## **BB-485DRCi**

# Industrial RS-232 to RS-422/485 Converter

#### Introduction

Model BB-485DRCi industrial-grade isolated serial converter changes RS-232 signals to RS-422 for increased range, or to RS-485 for increased range plus multi-drop capability.

Designed for rugged industrial use, the BB-485DRCi is UL approved and certified for operation in Class 1/Division 2 environments and offers 2,000V 3-way optical isolation on input, output, and power lines. In addition to optical isolation, the unit has surge suppression on the RS-422/485 lines. This DIN rail mountable converter optically isolates and converts unbalanced, full or half-duplex, RS-232 signals to balanced RS-422/485 signals at baud rates up to 115.2 kbps. Configuration is made via a 12-position DIP switch on the bottom of the converter.

Featuring Automatic Send Data Control circuitry, the converter does not require special software control of handshake signals in RS-485 mode. Removable terminal blocks for power and RS-422/485 signals make wiring easy. It is powered by a supply voltage of 10 to 48 Vdc which is isolated from all data and signal ground lines. An external power supply is required (not included, sold separately).

The BB-485DRCi may be suitable for use in Modbus and Allen-Bradley  $\ensuremath{\textcircled{B}}$  DH-485 applications.

#### **Automatic Send Data Control Explained**

As operating systems become more complex, it is increasingly difficult to control an RS-485 driver with standard software and the RTS line. This is especially true in Windows and multi-tasking operating systems. With Automatic Send Data Control circuit, driver control is in the converter hardware, so you do not have to work with software at all.

The circuit monitors data flow and enables the driver during transmission and automatically disables it when no data is being sent. There is no need to rework software or install new drivers. Most Advantech RS-232 to RS-485 converters and RS-485 serial cards include Automatic Send Data Control.

#### Allen-Bradley® 1761-NET-AIC

Model# BB-485DRCi can be used as a replacement for the Allen-Bradley® Advanced Interface Converter (AIC+) in some applications. The Model# 31D1-28100 null modem adapter accessory is required for these applications. Contact Advantech Technical Support for assistance regarding your specific installation needs. A White Paper is also available in the online technical library.

#### Features

- Converts RS-232 signals to RS-422/RS-485
- Three-way 2,000V optical isolation (input, output, power)
- Data rates up to 115.2 kbps
- Wide operating temperature: -40 to +80 °C
- DIN rail mountable
- UL Class 1/Division 2
- Modbus ASCII/RTU, Allen-Bradley® DH-485 compatible
- 10–48 Vdc input power range (power supply required, not included, sold separately)

#### **Ordering Information**

| Model No.  | RS-232 Connector | RS-422/485 Connector     | Isolation |
|------------|------------------|--------------------------|-----------|
| BB-485DRCI | DB9 Female (DCE) | Removable Terminal Block | 2 kV      |

#### Accessories – Sold Separately

BB-MDR-20-24 – Power supply, 24 Vdc, 1 A, DIN rail mount BB-EK-CLIP-MPC – Replacement DIN rail clip

BB-TBKT1 - Replacement terminal block, 2-position, 5.08mm, 8A, 300V

BB-TBKT2 - Replacement terminal block, 5-position, 5.08mm, 8A, 300V

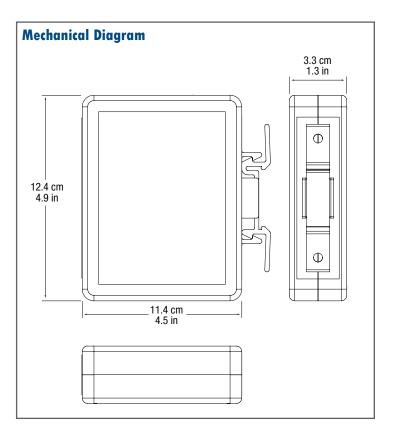

BB-31D1-28100 - Null Modem Adapter (Allen-Bradley® applications)
