

STANLEY FATMAX Metal Body Bi-Material Tri-Slide Knife

FMHT10367-0

- Tri-slide trigger can be engaged from three positions (top, left and right side)
- Auto-Retract blade retracts once trigger pressure is removed or material contact is lost
- Metal construction for ultimate strength and durability
- Integrated blade storage. The product is supplied with 4 x Round Nose Safety Blades
- Three blade depth settings to suit different materials and applications
- Blade lock provides security by limiting accidental blade exposure
- Instant blade change allowing a faster tool-free blade change for efficiency
- Contoured grip for increased comfort and control
- Lightweight construction helps reduce user fatigue
- Lanyard tether for easy transportation, security and storage

Description:

The STANLEY FATMAX Metal Body Bi-Material Tri-Slide Safety Knife has a pressure-sensitive blade that automatically retracts once disengaged from the cutting surface. Its oversized, contoured tri-slide button can be engaged from three positions (top, left, and right side). It also has a metal body with ergonomic, slip-resistant bi-material grip for durability, comfort, and control. With three blade depth settings to limit blade exposure and a blade lock to help prevent accidental blade exposure, this is a great cutting solution for corrugate, tape, and more. The lightweight design helps reduce user fatigue when working continuously with cutting tools in a fast-paced environment. The safety cutter reduces the risk of cuts, lacerations, and punctures on the job.
