# AMPMODU Headers and Receptacles, .100 [2.54] Centerline 

For drawings, technical data or samples, contact your Tyco Electronics sales engineer or call the Tyco Electronics Product Information Center: 1-800-522-6752

Electronics

## AMPMODU . 025 [0.64] Square Interconnection System

The AMPMODU interconnection system provides interconnections with a unique modular concept, utilizing precision formed receptacle contacts and mating posts.
Mating of the post and receptacle contacts of this system is very tolerant. This is made possible by a post with a burr-free lead-in and a receptacle contact featuring double cantilever beams and antioverstress stops.
AMPMODU receptacle contacts and posts categorically fall into three general classifications of products, which include: board mounted posts and receptacle assemblies, post headers and wire-applied contact housings for crimp snap-in pin and receptacle contacts.

Board mounted receptacle assemblies are available in various geometries, offering packaging interconnections that include perpendicular, parallel and stacking capabilities.
Crimp snap-in pins for 26-22 AWG [0.12-0.4 mm²] wire and crimp snap-in receptacles for 32-20 AWG [0.03-0.6 $\mathrm{mm}^{2}$ ] wire provide excellent discrete wire terminations. Housings for these contacts provide ease of handling terminations in high density applications.
Machine applied terminations, through matched application equipment, are geared for virtually any production volume requirement, for the lowest possible applied cost.

## Terms Explained

## Receptacle Contacts

## Receptacle-Closed Entry Housing Design

The closed entry housing style better eliminates the chance of a mating post stubbing on the edges of the receptacle contact.

AMPMODU mating posts are supplied typically as headers. They are available in various populations to meet the interconnection and packaging requirements of most systems. However, in instances where packaging configurations do not lend themselves to the economies of headers, Tyco Electronics can provide application equipment for the discrete location of individual posts.
Looking at the electronic industry's standard "levels of packaging," the AMPMODU . 025 [0.64] square interconnection system is primarily used in levels three and four.
In level three it is used as a connection between two or more printed circuits. A mother/daughter board connection is typical. In
level four it is used as a connection between two subassemblies, such as a power supply and an associated subassembly.
It is also important to note this product can serve as an interconnection in more than one level, depending on the application.
The . 025 [0.64] square interconnection system offers the most complete line of post/receptacle packaging products available today. This system, rated at 3 amperes per contact, has been used by almost every industry and marketplace over the last decade and is one of the oldest, most versatile and reliable interconnection systems employing . 025 [0.64] square packaging technology.

The AMPMODU receptacle cross-section is primarily rectangular, with rounded corners. Two integral cantilever beams contact the mating square or round male posts. Deflection of these spring members is limited by anti-overstress stops, and excessive permanent deformation is prevented. This feature allows a wide range for tolerance of misalignment of mating contacts.
The configuration of the receptacle completely encloses the spring members
preventing damage during handling and assembly and makes the system compatible with automatic application techniques.
Note: Application of a contact lubricant is part of the manufacturing process of all AMPMODU tin-plated crimp products. However, it is not part of the manufacturing process of products that customers will solder, then clean. For these products, Tyco Electronics recommends that customers use contact lubricant. See the Tyco Electronics web page for further information.

Mating Post Selection Guide

The following selection guide is provided to help in choosing a mating product after a receptacle, header or post has been selected. In some instances references are given on the catalog page to specific mating connectors. In other instances the reader is referred here to the selection guide for mating product recommendations.
If your application requirement is not answered here, consult Tyco Electronics for further recommendations.

## Posts Without Shoulders

For drawn wire products (ie, AMPMODU Breakaway and Low Profile Headers) and for products having the shoulder of the post below the housing or pc borad surface (ie, AMPMODU MTE and Single Row Shrouded Headers) the effective mating length starts at the housing or pc board surface.

## Posts With Shoulders

For product having the shoulder of the post extending above the housing or pc board surface) ie, Standard AMPMODU Shrouded and Unshrouded Headers) the effective mating length starts at the top of the shoulder.

## Product Facts

- Variety of popular sizes available
■ Substantial time/labor savings-install all posts at one time
■ Vertical and right-angle versions available in single- and double-row configurations
■ Triple-row version available in vertical configuration with .230 [5.84] mating length
- Copper alloy posts
- Choice of select gold or tin-lead plated posts
- Mating length for single and double row is .318 [8.08] (. 278 [7.06] effective mating length-see page 89)
- Flame retardant, black thermoplastic housings; $94 \mathrm{~V}-0$ rated
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Standard Headers—Unshrouded

## Performance

Characteristics
Electrical:
Insulation Resistance-5,000
megohms minimum initial
Dielectric Withstanding Voltage-
750 V rms at sea level

## Environmental:

Operating Temperature-
$-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$ (black thermoplastic
housings)
Current-3 amperes maximum
per contact (dependent upon mating
connector)
tyco
Electronics
. 025 [0.64] Square Straight Post

Material and Finish:
Housing-Black thermoplastic,
$94 \mathrm{~V}-0$ rated
Posts-Copper alloy, plated as follows:
Plating A-Selectively plated . 000030
[0.00076] gold on contact area, with gold flash over 000050 [ 0.00127 ] nickel on entire post
Plating B-Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [ 0.00127 ] nickel on entire post
Tin-Lead/Nickel—Plating option available; minimum order quantities may apply. Consult Tyco Electronics.

Catalog 1307819
Revised 6-04

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents.

Dimensions are shown for reference purposes only. Specifications subject to change.

USA: 1-800-522-6752 Canada: 1-905-470-4425 Мехісо: 01-800-733-8926 C. America: 52-55-5-729-0425

South America: 55-11-3611-1514 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-141-810-8967

Electronics

Standard Headers—Unshrouded, Single Row, . 100 [2.54]
Centerline (Continued)
. 025 [0.64] Square Right-Angle Post

Material and Finish:
Housing-Black thermoplastic, 94V-0 rated
Posts-Copper alloy, plated as follows: Plating A-Selectively plated . 000030 [0.00076] gold on contact area, with gold flash over .000050 [ 0.00127 ] nickel on entire post
Plating B-Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [ 0.00127 ] nickel on entire post
Tin-Lead/Nickel—Plating option available; minimum order quantities may apply. Consult Tyco Electronics.

