## Catalog Highlights

- Table of Contents (see pages i- viii)
- Complete product listing by family
- Color Coded Tabs
- Quick and easy identification of sections
- Part Number Index is shown on pages M1 - M21
- Complete part number listing
- Installation Tooling and Die Selection Chart page references are included
- Features and Benefits Pages are shown at the beginning of each section
- Highlight unique features of PANDUIT ${ }^{\circ}$ products
- Product Selection Guides are shown at the beginning of each section
- Quick way to identify the appropriate product
- Page references are included
- Installation Instructions
- PAN-TERM ${ }^{\bullet}$ Terminals, Disconnects, Splices and Wire Joints crimping instructions are shown on page G2
- PAN-LUG ${ }^{\text {mi }}$ Compression Lugs and Splices crimping instructions are shown on page G3
- Pan-Lug"' Copper HTAP and Clear Cover System crimping instructions are shown on page G4
- Aluminum Mechanical Lug installation instructions are shown on page H34
- Installation Tooling and Die Selection Charts are shown on pages L2-L41
- Wire strip lengths are shown on these charts
- Testing Agencies and Test Standards are shown on page L1
- Conductor Charts are shown on pages L43-L47
- Stud Size Chart is shown on page L48
- Recommended Termination Hardware is shown on page L42
- Support Products are shown on pages K1 - K41

## System Overview

PANDUIT ${ }^{\circledR}$ is a global leader in reliable solutions for terminating, splicing, tapping and disconnecting conductors to meet a variety of electrical applications. PANDUIT ${ }^{\ominus}$ PAN-TERM ${ }^{\bullet}$ terminal products include insulated and non-insulated terminals, disconnects, splices and ferrules for terminating wire sizes \#22 AWG - \#2 AWG. PANDUIT ${ }^{\bullet}$ PAN-LUG ${ }^{\text {m" }}$ products include copper and aluminum compression and mechanical connectors for use with conductor sizes \#14 AWG - 1,000 kcmil. All PANDUIT ${ }^{\circ}$ connectors are designed to provide ease of identification, fast termination and optimum conductivity.

- World-class quality — IS09001 and ISO14001
- High performance and reliability
- Ease of installation and use

- Reduction in total cost of ownership
- Meet the requirements of UL, CSA and NEBS Level 3, as noted

PANDUIT ${ }^{\oplus}$ provides the complete termination system including manual, pneumatic, hydraulic and battery powered hydraulic crimping tools. PANDUIT ${ }^{\ominus}$ installation tools are designed with ergonomic features and controlled cycle mechanisms that facilitate ease of operation and ensure reliable, high quality terminations. With a continued focus on the needs of the customer and a high level of investment in research and development, PANDUIT ${ }^{\circ}$ Termination Solutions meet today's needs.

For more program details, go to www.panduit.com/clip or contact Customer Service at (800) 777-3300.

## Global Services and Supporting Programs

## CLIP Program

The Contractor Loyalty Incentive Program (CLIP) was developed to strengthen relationships and form alliances with valued contractors. Use PANDUIT ${ }^{\circ}$ as your preferred vendor for terminals, power connectors, cable ties, identification products, surface raceway, installation tooling and a host of related products, and earn credit towards PANDUIT ${ }^{\circ}$ tooling.

Benefits of being a CLIP participant include annual credit incentives, continuous training, potential project leads, alliance with a global, world-class electrical manufacturer and exclusive promotions.

## Tooling Partinership Program

The Tooling Partnership Program is designed to make low-cost or no cost tooling available to the customer based on qualification and commitment to termination product purchases.

For more program details, go to www.panduit.com/tpp or contact Customer Service at (800) 777-3300.

## PC Express Program

PC Express offers the ultimate level of service for your power connector needs. PC Express is offered through select authorized PANDUIT ${ }^{\oplus}$ distributors. The PC Express Program provides customers with the ability to receive power connector orders, via second day delivery, at no additional charge.

The customer can place an order of any size, up to a 300 lb . maximum weight, through an authorized PANDUIT ${ }^{\bullet}$ distributor and PANDUIT ${ }^{\oplus}$ will absorb the second day freight charges. All orders will be shipped directly to the customer.
Orders received by PANDUIT ${ }^{\circ}$ Customer Service before 3:00 P.M. CST will be shipped on the same day, via second day delivery. Orders received after 3:00 P.M. CST will be shipped the next business day, via second day delivery.

For more program details, go to www.panduit.com/pcexpress or contact Customer Service at (800) 777-3300.
Note: All programs and benefits are subject to terms and conditions.

## PANDUIT ${ }^{\circ}$ Custom Copper Compression Lugs

PANDUIT ${ }^{\ominus}$ offers custom lug capabilities to meet your special dimensional specifications and requirements with premium two day or standard two week delivery. PANDUIT ${ }^{\bullet}$ provides a wide variety of dimensional choices for \#8 AWG to 250 kcmil copper code lugs and \#8 AWG to 4/0 AWG copper flex lugs, including the following options:

| Tongues | - Straight or Bent <br> — Stacking <br> — Special Lengths |
| :---: | :---: |
| Stud Holes | — Various Sizes, \#10 to 1/2" <br> - Multiple Hole Sizes and Spacing <br> - Special Locations |
| Barrels | —Three Standard Lengths: Short, Standard and Long - Custom Lengths |

For more program details, see pages F110 - F112, go to www.panduit.com/customlugs or contact Customer Service at (800) 777-3300.

## Pan-Term ${ }^{\circ}$ Terminals

PANDUIT ${ }^{\ominus}$ PAN-TERM $^{\ominus}$ Terminals are designed and manufactured for fast assembly, and reliable performance. PANDUIT ${ }^{\oplus}$ provides an extensive line of tooling designed specifically to provide optimum performance. As the demand for loose piece terminals increases, it becomes essential to provide a complete system for termination products.

- Funnel entry available on vinyl and nylon insulated terminals and disconnects, speeds insertion and
 minimizes turned back wire strands
- Made of electrolytic copper to provide an optimum combination of crimp forming and high conductivity properties to provide optimum terminations
- Offered in various types including rings, forks, flanged forks, locking forks and short locking forks
- Available in sizes from \#26 - \#2 AWG and stud hole diameters from \#2-1/2 inch. Non-insulated tubular terminals sizes from \#8-250 kcmil
- Applicable sizes are UL Listed and CSA Certified, as noted
- Wide assortment of manual, controlled cycle, battery operated hydraulic and pneumatic crimping tools for reliable connections at the lowest installed cost

PANDUIT ${ }^{\oplus}$ continually provides new designs to meet the application challenges encountered by our customers. PANDUIT ${ }^{\circ}$ offers a wide assortment of $P_{A N}$-TERM ${ }^{\circ}$ termination products to meet customer needs at the lowest installed cost.

## (HL) (1) Multiple Stud Terminal, Non-Insulated

## Type P-610R

## Ring Terminal, Non-Insulated - High Temperature

## Type P-RHT

Compression
Connectors

- Nickel plated copper
- Brazed seam

Support Products

- Single terminal for \#6, \#8, and \#10 size studs

- Brazed seam
- Beveled wire lead-in
- For temperatures up to $650^{\circ} \mathrm{F}\left(343^{\circ} \mathrm{C}\right)$

System Overview

Terminals

Disconnects
**Flammability - UL94V-21HB*.
*Proprietary blend of UL94V-2 and UL94HB flammability related materials. for corrosion resistance.

Nylon Insulated Terminals With Insulation Grip Sleeve Type PMN or PMNF

insertion and lower installed cost

## Features and Benefits - Pan-TERM ${ }^{\circledR}$ Metric Terminals

All PANDUIT ${ }^{\oplus}$ Terminals feature high quality materials made with electrolytic copper for high conductivity and are tin plated

Vinyl Insulated Terminals With Insulation Support

## Type PMV

**Flammability - UL94V-0

## Pan-Term ${ }^{\circ}$ Disconnects

> PANDUIT ${ }^{\ominus}$ PAN-TERM ${ }^{\ominus}$ Disconnects are designed and precision made to function as a reliable method of making quick, repeatable interconnections. Available with nylon, premium nylon or vinyl insulation or non-insulated.

System
Overview

Terminals

- Fully insulated design provides excellent protection from electrical shorts and provides additional installer protection for safety from electrical shocks
- Funnel entry speeds insertion and minimizes turned back wire strands
- Integrated metal insulation grip provides double crimp insulation grip for high vibration or conductor strain environments on select SupRA-GrIP" disconnects and Disco-Lok"' disconnects and DIsco-GRIP" disconnects
- Applicable sizes are UL Listed and CSA Certified, as noted
- Wide assortment of manual, controlled cycle, battery operated hydraulic and pneumatic crimping tools for reliable connections at the lowest installed cost

PANDUIT ${ }^{\circ}$ continually provides new designs to meet the application challenges encountered by our customers. PANDUIT ${ }^{\bullet}$ offers a wide assortment of PAN-TERM $^{\oplus}$ termination products at the lowest installed cost.

## Applicable PAN-TERM ${ }^{\oplus}$ products meet or exceed the following test specifications:

- UL310 (Disconnects)
- CSA C22.2 No. 153 (all designs)

UL and CSA Listed products are shown with the applicable logos in the product section.
UL file \#E78522 and CSA file \#LR31212.

System

- Internal wire barrel serrations for maximum wire tensile strength
- Tab size clearly marked on insulation housing
- Tin plated brass stamping
- Internal wire stop
- Mates with DNF-250FIMB

Overview

Disconnects

## (1L) Supra-GriP ${ }^{T M}$ Female Disconnect, Nylon Fully Pre-Insulated

## Type DNG-FB

- Funnel entry
- Integrated metal insulation grip to meet double crimp requirements
- Color coded insulation

## Features and Benefits - PAN-TERM ${ }^{\circledR}$ Metric Disconnects

Metric Nylon Fully Insulated
Female and Male Tabs
Type DMNF-FIB

Vinyl Barrel Insulated Female Receptacles Type DMV

## Available in

tab sizes to
accommodate
2.8, 4.8 and 6.3 mm tabs
*Rated at 600V.
**Flammibility UL94V-0.
Insulation grip sleeve provide a superior insulation crimp for high vibration and high strain relief applications

Nylon Barrel Insulated Female Receptacles and Male Tabs Type DMNF

DOV.

Non-Insulated Female Receptacles and Male Tabs Type DM

## Available in <br> tab sizes to <br> accommodate <br> 2.8, 4.8 and

6.3 mm tabs

Sleeved barrel assures crimp reliability

Maximum recommended operating temperature $150^{\circ} \mathrm{C}\left(302^{\circ} \mathrm{F}\right)$

(

## Pan-Term ${ }^{\text { }}$ Splices

PANDUIT ${ }^{\circ}$ PAN-TERM ${ }^{\circ}$ Splices are designed and manufactured for fast assembly, and long reliable performance. As the demand for splices increases, it becomes essential to provide a complete system for termination products. We provide an extensive line of tooling designed specifically to provide optimum performance when used as a system for terminating.

- Suitable for in-line, parallel and group splicing
 of wires
- Nylon and vinyl insulated as well as non-insulated
- Available in sizes from \#26 AWG - \#10 AWG
- Internal wire stops on butt splices prevent over insertion of wires
- Applicable sizes are UL Listed and CSA Certified, as noted
- Wide assortment of manual, controlled cycle, battery operated hydraulic and pneumatic crimping tools for reliable connections at the lowest installed cost

PANDUIT ${ }^{\circ}$ continually provides new designs to meet the application challenges encountered by our customers. PANDUIT ${ }^{\oplus}$ offers a wide assortment of PAN-TERM $^{\circ}$ termination products to meet customer needs at the lowest installed cost.

$\ddagger$ UL and CSA approved tooling/product combinations.

## Heat Shrink, Butt Splices

## Type BSH

- Form a protective barrier that provides environmentally sealed terminations
- Provide excellent strain relief for improved crimp integrity
- After crimping, heat shrink insulation is activated with a standard heat gun or an open flame
- Adhesive lined heat shrink

|  | Part Number | Wire Range | Color Code | Max. Ins. | Figure Dim. (In.) | Wire Strip Length | Crimp Tool | Std. <br> Pkg. <br> Qty. | Std. <br> Ctn. <br> Qty. |

## Metric Wire Joints, Nylon Insulated

## Pan-Term ${ }^{\circ}$ Ferrules

PANDUIT ${ }^{\oplus}$ PAN-TERM $^{\ominus}$ Ferrule end sleeves terminate stranded wire into terminal blocks with superior termination performance. A wide assortment of ferrule styles and tool designs provide a proven way to make reliable connections, especially for limited space applications. Insulation flare allows for ease of wire insertion and eliminates loose strands of wire. Encapsulated crimp contains loose wires to eliminate stray wire breakage.

- Insulated single wire range of \#26 - \#1 AWG, sizes meets French and DIN color code standards
- Insulated twin wire end sleeve range of \#22 - \#10 AWG, sizes meets DIN color code standard
- Non-insulated wire range of \#24 - \#1 AWG

- Ideal for control panel and terminal block applications
- Wide assortment of manual, controlled cycle, battery operated hydraulic and pneumatic crimping tools for reliable connections at the lowest installed cost

PANDUIT ${ }^{\circ}$ continually provides new designs to meet the application challenges encountered by our customers. PANDUIT ${ }^{\oplus}$ offers a wide assortment of $P_{A N}$-TERM ${ }^{\circ}$ termination products to meet customer needs at the lowest installed cost.

System Overview

## Features and Benefits - Pan-Term ${ }^{\circledR}$ Ferrules

PANDUIT ${ }^{\oplus}$ Ferrules are available for wiring applications from \#26 AWG to \#1 AWG. Offerings include insulated and non-insulated ferrules, in single-wire or double-wire configurations. Insulated ferrules are color coded to DIN or French standards.

