## Amphenol ${ }^{\oplus}$ Heavy Duty Cylindrical Connectors QWL Series

Amphenol ${ }^{\circledR}$ QWL Series Connectors are tailor made for compact, heavy duty industrial use.

The outstanding performance of this series makes it well suited for shipboard installations and ground support power distribution applications where physical strength and dependability are key requirements.
The QWL Series are a versatile, economical alternative to military qualified designs.

Equivalent MS shell sizes and insert arrangements offer compatibility with all standard cable types. MIL-C-22992 environmental connector requirements (see page 1) are used as a performance criteria base for this series to assure reliability under the most severe conditions.

The design features of this connector series provide:

- Exceptional Service - high strength aluminum shells with Alumilite $225^{*}$ hard anodic finish and shock resistant resilient inserts.
- Foolproof Operation - rugged double stub coupling threads, left hand accessory threads and simple single keyway mating.
- Versatility - both MS and custom insert patterns available for a wide variety of multiconductor cables.
A complete line of accessories is available for use with QWL Series connectors, including cable sealing and clamp adapters, protective covers, flange gaskets and banding clamps.

[^0]
## the environmental connector

- HIGH CURRENT CAPACITY for power distribution network and inputs to large equipment
- RUGGED CONSTRUCTION dictated by the working environment, high strength aluminum shells with Alumilite 225* hard anodic finish, shock resistant resilient inserts, gaskets or "O" rings at appropriate surfaces for perfect weather tight connections.
- SERVICEABILITY AND FOOL-PROOF OPERATION with fast coupling, easily maintained double stub threads, left hand accessory threads and single keyway mating.
- VERSATILITY - both MS and custom insert patterns available to accommodate a wide variety of multi conductor cables.

| CONDITION | CONFIGURATION | DESCRIPTION | REFERENCE |
| :---: | :---: | :---: | :---: |
| THERMAL SHOCK | UNMATED | Five complete one hour temperature cycles of $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ | MIL-STD-1344 <br> method 1003 <br> test condition |
| MOISTURE RESISTANCE <br> (Cable mounted connectors) | MATED | Ten complete 24 hour cycles of $+25^{\circ} \mathrm{C}$ to $+65^{\circ} \mathrm{C}$ temperature at $90 \%$ to $98 \%$ humidity | MIL-STD-202 <br> method 106 |
| DURABILITY | MATED | 500 complete mating/unmating cycles | MIL-C-22992 |
| SALT SPRAY (Corrosion) | UNMATED | 48 hour exposure to atomized 5\% saline solution at $+35^{\circ} \mathrm{C}$ | MIL-STD-1344 method 1001 |
| VIBRATION | MATED | 10 to $55 \mathrm{~Hz}, .06$ inch total excursion in 1 minute cycles for 6 hours 55 to 2000 Hz , 10G peak amplitude sweep | MIL-STD-1344 method 2005 |
| HIGH IMPACT | MATED | Nine hammer blows from 1, 3 and 5 feet, three each in three axes on mounting panel | MIL-STD-202 <br> method 207 |
| FLUID IMMERSION | UNMATED | 20 hours immersion in hydraulic fluid and lubricating oil | MIL-C-22992 |
| WATER IMMERSION | MATED | 4 hours immersion at 1 atmosphere pressure differential | MIL-C-22992 |

## QWL

## how to order

QWL heavy duty cylindrical connectors are ordered by Amphenol ${ }^{\circledR}$ part number only. To illustrate the ordering procedure, part number 10-107628-5P is shown as follows:

PART NUMBER

$$
\frac{10}{1}-\frac{107}{2} \frac{6}{3} \frac{28-5}{4} \frac{P}{5}
$$

See code below:

1. Base Number Prefix - used to define contact type and finish.

10- Solder type contacts, silver plated (Standard)
75- Crimp type contacts, silver plated
81- Crimp type contacts, plated .0001 gold over silver
82- Crimp type contacts for MIL-C-13777 cable, silver plated
83- Crimp type contacts for MIL-C-13777 cable, plated .0001 gold over silver
85- Crimp type contacts plated .00005 gold over silver
2. Base Number - QWL Series Heavy Duty Cylindrical Connector.
3. Shell Style -