Electronics

Standard Headers-Unshrouded, Double-Row, $.100 \times .100$ [2.54 x 2.54] Centerline (Continued)
. 025 [0.64] Square Right-Angle Post

Material and Finish:
Housing-Black thermoplastic, 94V-0 rated
Posts-Copper alloy, plated as follows: Plating A-Selectively plated . 000030 [0.00076] gold on contact area, with gold flash over . 000050 [0.00127] nickel on entire post
Plating B-Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [ 0.00127 ] nickel on entire post
Tin-Lead/Nickel—Plating option available; minimum order quantities may apply. Consult Tyco Electronics.

Electronics

## Product Facts

- Design and inventory versatility-headers can be broken into any size needed

■ Variety of popular sizes available
■ Substantial time/labor savings-install all posts at one time

- Vertical and right-angle versions available in single- and double-row configurations
■ Phosphor bronze posts
- Choice of gold duplex or tin-lead plated posts
■ Post lengths include . 230 [5.84] and . 318 [8.08] for connector mating
- Board retention feature available
- Flame retardant, black thermoplastic housings; 94V-0 rated
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Breakaway and Retention Headers-Unshrouded

## Performance

Characteristics
Electrical:
Insulation Resistance-5,000
megohms minimum initial
Dielectric Withstanding Voltage-
750 V rms at sea level

## Environmental:

Operating Temperature-
$-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$ (black thermoplastic
housings)
Current-3 amperes maximum per contact (dependent upon mating receptacle)
tyco
Electronics
. 025 [0.64] Square Straight Post

## Material and Finish:

Housing-Black thermoplastic, $94 \mathrm{~V}-0$ rated
Posts-Phosphor bronze, plated as follows:
Plating A-Duplex plated . 000030 [0.00076] gold on contact area,
$.000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating B-Duplex plated . 000015 [0.00038] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [0.00127] nickel
Plating C-.000100-.000200
[0.00254-0.00508] tin-lead over . 000050 [0.00127] nickel on entire post

Electronics
. 025 [0.64] Square Right-Angle Post

Breakaway Headers-Unshrouded, Single Row, . 100 [2.54]
Centerline (Continued)

## Material and Finish:

Housing-Black thermoplastic, $94 \mathrm{~V}-0$ rated
Posts-Phosphor bronze, plated as follows:
Plating A-Duplex plated . 000030 [0.00076] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating B-Duplex plated .000015 [ 0.00038 ] gold on contact area,
. $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127 ] nickel
Plating C-.000100-.000200
[0.00254-0.00508] tin-lead over
.000050 [0.00127] nickel on entire post

Notes: 1. Headers may be broken to desired number of positions using Tool Kit No. 314818-1 (not shown). 2. Other tail lengths are available, consult Tyco Electronics. are metric equivalents.

Electronics

Breakaway Headers-Unshrouded, Double-Row, $.100 \times .100$ [2.54 x 2.54] Centerline
.025 [0.64] Square Straight-Angle Post

Material and Finish:
Housing-Black thermoplastic, $94 \mathrm{~V}-0$ rated
Posts-Phosphor bronze, plated as follows:
Plating A-Duplex plated . 000030 [0.00076] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating B-Duplex plated .000015 [0.00038] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127 ] nickel
Plating C-.000100-.000200
[0.00254-0.00508] tin-lead over .000050 [0.00127] nickel on entire post

Electronics

Breakaway Headers-Unshrouded, Double-Row, $.100 \times .100$ [2.54 x 2.54] Centerline
. 025 [0.64] Square Right-Angle Post

Material and Finish:
Housing-Black thermoplastic,
94V-0 rated
Posts-Phosphor bronze, plated as follows:
Plating A-Duplex plated . 000030
[0.00076] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating B-Duplex plated . 000015 [0.00038] gold on contact area, . $000100-.000200$ [0.00254-0.00508]
tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel

Plating C-.000100-. 000200
[0.00254-0.00508] tin-lead over .000050 [0.00127] nickel on entire post

. 025 [0.64] Square
Straight Post (with Board Retention Feature)

Photo 98184-8

Material and Finish:
Housing-Black thermoplastic, 94V-0 rated
Posts—Phosphor bronze, plated as follows:
Plating A—Duplex plated .000030 [0.00076] gold on contact area, .000100-. 000200 [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [0.00127] nickel
Plating B—Duplex plated .000015 [0.00038] gold on contact area, .000100-. 000200 [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [0.00127] nickel
Plating C-.000100-. 000200
[0.00254-0.00508] tin-lead over
.000050 [0.00127] nickel on entire post

## Performance Characteristics:

Insertion Force-12 lb. [53.4N]
maximum
Retention Force- $25 \mathrm{lb} .[1.11 \mathrm{~N}]$ minimum

2. Other tail lengths are available, consult Tyco Electronics.

Electronics

## Features of Breakaway Headers

■ Design and inventory versatility - headers can easily be made into any size
■ High Temperature Compatible

- Reduced part number base

■ Reduced inventory burden

## Applications

■ Desktops \& workstations

- Set-top boxes

■ Televisions
■ Automotive instrument panels \& radios
■ Medical and test equipment

## Benefits

■ Off the shelf availability
■ Various header length capability using the same reel
■ Reduction of inventory costs

- Economy version of the standard breakaway headers

AMPMODU Reeled Breakaway Headers

Tyco Electronics now offers AMPMODU reeled breakaway headers, which are used for board-to-board interconnections, on a continuous reel. The reeled breakaway headers are an economy version of the standard breakaway headers, and continue to provide the same high quality standards that Tyco Electronics is known for in the connector industry.
Reeled breakaway headers provide the flexibility to be able to cut the headers to many different lengths, while only having to stock one part number. As a result, the amount of part numbers that need to be purchased and stored can be greatly reduced.