System Overview

## Insulated Ferrules - Single Wire DIN End Sleeve Type FSD

- Ease of wire insertion eliminates loose strands of wire
- Wire strands will not fray or spread
- No unwanted contacts when installing or removing the wire
- Maximizes a reliable electrical connection
- Encapsulated crimp eliminates stray wire breakage
- Great for limited space applications

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| KP-FSD1 | Ferrule kit includes: \#24 - \#18 AWG Insulated DIN Ferrules. Case includes: 30 pieces each of FSD73-6, FSD74-6, FSD75-8, FSD76-8 and FSD77-8. | 1 |
| KP-FSD2 | Ferrule kit includes: \#22 - \#14 AWG Insulated DIN ferrules. Case includes: 100 pieces each of FSD76-8, FSD77-8, FSD78-8, 50 pieces each of FSD75-8 and FSD80-8. | 1 |
| KP-FSD3 | Ferrule kit includes: \#12 - \#6 AWG Insulated DIN Ferrules. Case includes: <br> 50 pieces of FSD81-10, <br> 20 pieces each of FSD82-12 and FSD83-12, <br> 10 pieces of FSD84-12. | 1 |
| KP-F1 | Ferrule kit includes: \#22 - \#14 AWG Non-Insulated Ferrules. Case includes: <br> 500 pieces of F75-6, <br> 400 pieces each of F76-6 and F77-6, <br> 300 pieces of F78-7, <br> 200 pieces of F80-7. | 1 |
| KP-F2 | ```Ferrule kit includes: \#12 - \#6 AWG Non-Insulated Ferrules. Case includes: 150 pieces of F81-9, 100 pieces of F82-10, 80 pieces of F83-12, 40 pieces of F84-12.``` | 1 |

## Pan-Lug ${ }^{\text {m" }}$ Compression Connectors

PANDUIT ${ }^{\circ}$ PAN-LUG ${ }^{m "}$ Compression Connectors provide permanent terminations for a variety of power and grounding applications, with innovation, highest reliability and lowest installed cost. PANDUIT ${ }^{\circ}$ offers the first and only copper compression lugs and splices that meet Network Equipment-Building Systems (NEBS) Level 3 requirements as tested by Telcordia Technologies. NEBS Level 3 assures that product performance is suitable for equipment applications that demand minimal service interruptions over the life span of the equipment.

- Functional product information is marked directly on the connector, facilitating the identification, ordering and usage of the compression connector
- Color coded to facilitate quick identification of the proper crimp die
- Made from high strength, high conductivity electrolytic copper and aluminum alloy materials to provide optimum connectivity for power and grounding applications
- UL Listed or Recognized, CSA Certified and tested by Telecordia - meets NEBS Level 3, as noted
- Terminations using PANDUIT ${ }^{\bullet}$ PAN-Lug"' Compression Connectors are also UL Listed and CSA Certified with specified competitor tools
- Wide assortment of manual, controlled cycle, battery operated hydraulic and pneumatic crimping tools for reliable connections at the lowest installed cost

PANDUIT ${ }^{\circ}$ PAN-LUG $^{\text {™ }}$ Compression Connectors are designed for use with many different code and flex conductor types and are available in a broad range of styles and sizes including copper one-hole, two-hole and blank tongue lugs and splices; aluminum one-hole and two-hole lugs and splices; copper CTAP style taps; copper in-line reducing splices; and innovative copper HTAPs with snap-on clear covers. PANDUIT ${ }^{\circ}$ offers a wide assortment of PAN-LUG ${ }^{m}$ Power and Grounding Connectors to meet customer needs and today's application requirements.

Code Conductor, One-Hole, Short Barrel with Window Lug, $90^{\circ}$ Angle

## For Use with Stranded Copper Conductors

Type LCAS-F

- Short barrel for limited space applications
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- Tin plated to inhibit corrosion

UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies

- Tested by Telcordia - meets NEBS Level 3

## Code Conductor, One-Hole, Standard Barrel with Window Lug, $45^{\circ}$ Angle <br> (나) (19)

## For Use with Stranded Copper Conductors

## Type LCA-H

- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{\star \star}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies

UL) $\underbrace{8}$
Code Conductor, One-Hole, Standard Barrel with Window Lug, $90^{\circ}$ Angle

## For Use with Stranded Copper Conductors

## Type LCA-F

- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{m i}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3

## NEWI (14) (1) <br> Code Conductor, One-Hole, Standard Barrel with Window, Narrow Tongue Lug

## For Use with Stranded Copper Conductors

## Type LCAN

- Narrow tongue width for limited space applications
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE" ${ }^{\text {m" }}$ dieless crimping tools $\ddagger$

## ®ㅛ Code Conductor, Short Blank Tongue, Standard Barrel with Window Lug

## For Use with Stranded Copper Conductors

## Type LCA-00

- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Recognized for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ and specified competitor crimping tools and dies

## BTJUIT

## (4). © Code Conductor, One-Hole, Long Barrel Lug, $90^{\circ}$ Angle

## For Use with Stranded Copper Conductors

Type LCB-F

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion

- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT® UNI-DIE ${ }^{\text {m" }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3

## BNIUIT

## (4L) Co Code Conductor, Two-Hole, Standard Barrel with Window Lug, $45^{\circ}$ Angle

## For Use with Stranded Copper Conductors

## Type LCD-H

- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{\text {TM }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Available with NEMA hole sizes and spacing

## (ㄴ) (1) Code Conductor, Two-Hole, Long Barrel Lug, $45^{\circ}$ Angle

## For Use with Stranded Copper Conductors

## Type LCC-H

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{\text {m" }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Available with NEMA hole sizes and spacing

System Overview
minals

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion

## For Use with Stranded Copper Conductors

## Type LCC-F

- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{\text {TM }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Available with NEMA hole sizes and spacing

$\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
**Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
$\bullet$ NEMA hole sizes and spacing.

## NEW! (UL) Code Conductor, Two-Hole, Long Barrel with Window Lug

## For Use with Stranded Copper Conductors

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Inspection window to visually assure full conductor insertion
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T{ }^{\circledR}$ and specified
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{\text {Tw }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

## IATMUI <br> TERMINATION SOLUTIONS

## NEWI <br> Code Conductor, Two-Hole, Long Barrel with Window Lug, $45^{\circ}$ Angle

## For Use with Stranded Copper Conductors

## Type LCC-WH

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Inspection window to visually assure full conductor insertion
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{\star *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT $^{\oplus}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\oplus}$ UNI-DIE ${ }^{\text {m" }}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

$\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
*Not tested to NEBS Level 3 requirements.
**Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

- NEMA hole sizes and spacing

## NEWI (LL) © Code Conductor, Two-Hole, Long Barrel with Window, Narrow Tongue Lug

## For Use with Stranded Copper Conductors

## Type LCCN-W

- Narrow tongue width for limited space applications
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Inspection window to visually assure full conductor insertion
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\oplus}$ and specified competitor crimping tools and dies
- UL Listed and CSA Certified for wire range-taking capability when crimped with PANDUIT ${ }^{\circledR}$ UNI-DIE ${ }^{T M}$ dieless crimping tools $\ddagger$
- Tested by Telcordia - meets NEBS Level 3
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

$\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

## ${ }^{\text {BNOUNT }}$

## (4L) © Code Conductor, Two-Hole, Long Barrel with Corona Relief Taper Lug

## To Facilitate Use with Stranded Copper Conductors in Applications of 5000V or More

## Type LCCH

- Externally chamfered barrel end inhibits Corona effect when used in high voltage applications
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- Available with NEMA hole sizes and spacing

## For Use with Stranded Copper Conductors

## Type LCC-00W

- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Inspection window to visually assure full conductor insertion
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion
- UL Recognized for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies

System Overview

## (1L) Code Conductor, Short Barrel, Butt Splice

## For Use with Stranded Copper Conductors

Type SCSS

Terminals

- Short barrel for limited space applications
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Internal wire stops to prevent over-insertion of conductor
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies
- Tested by Telcordia - meets NEBS Level 3

## (4L) Code Conductor, Long Barrel with Corona Relief Taper Splice

## To Facilitate Use with Stranded Copper Conductors in Applications of 5000V or More Type SCH

- Externally chamfered barrel end inhibits Corona effect when used in high voltage applications
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Internal wire stops to prevent over-insertion of conductor
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies

## Code Conductor, Parallel Splice

## For Use with Stranded Copper Conductors

## Type PS

- Designed to splice a range of conductor sizes with a single connector
- Versatile, can also be used for pigtailing
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection

[^9]- Tin plated to inhibit corrosion
- $90^{\circ} \mathrm{C}$ temperature rated and for use up to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies

## NEW! (L) (内) Flex Conductor, One-Hole, Standard Barrel with Window Lug

For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCAX

Terminals

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
Disconnects
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ and specified competitor crimping tools and dies

System Overview

Terminals

Disconnects

## NEWI <br> $\mathrm{SH}^{\circ}$

Flex Conductor, One-Hole, Standard Barrel with Window Lug, $45^{\circ}$ Angle

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCAX-H

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV} * *$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ and specified competitor crimping tools and dies

## NEWY! <br> 

Flex Conductor, One-Hole, Standard Barrel with Window, Narrow Tongue Lug
For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors
Type LCAXN

- Narrow tongue width for limited space applications
- Can be used with flex conductor class: G, H, I, K, M and Locomotive
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies

$\ddagger$ See pages L22, L23 in Technical Info section for tool and die information.

## NEW! <br>  <br> Flex, One-Hole, Standard Barrel with Window, Narrow Tongue Lug, $45^{\circ}$

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

Type LCAXN-H

- Narrow tongue width for limited space applications
- Can be used with flex conductor class: G, H, I, K, M and Locomotive
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\oplus}$ and specified competitor crimping tools and dies

## BTJUIT <br> TERMINATION SOLUTIONS

## (4) © Flex, One-Hole, Standard Barrel with Window, Flared Lug, $90^{\circ}$ Angle

## For Use with Flexible and Extra-Flexible Copper Conductors <br> Type LCAF-F

- Can be used with flex conductor class: $\mathrm{K}, \mathrm{M}$ and Locomotive
- Flared entry prevents bent back strands when inserting fine strand conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$ and temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ crimping tools and dies
- Tested by Telcordia - meets NEBS Level 3

## BTMUIT <br> TERMINATION SOLUTIONS

## NEW! ① © Flex Conductor, One-Hole, Long Barrel with Window Lug

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCBX

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT® and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{\star *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT $^{\oplus}$ and specified competitor crimping tools and dies
- Meets TIA-607 requirements for network systems grounding applications

## NEWI (H) © $\mathrm{SH}_{\text {• }}$ Flex Conductor, One-Hole, Long Barrel with Window Lug, $45^{\circ}$ Angle

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

Type LCBX-H

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- Meets TIA-607 requirements for network systems grounding applications

## NEW! (1L) ${ }^{\circ}$ <br> Flex Conductor, Two-Hole, Standard Barrel with Window Lug, $90^{\circ}$ Angle

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors Type LCDX-F

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- Available with NEMA hole sizes and spacing

## NEW! <br> (UL) $\mathrm{SP}^{-}$ <br> Flex, Two-Hole, Standard Barrel with Window, Narrow Tongue Lug, $45^{\circ}$

## For Use with Flexible Copper Conductors

## Type LCDXN-H

- Narrow tongue width for limited space applications
- Can be used with locomotive flex conductor
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies

## IATMUIT <br> TERMINATION SOLUTIONS

## NEW! UL) © $\mathrm{S}_{\text {Lisio }}$ Flex Conductor, Two-Hole, Long Barrel with Window Lug

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCCX

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

## Technical Info

Index

$\ddagger$ See pages L22, L23 in Technical Info section for tool and die information.
${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

- NEMA hole sizes and spacing.

## NEWI (U) (W) Flex Conductor, Two-Hole, Long Barrel with Window Lug, $45^{\circ}$ Angle

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCCX-H

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ and specified competitor crimping tools and dies
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

Crimping

## NEW! (UL) © Flex Conductor, Two-Hole, Long Barrel with Window Lug, $90^{\circ}$ Angle

## For Use with Flexible, Extra-Flexible and Code Stranded Copper Conductors

## Type LCCX-F

- Can be used with code conductor and flex conductor class: G, H, I, K, M and Locomotive
- Long barrel maximizes number of crimps and provides premium wire pull-out strength and electrical performance
- Generously beveled wire entry prevents bent back strands when inserting conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ and specified competitor die index numbers for proper crimp die selection
- Inspection window to visually assure full conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\oplus}$ and specified competitor crimping tools and dies
- Meets TIA-607 requirements for network systems grounding applications
- Available with NEMA hole sizes and spacing

${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
$\bullet$ NEMA hole sizes and spacing.

## (4L) © Flex Conductor, Two-Hole, Long Barrel, Flared Lug

## For Use with Flexible and Extra-Flexible Copper Conductors

## Type LCCF

- Can be used with flex conductor class: K, M and Locomotive
- Long barrel maximizes the number of crimps and provides premium wire pull-out strength and electrical performance
- Flared entry prevents bent back strands when inserting fine strand conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ die index numbers for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$ and temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ crimping tools and dies
- Tested by Telcordia - meets NEBS Level 3
- Available with NEMA hole sizes and spacing

## 

## (Ll) © ${ }^{5}$. Flex Conductor, Standard Barrel, Flared, Butt Splice

## For Use with Flexible and Extra-Flexible Copper Conductors

## Type SCSF

- Can be used with flex conductor class: $\mathrm{K}, \mathrm{M}$ and Locomotive
- Flared entry prevents bent back strands when inserting fine strand conductor into barrel
- Color coded barrels marked with PANDUIT ${ }^{\circledR}$ die index numbers for proper crimp die selection
- Internal wire stops to prevent over-insertion of conductor
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$ and temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I{ }^{\oplus}$ crimping tools and dies
- Tested by Telcordia - meets NEBS Level 3

NEMI UL) ( SB Code/Flex Conductor, with Window, In-Line Reducing Splice For Use with Stranded Copper Code and Class I Flex Conductors Type RSC

- Low profile design provides minimum space requirements
- Manufactured from seamless, high conductivity copper tubing
- Color coded barrels marked with PANDUIT ${ }^{\text {® }}$ and specified competitor die index numbers for proper crimp die selection
- Inspection windows in each barrel to visually assure full conductor insertion
- Generous internally beveled wire entry for easy conductor insertion
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and dies
- Also sold as a kit with crystal clear PVC heat shrink (see pages F102, F103).

