- For example, if you chose 100 MHz, 2+8 channels, the model number will be MSOX2012A.

- See pages 20 to 21 for more detailed information on upgrauauity, and installed.
 Serial trigger and decode application will not run simultaneously with digital channels.
 See page 20 for probe compatibility table. For more information on probes and accessories, see the Keysight literature 5968-8153EN.

^{1.} Denotes warranted specifications, all others are typical. Specifications are valid after a 30-minute warm-up period and from ± 10 °C firmware calibration temperature.

^{2. 1} mV/div and 2 mV/div is a magnification of 4 mV/div setting. For vertical accuracy calculations, use full scale of 32 mV for 1 mV/div and 2 mV/div sensitivity setting.

| Acquisition modes | |
|----------------------------------|---|
| Normal | |
| Peak detect | Capture glitch as narrow as 500 ps at all timebase settings |
| Averaging | Select from 2, 4, 8, 16, 64 to 65,536 |
| High resolution mode | 12 bits of resolution when ≥ 20 μs/div |
| Segmented | Re-arm time= 19 μs (minimum time between trigger events) |
| Trigger system | |
| Trigger modes | Normal (triggered): Requires trigger event for scope to trigger |
| | - Auto: Triggers automatically in absence of trigger event |
| | - Single: Triggers only once on a trigger event, press [Single] again for scope to find another trigger event, or press |
| | [Run] to trigger continuously in either Auto or Normal mode |
| | Force: Front panel button that forces a trigger |
| Trigger coupling | Coupling selections: AC, DC, noise reject, LF reject and HF reject |
| Trigger source | Each analog channel, each digital channel (MSO models or DSOX2MSO upgrade, Ext, WaveGen, line) |
| Trigger sensitivity (internal) 1 | < 10 mV/div: greater of 1 div or 5 mV; ≥ 10 mV/div: 0.6 div |
| Trigger sensitivity (external) 1 | 200 mV (DC to 100 MHz); 350 mV (100 to 200 MHz) |
| External trigger input | Included on all models |
| Trigger type selections | |
| 00 71 | All 2000 X-Series models |
| Edge | Trigger on a rising, falling, alternating or either edge of any source |
| Pulse width | Trigger on a pulse on a selected channel, whose time duration is less than a value, greater than a value, or inside a time |
| | range |
| | Minimum duration setting: 2 to 10 ns (depends on bandwidth) |
| | Maximum duration setting: 10 s |
| Pattern | Trigger when a specified pattern of high, low, and don't care levels on any combination of analog, digital, or trigger |
| | channels is [entered exited]. Pattern must have stabilized for a minimum of 2 ns to qualify as a valid trigger condition. |
| Video | Trigger on all lines or individual lines, odd/even or all fields from composite video, or broadcast standards (NTSC, PAL, |
| | SECAM, PAM-M) |
| I ² C (optional) | Trigger on I ² C (Inter-IC bus) serial protocol at a start/stop condition or user defined frame with address and/or data |
| | values. Also trigger on missing acknowledge, address with no accq, restart, EEPROM read, and 10-bit write. |
| SPI (optional) | Trigger on SPI (Serial Peripherial Interface) data pattern during a specific framing period. Supports positive and negative |
| | Chip Select framing as well as clock Idle framing and userspecified number of bits per frame. |
| CAN (optional) | Trigger on CAN (controller area network) version 2.0A and 2.0B signals. Trigger on the start of frame (SOF) bit (standard). |
| | Remote frame ID (RTR), data frame ID (~RTR), remote or data frame ID, data frame ID and data, error frame, all errors, |
| | acknowledge error and overload frame. |
| LIN (optional) | Trigger on LIN (Local Interconnect Network) sync break, sync frame ID, or frame ID and data |
| RS232/422/485/UART | Trigger on Rx or Tx start bit, stop bit or data content |
| (optional) | |