Reeled breakaway headers can be purchased in single and double rows with tinlead, $5 \mathrm{Au}, 15 \mathrm{Au}$, and 30 Au duplex plating. The lower applied cost also offers . 230 " and .318 " mating lengths. (See standard breakaway-toreeled header conversion chart for vertical headers on the reverse side of this sheet)
Potential industries include: computer peripherals, telecommunications equipment, consumer, automotive, medical and test equipment.
Tooling available from: Robo-Pak, Inc. 814 Lakeshore Drive East Bethel, MN 55902
A pin retention and pin removal tooling option is also available in addition to cutting.

Breakaway Surface-Mount Compatible, High Temperature Headers-Unshrouded

## Product Facts

- Variety of popular sizes available
- Substantial time/labor savings-install all posts at one time
- Vertical and right-angle versions available in single- and double-row configurations
■ Phosphor bronze posts
- Gold duplex and tin plated posts
■ Post lengths include . 230 [5.84] and . 318 [8.08] for connector mating
- Black, glass-filled thermoplastic housings, high temperature compatible
- Recognized under the Component Program of Underwriters Laboratories Inc., "-1 File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

$\begin{array}{ll}\text { The AMPMODU } & \text { Performance } \\ \text { interconnection system } & \text { Characteristics } \\ \text { provides interconnections } & \text { Electrical: }\end{array}$ with a unique modular concept.

AMPMODU mating posts are supplied typically as header assemblies. They are available in various populations to meet the interconnection and packaging requirements of your system.

| With Board Retention Tails | 3 | . 284 [7.21] | . 200 [5.08] | 146297-3 | 146296-3 | 146294-3 | 146293-3 | 146292-3 | 146290-3 | 146289-3 | 146288-3 | 146286-3 |
| (See Notes 2 and 3. ) | 40 | 3.984 [101.19] | 3.900 [99.06] | 4-146297-0 | 4-146296-0 | 4-146294-0 | 4-146293-0 | 4-146292-0 | 4-146290-0 | 4-146289-0 | 4-146288-0 | 4-146286-0 |

Notes: 1. Headers without retention tails may be broken to the desired number of positions using Tool Kit No. 314818-1 (not shown).
2. Headers are also available in sizes 2 thru 39 positions (with Solder Tails) and 4 thru 39 positions (with Board Retention Tails).

When ordering, add the prefix and/or suffix (dash) numbers to the base part number that corresponds with the desired size.
For example, the complete part number for an 8 -position header with solder tails (C dimension 090 [2.29], post plating A) would be 146285-8. The complete part number for a 26 -position header with board retention tails ( $C$ dimension . 120 [3.05], post plating B) would be 2-146292-6. This part numbering system applies only to this page.
3. For C dimensions . 120 [3.05] and .125 [3.18], board retention using kinked tails are for headers 6 positions and smaller; headers 7 positions and larger use swaged tails. Headers with a C dimension of .090 [2.29] have swaged tails for all sizes.

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents.

Dimensions are shown for reference purposes only. Specifications subject to change.

Product Facts

- Surface Mount Leads
- Contact Material: phosphor bronze
- High temperature, black thermoplastic housings, $94 \mathrm{~V}-0$ rated, capable of withstanding IR or vaporphase reflow
- Recognized under the Component Program of Underwriters Laboratories Inc.
File No. E28476. File №. E28476
- Certified by Canadian Standards Association, File No. LR 7189
- Choice of gold duplex or tin lead plated posts
- Posts coplanar within . 006 [0.15]
- Tape and reel packaging available in addition to single tube packaging. Contact Tyco Electronics.
- Pick-and-place cap available for vacuum placement. Contact Tyco Electronics.
in single- and double-row vertical configurations with mating lengths of .230 [5.84] and . 320 [8.13]. Posts are offered with a choice of either .000030 [.0007] gold duplex or tin lead plating.

Current packaging is in a single tube but tape and reel is available for automatic pick-and-place. We also can provide a pick-and-place cap for vacuum placement if required.

An extension of the AMPMODU Breakaway Header product family is the surface mount, vertical breakaway headers. The AMPMODU surface-mount breakaway headers (Unshrouded) are available

## Product Facts

- Available in single and double row
- Parallel PC board stacking with numerous stack heights available
- Drawn wire posts allow 4 side mateability
- May eliminate the need for additional board spacers
- Can be used in conjunction with bottom entry receptacles
- Gold or tin plated

■ Up to 1.430 [36.32] overall post length

- Access sample request form Instruction Sheet Number 408-4236 on the Tyco Electronics FAX Information System
- Retention and surface mount features available upon request
■ Other header sizes can be made upon request
- Tape and reel packaging available. Contact Tyco Electronics.
- Pick-and-place cap available for vacuum placement. Contact Tyco Electronics.

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents.

Dimensions are shown for reference purposes only. Specifications subject to change.

USA: 1-800-522-6752 Canada: 1-905-470-4425 Mexico: 01-800-733-8926 C. America: 52-55-5-729-0425

South America: 55-11-3611-1514 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-141-810-8967

Electronics
. 025 [0.64] Square Straight Posts

Material and Finish:
Housing-Black thermoplastic,
94V-0 rated
Posts-Copper alloy, plated as follows:
Plating-As noted in chart
Tin-. $000100-.000200[.003-.005]$ inch tin-lead over . 000050 [.0012] inch nickel entire post
15Au-. 000015 [.0003] inch gold over . 000050 [.0012] inch nickel entire post

## Related Product Data:

Mateable Connectors-Refer to the Mating Post Selection Guide (page 89)

Technical Documents (page 294):
See mating connector for applicable product and and application specifications.