0 designates wall mount receptacle
1 designates cable connecting plug
2 designates box mount receptacle
3 designates jam nut receptacle with rear accessory threads (wall mount)
4 designates thru bulkhead receptacle
6 designates straight plug
7 designates flange mount plug
9 designates jam nut receptacle (box mount)
4. Shell Size/Insert Arrangement - Amphenol ${ }^{\circledR}$ QWL connectors are available in equivalent MS shell sizes with all current MS insert arrangements as well as a large selection of special arrangements for power and signal circuits. Select the required insert arrangement number from those shown on pages 18-40.
5. Contact Type/Alternate Insert Rotations - P for pin, S for socket. When an alternate position of the connector insert is required to prevent cross mating of connectors, a different letter (other than P or $S$ ) is used. Select from the table below the Amphenol ${ }^{\circledR}$ letter which indicates both type of contact, and insert rotation desired. Refer to page 17 for alternate insert rotations.

| PIN CONTACTS |  | SOCKET CONTACTS |  |
| :---: | :---: | :---: | :---: |
| MS <br> LETTERS | AMPHENOL <br> LETTER | MS <br> LETTERS | AMPHENOL® <br> LETTER |
| P | P (normal) | S | S (normal) |
| PW | G | SW | H |
| PX | I | SX | J |
| PY | K | SY | L |
| PZ | M | SZ | N |

## how to order, cont.

## ACCESSORIES

Cable Sealing Adapters - these are the basic connector accessories which provide moisture proofing and cable strain relief. Selection is made on the basis of accessory style, shell size and cable dimensions. To illustrate the ordering procedure, part number 10-101335-361 is shown as follows:

$\frac{10-101335}{1}-\frac{361}{2}$
See code below:

1. Accessory Base Number - refer to pages 41 through 52 for descriptions and dimensional data.10-101332 designates short barrel length with woven strain relief grip
10-101333 designates short barrel length without strain relief
10-101334 designates short barrel length with woven strain relief grip and attaching ring for protection cap with bead chain
10-101335 designates short barrel length with attaching ring for protection cap with bead chain
10-101380 designates short barrel length with attaching ring for protection cap with bead chain and clamp type strain relief bars
10-113637 designates long barrel length with woven strain relief and attaching ring for protection cap with bead chain
2. Part Number - represents connector shell size and range of cable diameters accommodated by the sealing adapter. Refer to the page listed below to determine the part number required for the accessory style being used:

| Accessory Series | Page |
| :--- | :---: |
| $10-10133 X$ | $46-48$ |
| $10-130380$ | 44 |
| $10-113637$ | $50-52$ |

## Cable Clamp 10-749XX-( ) and Adapter 10-113196-XX

Connectors which require weatherproofing on open wire cables are provided with a moisture seal by this cable clamp, a modification of the MS3057B design. A rubber grommet with holes for individual wires is used in place of the sleeve. As the assembly is tightened, the grommet is compressed around each wire, sealing out moisture.
Order this clamp by the part number listed on page 53 to accommodate the connector being used. Suffix the part number with the connector insert arrangement number.
To attach the cable clamp to the left hand accessory threads of QWL connectors, Adapter 10-113196-XX is needed. Finish is non-conductive Alumilite. Order by adapter part number listed on page 53 to accommodate the connector shell size being used. For a moisture proof seal, unused grommet holes must be filled with the appropriate size sealing plug or sealing rod selected from the table on page 53. Sealing plug or sealing rods must be ordered separately.

M85049/1 Cable Clamp and Adapter 10-113138-XX - order this clamp by the M85049( )C part number listed on page 55 to accommodate the cable type being used. To attach the cable clamp to the left hand accessory threads of QWL connectors, Adapter $10-113138-\mathrm{XX}$ is needed. Order by adapter part number listed on page 55 to accommodate the connector shell size being used. Standard finish on the clamp is olive drab, cadmium plate. Adapter finish is non-conductive Alumilite. MS3420-( )A sleeve, to facilitate sealing on smaller diameter cables, must be ordered separately. MS3420-( )A sleeves may be nested to accommodate smaller cable diameters.