##  <br> TERMINATION SOLUTIONS

## (1L) (14) Code Conductor, Thin Wall, CTAP

## For Copper Code Stranded Connections

## Type CTAPF

- For copper-to-copper tapping splicing or pigtailing
- Wire range-taking capability minimizes inventory requirements
- Color coded for proper crimp die selection
- Ribbed design provides high strength
- Made from high conductivity wrought copper
- UL Listed for use up to 600 V , temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\oplus}$ and specified competitor crimping tools and dies

## IATUUIT <br> TERMINATION SOLUTIONS

## NEW! (4) © Code/Flex Conductor HTAP Kit

## Type HTWC

- Includes all components to make a complete HTAP and cover installation: HTCT HTAP, matching CLRCVR clear cover and cable ties
- Each HTCT HTAP designed to terminate a wide range of copper code and flex conductor combinations to accommodate a variety of applications
- HTAPs incorporate a unique slotted design that allows for quick and easy installation using supplied PANDUIT ${ }^{\circledR}$ cable ties; saves time and cost
- Matching clear covers are made from high impact, optical grade plastic and provide high impact strength and $360^{\circ}$ viewing of installed HTAP
- Clear covers have a UL 94 V-0 flame rating and an oxygen index of 28 providing self-extinguishing, flame retardant properties
- UL Listed and CSA Certified for applications up to 600V when crimped with PANDUIT® and specified competitor crimping tools and PANDUIT ${ }^{\oplus}$ crimp dies
- See page G4 for detailed installation instructions

## NEW! (1) © Code/Flex Conductor HTAP

## For Making Parallel and Multiple Tap Connections on Code and Flex Conductors

## Type HTCT

- Used to tap into continuous conductors as a splice or pigtailing
- Each HTAP terminates a wide range of conductor sizes and combinations of code and flex conductors Class G, H, I and Locomotive to suit a variety of applications
- Slotted design allows quick and easy assembly of conductor to HTAP using 3 PANDUIT ${ }^{\circledR} 94 \mathrm{~V}-0$ cable ties included
- Tap grooves are separated from one another allowing them to function independently so HTAP can be used with a single or multiple taps providing maximum design and installation flexibility
- Color coded and marked with PANDUIT ${ }^{\circledR}$ die index numbers for proper crimp die selection
- UL Listed and CSA Certified for applications up to 600V when crimped with PANDUIT ${ }^{\circledR}$ and specified competitor crimping tools and PANDUIT ${ }^{\circledR}$ crimp dies
- Tin plated to inhibit corrosion
- See page G4 for detailed installation instructions

## IATMUI

## NEWI Clear Covers for HTCT HTAPs

## For Use with Solid and Stranded Copper Code Conductors <br> Type CLRCVR

- Made of high impact, optical grade plastic to provide high impact strength and $360^{\circ}$ inspections of crimped connection to assure the crimp is complete and the correct die was used
- Incorporate dual self-latching spring loaded latches and supplied with two PANDUIT ${ }^{\circledR}$ UL $94 \mathrm{~V}-0$ cable ties - allow for easy snap-on assembly and ensure covers are secured
- Low profile design minimizes space requirements
- Each cover half supports installation information labels inside plastic retainer strips to allow labels to be viewed on either side of cover and to protect labels from being removed
- Incorporate molded in flash barriers which encompass the HTAP installation providing protection against electrical flash over
- UL 94 V-0 flame rating and oxygen index of 28 providing self-extinguishing, flame retardant properties
- Part number, voltage rating, temperature rating and HTCT part number molded into cover for easy identification
- See page G4 for detailed installation instructions

## PANDUIT ${ }^{\oplus}$ Custom Copper Compression Lugs for Special Applications

Manufactured to meet your special dimensional specifications and requirements
PANDUIT ${ }^{\circledR}$ has incorporated manufacturing processes that permit custom lug capabilities with premium two day or standard two week delivery. PANDUIT ${ }^{\circledR}$ offers a wide variety of dimensional choices for \#8 AWG to 250 kcmil copper code lugs and \#8 AWG to 4/0 AWG copper flex lugs.

## Options:

$\begin{array}{ll}\text { Tongues } & \text { - Straight or Bent } \\ & \text { - Stacking } \\ & \text { Special Lengths }\end{array}$

Stud Holes —Various Sizes, \#10 to 1/2"

- Multiple Hole Sizes and Spacing
- Special Locations

Barrels

- Three Standard Lengths: Short, Standard and Long
- Custom Lengths

With Dependable PANDUIT ${ }^{\circledR}$ Service

- Excellent Quality

- Fast Delivery
- Low Minimum Order Quantities
- Competitive Prices

## Custom Lugs Spec Sheet Instructions

## Use these instructions to design your own custom lugs. Fill in the Custom Lugs Preliminary Spec Sheet to place your custom lugs order. You can copy the sheet from page F112 or download it at www.panduit.com/customlugs.

1. Fill out this section completely.
2. Check the conductor size and type (Code or Flex). Fill in the strand designation and type for flex conductor.
3. Check a barrel length. Refer to Chart " $A$ " for standard barrel length dimensions. If the length you require is not listed, fill in the special box with your required length.
4. Check "YES" if an inspection hole is required; check "NO" if it is not required.
5. Check the barrel end type you require.
6. Check a stud size and tongue style (one-hole, two-hole or blank). Refer to Chart "A" and Chart "B" for standard tongue dimensions. If you require tongue dimensions other than those listed, fill in the box that corresponds to the feature that requires a special dimension. You must fill in a hole spacing on two-hole lugs and tongue length on blank tongue lugs.

## NOTE: Steps 7 and 8 are for bent or stacking lugs ONLY.

7. Check the stacking lug you require. If both upper and lower lugs are required, check "both". (2 drawings will be provided.) If you choose a bent stacking lug, fill in the required angle.
8. Check the bent lug you require. If you check "special angle", fill in the required angle.
9. Check the special options you require. Fill in any blank lines that correspond to the option you've selected.
10. Fax or mail the completed spec sheet to PANDUIT ${ }^{\oplus}$ Corp. Address and phone/fax numbers are listed on the bottom of the Custom Lugs Preliminary Spec Sheet (see page F112 or go to www.panduit.com/custom/ugs). PANDUIT ${ }^{\oplus}$ will send drawings for your approval.

Terminals

## (4L) (1P) Code Conductor, One-Hole, Aluminum Lug

## For Use with Stranded Aluminum or Copper Code Conductors

## Type LAA

- Manufactured from high conductivity thick wall wrought aluminum
- Factory pre-filled with joint compound and sealed with easy pull-out end plug to inhibit corrosion
- Color coded end plug and PANDUIT ${ }^{\oplus}$ and specified competitor die index numbers marked on barrel for proper crimp die selection
- Enclosed barrel prevents corrosive material from entering barrel when used in harsh environments
- Tin plated to inhibit corrosion
- UL Listed for use up to $35 \mathrm{KV}^{* *}$, temperature rated $90^{\circ} \mathrm{C}$ and CSA Certified to 600 V when crimped with $P A N D U I T^{\circledR}$ and specified competitor crimping tools and dies
$\ddagger$ See pages L40, L41 in Technical Info section for tool and die information.
${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
See pages H33, F118 for PANDUIT ${ }^{\circledR}$ joint compounds recommended for pad to pad and conductor connections.

## Code Conductor, Aluminum HTAP

## For Combinations of Aluminum - to - Aluminum or Aluminum - to - Copper Code Conductors

Type HTAP

- Dual rated - used to tap into continuous runs of aluminum conductor with either aluminum or copper tap conductor
- Factory pre-filled with joint compound to inhibit corrosion
- Conductor range for each tap groove and die index number marked on barrel to identify proper conductor size and crimp die to be used

- Made from high conductivity, high strength aluminum to provide premium mechanical and electrical performance
- For use up to 600 V and $90^{\circ} \mathrm{C}$ temperature rated when crimped with PANDUIT ${ }^{\circledR}$ crimping tools and dies

$\ddagger$ See page L37 in Technical Info section for tool and die information.
See page F106 for Type TAPC HTAP covers.
See below for PANDUIT ${ }^{\oplus}$ joint compounds recommended for pad to pad and conductor connections.

## Joint Compounds

## Type CMP

- Oxide inhibitor for compression conductor connections made with aluminum compression connectors lowers electrical contact resistance of compression joint while sealing out air and moisture to prevent the formation of surface oxides
- Wide operating temperature range; can be used in a wide range of electrical and environmental conditions
- Non-toxic
- Non-flammable
- Packaged in convenient 8 oz. dispenser bottles

| Part Number |  | Std. <br> Pkg. <br> Qty. |
| :--- | :--- | :---: |
| CMP-100-1 | Contact aid for pad-to-pad or thread-to-thread aluminum connections. Operating temperature <br> range $-60^{\circ} \mathrm{F}\left(-51^{\circ} \mathrm{C}\right)$ to $400^{\circ} \mathrm{F}\left(2044^{\circ} \mathrm{C}\right)$. Maintains low electrical resistance and seals out air and <br> moisture to prevent the formation of surface oxides. | 1 |
| CMP-200-1 | Contact aid for cable connections with compression connections made on aluminum conductor. <br> Operating temperature range $-40^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right)$ to $400^{\circ} \mathrm{F}\left(204^{\circ} \mathrm{C}\right)$. Lowers contact resistance of <br> compression joint and seals out moisture and air to prevent the formation of surface oxides. <br> Compatible with all insulating materials. | 1 |

## CRIMPING Tools

PANDUIT ${ }^{\circ}$ offers a wide range of tools to provide solutions for installing terminals, disconnects, splices and lugs. PANDUIT ${ }^{*}$ installation tools provide quality performance, ease of installation and lowest installed cost. The long-term reliability of PANDUIT ${ }^{\circ}$ installation tools provides the highest level of service to meet and surpass customer requirements.

- Ergonomic design to minimize operator effort
- Compression tools provide UL Listed and CSA Certified terminations with PANDUIT ${ }^{\circ}$ electrical connectors, as noted
- Compression tools feature controlled cycle mechanisms ensuring reliability and repeatability in every crimp made
- Crimping dies are color coded to easily match the electrical connector to the proper die

PANDUIT ${ }^{\ominus}$ tools are available in an assortment of styles including manually operated mechanical and hydraulic, battery operated hydraulic, AC powered hydraulic and pneumatic to meet a variety of installation needs. Hand operated Contour CRIMP ${ }^{\text {m" }}$ Controlled Cycle Crimping Tools feature ergonomically designed cushioned grips and low handle effort. UNI-DIE ${ }^{m}$ Dieless Crimping Tools crimp a variety of sizes and eliminate the need to purchase crimping dies. Fully self-contained battery powered crimping tools provide the ease of push button crimping. PANDUIT ${ }^{\circ}$ crimping tools are designed for use with PANDUIT ${ }^{\circledR}$ electrical connectors, providing the right solution for your termination needs. Splices and Wire Joints
Terminals

## Insulated Terminals and Disconnects

1. Locate terminal in proper size crimp die with edge of die $1 / 16$ " from the tongue end of the insulation sleeve (See Note 1 below). Ensure that crimp is perpendicular to the plane of the terminal tongue, as shown.
2. Insert properly stripped wire into terminal until a minimum of $1 / 32$ " of conductor extends beyond the terminal barrel.
3. Squeeze tool handles firmly (See Note 2 below).
4. Provide second crimp in the insulation crimp area to close the insulation (See Note 3 below).

## Insulated Butt Splices

1. Locate butt splice in proper size crimp die and position crimp pocket halfway between the wire stop (center of splice) and the wire stop end of the insulation crimp area, as shown (See Note 4 below).
2. Insert properly stripped wire into one end of butt splice.
3. Squeeze tool handles firmly (See Note 2 below).
4. Provide second crimp in the insulation crimp area to close the insulation (See Note 3 below).
5. Repeat steps 1-4 for opposite end of butt splice.

## Insulated and Non-Insulated Wire Joints

1. Properly strip wires, twist stripped wire ends together, and insert wires into wire joint.
2. Locate wire joint in proper crimp die and position crimp pocket in the center of the metal insert.
3. Squeeze tool handles firmly (See Note 2 below).
[^17]
## Crimping Guidelines for PANDUIT ${ }^{\circledR}$

1. Select the proper PANDUIT ${ }^{\oplus}$ compression connector for the conductor type and size being used.

- PANDUIT ${ }^{\oplus}$ compression connectors are identified with the proper conductor size and conductor type marked on the tongue or barrel of the connector
- PANDUIT ${ }^{\circledR}$ compression connector packaging comes complete with installation instructions that include the proper conductor size and type to be used with each connector
- This catalog includes tool charts that incorporate the proper conductor size and type to be used with each connector*

## 3. Select the proper crimp die and crimping tool to be used with the connector.

Use crimping tools and dies that provide a UL Listed and/or CSA Certified electrical termination, to assure a safe and reliable connection.
Many PANDUIT® compression connectors are UL Listed and CSA Certified when crimped with PANDUIT ${ }^{\text {® }}$ and specified competitor crimping tools and dies. These tools and dies are listed in the tool charts in this catalog ${ }^{*}$. PANDUIT ${ }^{\oplus}$ crimping tools and dies to be used with each connector are also listed on the instruction sheets included with PANDUIT ${ }^{\circledR}$
 product packaging.
PANDUIT ${ }^{\oplus}$ compression connectors are color coded and marked with PANDUIT ${ }^{\text {® }}$ and specified competitor die index numbers. Select the proper crimp die to be used by matching the color code and die index number marked on the connector to the same markings on the crimp die.

Pan-Lug ${ }^{\text {TM }}$ Compression Lugs and Splices

## 2. Strip the conductor to the proper strip length. As specified:

- On the PANDUIT ${ }^{\circledR}$ product packaging label or
- On the installation instruction sheet included with PANDUIT ${ }^{\circledR}$ product packaging or
- In the tool charts in
 this catalog*
Make sure the conductor is not stripped too long, which would result in exposed wire between the barrel of the connector and the cable insulation.
Make sure the conductor is not stripped too short, which would result in a less than complete contact area with the connector when the conductor is inserted in the barrel.
Do not nick or cut strands of conductor during crimping, which would result in a less than premium conductor termination.

Make sure conductor strands are free from corrosion.

## 4. Crimp the connector.

Insert the conductor into the barrel of the connector. The conductor should stop against the end of the barrel of the lug, or wire stop in the butt splice, upon
 complete insertion of the conductor in the barrel. Some lugs are offered with inspection windows that provide visual inspection of the complete conductor insertion.
Review the installation instructions included with the PANDUIT ${ }^{\text {® }}$ product packaging or the tool charts* for the proper number of crimps to be placed in the

| D-920-400 | STD | CD-2001-400 | connector. Make the first crimp in the barrel nearest the tongue of the lug, or wire stop in a butt splice, and make successive crimps in the barrel working

 towards the conductor entry at the end of the barrel. Use the color coded or knurled band markings on the barrel of the connector to evenly space the placement of the crimps in the barrel.

When properly crimped, the die index number engraved in the crimp die will be embossed into the barrel of the connector. The crimp should be placed in the connector so the die index number can be easily read when the connector is installed.
4. Install the two flame retardant cable ties (provided) in
the grooved areas on the cover. Tension and cut off
4. Install the two flame retardant cable ties (provided) in
the grooved areas on the cover. Tension and cut off excess lengths of ties.

## Label Size Information

## Cover Installation

1. If labels are being utilized, cut labels to the dimensions shown below. NOTE: When using a PANDUIT ${ }^{\oplus}$ LS7 printer, the length dimensions can be easily programmed to provide cutoff marks.
2. Position the label(s) in the pockets inside the cover and snap in the label retainer(s) as shown in Figure B. Information can be marked on the matte finish label retainers in lieu of using a separate label.
3. Position one cover half around the crimped connector assembly. Align the second cover half with the first and snap together.

