MKP338 2 X2

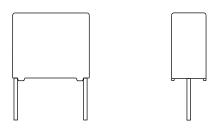

RoHS

COMPLIANT

Vishay BCcomponents

Interference Suppression Film Capacitors MKP Radial Potted Type

FEATURES

- 7.5 mm to 27.5 mm lead pitch
- Supplied loose in box, taped on reel
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

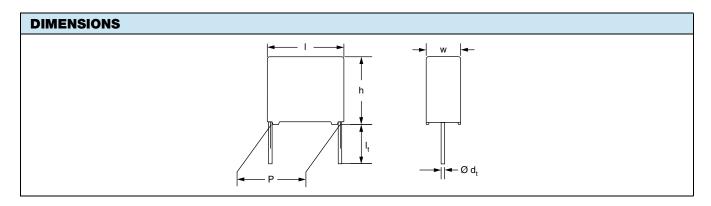

APPLICATIONS

For standard across the line X2 applications See also application note: www.vishay.com/doc?28153

| QUICK REFERENCE DATA | |
|---|--|
| Capacitance range (E12 series) | 0.001 μ F to 3.3 μ F (preferred values acc. to E6) |
| Capacitance tolerance | ± 20 %; ± 10 %, ± 5 % |
| Climatic testing class according to IEC 60068-1 | 55/110/56/B |
| Rated AC voltage | 310 V _{AC} ; 50 Hz to 60 Hz |
| Permissible DC voltage | 800 V _{DC} at 85 °C, 630 V _{DC} at 110 °C |
| Maximum application temperature | $C \leq 470$ nF: 110 °C (125 °C for less than 1000 h), C > 470 nF: 110 °C |
| Reference standards | IEC 60384-14 ed-4 (2013) and EN 60384-14 IEC 60065 requires pass. flamm. class B UL 60384-14; CSA-E384-14, CQC |
| Dielectric | Polypropylene film |
| Electrodes | Metallized film |
| Construction | Mono construction |
| Encapsulation | Plastic case, epoxy resin sealed, flame retardant UL-class 94 V-0 |
| Leads | Tinned wire |
| Marking | C-value; tolerance; rated voltage; sub-class; manufacturer's type designation; code for dielectric material, manufacturer location; manufacturer's logo; year and week; safety approvals |

MOUNTING

Normal Use

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoleers are designed for mounting in printed-circuit boards by means of automatic insertion machines.

For detailed tape specifications refer to packaging information: <u>www.vishay.com/doc?28139</u>

Specific Method of Mounting to Withstand Vibration and Shock

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board:

• For pitches \leq 15 mm capacitors shall be mechanically fixed by the leads

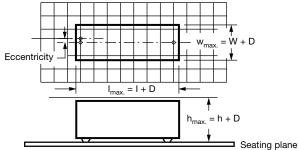

• For longer pitches the capacitors shall be mounted in the same way and the body clamped

Space Requirements on Printed Circuit Board

The maximum space for length ($I_{max.}$), width ($w_{max.}$) and height ($h_{max.}$) of film capacitors to take in account on the printed circuit board is shown in the drawings.

- For products with pitch \leq 15 mm, $\Delta w = \Delta I = 0.3$ mm; $\Delta h = 0.1$ mm
- For products with 15 mm < pitch \leq 27.5 mm, $\Delta w = \Delta I = 0.5$ mm; $\Delta h = 0.1$ mm

Eccentricity defined as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned.

SOLDERING

For general soldering conditions and wave soldering profile, we refer to the application note: "Soldering Guidelines for Film Capacitors": <u>www.vishay.com/doc?28171</u>

Storage Temperature

 T_{stg} = -25 °C to +35 °C with RH maximum 75 % without condensation

Ratings and Characteristics Reference Conditions

Unless otherwise specified, all electrical values apply to an ambient temperature of 23 °C \pm 1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 % \pm 2 %.

For reference testing, a conditioning period shall be applied over 96 h \pm 4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

Insulation resistance as a function of ambient temperature

APPLICATION NOTES

- For X2 electromagnetics interference suppression in standard across the line applications (50 Hz / 60 Hz) with a maximum mains voltage of 310 V_{AC}
- For series impedance applications we refer to application note <u>www.vishay.com/doc?28153</u>
- For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact: rfi@vishav.com
- These capacitors are not intended for continuous pulse applications. For these situations, capacitors of the AC and pulse programs must be used
- The maximum ambient temperature must not exceed 105 °C (125 °C for less than 1000 h) for C ≤ 470 nF and 110 °C for C > 470 nF
- Rated voltage pulse slope:

if the pulse voltage is lower than the rated voltage, the values of the specific reference data can be multiplied by 435 V_{DC} and divided by the applied voltage

INSPECTION REQUIREMENTS

General Notes

Sub-clause numbers of tests and performance requirements refer to the "Sectional Specification, IEC Publication IEC 60384-14 ed-4 (2013) and Specific Reference Data."

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