Retention and surface mount features available upon request. Other header sizes can be made upon request.
*Note: Headers are available in sizes 2 thru 80 . When ordering, add the prefix and/or suffix (dash) numbers to the base part number that corresponds with the number of positions per row.
For example, the complete part number for a 16 -position header is 146283-8. The complete part number for a 32-position of the same series would be 1-146283-6

Electronics

## Product Facts

■ Available in several styles-right-angle with three- and four-sided pin protection, and straight post with pin protection and mounting ears

- Post retention feature available
- Can be used for feed-to and feed-thru applications
- Housings are black thermoplastic, flame retardant 94V-0 rated

■ Contacts are copper alloy

- Available in gold duplex, gold over nickel and tinlead over nickel platings
■ Headers with . 066 [1.68] and 150 [3.81] end dimen sions are available in select sizes up to 60 positions
- Can be select loaded, consult Tyco Electronics.
- Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Standard Profile Headers-Shrouded

## Performance

Characteristics
Electrical:
Insulation Resistance-5,000
megohms minimum initial
Dielectric Withstanding Voltage-
750 RMS at sea level

Environmental:
Operating Temperature-
$-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$ (black thermoplastic
housings)
Current-3 amperes maximum
per contact

Electronics
. 025 [0.64] Square Straight Post (with Standoffs)

Material and Finish:
Housing-Black thermoplastic, $94 \mathrm{~V}-0$ rated
Posts-Copper alloy, plated as follows: Plating A-Duplex plated . 000030 [0.00076] gold on contact area, $.000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127 ] nickel
Plating B-Duplex plated . 000015 [0.00038] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating C-. $000100-.000200$
[0.00254-0.00508] tin-lead over .000050 [0.00127] nickel on entire post

## Product Facts

■ Available in . 000015 [0.00038] and . 000030 [0.00076] gold duplex plated posts

- Available in selected positions 10 thru 60
- Flame retardant, thermoplastic housings, 94V-0 rated
- Vertical and right-angle versions available in double row configurations
■ Available in . 025 [0.64] square drawn wire posts
- Wash out clearance for flux removal
- Accepts center and double bar polarization housings
■ Mates with AMP-LATCH Ribbon Cable Connectors
- Available with and without eject latches
- Available with and without high temperature compatible material
- Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

## Performance

Characteristics
Electrical:
Insulation Resistance-5,000
megohms minimum initial
Dielectric Withstanding Voltage-
750 V rms at sea level

Environmental:
Operating Temperature-
$-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$
Current-1 ampere maximum per contact

Electronics

AMP-LATCH Low Profile Headers-Shrouded, with . 150 [3.81] End Dimension, Double-Row, . $100 \times 100$ [ $2.54 \times 2.54$ ] Centerline
.025 [0.64] Square Straight Post

## Material and Finish:

Housing-Black thermoplastic, 94V-0 rated
Posts-Copper alloy, plated as follows:
Plating A-Duplex plated . 000030 [0.00076] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated .000050 [ 0.00127$]$ nickel
Plating B-Duplex plated . 000015 [0.00038] gold on contact area, . $000100-.000200$ [0.00254-0.00508] tin-lead on solder area, with entire post underplated $.000050[0.00127]$ nickel

## Electronics

AMPMODU Stacking Connectors-Shrouded, $.025 \times .025$ [ $0.64 \times 0.64]$ Posts

## Product Facts

- Parallel PC board stacking without use of mother boards
- Provides space between boards for interference-free routing of wire-to-board connections
- Two header heights available: . 785 [19.94] and 1.200 [30.48]
- Vertical mount headers are fully shrouded
■ Receptacle contacts have dual cantilever beams with built-in overstress protection

■ . 025 [0.64] sq. posts and receptacle contacts on double-row, $100 \times .100$ [ $2.54 \times 2.54$ ] centers

- Header posts and receptacle contacs are phosphor bronze, duplex plated
- Housings are made of flame retardant, glass-filled

AMPMODU stacking connectors are a two-piece interconnection system designed for parallel stacking printed circuit boards, without the use of mother boards.

Vertical mount headers and receptacle assemblies feature duplex plated posts and receptacle contacts on a double-row, $.100 \times .100$ [2.54 x 2.54] grid. The . 025 [ 0.64 ] sq. header posts are more protected, and the top-entry receptacle contacts utilize the proven

AMPMODU receptacle contact design; dual cantilever beams with builtin overstress protection.

Headers are available in two heights: . 785 [19.94] and 1.200 [30.48]. This allows the customer to use the height of the header to keep wire-to-board connections up and away from other board components, particularly if the components are densely packaged around the header.
tyco

Vertical Mount, Top Entry, High Profile, Selectively Loaded (with Standoffs)

## Material and Finish:

Housing-Brown thermoplastic, flame retardant

Contacts-Phosphor bronze, duplex plated .000015 [0.00038] gold on mating area, . $000050-.000100$ [0.00127$0.00254]$ bright tin-lead on solder area, with entire contact underplated .000050 [0.00127] nickel

*In addition to the active positions, each receptacle has four cavities on each end that are not loaded with contacts. These empty cavities aid in aligning
the receptacle with header posts during mating
Notes: 1. AMP, part no. and date code stamped on housing where size permits.
2. These receptacle assemblies mate with headers of the same size as the active positions listed above. Refer to pages 160 and 161. are metric equivalents.

Note: This header mates with receptacle assembly having the same number of active positions. See page 159. specified. Values in brackets are metric equivalents.

Electronics

## Product Facts

- Straight posted unshrouded and shrouded versions

■ . 025 [0.64] square ACTION PIN posts

- ACTION PIN posts make a gas-tight, press-fit connection in platedthrough holes
■ Does not damage platedthrough holes

■ Unshrouded headers available in selected sizes 1 through 40 positions (single-row) and 4 through 80 positions (double-row)
■ Shrouded headers (doublerow) available in selected sizes of 6 through 60 positions

- Flame retardant, black thermoplastic housings, 94V-0 rated

■ Available in . 100 [2.54] Centerline spacing in an insulator header that is directly mounted on a printed circuit board

- Recognized under the Component Program of Underwriters Laboratories Inc., - ${ }^{-1}$ File No. E28476
- Certified by Canadian Standards Association © File No. LR 16455

## Electronics

AMP ACTION PIN Press-Fit Posts

## The Reliable Plated-Through Hole Interconnect

Solderless interconnections have been popular in electrical and electronic applications with world-wide success for decades. They provide reliable electrical and mechanical stability and offer applied-cost savings across the board. For PC board applications, AMP compliant ACTION PIN posts provide these features:
■ Large gas-tight contact zone
■ High reliability due to stored energy
■ More resistant to damage to plated-through holes during installation

- Especially suited for multilayer PC boards

■ Less costly board manufacturing due to larger hole tolerances compared to use of solid pins