| Types | Amplitude, time , frequency (FFT), manual, tracking, binary, HEX |
| Measurements | ΔT , $1/\Delta T$, $\Delta V/X$, $1/\Delta X$, ΔY , Phase and Ratio |
| Cursors ² | Single cursor accuracy: ± [DC vertical gain accuracy + DC vertical offset accuracy + 0.25% full scale] |
| | Dual cursor accuracy: ± [DC vertical gain accuracy + 0.5% full scale] ¹ |
| Automatic waveforms measurem | nents |
| Voltage | Snapshot all, maximum, minimum, peak-to-peak, top, base, amplitude, overshoot, preshoot, average- N cycles, average-full screen, DC RMS- N cycles, DC RMS- full screen, AC RMS- N cycles, AC RMS- full screen (std dev) |
| Time | Period, frequency, rise time, fall time, + width, - width, duty cycle, delay A→B (rising edge), delay A→B (falling edge), phase A→B (rising edge,) and phase A→B (falling edge), bit rate |
| Waveform math | (a |
| Operators | Add, subtract, multiply, divide, FFT |
| FFT | Windows: Hanning, flat top, rectangular; Blackman-Harris - up to 64 kpts resolution |
| Sources | Math functions available between any two channels |
| Display characteristics | |
| Display | 8.5-inch WVGA color TFT LCD |
| Resolution | 800 (H) x 480 (V) pixel format (screen area) |
| Interpolation | Sin(x)/x interpolation (using FIR filter; used when there is less than one sample per column of the display) |
| Persistence | Off, infinite, variable persistence (100 ms to 60 s) |
| Intensity gradation | 64 intensity levels |
| Modes | Normal |
| | XY - XY mode changes the display from voltage versus time scale to a volts versus volts scale |
| | Roll – Displays the waveform moving across the screen from right to left much like a strip chart recorder |
| MSO (digital channels) | |
| Upgradable from DSO | Yes |
| MSO channels | 8 channels (D0 to D7) |
| Maximum sample rate | 1 GSa/s |
| Maximum record length | 500 kpts per channel (digital channels only) |
| | 125 kpts per channel (analog and digital channels) |
| Threshold selections | TTL (+1.4 V), CMOS (+2.5 V), ECL (-1.3 V), User-definable (± 8.0 V in 10 mV stops) |
| Threshold accuracy ¹ | \pm (100 mV + 3% of threshold settings) |
| Maximum input voltage | ± 40 V peak CAT I |
| Maximum input dynamic range | ± 10 V about threshold |
| Minimum voltage swing | 500 mVpp |
| Input impedance | 100 kΩ ± 2% at probe tip, ~8 pF |
| Minimum detectable pulse width | 5 ns |
| Channel-to-channel skew | 2 ns (typical), 3 ns (maximum) |

^{1.} Denotes warranted specifications, all others are typical. Specifications are valid after a 30-minute warm-up period and from ± 10 °C firmware calibration temperature.

^{2. 1} mV/div and 2 mV/div is a magnification of 4 mV/div setting. For vertical accuracy calculations, use full scale of 32 mV for 2 mV/div sensitivity setting.

WaveGen - built-in function generator (Specifications are typical) (Continued)

Modulation Modulation types: AM, FM, FSK

Carrier waveforms: Ssine, ramp

Modulation source: Internal (no external modulation capability)

AM:

Modulation waveform: Sine, square, ramp Modulation frequency (1 Hz to 20 kHz)

Depth: 0 to 100%

FM:

Modulation: Sine, square, ramp (1 Hz to 20 kHz)

Modulation frequency (1 Hz to 20 kHz) Minimum carrier frequency: 10 kHz

Minimum deviation: 1 Hz

Maximum deviation: 100 kHz or (carrier frequency - 9 kHz), whichever is smaller

FSK:

Modulation: 50% duty cycle square wave

FSK rate: 1 Hz to 20 kHz

Minimum carrier frequency: 10 kHz

Minimum hop frequency: 2 x FSK rate to 10 MHz

| | William hop hoquency. 2 x roll rate to rolling | |
|---------------------------|--|--|
| Integrated digital voltme | ter (Specifications are typical) | |
| Functions | ACrms, DC, DCrms, frequency | |
| Resolution | ACV/DCV: 3 digits frequency: 5.5 digits | |
| Measuring rate | 100 times/second | |
| Autoranging | Automatic adjustment of vertical amplification to maximize the dynamic range of measurements | |
| Range meter | Graphical display of most recent measurement, plus extrema over the previous 3 seconds | |
| Measurement range (Spe | ecifications are typical) | |
| | Frequency range | |
| ACRms | 20 Hz to 100 kHz | |
| DCRms | 20 Hz to 100 kHz | |
| DC | NA | |
| Frequency counter | 1 Hz - BW of Scope | |

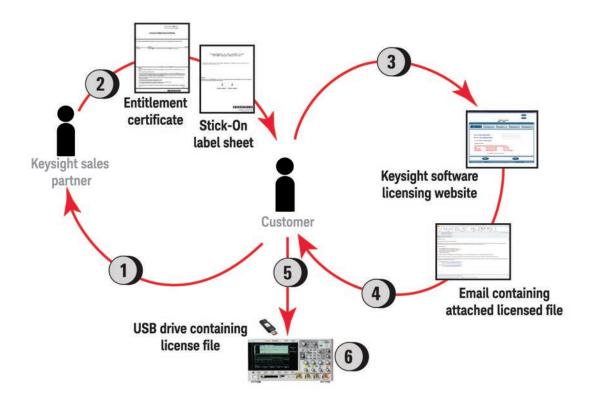

InfiniiVision X-Series Physical Characteristics

| Connectivity | | | | | |
|-----------------------------------|--|--|--|--|--|
| Standard ports | One USB 2.0 hi-speed device port on rear panel. Supports USBTMC protocol | | | | |