## Plug Protection Caps -

$\begin{array}{ll}\text { 10-101046-( ) } & \text { designates plug cover with chain, Alumilite } 225 \text { finish } \\ \text { 10-101531-( ) } & \text { designates plug cover with chain and eyelet end, Alumilite } 225 \text { finish }\end{array}$
Order these plug covers by the part number listed on page 57 for the appropriate connector shell size.

## Receptacle Protection Caps -

10-101063-( ) designates receptacle cover with chain, Alumilite 225 finish

10-101048-( ) designates receptacle cover with chain and eyelet, Alumilite 225 finish
Order these receptacle covers by the part number listed on page 57 for the appropriate connector shell size.

## Flange Gasket -

10-36675-( ) for operating temperature range $-67^{\circ}$ to $+275^{\circ} \mathrm{F}$
$10-40450-() \quad$ for operating temperature range $0^{\circ}$ to $+257^{\circ} \mathrm{F}$
Order by part number listed on page 59 for appropriate connector shell size.
10-183249 Grip Banding Clamp - order this stainless steel clamp by part number listed on page 59 to accommodate cable diameter being used.

* Crimp contacts accommodate wire the same size as the contact as well as wire of the next smaller, even size. Arrangements identified with an asterisk ( ${ }^{*}$ ) are exceptions. See insert arrangement drawings on pages 18-40 for application wire size.
** Coaxial cable data can be found on insert arrangement drawings, pages 38-48. For further information on coaxial contacts and cable see catalog 12-130. Consult Sidney, NY for alternate rotations not covered on page 17.

## QWL

## alternate positioning

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the accompanying charts.
As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

Position W

Position X

Position Z

View looking into front face of pin insert or rear of socket insert.

The following insert arrangements have the same alternate insert rotations for $\mathrm{W}, \mathrm{X}, \mathrm{Y}$ and Z , which are:

| Degrees |  |  |  |
| :---: | :---: | :---: | :---: |
| W | X | Y | Z |
| 80 | 110 | 250 | 280 |

| $16-7$ | $20-22$ | $22-29$ | $24-17$ | $28-16$ | $32-13$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

CONTACT LEGEND

## Special contact arrangements

Requirements for more complex circuits prompted Amphenol to provide inserts not covered by the MS drawings. Illustrated here and on the following pages are insert layouts which have from one contact (high tension) to the 104 contact insert in shell size 44.

Many of these special inserts are also available in alternate keyway arrangements. Please contact Amphenol, Sidney, NY for additional information on special circuit application requirements.

## QWL - accessories cabling information

The Amphenol ${ }^{\circledR}$ QWL series of electrical connectors has been designed with the problems of multi-conductor cable users in mind. Two of these problems, namely water proofing and strain relief, are solved by the radial inward compression of an internal neoprene gland in the various cable accessories shown on the following pages. For additional strain relief beyond that provided by the gland, both cable grips and bar clamps are available. Since the glands close down from .094" to .145" (depending on shell size), the optimum condition for cable users is to select a gland with an I.D. only slightly larger than the maximum O.D. of the cable. The inside diameter of the accessory housing determines the maximum diameter of the cable as shown in the tabulation below. Smaller sizes than those shown in each shell size can be accommodated by smaller compression glands.

Different cable manufacturers use different constructions and cable lays in manufacturing multi-conductor cable. The specific cabling manufacturing specification should be known by the customer in detail in order to properly figure each QWL application. This knowledge can save many individual wire crossovers in any given run of cable. Crossovers add materially to the cable diameter without a cable accessory. In those cases where diameter buildup is impossible to avoid, special cable accessories with longer barrels are available.

How to order information is covered in detail on pages 4 and 5 . In selecting the base number below, care should be used, as some of the cable accessories are provided with protection cap attachment rings, while others are provided with the Kellems strain relief grip as shown. If a type or cable accommodation size is not found herein that fulfills your application, please contact Amphenol, Sidney, NY.

All dimensions for reference only.

*For complete order number see pages 4 and 5 .

## QWL - accessories <br> 10-10133X <br> cable sealing adapter

Type I Straight

Type II Step Down

*Wire grip dimensions (K) apply to 10-101332 and 10-101334 assemblies only
Type III Step Up
cable sealing adapter

All dimensions are for reference only.