- Application can be made by end-user
- Repairability-contact can be replaced in the same pin location (two repairs)
- Installation with no heat cycling of board
- Permits mass insertion by minimizing forces needed to insert pins as compared to solid pin press-fit application

■ Significant applied-cost savings in many applications
Since AMP compliant ACTION PIN posts do not have to be soldered, problems associated with solder are eliminated, such as:

- Faulty solder joints
- Solder fumes; contaminants are deposited on the contacts
- Solder spots; short circuits between printed circuits
- Flux residuals
- Thermal strain on printed circuit boards and components
- Degasing of plated-through holes

Solderless press-fit interconnections using AMP compliant pins are primarily integrated in, but not limited to, backplanes.
Solderless press-fit interconnections are used in racks, especially where connectors must be fixed on the solder side of the PC board and/or component side. In these applications, the holes for AMP ACTION PIN post connectors are covered during the soldering process and press-fitting is performed after soldering.
Other applications for AMP ACTION PIN post interconnections include PC boards that incorporate components using surface mount technology (SMT). Here, too, press-fit interconnections can be applied after soldering, thus eliminating complications associated with connectors suitable for surface mounting.

## Principle of the AMP Compliant ACTION PIN Post

When an AMP compliant ACTION PIN post is inserted into a plated-through hole, two spring members are compressed, exerting force against the hole for a gas-tight connection. The diameter of the hole is smaller than the diagonal size of the pin (see cross-section illustration below).
The beam characteristics of the pin are designed so that a plastic, as well as an elastic, deformation takes place during insertion. The two spring members compress to different degrees to accommodate hole tolerances. The compliant pin also reduces strain on the board. With a rigid pin, the elastic strain energy is stored entirely in the board, leading to damage of the plated-through holes. With the AMP compliant ACTION PIN post, the residual force of the elastic deformation maintains stored energy to produce a tight contact zone between the pin and the plated-through hole. This maintains long-term electrical and mechanical reliability of the interconnection.

Cross-Section Area of AMPACTIONPIN Press-Fit Post in Printed Circuit Board Holes specified. Values in brackets are metric equivalents. Electronics

ACTION PIN posts provide a more reliable press-fit connection. Localized pressure in the interface area for oxide break-through and prevents corrosion better in many of the harshest environments to provide a reliable connection virtually every time. Also, radial and axial distortion are controlled to meet today's standards for multilayer board applications.

## PC Board Thickness

ACTION PIN posts designed for use in a variety of PC board thicknesses. However, certain ACTION PIN posts are to be used in specific ranges of board thicknesses.
To promote optimum performance, the recommended board thicknesses provided with the connector being used must be followed.

(1) Annular Ring (See Note)
(2) Drilled Hole
(3) Copper Thickness
(4) Tin-Lead Thickness
(5) Plated-Through Hole

ACTION PIN Post/PC Board Applications

| ACTION PIN Contact Material Thickness | Drilled Hole Diameter ${ }^{2}$ | Plating Thicknesses |  | Plated-Through Hole Diameter ${ }^{\text {© }}$ | Distortion Specification* |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Copper ${ }^{\text {* }}$ * | Tin-Lead ${ }^{\text {® }}$ |  | Average | Maximum |
| . 025 [0.64] | .0453 ${ }^{ \pm .001}$ [1.151 ${ }^{\text {a }}$.03] | .001-.003 [0.03-0.08] | . 0003 [0.008]Min. | .037-.043 [0.94-1.09] | . 0015 [0.038] | . 002 [0.05] |

*Maximum hardness of copper layer is 150 Knoop.
**Radial hole distortion.
Note: Recommended annular ring diameter is hole diameter plus . 020 [0.51].

## ACTION PIN Post Replacement Tooling

Rear Insertion/Extraction Tool No. 265871-7 (Ref. 408-2636) Includes:
Impact Tool No. 380392-8
Removal Tool No. 265964-1
Replacement Tip No. 308554-1

BMEP-5T

Application Tooling for AMPMODU Headers with ACTION PIN Posts

## Single-Row Connector Seating Tools

Tooling Assembly No. 91171-1 is used to install single-row AMPMODU headers with ACTION PIN posts into PC boards.

Pin headers with ACTION PIN posts allow high speed, solderless back-plane construction through reliable press-fit application. Press fitting connectors to printed circuit boards requires special seating tools which transfer application force directly to the contacts.

Force applied to the tool to seat the connectors can be provided by the AMP seating machines shown on this page.

For tooling information, call the Tyco Electronics Automation Group 1-215-657-6202.

## ASG Servo Electric Presses

Tyco Electronics offers a wide range of servo-electric presses for the application of press-fit connectors. Systems are available with varying force capacity, board size capacity and process capability. Each system features real-time force feedback and PC control to allow the highest level of control and traceability. Every

## Comp-U-Sertor II Insertion Machine No. 122300-1

This machine has a compact, microprocessor-controlled X-Y positioning table for inserting a variety of AMP posts, sockets and receptacles at rates up to 14,000 contacts per hour. It is programmed and operated with an easy-to-use, menu-driven touchscreen. Programs are stored in a battery-backed Random Access Memory. A 3.5" floppy disk drive is provided for off-line programming and storage. Insertion heads are interchangeable. The insertable area is $12 \times 18$ [ $305 \times 457$ ]. The power requirement is 120 VAC, $50-60 \mathrm{~Hz}, 7 \mathrm{~A}$; the air requirement is 90 psi [6.21 bar] at 2-15 scfm [0.00094-0.00708 $\mathrm{m}^{3} / \mathrm{s}$ ], depending upon application.
For further information, request Tyco Electronics Customer Manual 409-5863.

## Modular Insertion System Bench Machine No. 217600-1

This machine uses AMP insertion heads to install a variety of printed circuit board products at rates of 2,000 per hour. The printed circuit board is placed in a Board Holding Fixture which is attached to a two-hand controlled mechanism. The operator moves the board over the machine anvil; a switch in the anvil actuates the machine when the printed circuit board is placed on the anvil. A spotlight illuminates the insertion area.
Consult Tyco Electronics for further information on this machine and the insertion heads.