Support
Products

Technical

Figure A
 slots in the HTAP. The head of the cable tie must be positioned along the side of the HTAP as shown in Figure A. Tension and cut off excess length of tie. Additional cable ties may be used adjacent to the HTAP to
5. Install the correct dies (see page L35) into the crimping tool. NOTE: The color code and die index number
6. Position the HTAP in the crimp tool so that the entire HTAP will be compressed by the crimping surfaces of the dies
7. After crimping, if desired, cut off the cable tie head or remove the entire cable tie. NOTE: In some cases, the cable tie head must be cut off in order for the crimped connector to fit inside the insulating cover.

## Controlled Cycle Crimping Tools - In-Line

- Military specialty tools help meet military and nuclear test requirements
- In-line crimp action for greater dielectric strength with uniform insulation compression
- Calibration-recalibration is possible for maintaining exact crimp dimensions
- High performance to help meet military and nuclear requirements

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| CT-400 | Crimps \#22 - \#14 PANDUIT ${ }^{\circledR}$ insulated terminals, disconnects and splices. Comes complete with carrying/storage case which includes tools for calibration. Has adjustable pre-load and emergency ratchet. Helps meet military and nuclear requirements. | 1 |
| CT-460 | Crimps \#16 - \#10 PANDUIT ${ }^{\circledR}$ insulated terminals, disconnects and splices. Has same features as CT-400 above. | 1 |

## IATMUI

## Pneumatic Crimping Tool

CT-600

- Quickly crimps a variety of loose piece terminals in a variety of wire sizes for medium volume production
- Versatile-interchangeable crimping heads let you switch terminal types quickly to meet changing production requirements. This tool, when used with only four crimp heads, can crimp a full range of \#26 thru \#10 AWG insulated and non-insulated terminal products

| Part Number |  | Std. <br> Pkg. <br> Qty. |
| :--- | :--- | :---: |
| CT-600 | Pneumatic tool, 6 ft. air hose and carrying case. Does not include crimping heads <br> (ordered separately). | 1 |
| CT-500CH | Crimping head for most \#22 - 14 insulated terminals, splices and disconnects. | 1 |
| CT-520CH | Crimping head for most \#22 - 14 insulated butted seam disconnects and \#26-22 <br> insulated terminals. | 1 |
| CT-550CH | Crimping head for most \#22 - 10 insulated terminals and splices. | 1 |
| CT-570CH | Crimping head for \#22 - 10 non-insulated terminals, splices and disconnects. | 1 |
| PD-600 | Positioning device (for bench mounting of CT-600) | 1 |
| FPC-600 | Foot actuator operating air pressure: 80-100 psi .233 SCFM type of air: lubricated. <br> Recommend using Norgren (Brand) \#FLR222-012-043008 filter lubricator regulator. | 1 |

For proper crimp head selection, see pages $L 2, L 3, L 4$ in Technical Info section of this catalog.

## Compression Connector Tools

## Die Type, Manual, Crimping Tool

CT-720

- High quality, durable tool construction provides long term dependability
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ copper and aluminum lugs and splices and insulated terminals
- Cushioned grips prevent hands from slipping on tool and reduce fatigue

| Part Number | Part Description | Std. Pkg. Qty. |
| :---: | :---: | :---: |
| CT-720 | Manual crimping tool for UL Listed or Recognized and CSA Certified terminations of PANDUIT ${ }^{\circledR}$ PAN-LUG ${ }^{\text {m" }}$ copper compression lugs and splices for \#8 AWG -500 kcmil copper code conductor and aluminum compression lugs and splices for \#6 AWG 350 kcmil copper and aluminum code conductors. Provides UL Listed terminations of PANDUIT ${ }^{\oplus}$ PAN-TERM ${ }^{\oplus}$ \#8 - \#2 AWG vinyl insulated terminals. <br> Color coded CD-720 crimp dies, carrying/storage case and controlled cycle mechanism must be purchased separately. <br> Specifications: <br> Output: 6 tons <br> Weight: 7.7 lbs . <br> Length: 26" <br> Handle span: 58" (open), 2.5" (closed) <br> Warranty: 90 days | 1 |
| CC-720 | Optional control cycle mechanism only. Total weight of tool with CC-720 is 8.25 lbs . | 1 |
| C-720 | Steel carrying case for CT-720 crimping tool. | 1 |

- Uses single retention screw for fast and easy die change-over
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Available with or without control cycle feature to meet specific applications
- Portable - the small size, ease of bench mounting and quick pneumatic connection allow the tool to be moved from one work station to another or to the work itself

## WTUUIT

## Die Type, Manual Hydraulic, 14 Ton, Crimping Tool

- Develops 14 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp - saves time
- High quality, durable tool construction provides long-term dependability
- Cushioned grip prevents hands from slipping on tool - reduces fatigue
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LUG ${ }^{\text {"" }}$ copper and aluminum lugs and splices and copper taps
- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Rubber boot on crimp head provides abrasion protection
- Audible "pop-off" valve indicates crimp completion
- Crimp head rotates 180 degrees, provides versatility for use in restricted spaces

Uses CD-920 and CD-930 color coded crimp dies. Dies must be purchased separately, see page G25. CG-920 crimp force measurement gauge available, sold separately see page G31.

System Overview

## Die Type, Battery Powered Hydraulic, 6 Ton, Crimping Tool with Closed Head

- Battery powered - provides fingertip operation
- Self-contained unit - completely portable
- Lightweight and ergonomically balanced for easy operation without fatigue
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LUG ${ }^{m "}$ copper lugs, splices and taps
- Audible "pop-off" valve indicates crimp completion
- Tool provided with two, NiCd rechargeable batteries and battery charger to allow for continuous operation
- High productivity - up to 80 crimps on 500 kcmil copper lugs and splices on a single battery charge
- Six to eight second crimp cycle time, provides quick terminations, saves time
- Battery charger charges expended batteries completely in 25 minutes
- Battery charger includes battery reconditioner feature which prevents battery memory build-up and provides over 1,000 battery recharge cycles resulting in long life
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins - no need for tools
- Crimp head rotates 180 degrees - provides versatility for use in restricted spaces

Uses color-coded CD-2001 crimp dies. Dies must be purchased separately, see page G16.
For battery charger and battery accessories, see page G32.

## Die Type, Battery Powered Hydraulic, 6 Ton, Crimping Tool with Open "C-Head"

- Battery powered - provides fingertip operation
- Self-contained unit - completely portable
- Lightweight and ergonomically balanced for easy operation without fatigue
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LuG ${ }^{\text {m" }}$ copper lugs, splices and taps
- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Rubber boot on crimp head provides abrasion protection
- Audible "pop-off" valve indicates crimp completion
- Tool provided with two, NiCd rechargeable batteries and battery charger to allow for continuous operation
- High productivity - up to 80 crimps on 500 kcmil copper lugs and splices on a single battery charge
- Six to eight second crimp cycle time, provides quick terminations, saves time
- Battery charger charges expended batteries completely in 25 minutes
- Batteries include LED battery charge indicators for visual indication of current battery charge
- Battery charger includes battery reconditioner feature which prevents battery memory build-up and provides over 1,000 battery recharge cycles resulting in long life
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins - no need for tools
- Crimp head rotates 180 degrees - provides versatility for use in restricted spaces

## BTJUIT

## Die Type, Battery Powered Hydraulic, 12 Ton, Crimping Tool

- Battery powered - provides fingertip operation
- Self-contained unit - completely portable
- Develops 12 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- Two stage rapid advance hydraulic system minimizes cycle time
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LUG ${ }^{\text {m }}$ copper and aluminum lugs and splices and copper taps
- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Rubber boot on crimp head provides abrasion protection
- Ram automatically retracts when crimp cycle is complete
- Tool provided with two, high capacity 12 VDC rechargeable nickel-metal hydride batteries provides for continuous operation and eliminates "memory" build-up, one hour charge time
- Eight second crimp cycle time provides quick terminations, saves time
- Uses industry standard Makita* batteries and charger - industry proven reliability easy to obtain from local retail sources
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins - no need for tools
- Crimp head rotates 360 degrees - provides versatility for use in restricted spaces

Uses CD-920 and CD-930 color-coded crimp dies with CD-940-DA die adapter.
Uses CD-940 color-coded crimp dies.
Dies and die adapter must be purchased separately, see pages G25 and G26.
For battery charger and battery accessories, see page G32.

System Overview Conco

Die Type, Remote Hydraulic, 14 Ton, Crimp Head

- Develops 14 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil
- Incorporates Parker type quick-connect fittings - eases installation and saves time
- High quality, durable tool construction provides long-term dependability
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LuG ${ }^{\text {mim }}$ copper and aluminum lugs and splices and copper taps
- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Uses color coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels for post crimp inspection
- Dies installed using spring loaded die retention pins - no need for tools
- Cast in handle allows crimp head to be mounted in a bench vice

|  |  | Std. <br> Pkg. |
| :--- | :--- | :---: | :---: |
| Qty |  |  |$|$

Uses CD-920 and CD-930 color-coded crimp dies.
Dies must be purchased separately, see page G25.
*CT-901 RCH remote control handle available, offering one hand operation of crimp head with PANDUIT ${ }^{\circledR}$ CT-901HP hydraulic pump and CT-900HPH hose, sold separately, see page G22. CG-920 crimp force measurement gauge available, sold separately, see page G31.

## BNDUTI

## Die Type, Remote Hydraulic, 15 Ton, Crimp Head

- Develops 15 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to $1,000 \mathrm{kcmil}$
- Incorporates Parker type quick-connect fittings - eases installation and saves time
- High quality, durable tool construction provides long-term dependability
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PAN-LUG ${ }^{\text {" }}$ copper and aluminum lugs and splices and copper taps
- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Uses color coded crimp dies to provide easy matching of crimp die to connector

## Hydraulic Pump and Accessories, Electric, 10,000 PSI

CT-901HP

CT-900HPH

CT-901RCH

CT-901RFS

- Develops 10,000 psi of hydraulic pressure
- Easy to operate using manual switch or remote pendant supplied; or optional CT-901RFS foot switch or CT-901RCH remote controlled handle
- Factory set relief valve - pump stops when crimp is complete
- Convenient 120 VAC operation
- Incorporates Parker type quick-connect fittings - eases installation and saves time
- Versatile - can be used with PANDUIT ${ }^{\text {® }}$ CT-930CH, CT-940CH or CT-980CH crimp heads

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| CT-901HP | Hydraulic pump. Develops 10,000 PSI output. Pump shuts off when cycle is complete. Will not release until down switch is activated. Compatible with CT-900HPH hydraulic hose, CT-930CH, CH-940CH and CT-980CH crimp heads sold separately.* <br> Specifications: <br> Pump output: 10,000 psi <br> Tank capacity: 2.5 L incorporates sight gage for visual inspection of fluid level. <br> Fluid type: Aero Shell \#4 or equal <br> Motor: 120 VAC $50 / 50 \mathrm{~Hz}$ <br> Current: 6.5 amps <br> Horsepower: 1/2 hp <br> Weight: 34 lbs . <br> Length: 7" <br> Height: 14" <br> Width: 6" <br> Warranty: 5 years <br> CT-901HP pump includes: <br> - On/off pendant switch on 10 ' electric cord <br> - 3 prong A/C plug on 10' electric cord <br> - Supplied with female Parker type quick-connect fitting assembled to pump | 1 |
| CT-900HPH | Electrically non-conductive 10 ' hose compatible with PANDUIT ${ }^{\circledR}$ CT-901HP hydraulic pump and CT-930CH, CT-940CH and CT-980CH crimp heads, supplied pre-filled with hydraulic fluid for fast start up. Supplied with two male Parker type quick-connect fittings. Warranty: 5 years | 1 |
| CT-901RCH | Remote control handle provides plastic carrying handle incorporating on/off activation switch that allows operator to hold crimp head and activate CT-901HP hydraulic pump with one hand. Use with PANDUIT® remote hydraulic crimp heads CT-930CH, CT-940CH and CT-980CH. Equipped with 3/8" Parker type quick-connect coupler for attaching crimp heads to PANDUIT ${ }^{\circledR}$ CT-900HPH hydraulic hose. Includes a 10', three wire control cable that can be directly connected to the CT-901HP pump. Warranty: 5 years | 1 |
| CT-901RFS | Dual electrical foot switch that allows convenient "hands free" operation of the PANDUIT ${ }^{\circledR}$ CT-901HP or CT-8250HP electric hydraulic pumps used with PANDUIT ${ }^{\oplus}$ remote hydraulic crimp heads. Supplied with 10' electric cord that can be directly connected to PANDUIT ${ }^{\text {® }}$ hydraulic pumps. Warranty: 5 years | 1 |

[^20]*For information on crimp heads, see pages G20, G21 and G30.

## Die Type, Remote Hydraulic, 10.5 Ton, Crimp Head

- Low pressure system extends life of crimp head for high volume crimping applications
- Develops 10.5 tons of crimping force when used with 7,500 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 250 kcmil
- Incorporates Parker type quick-connect fittings - eases installation and saves time
- High quality, durable tool construction and low pressure hydraulic requirements provide longterm dependability and tool life
- Provides UL Listed and CSA Certified connections on PANDUIT ${ }^{\oplus}$ PaN-LUG ${ }^{m m}$ copper lugs and splices

| Part Number | Part Description | Std. <br> Pkg <br> Qty. |
| :---: | :---: | :---: |
| CT-930LPCH | Remote hydraulic crimp head provides UL Listed or Recognized terminations of PANDUIT ${ }^{\oplus}$ PAN-LUG ${ }^{\text {™ }}$ copper compression lugs and splices for \#8 AWG - 250 kcmil copper code conductor. <br> Use with PANDUIT ${ }^{\circledR}$ CT-8250HP hydraulic pump and CT-900LPHPH 10' hydraulic hose.* <br> Specifications: <br> Output: 10.5 tons <br> Jaw opening: 1.65" <br> Weight: 11 lbs. <br> Length: 12 1/4" <br> Height: 5" <br> Width: 3" <br> Warranty: 5 years <br> CT-930LPCH includes: <br> - Tool <br> - Steel tool case <br> - Supplied with male Parker type quick-connect fitting assembled to tool | 1 |

Uses CD-920 color-coded crimp dies. Dies must be purchased separately, see page G25.
PG-1 in-line pressure gauge provides visual measurement of hydraulic output pressure, sold separately, see page G31.
*For information on hydraulic pump and hose, see page G24.