# QWL - accessories adapter, cable clamp 

10-113196-XX adapter

## 10-749XX-( ) <br> cable clamp

This cable clamp is designed to be used with specific QWL insert arrangements. The locations, quantity, and sizes of holes in the clamp grommet must correspond to those in the connector for an effective moisture seal without wire crossing. Contact Amphenol, Sidney, NY, for grommet availability. Example: 10-107618-4P must use 10-74918-4 clamp.

## QWL - accessories adapter, cable clamp, sealing plugs

## QWL

## crimp contacts

Machined from copper alloy and silver-plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all MS insert arrangements and are identified with an Ampheno ${ }^{\circledR}$ proprietary number.

* When using wire adapter sleeve shown.
** Contact ratings as stated are test ratings only. The connector could not withstand full rated current through all contacts continuously. Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.
$\dagger$ The 12S, 14S and 16S connectors require short contacts.

TABLE I
CONTACT ARRANGEMENT SERVICE RATING

| MS <br> Service <br> Rating | Recommended <br> Operating Voltage <br> at Sea Level |  | Effective <br> Creepage <br> Distance <br> Nom. | Mechanical <br> Spacing <br> Nom. |
| :---: | :---: | :---: | :---: | :---: |
|  | DC | AC (RMS) | $1 / 16$ |  |
| A | 700 | 250 | 500 | $1 / 8$ |
| D | 1250 | 900 | $3 / 16$ | $1 / 16$ |
| E | 1750 | 1250 | $1 / 4$ | $3 / 16$ |
| B | 2450 | 1750 | $5 / 16$ | $1 / 4$ |
| C | 4200 | 3000 | 1 | $5 / 16$ |

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

TABLE II
ALTITUDE VOLTAGE DERATING** CHART

|  | Nominal Distance |  | Standard Sea Level Conditions |  | Pressure Altitude $\dagger$ 50,000 Feet |  | Pressure Altitude $\dagger$ 70,000 Feet |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| MS Service Rating | Airspace | Creepage | Minimum Flashover Voltage AC (RMS) | $\begin{gathered} \text { Test } \\ \text { Voltage } \\ \text { AC (RMS) } \end{gathered}$ | Minimum Flashover Voltage AC (RMS) | Test Voltage AC (RMS) | Minimum Flashover Voltage AC (RMS) | Test Voltage AC (RMS) |
| Inst. | 1/32 | 1/16 | 1400 | 1000 | 500 | 400 | 325 | 260 |
| A | 1/16 | 1/8 | 2800 | 2000 | 800 | 600 | 450 | 360 |
| D | 1/8 | 3/16 | 3600 | 2800 | 900 | 675 | 500 | 400 |
| E | 3/16 | 1/4 | 4500 | 3500 | 1000 | 750 | 550 | 440 |
| B | 1/4 | 5/16 | 5700 | 4500 | 1100 | 825 | 600 | 480 |
| C | 5/16 | 1 | 8500 | 7000 | 1300 | 975 | 700 | 560 |

$\dagger$ Not corrected for changes in density due to variations in temperature.
** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.

## QWL

## solder contacts

Machined copper alloy contacts in a full range of sizes, with closed entry socket design in the size 12 and 16 contacts. A heavy silver-plated finish is deposited on all MS style solder contacts for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop.

| $*$ | $*$ | 0 | Pin \& Socket | $11-7365-5 \dagger$ | Pin 11-7370-5 <br> *ocket 11-7674-3 $\dagger$ |

*Refer to tool manufacturers for appropriate crimp tools or positioner/turret. $\dagger$ Tools used with Arbor press 11-7364.

## QWL

## thermocouple contacts

Available from Amphenol is a complete line of cylindrical connectors featuring thermocouple contact insert arrangements. The design of these contacts is such that standard shell components and resilient inserts are used in the assemblies. Thermocouple contacts are available in all arrangements which contain size 12 and 16 pins and sockets, and feature probeproof, closed entry design for the socket contacts. MSapproved and other commercial arrangements may be ordered with thermocouple contacts substituted for the standard contacts. All thermocouple contact layouts may contain either iron, alumel, chromel, constantan, standard (copper) or brass (dummy) contacts. The resulting assembly will be identified with an Amphenol part number.