## P300 Automatic Insertion Machine

The P300 is a fully automatic insertion machine for processing reeled press-fit and thru-hole components into PCBs. It is available as either a stand-alone unit or as an inline system. Boards up to 15.5 " $\times 23.5^{\prime \prime}$ [ $400 \times 600$ ] can be processed and are positioned by an XIY table. Each contact is seated in the PCB via a product specific insertion head. An optional automatic tool changer system allows up to 3 different insertion heads to be used. A multitasking control unit controls and monitors the entire system. Optional insertion force monitoring allows the verification of every component applied for quality assurance. A wide range of optional equipment is available for further performance and flexibility enhancement.

Please consult Tyco Electronics for further information on this machine. specified. Values in brackets are metric equivalents.

Electronics

## Product Facts

- Can stack multiple printed circuit boards without the need of a mother board
- Connect bus lines in the shortest possible distance
- Receptacle assembly has ACTION PIN posts for solderless board mounting
- Can be mounted onto the board simply by press fitting with Mini-Press
- Receptacle assembly is easy to service and replace (up to 2 times)
- Receptacle contacts are of fork design to mate with posts at two points. No danger of scooping at mating/ unmating
- Stacking dimensions are 13.4 [.528] or 19.0 [.748] when using receptacle assemblies together, and 13.9 [.547] or 19.5 [.768] when using a combination of receptacle and post header assemblies
■ Accepts 1.6 [.062] thick boards
■ Housing provided with polarization to help prevent mismating
- Housing made of chemicalresistant glass-filled PBT, black in color
- Contacts are of copper alloy material with high spring characteristics, gold-overnickel plated
- Post hood available to protect the post portion of receptacle contacts. Can be selected depending on stacking dimensions
- Connectors available in sizes of 26, 30, 34, 40, 50 and 60 positions
- Product specification: 108-5197

## AMP ACTION PIN Stacking Connector System (Non-Intermateable with AMPMODU Connectors)

AMP ACTION PIN Stacking Connectors are a family of two-piece connectors used to stack multiple printed circuit boards in parallel. They have been developed to provide a more reliable and economical means of compact wiring and highdensity packaging inside a variety of electronic equipment.
The connectors have many advanced features: they can be used to connect
bus lines in the shortest possible distance without the need of a mother board, thus permitting effective utilization of space above the board; compared with other methods of jumper connection using cable connectors, they make the overall board layout more clean and straight for compact packaging.
Contacts are on $2.54 \times 2.54$ [. $100 \times .100$ ] grid. The connectors are available in
sizes of 26, 30, 34, 40, 50 and 60 positions. AMP ACTION PIN Stacking Connectors consist of a receptacle assembly, a mating post header and a post hood to protect the post portion of the receptacle assembly.

A complete description of the AMP ACTION PIN Stacking Connectors is presented on the following page (172).

AMP ACTION PIN Stacking Connector System (Non-Intermateable with AMPMODU Connectors)

## Receptacle Assembly

The receptacle assembly features reliability and economy characteristic of this product line.
The mating portion of its built-in receptacle contacts is of a fork design, highly resilient and help prevents damage to contacts by scooping at mating/unmating.
On the board mount side of the assembly are 0.55 [.022] square ACTION PIN posts.
No soldering is required to mount the assembly on the board, the posts being simply, press fit into the board's 0.825 [.032] diameter holes.

Two types of receptacle assembly are available; one is used with an outermost
board and the other with intermediary boards. A solder version is also available for the outer board mount assembly.

## Post Hood

When using the intermediary board mount receptacle assembly, this post hood is used to protect the post portion of the assembly. The post hood is available in two types: one with the housing height of 10.0 [.394] and the other with the housing height of 15.7 [.618]. They can be selected, depending on stacking dimensions.

## Post Header

The post header is mounted onto the outer board on the other side of the board to
which an outer board mount receptacle assembly is applied. The post header is preloaded with 0.50 [.022] square soldering posts. These posts are protected by the side walls of the housing.
Stacking dimensions provided by this connector line are as follows:
When the outer board receptacle and intermediary board receptacle assemblies are used 13.4 [.528] or 19.0 [.748].

When the intermediary board receptacle assembly and the post header assembly are used 13.9 [.547] or 19.5 [.768].

## Typical Application

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents.

AMP Mini-Press

| No. of <br> Pos. | Part No. |
| :---: | :---: |
| 40 | $1-758030-1$ |
| 50 | $1-758030-2$ |
| 60 | $1-758030-3$ |

The part numbers above include the Mini-Press unit, insertion support plate and press-fit jig.

## Mini-Press Unit

Part No. 1-758030-3
When ordering a press-fit jig only, consult the table below.

| Press-fit Jig (separate order) |  |
| :---: | :---: |
| No. of <br> Pos. | Part No. |
| 26 | $907459-1$ |
| 30 | $907459-2$ |
| 34 | $907459-3$ |
| 40 | $907459-4$ |
| 50 | $907459-5$ |
| 60 | $907459-6$ |

Also, optional insertion support plates are obtainable by separate order to meet your specific requirements for improved board handling.

Application Tooling for AMP ACTION PIN Stacking Connectors

1. Insert connector into the board tentatively (Be sure that connector is in the right direction).

2. Set insertion support plate in place by butting it against Mini-Press platform.

3. Press handle down gently and insert connector into the board

4. Attach insertion support plate to the leg portion of connector from below.

5. By pressing Mini-Press handle down, rest the press-fit jig against connector.

6. Now connector has been mounted to the board securely.

Features of . 025 [0.64] Square Continuous Posts - Brass drawn wire for posts ■. 400 to 1.000 [10.16 to 25.40] overall pin length (. 010 [0.25] increments)

- Plating Options: Tin-Lead $15 \mu \mathrm{in}$. gold
$30 \mu \mathrm{in}$. gold
- Star feature also available

## Benefits

■ Less expensive than bandolier style posts

- Can be placed on printed circuit boards at any desired centerline
■ Less scrap material (no carrier strip)

Technical Documents (page 294): Application Specification 114-13011

AMPMODU . 025 [0.64] Square Continuous Posts

Tyco Electronics now offers AMPMODU . 025 [0.64] Square Continuous Posts. These posts can be used instead of the original posts that come on a bandolier style carrier strip. These posts are on a reel, but the posts are 'notched' at the desired length (no carrier strip is needed). This feature allows more versatility by providing posts lengths from . 400 to 1.000 [10.16 to 25.40], available in increments of .010 [0.25].