- Open "C-Head" design allows easy loading of crimp dies and connectors, saves time
- Uses color-coded crimp dies to provide easy matching of crimp die to connector
- Embosses die index number on connector barrels for post crimp inspection
- Dies installed using spring loaded die retention pins - no need for tools
- Cast in handle allows crimp head to be mounted in a bench vice

Disconnects

CT-901RFS

- Develops 7,500 psi of hydraulic pressure
- Easy to operate using manual switch or remote pendant supplied; or optional CT-901RFS foot switch
- Factory set relief valve - pump stops when crimp is complete
- Convenient 120 VAC operation
- Incorporates Parker type quick-connect fittings - eases installation and saves time
- Versatile - can be used with PANDUIT ${ }^{\circledR}$ CT-930LPCH or CT-980LPCH crimp heads

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| CT-8250HP | Hydraulic pump. Develops 7,500 psi output. Pump shuts off when cycle is complete. <br> Will not release until down switch is activated. Compatible with CT-900LPHPH hydraulic hose, CT-930LPCH, and CT-980LPCH crimp heads sold separately.* <br> Specifications: <br> Pump output: 7,500 psi <br> Tank Capacity: 2.5 L incorporates sight gauge for visual inspection of fluid level <br> Fluid type: Aero Shell \#4 or equal <br> Motor: 120 VAC 50/50Hz <br> Current: 6.5 amps <br> Horsepower: $1 / 2 \mathrm{hp}$ <br> Warranty: 5 years <br> Weight: 34 lbs . <br> Length: 7" <br> Height: 14" <br> Width: 6" <br> CT-8250HP pump includes: <br> - On/off pendant switch on 10' electric cord <br> - Three prong A/C plug on 10 ' electric cord <br> - Supplied with male Parker type quick-connect fitting assembled to pump | 1 |
| CT-900LPHPH | Electrically non-conductive 10' hose compatible with PANDUIT ${ }^{\oplus}$ CT-901LPHP hydraulic pump and CT-930LPCH, and CT-980LPCH crimp heads, supplied pre-filled with hydraulic fluid for fast start up. Supplied with two female Parker type quickconnect fittings. Warranty: 5 years | 1 |
| CT-901RFS | Dual electrical foot switch that allows convenient "hands free" operation of the PANDUIT ${ }^{\circledR}$ CT-901HP or CT-8250HP electric hydraulic pumps used with PANDUIT ${ }^{\oplus}$ remote hydraulic crimp heads. Supplied with 10' electric cord that can be directly connected to PANDUIT ${ }^{\oplus}$ hydraulic pumps. Warranty: 5 years | 1 |

*For more information on crimp heads, see pages G23 and G30.
PG-1 in-line pressure gauge provides visual measurement of hydraulic output pressure, sold separately, see page G31.

## Unl-DIE ${ }^{m "}$ Dieless, Manual Hydraulic, 6.2 Ton, Crimping Tool

- Dieless crimping tool design eliminates purchase or lost crimp dies, saves cost
- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil
- Two stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp
- High quality, durable tool construction provides long-term dependability
- Cushioned grips prevent hands from slipping on tool, reduces fatigue
- Incorporates aluminum crimp head and fiberglass handles, results in lightweight tool and ease of operation
- Provides UL Listed and CSA Certified connections on PANDUIT® PAN-LUG ${ }^{\text {m" }}$ copper lugs and splices
- Provides UL Listed and CSA Certified wire range-taking capability on PANDUIT ${ }^{\ominus}$ PAN-LUG ${ }^{\text {m" }}$ copper lugs and splices, minimizes connector inventory and saves cost
- Flip-top crimp head design allows easy loading of crimp dies and connectors, saves time
- Audible "pop-off" valve indicates crimp completion
- Crimp head rotates 360 degrees, provides versatility for use in restricted spaces

## Uni-DIE ${ }^{\text {TM }}$ Dieless, Battery Powered Hydraulic, 6.2 Ton, Crimping Tool, 12 VDC

- Dieless crimping tool design eliminates purchase or lost crimp dies, saves cost
- Battery powered - provides fingertip operation
- Self-contained unit - completely portable
- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil
- Two stage rapid advance hydraulic system minimizes cycle time
- Ram automatically retracts when crimp cycle is complete
- Tool provided with two, high capacity 12 VDC rechargeable nickel-metal hydride batteries provides for continuous operation and eliminates "memory" build-up, one hour charge time

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| CT-2981 | Battery powered hydraulic $U_{N I}-D I E^{\text {m" }}$ dieless crimping tool provides UL Listed or Recognized and CSA Certified terminations of PANDUIT® PAN-LUG ${ }^{\text {T"M }}$ copper compression lugs and splices for \#4 AWG - 750 kcmil copper code conductor. Terminates PAN-LUG ${ }^{\text {m" }}$ aluminum compression lugs and splices for \#6 AWG 500 kcmil copper and aluminum code conductor (not UL or CSA). <br> Specifications: <br> Output: 6.2 tons <br> Jaw opening: 1.46" <br> Weight: 10.8 lbs . with battery <br> Length: 13" <br> Height: 12" <br> Width: 3" <br> Warranty: 3 years <br> CT-2981 includes: <br> - Tool <br> - Two 12 VDC, NiMH rechargeable batteries <br> - One battery charger <br> - Steel tool case with storage for batteries, charger and crimp dies | 1 |

## Pan-Lug ${ }^{\text {m" }}$ Mechanical Connectors

PANDUIT ${ }^{\circ}$ offers a broad variety of mechanical lugs, splices and split bolt connectors suitable for a wide range of electrical terminations using code conductor. Designed to be reusable and installed without special tooling, PAN-LUG" Mechanical Connectors provide quality performance, ease of installation and lowest installed cost.

- Functional product information is marked directly on the connector, facilitating the identification, ordering and usage of the mechanical connector
- Incorporate wire range-taking capability to minimize inventory requirements
- Made from high strength, high conductivity electrolytic copper and aluminum alloy materials to provide optimum connectivity for power and grounding applications
- UL Listed and CSA Certified, as noted

PAn-LUG ${ }^{\text {m" }}$ Mechanical Connectors include split bolt connectors, copper mechanical lugs, aluminum mechanical lugs and aluminum multi-tap connectors with clear PVC insulation. Products are available in stamped and formed, extruded and cast varieties of multiple barrel and tongue configurations to provide solutions for diverse power and grounding needs. PANDUIT ${ }^{\circ}$ offers a wide assortment of PAN-LuG" ${ }^{\text {" }}$ Power and Grounding Connectors to meet customer needs and today's application requirements.

## Type SBC

- Made from high strength copper alloy to resist corrosion and provide premium electrical and mechanical performance
- Offered with extra long body to allow connection of one or two taps to a single run conductor
- Wire range-taking capability minimizes inventory requirements
- True hex design for body and nut hex provides correct fit with socket, box or open end wrenches resulting in proper torquing of electrical connection
- Pressure bar provides secure connection on a full range of conductor combinations used with each connector assuring premium wire pull-out strength
- UL Listed and CSA Certified for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

*Long body accommodates two tap conductors with single run; not CSA Certified.
**The conductor sizes shown are for equal run and tap combinations for both solid and stranded unless otherwise listed.

System Overview

Terminals

- Made from high strength copper alloy to provide premium electrical and mechanical performance
- Tin plated to inhibit corrosion and oxidation
- Offered with dual rating for use with aluminum or copper conductors
- Wire range-taking capability minimizes inventory requirements

## (4) (5.) Split Bolt, Aluminum

## For Use with Copper and Aluminum Code Conductors

## Type SBA

- Made from lightweight, durable aluminum alloy to resist corrosion and provide premium electrical and mechanical performance
- Dual rated for use with aluminum to aluminum, aluminum to copper and copper to copper conductor combinations
- Tin plated to inhibit corrosion and oxidation
- Wire range-taking capability minimizes inventory requirements

- True hex design for body and nut hex provides correct fit with socket, box or open end wrenches resulting in proper torquing of electrical connection
- Free floating pressure bar separates conductors of dissimilar materials for secure connection on a full range of conductor combinations
- UL Listed and CSA Certified for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

## (LI) Two Bolt Connector, Bronze

## For Use with Copper Code Conductors

## Type VT

- Made from high strength bronze for heavy duty connections and to inhibit corrosion
- Cap swivels for easy installation of conductors
- Rubber washer retains hardware to connector and eliminates loose parts
- High strength silicon-bronze hardware provides premium mechanical performance when assembled to conductor
- Wire range-taking capability minimizes inventory requirements
- UL Listed for use up to 600 V and $90^{\circ} \mathrm{C}$ temperature rated

## (UL) Two-Hole, Straight Tongue Lug

## For Use with Copper Code Conductors

## Type PNL-2

- Cast from high strength corrosion resistant copper alloy to provide premium electrical and mechanical performance
- Wire range-taking capability minimizes inventory requirements
- Inspection window to visually assure full conductor insertion

- Plated steel set screw provides high strength, durable electrical contact between conductor and connector
- Flat bottom allows for complete contact with mounting surface
- UL Listed for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$
- Available with NEMA hole sizes and spacing

| Part Number | Copper Conductor Size Range | Stud Hole Size (In.) | Stud Hole Spacing (In.) | Hex Key Size (In.) | Figure Dimensions (In.) |  |  |  |  | Tightening Torque (In.-Lbs.) | Std. <br> Pkg. <br> Qty. |

## (1) Two-Hole, Straight Tongue Lug with NEMA Hole Sizes and Spacing For Use with Copper Code Conductors

## Type HL-2N

- Cast from high strength corrosion resistant copper alloy to provide premium electrical and mechanical performance
- Wire range-taking capability minimizes inventory requirements
- Internal pressure plate provides uniform clamping force on conductor for premium electrical performance
- Internal barrel serrations allow for premium wire pull-out strength
- Inspection window to visually assure full conductor insertion
- Flat bottom allows for complete contact with mounting surface
- UL Listed for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

## (UL) Two-Hole, Straight Tongue, Tandem Set Screw Lug

## For Use with Copper Code Conductors

## Type HHL-2N

- Cast from high strength corrosion resistant copper alloy to provide premium electrical and mechanical performance
- Double set screws provide additional wire secureness for use in heavy duty applications
- Wire range-taking capability minimizes inventory requirements
- Internal pressure plate provides uniform clamping force on conductor for premium electrical performance
- Internal barrel serrations allow for premium wire pull-out strength
- Inspection window to visually assure full conductor insertion
- Flat bottom allows for complete contact with mounting surface
- UL Listed for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

## (4) Two-Hole, Straight Tongue, Two Barrel Lug

## For Use with Copper Code Conductors

## Type H2L-2N

- Allows for termination of two copper conductors
- Cast from high strength corrosion resistant copper alloy to provide premium electrical and mechanical performance
- Wire range-taking capability minimizes inventory requirements
- Internal pressure plate provides uniform clamping force on conductor for premium electrical performance
- Internal barrel serrations provide premium wire pull-out strength
- Inspection window to visually assure full conductor insertion
- Flat bottom allows for complete contact with mounting surface
- UL Listed for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

**Uses slotted head set screw.
- NEMA hole sizes and spacing.

- Inspection window to visually assure full conductor insertion
- Plated steel set screw provides high strength, durable electrical contact
- Flat bottom allows for complete contact with mounting surface
- UL Listed for use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

## For Use with Copper Code Conductors

## Type P2NLT

- Allows for termination of two copper conductors
- Cast from high strength corrosion resistant copper alloy to provide premium electrical and mechanical performance
- Tin plated to inhibit corrosion
- Wire range-taking capability minimizes inventory requirements
- Internal barrel serrations provide premium wire pull-out strength

| Part Number |  | Copper Conductor Size Range | Stud Hole Size (In.) | Stud Hole Spacing (In.) | Hex Key Size (In.) | Figure Dimensions (In.) |  |  |  |  | Tightening Torque (In.-Lbs.) | Std. <br> Pkg. <br> Qty. |

## Type LAM4D

- Four barrels provide termination of four conductors
- Made from high strength, extruded aluminum alloy to provide premium electrical and mechanical performance
- Tin plated to inhibit corrosion
- Wire range-taking capability minimizes inventory requirements
- Inspection window to visually assure full conductor insertion
- Plated steel or aluminum set screw provides high strength, durable electrical contact between conductor and connector
- LAM4LD connector is provided with dual set screws to allow premium clamping of conductor to connector for heavy duty applications
- For use up to 600 V and temperature rated $90^{\circ} \mathrm{C}$

Transformer Lug Kit
For Use with Stranded Aluminum or Copper Code Conductors

Type KLM

- Kits include all of the connectors and hardware to make a complete transformer connection in a single convenient package
- Lugs are made from high strength, extruded aluminum alloy and are tin plated to inhibit corrosion and oxidation
- Plated steel cap screws, belleville and flat washers and hex nuts are provided to assure that terminal to bus connections are made using proper hardware resulting in true torque to pressure performance

## Joint Compounds

## Type CMP

- Oxide inhibitor for compression cable connections made with aluminum compression connectors lowers electrical contact resistance of compression joint while sealing out air and moisture to prevent the formation of surface oxides
Wide operating temperature range; can be used in a wide range of electrical and environmental conditions
- Non-toxic
- Non-flammable
- Packaged in convenient 8 oz. dispenser bottles

| Part Number |  | Std. <br> Pkg. <br> Qty. |
| :--- | :--- | :---: |
| CMP-100-1 | Contact aid for pad-to-pad or thread-to-thread aluminum connections. Operating <br> temperature range $-60^{\circ} \mathrm{F}\left(-51^{\circ} \mathrm{C}\right)$ to $400^{\circ} \mathrm{F}\left(204^{\circ} \mathrm{C}\right)$. Maintains low electrical resistance <br> and seals out air and moisture to prevent the formation of surface oxides. | 1 |
| CMP-200-1 | Contact aid for cable connections with compression connections made on aluminum <br> conductor. Operating temperature range $-40^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right)$ to $400^{\circ} \mathrm{F}\left(204^{\circ} \mathrm{C}\right)$. Lowers contact <br> resistance of compression joint and seals out moisture and air to prevent the formation <br> of surface oxides. Compatible with all insulating materials. | 1 |

## Guidelines for Installing Connectors on Aluminum Conductor Cable:

3 CLEAN the exposed conductor using a wire brush or an emery cloth. In a similar manner, clean an unplated connector pad and the surface to which the connector will be attached. Solvent should be used to clean plated parts that are dirty, but the plating should never be disturbed with abrasives.
2 REMOVE the insulation from insulated cable. See page G32 for PANDUIT ${ }^{\oplus}$ cable stripping tools.

