Notes

- 1. The automotive operating temperature range to be individually discussed upon request.
- 2. ○marks in "Available for automotive use" indicate that some of the series products can work at the operating temperature range from -40°C to +85°C, ●marks in "Available for automotive use" indicate that all of the series products can work at the operating temperature range from -40°C to +85°C.

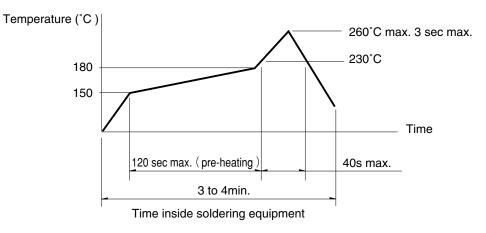

Soldering Conditions

Condition for Reflow

Available for Surface Mount Type.

- 1. Heating method: Double heating method with infrared heater.
- 2. Temperature measurement: Thermocouple 0.1 to 0.2ϕ CA (K) or CC (T) at solder joints (copper foil surface). A heat resistive tape should be used to fix thermocouple.

3. Temperature profile

Notes

- 1. The above temperature shall be measured of the top of switch. There are cases where the PC board's temperature greatly differs from that of the switch, depending on the material, size, thickness of PC boards and others. The above-stated conditions shall also apply to switch surface temperatures.
- 2. Soldering conditions differ depending on reflow soldering machines. Prior verification of soldering condition is highly recommended.

Conditions for Auto-dip Available for Snap-in Type and Radial Type (Except, SKHL, SKQJ, SKQK, SKEG series)

| Items | Condition | | | |
|------------------------|--|--|--|--|
| Flux built-up | Mounting surface should not be exposed to fluk | | | |
| Preheating temperature | Ambient temperature of the soldere surface of PC board. 100°C max. | | | |
| Preheating time | 60s max. | | | |
| Soldering temperature | 260°C max. | | | |
| Duration of immersion | 5s max. | | | |
| Number of soldering | 2times max. | | | |

■ Manual Soldering (Except SKRT Series)

| Items | Condition |
|------------------------------|-----------|
| Soldering temperature | 350°Cmax. |
| Duration of soldering | 3s max. |
| Capacity of soldering iron | 60W max. |

Notes

- Consult with us for availability of TACT Switch[™] washing.
- 2. Prevent flux penetration from the top side of the TACT Switch $^{\text{TM}}$.
- 3. Switch terminals and a PC board should not be coated with flux prior to soldering.
- 4. The second soldering should be done after the switch is stable with normal temperature.
- 5. Use the flux with a specific gravity of min 0.81. (EC-19S-8 by TAMURA Corporation, or equivalents.)