The posts are brass drawn wire and are inserted into a printed circuit board via application tooling at any centerline configuration. They can be used for wire
wrap applications or mated to a receptacle.

The current rating is 3 amps .
The posts are available plated with tin lead, $15 \mu$ in. gold, or $30 \mu \mathrm{in}$. gold. Other platings are available upon request.

The application tooling needed is a modular head (Part Number 904641-1) which is placed on the AMP Comp-U-Sertor machine (Part Number 122300-1.)

tyco Electronics

Features of . 045 [1.14] Square Continuous Posts ■ Brass drawn wire for posts ■ . 400 to 1.000 [10.16 to 25.40] overall pin length (. 010 [0.25] increments)

- Plating Options: Tin-Lead $15 \mu \mathrm{in}$. gold
$30 \mu \mathrm{in}$. gold
- Star feature also available

## Benefits

■ Less expensive than bandolier style posts

- Can be placed on printed circuit boards at any desired centerline

■ Less scrap material (no carrier strip)

Technical Documents (page 294):
Application Specification 114-13011

AMPMODU . 045 [1.14] Square Continuous Posts

Tyco Electronics now offers AMPMODU . 045 [1.14] Square Continuous Posts. These posts can be used instead of the original posts that come on a bandolier style carrier strip. These posts are on a reel, but the posts are 'notched' at the desired length (no carrier strip is needed). This feature allows more versatility by providing posts lengths from . 400 to 1.000 [10.16 to 25.40], available in increments of 010 [0.25].

The posts are brass drawn wire and are inserted into a printed circuit board via application tooling at any centerline configuration. They can be used for wire
wrap applications or mated to a receptacle.

Potential industries include:
building systems,
commercial/home
equipment, household appliances, home power tools and equipment.

The current rating is 7 amps. The posts are available plated with tin lead, $15 \mu$ in. gold, or $30 \mu$ in. gold. Other platings are available upon request.

The application tooling needed is a modular head (Part Number 904640-1) which is placed on the AMP Comp-U-Sertor machine (Part Number 122300-1.)

AMPMODU .045" [1.14] Square Continuous Posts (Continued)

Electronics

## Product Facts

- All receptacle assemblies are end stackable
- Contact design employs dual cantilever beams with built-in anti-overstress feature
- Closed entry housings help prevent post stubbing
- Wide range of sizes available

■ Other versions available upon request

■ Housings made of high temperature, surface mount compatible thermoplastic material, 94V-0 rated

- Duplex gold and bright tinlead plated contacts have full nickel underplate
- Housings feature PC board standoffs
- Solder tails accommodate a PC board thickness of . 062 [1.57]
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Horizontal Mount receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronics industry, generally for applications using the mother/daughter board arrangement.
This product line is offered in both single and double row configurations. The .100 [2.54] centerline

## Performance Characteristics

## Mechanical Characteristics:

Mating Force-6.0 oz. [1.67N] per contact (max.)
Unmating Force-. 75 oz. [0.21N] per contact (min.) during third mating cycle Durability-200 cycles

Environmental Characteristics:
Operating Temperature-
$-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
assemblies are available in a wide range of position sizes. They have end stacking capability which give the added advantage of flexibility.
The housings are made of high temperature, surface mount compatible thermoplastic material that is 94 V -O rated. Contacts are phosphor bronze, fully underplated with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design with a fully enclosed, one-piece "box" to protect the contact area. In addition, the receptacle contact has dual cantilever beams with a built-in antioverstress feature. Standard solder tails accommodate a board thickness of . 062 [1.57].

## Electrical Characteristics:

Current Rating-3.0 amperes (max.) for single contact; 2.0 amperes (max.) per contact when connector is fully energized
Contact Resistance-12 milliohms (max.)
Insulation Resistance-5000
megohms (min.) between adjacent contacts
Dielectric Withstanding Voltage (at sea level)-750 V rms

Electronics

Mod II Receptacle Assemblies, Single-Row, . 100 [2.54] Centerline

Closed Entry, End Stackable, Short Point-of-Contact, with Standoffs

## Material and Finish:

Housing-Black thermoplastic, 94V-0 rated, high temperature, surface mount compatible
Contacts—Phosphor bronze, plated as follows:
Plating A—Duplex . 000030 [0.00076] gold on contact area, . 000150-. 000300 [0.00381-0.00762] tin-lead on solder area all over . 000050 [0.00127] nickel
Plating B—Duplex . 000010
[0.000254] gold on contact area,
.000150-. 000300 [0.00381-0.00762]
tin-lead on solder area all over . 000050 [0.00127] nickel
Plating C-. $000100-.000200$
[0.00254-0.00508] tin-lead over
. 000050 [0.00127]

Electronics

## Product Facts

■ Surface mount leads

- All receptacle assemblies are end stackable
- Contact design employs dual cantilever beams with built-in anti-overstress feature
- Closed entry housings help prevent post stubbing

■ Housings made of high temperature, surface mount compatible thermoplastic material, 94 V-0 rated

- Duplex gold and bright tinlead plated contacts have full nickel underplate
- Housings feature PC board standoffs
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Mod II Surface Mount Horizontal Receptacle Assemblies, $.100 \times .100$ [2.54 x 2.54] Centerline

Horizontal surface mount receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronic industry as process technologies evolve from wave soldering to surface mount processing.
This broad product line is offered in both single and
double row configurations. The . 100 [2.54] centerline assemblies are available in 2-40 (single row) positions and 4-80 (double row) positions. Housings are end stackable, which gives the advantage of added flexibility.
The housings are made of high temperature material that is $94 \mathrm{~V}-0$ rated. Contacts are phosphor bronze, fully underplated
with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design, with a fully enclosed one-piece "box" to protect the contact beams with built-in anti-overstress feature.