- Use care to avoid nicking the conductor strands
- Strip the insulation to the proper length as listed in the installation instruction sheets provided with PANDUIT ${ }^{\oplus}$ connectors.
- Always use an aluminum conductor with an aluminum connector
- Verify that the connector is marked for the conductor size and type that you are using

4 APPLY PANDUIT ${ }^{\circledR}$ Joint Compound to the clean conductor for mechanical connector applications (see pages H33, F118). Joint compound will deter the formation of surface oxides after installation. (Aluminum compression connectors and insulated mechanical connectors are pre-filled with joint compound.)

5 INSERT the conductor into the connector and:
a) for mechanical connectors, tighten the screws to the recommended torque values...

## OR

b) for compression connectors, use the recommended die and crimping tool to make the proper compression connection

## Pan-Lug"' Grounding Connectors

PANDUIT ${ }^{\circ}$ PAN-LUG $^{\prime \prime \prime}$ Grounding Connectors provide innovative solutions for joining ground conductor to water pipe, ground rods, conduit, iron pipe and structural steel. PAN-LUG ${ }^{m \prime}$ mechanical grounding connectors are designed with the needs of the end user in mind focusing on easy installation, lowest installed cost and long-term reliability.

- Functional product information is marked directly
 on the connector, facilitating the identification, ordering and usage of the grounding connector
- Designed for easy installation — no special tooling required
- Incorporate wire range-taking capability to minimize inventory requirements
- Made from high strength, high conductivity electrolytic copper and aluminum alloy materials to provide optimum connectivity for power and grounding applications
- Include plated or silicon bronze hardware to inhibit corrosion
- Copper and bronze grounding connectors are UL Listed for direct burial in earth and concrete, as noted
- UL Listed per UL 467 for grounding and bonding, as noted

PANDUIT ${ }^{\circ}$ PAN-LUG $^{\text {" }}$ Grounding Connectors are available in a variety of configurations, including water pipe clamps, bronze grounding clamps and bronze service post connectors.
PANDUIT ${ }^{\circ}$ offers a wide assortment of PAN-LU ${ }^{\prime \prime \prime}$ Power and Grounding Connectors to meet customer needs and today's application requirements.

## 

## c(UL) us Service Post Connector, Male Stud, Single Conductor, Bronze <br> Type SP1

- For grounding one copper code conductor to steel structures, bus bars or transformers or for tapping from bus bar with hex nut and washer
- Made from high copper content, hard drawn copper rod provides high strength
- Offered with standard and long stud lengths to accommodate a variety of mounting applications
- Wire range-taking capability minimizes inventory requirements
- True hex design for body and nut hex provides correct fit with socket, box or open end wrenches resulting in proper torquing of electrical connection
- Pressure bar provides secure connection on a full range of conductor combinations used with each connector providing premium wire pull-out strength
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

## c(UL) us Service Post Connector, Male Stud, Two Conductor, Bronze

## Type SP2

- For grounding two copper code conductors to steel structures, bus bars or transformers or for tapping from bus bar with hex nut and washer
- Made from high copper content, hard drawn copper rod provides high strength
- Offered with standard and long stud lengths to accommodate a variety of mounting applications
- Wire range-taking capability minimizes inventory requirements
- True hex design for body and nut hex provides correct fit with socket, box or open end wrenches resulting in proper torquing of electrical connection
- Pressure bar provides secure connection on a full range of conductor combinations used with each connector providing premium wire pull-out strength
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

## BNDUIT ${ }^{\circ}$

## c (UL) us Service Post Connector, Female Thread, Single Conductor, Bronze

## Type SPF1

- For grounding one copper code conductor to steel structures, bus bars or transformers or for tapping from bus bar using external studs, screws or bolts
- Made from high copper content, hard drawn copper rod provides high strength
- Wire range-taking capability minimizes inventory requirements
- True hex design for body and nut hex provides correct fit with socket, box or open end wrenches resulting in proper torquing of electrical connection
- Pressure bar provides secure connection on a full range of conductor combinations used with each connector providing premium wire pull-out strength
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

## Grounding Clamp for Water Pipe with Copper Strap, Bronze

## Type KLS

- Used to ground copper code conductor to rigid conduit systems
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- Plated steel screws provide high strength and inhibit corrosion
- Pure copper contact strip included to isolate conduit system from water pipe vibrations
- High strength bronze conduit hub also included to provide durable connection of conduit to copper strap
- Accommodates a wide range of pipe, tube and conductor sizes minimizes inventory

## Grounding Clamp for Conduit, Bronze

Type KH

- Used to ground copper code conductor to rigid conduit systems
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- Plated steel screws provide high strength and inhibit corrosion
- Includes high strength bronze conduit hub to ensure a durable connection of conduit to copper strap
- Accommodates a wide range of pipe, tube and conductor sizes - minimizes inventory

## (4L) Grounding Clamp for Water Pipes, Aluminum

Type GC

- Dual rated for grounding aluminum or copper code conductors to copper water pipe, galvanized pipe or steel conduit
- Made from high strength, extruded aluminum alloy to provide long term durability
- Tin plated to inhibit corrosion and oxidation and for low contact resistance
- Plated steel screws provide high strength and inhibit corrosion
- Accommodates a wide range of pipe, tube and conductor sizes - minimizes inventory
- UL Listed for grounding and bonding

| Part Number | Conduit Pipe or Water Tube Size | $\begin{aligned} & \text { Conductor } \\ & \text { Size } \\ & \text { Range } \end{aligned}$ | Figure Dimensions (In.) |  | Tightening Torque (In.-Lbs.) |  | Std. <br> Pkg. <br> Qty. |

## Support Products

PANDUIT* is a leading global producer of electrical products, including ReEL SMART"' System, heat shrink, printers, software, labels and cable ties. These products complement the complete termination solution and make PANDUIT ${ }^{\circ}$ the best source for all your electrical needs.

- PANDUIT ${ }^{\circ}$ REEL SMART" System provides the best solution for quality, high volume terminations designed to dramatically reduce set-up time and downtime. The ReEE SMART"' continuously molded offering provides product for virtually any insulation application, including the industry's only continuously molded right angle disconnects, butt splices, and the largest reel-fed expanded barrel disconnect offering. (For more information go to www.panduit.com/reelsmart.)

- PANDUIT ${ }^{\circ}$ heat shrink products provide an economical and easy way to insulate, protect, harness and color code electrical/electronic components and cable in a wide variety of sizes and materials. (For more information go to www.panduit.com/heatshrink or request catalog SA-CTCBO3.)
- PANDUIT ${ }^{\circ}$ labeling products, software and printers assist with proper identification of wires and cable. (For more information go to www.panduit.com/idproducts or request catalog SA-IDCB16.)
- PANDUIT ${ }^{\circ}$ cable ties are available in a broad selection of sizes,styles, materials and colors. Industry leading installation tools are offered to speed installation and lower installed cost. (For more information go to www.panduit.com/cableties or request catalog SA-CTCB03.)

PANDUIT ${ }^{\circ}$ continually provides new designs with innovative features to meet the application challenges encountered by customers, while providing the lowest installed cost.

## Continuously Molded Reel-Fed Termo ${ }^{\text {m" }}$ Terminals, Butt Splices and Disco ${ }^{\text {m }}$ — DIscoGRIP ${ }^{\text {m" }}$ Continuously Molded Reel-Fed Disconnects

The PANDUIT ${ }^{\bullet}$ continuously molded REEL SMART ${ }^{\text {m" }}$ products are designed such that the terminal, disconnect, and butt splice housings are connected by an integral molded carrier in the barrel crimp zone, producing a continuous length of product. Plated metal terminals, disconnects and splices are then assembled into the housings. During termination, the continuously molded components are fed into a universal applicator. This process produces a reel-fed solution that eliminates a variety of problems associated with other reel-fed designs and provides high quality, high capacity product on reels for longer, uninterrupted production runs - resulting in the lowest installed cost.

The PANDUIT ${ }^{\circ}$ CA9 EzAIR ${ }^{m \times}$ applicator automatically adjusts feed stroke to the correct pitch and length for the entire product line of continuously molded products. The need for multiple applicators is eliminated. The applicator, in conjunction with the precision, continuously molded product provides perfect front-to-back and side-to-side alignment in the die pocket for a high quality termination every time - resulting in the most optimum system to terminate terminals.

## Nylon Insulated Terminals with Insulation Grip Sleeve (Funnel \& Non-Funnel Entry Types)

The 3-piece design terminal provides a permanently attached tin plated brass sleeve for insulation grip in funnel and straight entry sleeve designs. This product feature offers the highest quality reliable terminations. Nylon insulation is rated up to 600 V maximum and designed for up to $105^{\circ} \mathrm{C}\left(221^{\circ} \mathrm{F}\right)$ operating temperature maximum. Supplied on rings, forks, locking forks, short locking forks and flanged forks in wire sizes \#22 through \#10.

> - Sleeved Barrel - assures crimp reliability

- PNF - funnel-entry styles available
- Metal Insulation Crimp - provides DOUBLE CRIMP wire insulation grip sleeve for high vibration or conductor strain environments
- Internal Wire Barrel Serrations - assure good wire contact and maximum tensile strength
- Product Markings - UL and CSA Rated - up to 600 V , maximum operating temperature $105^{\circ} \mathrm{C}\left(221^{\circ} \mathrm{F}\right)$

The PVC insulation forms an insulation crimp on the wire insulation. Supplied on \#22 - \#10 rings, forks, locking forks, short locking forks and flanged forks. All polyvinylchloride 2-piece insulated terminals are rated up to 600 V maximum and designed for up to $105^{\circ} \mathrm{C}\left(221^{\circ} \mathrm{F}\right)$ operating temperature maximum.

## Performance Requirements

|  | Wire Size (AWG) |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \#26 | \#24 | \#22 | \#20 | \#18 | \#16 | \#14 | \#12 | \#10 |
| UL 486A (TERMINALS), UL310 (MALE BLADE ADAPTERS) |  |  |  |  |  |  |  |  |  |

## Applicable Pan-Term ${ }^{\circledR}$ products meet or

 exceed the following test specifications:- UL486A (Terminals)
- UL486C (Splices)
- UL310 (Blade Adapters)
- CSA C22.2 No. 65 (all designs)

UL and CSA approved products are shown with the applicable logos in the product section.

UL file \#E52164, CSA File \#LR31212

Supra-Grip ${ }^{\text {m" }}$ Nylon Fully
Insulated Funnel Entry,
Female Receptacle Type DNG-FB

Standard and Premium
Nylon Fully Insulated, Funnel Entry, Females Receptacles and Male Tabs Type DNF and DPF

## Disco-Lok ${ }^{\text {m" }}$ Nylon Fully Insulated, Funnel Entry, Female Receptacle Type DNG-FL

Funnel entry for
faster wire insertion and lower installed cost

Vinyl Barrel Insulated Funnel Entry, Female Receptacles and Male Tabs

Type DV

Continuously molded design provides reliable, consistent performance through applicator

Available in
tab sizes to
accommodate
.187", .205" or .250" tabs

Insulation support to protect electrical crimp

Insulation grip sleeve provides a superior insulation crimp for high vibration and high strain relief applications

## Features and Benefits - Reel Smart ${ }^{T m}$ Disconnects

## Applicable Reel Smart ${ }^{\text {tm }}$ products meet or exceed the following test specifications:

- Listed per Underwriters Laboratories, Inc. Standard UL 310 (Disconnects)
- Recognized under the Component Recognition Program of Underwriters Laboratories Inc.
- Certified by Canadian Standards Association (Disconnects)
- UL and CSA listed products are shown with the applicable logos in the product section.
- UL file \#E78522. CSA file \#LR31212.

TA13721A01 $=60 / 40$ Solder Slug with $1 / 8^{\prime \prime}(.125)$ outer diameter.
TA13722A01 $=60 / 40$ Solder Slug with $3 / 16^{\prime \prime}(.188)$ outer diameter.
(1) Insulation Support: Minimum wire insulation strain relief for normal applications.

Plastic \& DIScoGRIP ${ }^{m \prime \prime}$ insulation Crimp: Secondary wire insulation strain relief for high vibration or conductor strain applications.
Metal Insulation Grip: Maximum wire insulation strain relief for high vibration or conductor strain applications.
${ }^{* * *}$ Modified lower die for barrel insulated disconnects DV-B series. Available as a complete die set or just lower die assembly.

TA13721A01 $=60 / 40$ Solder Slug with $1 / 8^{\prime \prime}(.125)$ outer diameter.
TA13722A01 $=60 / 40$ Solder Slug with $3 / 16^{\prime \prime}(.188)$ outer diameter.
(1) Insulation Support: Minimum wire insulation strain relief for normal applications.

Plastic \& DIScoGriP ${ }^{T M}$ Insulation Crimp: Secondary wire insulation strain relief for high vibration or conductor strain applications.
Metal Insulation Grip: Maximum wire insulation strain relief for high vibration or conductor strain applications.
***Modified lower die for barrel insulated disconnects DV-B series. Available as a complete die set or just lower die assembly.

## Heat Shrink

## (6) FI DRM IP62 Thin Wall Polyolefin Heat Shrink <br> Except Clear

- Shrink ratio of 2:1 insulates a wide range of diameters and irregular shapes
- Cross-linked, UV resistant material improves flame retardancy, chemical and temperature resistance

## Crimping

$\ddagger$ For clear, add " $C$ " to end of part number package suffix (Example HSTT05-48-QC). Contact customer service for additional color information.
$\wedge$ Meets Mil Spec AMS-DTL-23053/5 Class 1, except clear which is manufactured from non-flame retardant polyolefin cross-linked material and meets AMS-DTL-23053/5 Class 2.
MMeets Mil Spec AMS-DTL-23053/5 Class 3.

## PTगU1 ${ }^{\circ}$ <br> TERMINATION SOLUTIONS

## Crystal Clear PVC Heat Shrink

- Low shrink temperature (store below $90^{\circ} \mathrm{F}$ ) to speed installation
- Crystal clear material ensures easy to read labels and splice inspections
- Highly flame retardant product manufactured from a material that is rated UL224 VW-1
- Shrink ratio of 2:1 insulates a wide range of diameters and irregular shapes

## Thick Wall Polyolefin Heat Shrink

- Shrink ratio of $3: 1$ insulates a wide range of diameters and irregular shapes, which reduces inventory costs
- Cross-linked, UV resistant material improves flame retardancy, chemical and temperature resistance
- Thick wall product seals and insulates in one step to speed installation

System
Overview
SVEC
SHRINk. P68 Heat Shrink End Caps

- Heat indicating line ensures correct temperature is applied
- Cross-linked, UV resistant material improves flame retardancy, chemical and temperature resistance
- Shrink ratio of 3:1 insulates a wide range of diameters and irregular shapes, which reduces inventory costs

Support Products

## Labeling \& Administration

PanĀㅡㄹa ${ }^{\circledR}$ LS7 Hand-Held Thermal Transfer Printer and Accessories

- Multi-purpose printer features the ability to create cable labels with repeat legends, continuous tapes, component labels, bin markers and safety/facility identification
- High quality thermal transfer print for professional looking labels that will not smear
- Fast loading label cassette includes both label material and ribbon to make changing labels easy

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. | Std. <br> Ctn. <br> Qty. |
| :---: | :---: | :---: | :---: |
| LS7 | Includes printer, 6 AA alkaline batteries, $3 / 4^{\prime \prime}(18 \mathrm{~mm})$ non-laminated black/white cassette, hardside carrying case, wrist strap, label separator tool and operator's manual | 1 | 4 |
| LS7-ACS | 120 VAC adapter* | 1 | 6 |
| LS7-CLN | Cleaning kit | 1 | 20 |

*Cannot be used to charge batteries.
For detailed information on the PANACEA ${ }^{\oplus}$ LS7 Hand-held Thermal Transfer Printer, request product bulletin SA-IDCB1000A.