## IDENTIFICATION

For the purpose of wiring identification, thermocouple contacts are marked in accordance with the following color code which agrees with the wire code.

| Chromel. | . | . | . | . | White |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Alumel | . | . | . | . | Green |
| Iron . . . . . . . |  |  |  |  |  |

This identification is made by means of small dots of stain on solder well end of the contact and is in accordance with the listing shown above.

WIRE WELL DATA

| Contact Size | 12 | 16 |
| :---: | :---: | :---: |
| Well Inside +.004 <br> Diameter -.002 | . 125 | . 094 |
| Well +.031 <br> Depth -.000 | . 250 | . 188 |
| Solder Well <br> Barrel <br> Outside Diameter | . $166 \pm .003$ | . $125_{-.002}^{+.002}$ |

RECOMMENDED WIRE:
I Chromel - Alumel: Use wire in accordance with AN-W-29
II Iron - Constantan: Use wire in accordance with AN-W-8b

## QWL

## thermocouple arrangements

Military connector specifications do not provide for thermocouple contact usage in established MS inserts. Amphenol ${ }^{\circledR}$ has established a series of insert arrangements containing thermocouple contacts. Some inserts have been rotated into positions outside those covered by MS
drawings to prevent cross plugging. Available thermocouple arrangements are tabulated on the following pages. Please contact your local sales office or Sidney, NY for additional information regarding thermocouple arrangements particular to your application.

The following abbreviations are used in the contact material column:

| Abbreviation | Ir. | Con. | Cu. | Ch. | Al. | Dummy |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Material | Iron | Constantan | Copper | Chromel | Alumel | Brass |

| Shell Size and Arrg. $\dagger$ | Similar To MS Arrg. | Total Contacts | Contact Size |  | Pin Insert Rotation C/W | Contact Material |

## Other Heavy Duty Cylindrical Connectors Offered by Amphenol Class "L" MIL-C-22992, QWLD and Star-Line

Amphenol meets the demands for heavy duty connectors by providing three additional cylindrical connector series, each with unique design characteristics for reliable operation in specific industrial environments.

Class "L", MIL-C-22992 - for the heaviest electrical loads; for military and industrial applications.

- MIL-C-22992 qualification.
- Current range from 40 to 200 amperes.
- Direct current or single/three phase, 60/400 Hertz alternating current.
- Rugged shells are resistant to vibration, high impact, shock and corrosion
- Double stub threads per MIL-STD-1373 for fast coupling and easy cleaning.
- Five key polarization system assures that circuits with
 incompatible power characteristics (voltage, phase and frequency) are not mated.

Heavy Duty Class "L"

- Crimp termination. Contacts can be soldered.

Connectors

- Automatic grounding for safety.
- Unique arc quenching capability provides a positive safety feature if connectors are inadvertently disconnected under load.
- 4 shell styles with 7 insert patterns that facilitate large conductors.
- Grommets and seals provide waterproofing.

QWLD - for most power and control circuits

- Military (MIL-C-22992) qualified connectors and industrial equivalents available.
- Increased shell size for greater durability than similar standard connectors.
- Crimp or solder termination.
- Double stub threaded per MIL-STD-1373.
- 7 shell styles with over 300 insert patterns (MIL-C-5015 inserts plus specials)

- Class C is pressurized; Class R is environmental.

Star-line ${ }^{\circledR}$ Series - heavy duty environmentally sealed plugs and receptacles that are used in all types of industrial and aerospace applications.

- Equals or exceeds MIL-C-5015 E and R specifications.
- UL listed and CSA listed circuit breaking capability.
- Up to high amperage of 1135 amps at 1000 VAC or DC rating available.
- Solder, crimp and pressure terminals. Circuit breaking power and control types.
- Double lead Acme threads provide complete coupling in one turn of the coupling nut, and do not clog under adverse weather conditions.
- IP67 rating for environmental sealing.
- Hard anodic coating provides dielectric strength with heat and corrosion resistance.

Star-Line Series
Star-line EX ${ }^{\circledR}$ Series - Hybrid form of the Star-Line series with higher temperature ranges. Cenelec Certified for use in Zone 1-IIc hazardous environments. EX Certificate \#03ATEX 1101X.