License-only Bandwidth Upgrades And Measurement Applications

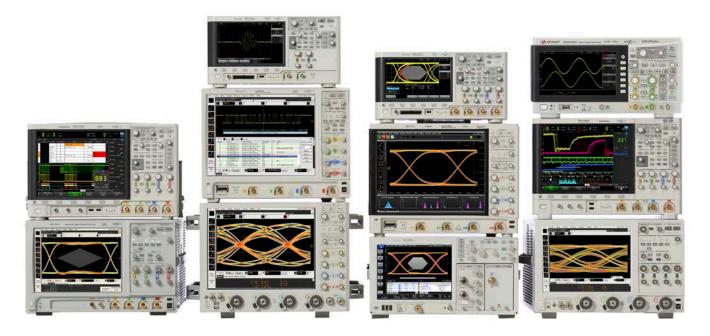

| Bandwidth upgrade models | | | | |
|--------------------------|------------------------------------|--|--|--|
| 2000 X-Series | | | | |
| DSOX2BW12 | 70 to 100 MHz, 2 ch, License only | | | |
| DSOX2BW14 | 70 to 100 MHz, 4 ch, License only | | | |
| DSOX2BW22 | 100 to 200 MHz, 2 ch, License only | | | |
| DSOX2BW24 | 100 to 200 MHz, 4 ch, License only | | | |

| Measurement applications | | |
|--------------------------|---|--|
| DSOX2MEMUP | Upgrade to 1 Mpts per channel | |
| DSOX2COMP | Computer serial triggering and analysis | |
| | (RS232/422/485/UART) | |
| DSOX2AUTO | Automotive serial triggering and analysis (CAN, LIN) | |
| DSOX2EMBD | Embedded serial triggering and analysis (I ² C, SPI) | |
| DSOX2WAVEGEN | WaveGen (built-in function generator) | |
| DSOXDVM | Integrated digital voltmeter | |
| DSOXEDK | Educator's kit | |
| DSOX2MASK | Mask testing | |
| DSOX2SGM | Segmented memory | |
| DS0X2MS0 | Upgrade to 8 digital timing channels | |

Process description

- Place order for a license only bandwidth upgrade or measurement appliction product to a Keysight sales partner. If multiple bandwidth upgrade steps are needed, order all the corresponding upgrade products required to get from current bandwidth to desired bandwidth. In the case where the new bandwidth requires higher bandwidth passive probes, they are included with the upgrade. For the DSOX2BW22 and DSOX2BW24, the N2863B 10:1 300 MHz passive probes (1 per channel) will be sent with the upgrade.
- Receive a paper or electronic .pdf Entitlement Certificate document for any of the orderable measurement applications For bandwidth upgrades only, you receive a stick-on label document indicating upgraded bandwidth specification.
- 3 Use Entitlement Certificate or electronic .pdf document containing instructions and certificate number needed to generate a license file for a particular 2000 X-Series oscilloscope model number and serial number unit.
- 4 Receive the licensed file and installation instructions via email.
- Copy license file (.lic extension) from email to a USB drive and follow instructions in email to install the purchased bandwidth upgrade or measurement application on the oscilloscope.
- For bandwidth upgrades only, attach bandwidth upgraded stick-on labels to front and rear panels of the oscilloscope. Model number and serial number of the oscilloscope do not change.

Keysight Oscilloscopes

Multiple form factors from 20 MHz to > 90 GHz | Industry leading specs | Powerful applications

www.axiestandard.org

AdvancedTCA® Extensions for Instrumentation and Test (AXIe) is an open standard that extends the AdvancedTCA for general purpose and semiconductor test. The business that became Keysight was a founding member of the AXIe consortium. ATCA®, AdvancedTCA®, and the ATCA logo are registered US trademarks of the PCI Industrial Computer Manufacturers Group.

LXI

www.lxistandard.org

LAN eXtensions for Instruments puts the power of Ethernet and the Web inside your test systems. The business that became Keysight was a founding member of the LXI consortium.

www.pxisa.org

PCI eXtensions for Instrumentation (PXI) modular instrumentation delivers a rugged, PC-based high-performance measurement and automation system.

Download your next insight

Keysight software is downloadable expertise. From first simulation through first customer shipment, we deliver the tools your team needs to accelerate from data to information to actionable insight.

Accelerate Technology Adoption.

Keysight Services

www.keysight.com/find/service

Our deep offering in design, test, and measurement services deploys an industry-leading array of people, processes, and tools. The result? We help you implement new technologies and engineer improved processes that lower costs.

Three-Year Warranty

www.keysight.com/find/ThreeYearWarranty

Keysight's committed to superior product quality and lower total cost of ownership. Keysight is the only test and measurement company with three-year warranty standard on all instruments, worldwide. And, we provide a one-year warranty on many accessories, calibration devices, systems and custom products.

Keysight Assurance Plans

www.keysight.com/find/AssurancePlans

Up to ten years of protection and no budgetary surprises to ensure your instruments are operating to specification, so you can rely on accurate measurements.

Keysight Channel Partners

www.keysight.com/find/channelpartners

Get the best of both worlds: Keysight's measurement expertise and product breadth, combined with channel partner convenience.