- Advanced functions including repeat legend, serialization, vertical and horizontal lines, symbol library and memory
- Six AA alkaline batteries and hardside case included

## VIPER ${ }^{\text {™ }}$ LS6 Portable Thermal Transfer Printer and Accessories

- Create wiremarkers, heat shrink labels, continuous tapes, component labels, bin markers, pipe markers, safety/facility identification and network connectivity labels
- High quality thermal transfer print for professional looking labels that will not smear
- AC adapter included so you can start printing right out of the box
- Serial port / PC interfacing
- Fast loading ribbon cartridge lets you slide, lock and go!
- 128 K file memory reduces setup time by recalling frequently used labels
- Nickel metal hydride battery provides longer battery life
- Advanced functions including serialization, bar code printing, vertical and horizontal lines, date and time stamp, variety of font sizes and a symbol library containing over 35 electrical, safety and network symbols

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. | Std. <br> Ctn. <br> Qty. |
| :---: | :---: | :---: | :---: |
| LS6-KIT | Includes printer, AC power adapter/charger, LS6-RWBLK ribbon, hardside carrying case and operator's manual | 1 | - |
| LS6-RWBLK | Black, wax ribbon, 2.00 " $\times 100.0^{\prime}$. For use with self-laminating and non-laminated labels | 1 | 6 |
| LS6-RRBLK | Black, resin ribbon, $2.00^{\prime \prime} \times 100.0^{\prime}$. For use with component labels and continuous tape | 1 | 6 |
| LS6-RRWHT | White, resin ribbon, 2.00 " $\times 75.0^{\prime}$. For use with component labels and continuous tape | 1 | 6 |
| LS6-RHBLK | Black, hybrid ribbon, $2.00^{\prime \prime} \times 100.0^{\prime}$. For use with self-laminating, heat shrink, component, non-laminated and vinyl cloth labels | 1 | 6 |
| LS6-BP | Replacement battery pack | 1 | 6 |
| LS6-ACS | North America AC power adapter/charger | 1 | - |
| LS6-PCKIT | PC interface kit includes serial cable and VIPERLINK ${ }^{m \prime}$ software | 1 | - |
| LS6-CLN | 5 cleaning cards | 1 | 5 |

For a full product offering on the VIPER ${ }^{\text {ww }}$ LS6 Portable Thermal Transfer Printer, request product bulletin SA-ID07BR01B.

System Overview

## Pan-Quik ${ }^{\text {m" }}$ LS3E Hand-Held Dot Matrix Printer and Accessories

- Lightweight, versatile printer for high quality labels that you can print anytime, anywhere
- Flexibility to print self-laminating cable labels, heat shrink labels and network system component labels faster than other hand-held dot-matrix printers
- Features the QUIK-KEY ${ }^{m "}$ Fast Label Formatting System for reduced set-up time
- 20 Kb file storage memory saves time when producing frequently used labels
- Automatic serialization and legend repeat functions
- Automatic recall of last legend entered so there is no need to re-enter information after shut-off or recharging battery pack
- Rotated legends allow printing of continuous strips for marking terminal blocks, patch panels and more!

|  |  |  | Std. <br> Pkg. <br> Std. <br> Ctn. |
| :--- | :--- | :---: | :---: |
| Part Number | Qty. |  |  |
| LS3E-KIT | Includes printer, battery pack, battery charger, printer ribbon, wrist strap and <br> operator's manual, plus LS3EAK-S AC adapter and carrying case | 1 | - |
| LS3-RIB | Replacement ribbon | 1 | 6 |

For detailed information on the PAN-QUIK" LS3E Hand-held Dot Matrix Printer, request product bulletin SA-101N398A-ID.

## TDP43M Thermal Transfer Desktop Printer and Accessories

- It's Quick! - Custom capability allows high quality labels to be produced in-house for medium volume applications
- Choose from an assortment of self-laminating wire markers, heat shrink markers, vinyl cloth wire/cable markers, continuous vinyl tape and component labels
- Produces high quality, 300 dpi thermal transfer print for labels that are both professional and robust
- Works with most standard PC's and labeling printing software including PANDUIT® EASY-MARK" ${ }^{\text {"I }}$ or PAN-MARK ${ }^{\circledR}$ for WINDOWS^ Labeling Software
- Flexibility and speed make the TDP43M a useful tool for your on-demand labeling needs!

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :---: | :---: | :---: |
| TDP43M | 300 dpi printer; includes printer, PANDUIT ${ }^{\circledR}$ EASY-MARK ${ }^{\text {mi }}$ labeling software, RMH4BL hybrid black ribbon, AC power adapter with US and Europlug power cords, manual and quick start card | 1 |
| TDP43M-RS | External label roll stand - used to rear feed labels that are supplied on 3.00" cores | 1 |

## Thermal Transfer Ribbons for use with the TDP43M Thermal Transfer Desktop Printer

Available in three types:

- Resin for harsh environments

| Part Number | Part Description | Height |  | Length |  | Std. <br> Pkg. <br> Qty. | Std. Ctn. Qty. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | In. | mm | ft. | M |  |  |

## IATMUI

## PAN-MARK ${ }^{\circledR}$ for WINDOWS^ Labeling Software

- PAN-MARK ${ }^{\circledR}$ for WINDOWS^ Labeling Software has preloaded and ready to use, thermal transfer, dot-matrix, laser and ink jet label formats.
- ODBC (Open Data-Base Connectivity) allows importing of information from electronic databases such as $\operatorname{EXCEL\wedge }$ and $A C C E S S^{\wedge}$ directly onto the label formats
- On-line help function files, including the TIA/EIA-606-A Labeling Compliance Brochure that assists in understanding the TIA/EIA-606-A standard and insure network labeling compliance
- Easy to install and supplied on CD-ROM
- Uses full range of WINDOWS^ fonts including True Type* fonts
- Use image library to add commonly used symbols to your labels (fax, data, voice, etc.)
- Import bitmap (.bmp) graphic images into a label
- Create alpha and numeric serializations

## System Requirements:

-WINDOWS^ 95, 98, Me, 2000, NT 4.x, and XP; minimum 486 processor; minimum 8MB of RAM; 30 MB hard drive space

|  |  |  | Std. <br> Pkg. <br> Part Number |  |

## EASY-MARK ${ }^{\text {m" }}$ Labeling Software

- WYSIWYG - What You See Is What You Get - program allows you to see labels on-screen as they will appear when printed
- Quick text entry - feature allows you to enter text on individual labels or over an entire range
- Advanced alpha and numeric serialization speeds label creation
- All PANDUIT® thermal transfer, dot-matrix, laser and inkjet label formats
- On-line help function files, including the TIA/EIA-606-A Labeling Compliance Brochure that assists in understanding the TIA/EIA-606-A standard and insure network labeling compliance
- Easy to install and supplied on CD-ROM
- Uses full range of WINDOWS^ fonts including True Type* fonts

## System Requirements:

-WINDOWS^ 95, 98, Me, 2000, NT4.x, and XP; minimum 486 processor; minimum 32 MB RAM; 64 MB hard drive space

## Self-Laminating Labels for Wire and Cables

- Labels for wire/cable applications are specifically sized and consistent across print technologies: laser/ink jet, thermal transfer, dot matrix and portable printers
- PANDUIT® labeling software packages include all label formats to quickly and economically identify wires and cables
- White print-on area with clear overlaminate protects legend for clear and durable identification

Self-Laminating Labels for Laser/Ink Jet Desktop Printers Supplied on $8.5^{\prime \prime} \times 11$ " Sheets

## Heat Shrink Labels for Wire and Cables

- Produce durable, high quality chemical/abrasion resistant heat shrink markers
- Pre-cut tubing mounted on plastic carrier
- Flattened polyolefin material
- Service temperature range: $-22^{\circ}$ to $220^{\circ}$ ( $-30^{\circ} \mathrm{C}$ to $105^{\circ} \mathrm{C}$ )
- Shrink ratio $3: 1$ at $212^{\circ} \mathrm{F}\left(100^{\circ} \mathrm{C}\right)$
- Meets UL Standard 224 for flammability
- For best results when using desktop thermal transfer printers use PANDUIT ${ }^{\text {® }}$ hybrid thermal transfer ribbon, TTRH-BL found on page K30. When using the VIPER ${ }^{\text {w }}$ LS6 Portable Thermal Transfer Printer, use with LS6-RHBLK found on page K29.

## Cable Ties

## PAN-TY ${ }^{\circledR}$ Cable Ties

- One piece construction for consistent performance and reliability
- Lowest threading force of any one piece cable tie in the industry
- Versatile cable ties that can be used in countless applications
- Material: Nylon 6.6

## HOT STAMPING - Custom Printed Cable Ties

A wide variety of information can be imprinted on PANDUIT ${ }^{\circledR}$ cable ties, marker ties and marker plates. Printing utilizes a durable "Hot Stamping" process that is an economical and convenient way to permanently mark cable ties. Customize with a wide variety of choices:

- Seven basic text colors
- Special logos and diagrams (with customer supplied camera-ready artwork)
- Alphanumeric and sequential numbering for serialization
- Fast delivery with approved artwork
- 5,000 piece minimum per part number

## TMDUli

## Dome-Top ${ }^{\circledR}$ Barb Ty Cable Ties

c ious c ULUS

- Unique patented design with round, smooth edges
- Stainless steel locking barb provides consistent performance, reliability and infinite adjustability through its entire bundle range
- High strength and low thread force

For cable tie installation tooling, see page K41.

- Used to fasten and identify bundles at the same time
- Stainless steel locking barb
- May be marked with PANDUIT ${ }^{\circledR}$ marker pens computer printable labels or use PANDUIT ${ }^{\circledR}$ custom hot stamping service (see page K36)

## Dome-Top ${ }^{\circledR}$ Barb Ty Marker \& Flag Ties

System Overview

Disconnects

## Dura-Ty ${ }^{\text {Tw }}$ Cable Ties

- Ideal for telecommunications, outside plant cabling applications and for use between campus buildings
- Weather Resistant Acetal provides excellent chemical and moisture resistance
- Double stainless steel, Type 302, locking barbs
- High tensile strength ( 250 lb. ) and high impact resistance
- Meets Telcordia TR-TSY-000789
- May be used with stackable cable spacer, SACS50-T100

## TAK-TAPE ${ }^{\text {mi }}$ Hook \& Loop Strips

- Strongest, low profile material in the industry - thin and flexible to quickly wrap around bundles
- Cost effective for general purpose bundling
- Adjustable, releasable and reusable
- Large continuous roll you can cut to size

|  | Length |  | Width |  | Max. <br> Bundle Dia. |  | Min. Loop <br> Tensile Str. |  | Std. <br> Pkg. | Std. <br> Ctn. |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Ft. | $\mathbf{M}$ | $\mathbf{I n}$. | $\mathbf{m m}$ | $\mathbf{I n}$. | $\mathbf{m m}$ | Lbs. | $\mathbf{N}$ | Qty. | Ity. <br> Qty. |

| TTS-35RX0 | 35 | 11 | .750 | 19.1 | Various | Various | 40 | 178 | 1 | 10 |

Std. Pkg. Qty. of TTS-35RX0 denotes 1 package of ten 35 ' rolls.

- Handy, reusable plastic case (TTS20) keeps material clean

Note: Minimum 2" overlap required to achieve loop tensile rating.

## NEMI Ultra-Cinch ${ }^{\text {m" }}$ Hook \& Loop Ties

- Exclusive material with hooks \& loops on same side allows user to secure a greater range of bundle diameters, including smaller bundles
- Low profile contoured cinch ring reduces overall bundle size
- Releasable and reusable hundreds of times which is ideal for applications requiring frequent moves, adds or changes
- Soft hook and loop material protects against cable damage, such as over-tensioning of high performance UTP and fiber optic cables

| Part Number | Length |  | Width |  | Max. Bundle Dia. |  | Min. Loop Tensile Str. |  | Std. <br> Pkg. <br> Qty. | $\begin{aligned} & \text { Std. } \\ & \text { Ctn. } \end{aligned}$Qty. |

## Screw Information

|  |  | Std. <br> Pkg. <br> Qty. | Std. <br> Ctn. <br> Qty. |
| :--- | :--- | :---: | :---: |
| Part Number | Part Description | 10 | 100 |
| UCTGS1224-X | $12-24$ UNC $\times 5 / 8 \mathrm{~mm}(.625 ")$ Flat Head Phillips Screw | 10 | 100 |
| UCTGSM5-X | M5 x 16mm Flat Head Phillips Screw | 10 | 100 |
| UCTGSM6-X | M6 $\times 16 \mathrm{~mm}$ Flat Head Phillips Screw |  |  |

Use of above screws ensures screw head is mounted flush with grommet.

## 

TERMINATION SOLUTIONS

## Cable Tie Installation Tools

## Hand-Operated Tools - Tool-Controlled Tension and Cut-Off

- Tool-controlled tension and cut-off provides consistent results and speeds installation to lower installed cost
- Ergonomic tools (GTS \& GTH) are lightweight and comfortable to use, reducing operator fatigue

| Part Number |  | Std. <br> Pkg. <br> Qty. |
| :--- | :--- | :---: |
| GTS | Installs Subminiature, Miniature, Intermediate and Standard cross section cable ties. <br> Qualified Product Listed per Mil. Std. MS90387-1 and Mil. Spec. MIL-T-81306A. <br> Color identification: black trigger handle <br> Body: gray plastic housing with black selector knob <br> Weight: 8.8 oz. (249g) | 1 |
| GTH | Installs Standard, Heavy-Standard, Light-Heavy and Heavy cross section cable ties. <br> Color identification: red trigger handle <br> Body: gray plastic housing with red selector knob <br> Weight: 11.2 oz. (318g) | 1 |
| GS4EH | Installs Light-Heavy, Heavy and Extra-Heavy cross section cable ties. <br> Color identification: blue trigger handle <br> Body: gray metal housing with blue selector knob <br> Weight: 16 oz. (454g) | 1 |

Cable Tie Installation Tools for use with PANDUIT ${ }^{\circledR}$ cable ties on pages $K 36$ to $K 39$.

## Hand Operated Tools - Installer-Controlled Tension and Cut-Off

- Economical series of tools for maintenance or construction applications
- Operator-controlled tension and cut-off
- Excellent tool for low volume applications

| Part Number | Part Description | Std. <br> Pkg. <br> Qty. |
| :--- | :--- | :---: |
| STS2 | Installs Miniature, Intermediate and Standard cross section cable ties. Install cable tie <br> around bundle and tension tie by squeezing tool handle. Reduce tension slightly and <br> twist tool 1/4 turn in either direction to cut off excess cable tie. <br> Color identification: black <br> Weight: 2.5 oz. (71g) | 1 |
|  | Installs Standard, Heavy-Standard, Light-Heavy and Heavy cross section cable ties. <br> Inexpensive, maintenance-free, all purpose tool. Ergonomic handle design and short <br> handle span. Top loading feature for right or left-handed users. Install cable tie around <br> bundle and tension tie by squeezing tool handle. Reduce tension slightly and twist tool <br> 1/4 turn either direction to cut off excess cable tie. | 1 |
| CTH2 <br> Color identification: red <br> Weight: 2.5 oz. (71g) | Installs Light-Heavy, Heavy and Extra-Heavy cross section cable ties. Durable all steel <br> construction with comfortable rubber handles. Install cable tie around bundle and <br> tension tie by squeezing tool handle. Reduce tension slightly and twist tool 1/4 turn <br> either direction to cut off excess cable tie. | 1 |
| ST2EH | Color identification: black <br> Weight: 16 oz. (454g) |  |

Cable Tie Installation Tools for use with PANDUIT® cable ties on pages $K 36$ to $K 39$.

- Tools provide flush cut-off of cable tie, which limits exposure to sharp edges
- Tension adjustment conveniently located and easy to change
- Replacement blades available

## Technical Specification and Selection Information

The following pages provide information helpful in specifying PANDUIT ${ }^{\circ}$ Power and Grounding Connectors and selecting the appropriate connector and tooling for your applications.

## Testing Agencies and Test Standards

## Underwriters Laboratories, Inc.

Is an independent, not-for-profit safety testing and certification organization based in the United States. Underwriters Laboratories, Inc. Standards applicable to specified PANDUIT® PAN-TERM ${ }^{\circledR}$ Terminals and PAN-LUG ${ }^{\text {m }}$ Power Connectors:

- UL 486A Wire Connectors and Soldering Lugs for Use with Copper Conductors - Covers pressure wire connectors and soldering lugs for use with copper conductors according to the National Electrical Code NFPA 70.
- UL 486B Wire Connectors for Use with Aluminum Conductors
UL 467 Grounding and Bonding Equipment
- UL 310 Electrical Quick-Connect Terminals
- UL 94 Test for Flammability of Plastic Materials for Parts in Devices and Appliances

## Canadian Standards <br> Association

Canadian Standards Association is a not-for-profit membership based association serving business, industry, government, and consumers in Canada and the global market place. C.S.A. works in Canada and around the world to develop standards that enhance public safety and health.
Canadian Standards Association standards that are applicable to specified PANDUIT ${ }^{\oplus}$ PAN-TERM ${ }^{\circledR}$ Terminals and PaN-LUG ${ }^{\text {m" }}$ Power Connectors:
C22.2 NO. 65-03 Wire Connectors
C22.2 NO. 41-M1987 (R1999) Grounding and Bonding Equipment

## National Electrical Manufacturers Association NEMA

NEMA is the largest trade association in the U.S. representing electro-industry manufacturers. NEMA develops industry standards that are in the best interest of the industry and users of its products. NEMA standards for electrical power connector for substations covers uninsulated connectors and bus bar supports which are made of metal and intended for use in substations. Included in the standard are manufacturing standards for bolt hole sizes and spacings for terminal connectors with single tangs. PANDUIT ${ }^{\circledR}$ offers connectors that meet NEMA manufacturing standards and these are specially noted as listed within this catalog.

## Telecommunications Industry Association TIA <br> (TA)

 The Telecommunications Industry Association is a leading U.S. non-profit trade association serving the communications and information technology industry. TIA represents providers of communications and information technology products and services for the global marketplace through its core competencies in standards development.
## Alliance for Telecommunications Industry Solutions ATIS

ATIS is a technical planning and standards development organization that is committed to rapidly developing and promoting technical and operations standards for the communications and related information technologies industry worldwide using a pragmatic, flexible and open approach. Over 1,200 participants from more than 400 communications companies are active in ATIS' 22 industry committees, and its Incubator Solutions Program. www.atis.org
JJSTD-607-A-2002, Commercial Building Grounding (Earthing) and Bonding Requirements for Telecommunications is jointly developed by TIA/EIA and ATIS' technical committee T1E1. This document is available on the ATIS Document Center at www.atis.org.
Adhering to the grounding principles outlined in J-STD-607-A-2002 helps ensure that telecommunications equipment and systems operate reliably. As stated in J-STD-607-A-2002, the preferred means of connecting conductors to busbars is by using two-hole irreversible compression lugs listed by a nationally recognized testing laboratory (NRTL) such as UL. The PANDUIT ${ }^{\circledR}$ PAN-LUG ${ }^{\text {T" }}$ line of copper compression connectors meets these requirements, in all of the barrel sizes specified by the 607 standard.

## NEBS Level 3 Approval as tested by Telcordia Technologies

PANDUIT ${ }^{\oplus}$ is the first in the industry to have a system of copper compression lugs and splices (\#8 AWG-1,000 kcmil) and crimping tools physically and rigorously tested by Telcordia Technologies to meet Network Equipment-Building Systems (NEBS) Level 3 compliance.
Telcordia Technologies, formerly known as Bellcore, serves as the testing agency for the Regional Bell Operating Companies.
NEBS was developed by Bellcore and is currently maintained by Telcordia Technologies. NEBS was developed to standardize requirements for Central Office Equipment and to develop criteria for personal safety, protection of property and operational continuity.
NEBS level 3 Criteria is the minimum level of environmental compatibility needed to provide maximum assurance of equipment operability within the network facility environment. The Level 3 Criteria is the highest assurance of product operability. Products that meet NEBS level 3 Criteria are suited for equipment applications which demand minimal service interruptions over the life span of the equipment.

System Overview

${ }^{* *}$ CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.
(1) Maximum size with CT-2950 is 500 kcmil lugs, 250 kcmil splices.
(2) CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.
(3) Half width dies.
(4) The CT1700 crimp pockets are integrated into the crimp head.
(5) Maximum size: 250 kcmil lugs and splices.
(6) Minimum size: 4 AWG lugs and splices.

*CT-1700 crimp die pockets are integrated into the tool head.
${ }^{* *}$ CD-920 Dies can be used with CT-940CH Tool and CT-2940 Tool with CD-940-DA Die Adapter.
${ }^{\wedge}$ CD-940 Dies to be used with CT-940CH and CT-2940 Tool.
$\ddagger$ Maximum conductor size: 500 flex I and 750 kcmil.
$\ddagger \ddagger$ Maximum conductor size: 250 flex I and 400 kcmil.

*Half width dies.
${ }^{* *}$ CD-920 Dies can be used with CT-940CH Tool with CD-940-DA Die Adapter. Maximum size splice is 250 kcmil with CT-920, CT-920CH and CT-2920 Tools.
***CT-1700 Crimp Pockets are integrated into the tool head.
$\ddagger$ CT-940 Dies to be used exclusively with CT-940CH Tool.

## For use with Installation Tooling and Die Selections for: Copper or Aluminum Conductors <br> Types LAA, LAB and SA (continued)

Flat washer or belleville (conical) washer recommended for aluminum lugs.

Use of CMP-100 joint compound between aluminum lug and copper or aluminum bus bar or mounting pad is recommended.

## Recommended Hardware Material

Material Configuration of Lug/Mounting Surface

| Copper to Copper | Aluminum to Copper | Aluminum to Aluminum | Copper to Steel | Aluminum to Steel |
| :--- | :--- | :--- | :--- | :--- |
| 1. Silicon Bronze <br> 2. Stainless Steel | 1. Silicon Bronze <br> 2. Aluminum <br> 3. Stainless Steel | 1. Aluminum <br> 2. Stainless Steel <br> 3. Plated Silicon Bronze | 1. Silicon Bronze <br> 2. Stainless Steel | 1. Aluminum <br> 2. Stainless Steel |

*Strandings required for UL and CSA Certification testing.
This chart details the different conductors commonly used in the industry.
For each size, either AWG or Metric, various stranding options are listed. Typically the higher stranding is used in applications requiring greater conductor flexibility.

[^0]:    **To order in bulk, replace -C in the part number with -M for a bulk package of 1000 and replace -L with -D for a bulk package of 500 .

[^1]:    **To order in bulk, replace -C in the part number with -M for a bulk package of 1000 and replace -L with -D for a bulk package of 500 .

[^2]:    *Brazed seam.
    **Available in bulk, to order, replace -C in the part number with -M for a bulk package of 1000 .

[^3]:    $\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
    *Not tested to NEBS Level 3 requirements.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^4]:    $\ddagger$ See pages $L 8, L 9$ and $L 10, L 11$ in Technical Info section for tool and die information.
    *Not tested to NEBS Level 3 requirements.
    **Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
    $\bullet$ NEMA hole sizes and spacing.

[^5]:    $\ddagger$ See pages L8, L9 and L10, L11 in Technical Info section for tool and die information.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^6]:    $\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
    **Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
    $\bullet$ NEMA hole sizes and spacing

[^7]:    $\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
    **Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
    $\bullet$ NEMA hole sizes and spacing.

[^8]:    $\ddagger$ See pages L12, L13 and L14, L15 in Technical Info section for tool and die information.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^9]:    $\ddagger$ See pages L20, L21 in Technical Info section for tool and die information.
    For smaller wire sizes, see page D6 in Splice Section.

[^10]:    $\ddagger$ See pages L22, L23 in Technical Info section for tool and die information.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^11]:    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^12]:    $\ddagger$ See pages L22, L23 in Technical Info section for tool and die information.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^13]:    $\ddagger$ See pages L22, L23 in Technical Info section for tool and die information.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts. $\bullet$ NEMA hole sizes and spacing.

[^14]:    $\ddagger$ See pages L24, L25 in Technical Info section for tool and die information.
    **Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.
    $\bullet$ NEMA hole sizes and spacing.

[^15]:    $\ddagger$ See pages L26, L27, L28, L29, L30, L31 in Technical Info section for tool and die information.
    *Also UL Listed and CSA Certified for \#3 AWG STR and \#2 AWG SOL.
    ${ }^{* *}$ Consult cable manufacturer for voltage stress relief instructions with applications greater than 2000 volts.

[^16]:    $\ddagger$ See page L35 in Technical Info section for tool and die information.

[^17]:    NOTES for Crimping with Hand Operated Controlled Cycle Crimping Tools:

    1. PANDUIT® controlled cycle crimping tools properly locate rings, forks, barrel insulated and non-insulated disconnects, pins, and blades. No further positioning is required.
    2. Once a crimp has been started, the ratchet device of controlled cycle tools will not release until the crimp is complete, independent of operator expertise.
    3. Controlled cycle tools provide the electrical crimp and the insulation closure in a single cycle of the tool.
    4. When using controlled cycle tooling, insulated butt splices must be inserted from the back of the tool to ensure that the electrical and insulation closure crimp pockets are properly aligned with the splice.
[^18]:    See Tool Charts on pages L6-L41 for selection of crimp dies and number of crimps used with specific tool and connector combinations.

[^19]:    See pages L6-L41 in Technical Info section for connector and tool selection information.

[^20]:    Contact PANDUIT ${ }^{\circledR}$ Technical Assistance for use in production environments.

[^21]:    See pages $L 6$ - $L 41$ in Technical Info section for connector and tool selection information.

[^22]:    **Uses slotted head set screw.

[^23]:    The use of PANDUIT ${ }^{\oplus}$ oxide inhibiting joint compound (CMP-100) is recommended for pad to pad and conductor connections. See pages H33, F118.

[^24]:    *Listed torque values are for maximum conductor sizes, consult the installation instruction sheet for smaller sizes.

[^25]:    *To mate with other manufacturers fully insulated $.250 \times .032$ female receptacles.

[^26]:    ${ }^{* *}$ CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.
    (1) Maximum size with CT-2950 is 500 kcmil lugs, 250 kcmil splices.
    (2) CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.
    (3) Half width dies.
    (4) The CT1700 crimp pockets are integrated into the crimp head.
    (5) Maximum size: 250 kcmil lugs and splices.
    (6) Minimum size: 4 AWG lugs and splices.

[^27]:    * Half width dies.
    **CD-920 Dies can be used with CT-940CH and CT-2940
    tools with CD-940-DA adapter.
    (1) Require U Die adapter.
    (2) CD-940 Dies to be used exclusively with C-940CH tool.
    (3) Maximum size: 500 kcmil lugs and 250 kcmil splices.

[^28]:    *Half width dies.
    **CD-920 Dies can be used with CT-940CH Tool with CD-940-DA Die Adapter.
    $\ddagger$ Maximum Size: 500 kcmil lug, 250 kcmil splice.
    ${ }^{(1)}$ CT-1700 crimp die pockets are integrated into the tool head.
    ${ }^{(2)}$ Maximum size: 250 kcmil lugs and splices.
    ${ }^{(3)}$ Minimum size: 4 AWG lugs and splices.

[^29]:    *CT-940CH and CT-2940 require CD-940-DA adapter for CDM-920 dies.
    **The CT-1700 crimp die pockets are integrated into the tool head.

[^30]:    *CT-940CH and CT-2940 PANDUIT tools and Y46 and Y46C Burndy tools require CD-940-DA adapter for CD-920H and CD-930H dies.
    PANDUIT crimping dies must be used with all tooling (PANDUIT and competitor) to maintain UL/CSA certification for applications up to 600 V .

[^31]:    *Half width dies.
    **CD-920 Dies can be used with CT940CH Tool with CD-940-DA Die Adapter. Maximum size splice is 250 kcmil with CT-920, CT-920CH and CT-2920 Tools.
    $\ddagger C D-940$ Dies to be used exclusively with CT-940CH Tool.

[^32]:    *Terminal Stud.
    **Power Connector Stud.