## Performance Characteristics

Mechanical Characteristics:
Mating Force-6.0 oz. [1.67N] per contact (max.)
Unmating Force-. 75 oz. [0.21N] per contact (min.) during third mating cycle Durability-200 cycles

Environmental Characteristics:
Operating Temperature-$-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$

Electrical Characteristics:
Current Rating- 3.0 amperes (max.)
for single contact; 2.0 amperes (max.) per contact when connector is fully energized
Contact Resistance-12 milliohms (max.)
Insulation Resistance-5000
megohms (min.) between adjacent contacts
Dielectric Withstanding Voltage (at sea level)-750 V rms

## Product Facts

- Dual-cantilever beam contact with box design
- Single-row assemblies have . 100 [2.54] centerline contact spacing; double-row assemblies have $.100 \times .100$ [2.54 x 2.54] centerline contact spacing
- 3 through 40 positions in single-row assemblies; 2 through 80 positions in double-row assemblies

■ Mod II Standard . 340 [8.64] and Mod IV Iow . 265 [6.73] profiles

- Mod II and Mod IV profiles available in dual entry
- Duplex gold and bright tinlead plated contacts have full nickel underplate
■ Thermoplastic housings, 94V-0 rated
- Standoffs for easy flux cleaning
- All throughhole assemblies are end stackable
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian

Standards Association, File No. LR 7189

## Performance

Characteristics
Mechanical Characteristics:
Mating Force-8.0 oz. [2.22N] per contact (max.)
Unmating Force-. 75 oz. [0.28N] per contact (min.)
Durability (Tested to)-200 cycles

Environmental Characteristics:
Operating Temperature-
$-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$

Receptacle Assemblies, Vertical Mount

Vertical receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronic industry.

This broad product line offers a wide variety of assembly styles and features. They are available in dual entry style, in both single and double row configurations. The . 100 [2.54] centerline assemblies are available in

Electrical Characteristics:
Current Rating- 3.0 amperes (max.) for single contact; 2.0 amperes (max.) per contact when connector is fully energized
Contact Resistance-12 milliohms (max.)
Insulation Resistance-5000
megohms (min.) between adjacent contacts
Dielectric Withstanding Voltage (at sea level)- 750 V rms

3-40 (single row) positions and 2-80 (double row) positions. Standard and low profile housings which are end stackable also enhance the product line giving the advantage of added flexibility.

The housings are made of flame retardant material that is $94 \mathrm{~V}-0$ rated. Contacts are phosphor bronze, fully underplated with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design, with a fully enclosed one-piece "box" to protect the contact beams.

These assemblies are offered in . 265 [6.73] (Mod IV) and .340[8.64] (Mod II) high profiles. Standard solder tails accommodate board thickness of . 062 [1.57].

Product styles include single and dual tine variations. Outrigger tine styles are also available for bottom entry parallel board stacking applications. specified. Values in brackets are metric equivalents.

Notes: 1. Tyco Electronics recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension.

Notes: 1. Tyco Electronics recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension, and .062 [1.57] for recommended board thickness if used in bottom entry application.

Mod IV Surface-Mount Vertical Receptacle Assemblies, $.100 \times .100$ [2.54 x 2.54] Centerline

Product Facts

- Surface Mount Leads
- Contact Material: phosphor bronze
- High temperature, black thermoplastic housings, $94 \mathrm{~V}-0$ rated, capable of withstanding IR or vaporphase reflow
- Gold/tin-lead duplex plating for reliable mating interconnection and solder interface
- Metallic hold downs provide retention in the PC board prior to and during the reflow process . . . and strain relief after soldering
- Hold downs provide for proper lead-to-pad registration
- Closed-entry receptacle housings provide lead-in ramp for positive mating
- Receptacle contacts employ dual cantilever beams and built-in anti-overstress for reliable connections
- Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

The AMPMODU 0.025
[0.64] square interconnection system is an industry standard that has provided level III and IV through-hole
interconnections to almost every industry and marketplace for years. As technology advances, so has the AMPMODU product line.

Surface mount vertical receptacle assemblies are available to meet your level II packaging needs as process technologies evolve from wave soldering to surfacemount reflow (infrared and vapor-phase) processes. AMPMODU surface-mount receptacle assemblies are offered in vertical dual entry configurations. These receptacles are available in single-row and double-row configurations with a contact centerline spacing of . 100 x 100 [2.54 x 2.54].

AMPMODU surface-mount vertical receptacle assemblies continue to provide the proven features and benefits of the throughhole counterparts in the AMPMODU product family. Closed-entry style housing design provides a lead-in ramp for positive mating of contacts, virtually eliminating the possibility of stubbing. The dual-beam receptacle contact design, coupled with gold plating in the contact area, provides a reliable interface. The contacts also provide builtin anti-overstress protection. Tin-lead plating on the solder tails also enhances solderability.

The incorporation of compliant metallic hold downs on receptacle assemblies offers multiple benefits. The hold downs provide for proper lead-topad registration and provide retention to the PC
board prior to and during processing. Used with a plated through-hole, the hold downs are soldered during the reflow process and serve as a strain relief for the solder joints during mating/unmating.

The design of the hold downs results in an excellent ratio of insertion/extraction forces (into the PC board); 20 lb . [89 N] maximum insertion force per pair and 10 lb . [44.5 N] minimum extraction force per pair (unsoldered). No tools are required for insertion. specified. Values in brackets are metric equivalents.

Mod IV Surface-Mount Vertical Receptacle Assemblies, $.100 \times 100$ [2.54 x 2.54] Centerline (Continued)

Performance<br>Specifications

Voltage Rating: 250 VAC
Current Rating: 3.0 amperes (max.) for single contact;
2.0 amperes (max.) per contact when connector is fully energized

Operating Temperature Range (Receptacle Assemblies): $-65^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
Operating Temperature Range (Headers): $-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$
Dielectric Withstanding Voltage: 750 VAC
Termination Resistance: 12 milliohms (max.)
Insulation Resistance: 5000 megohms (min.)
Mating Force (Receptacle Assemblies): 8.0 oz. [2.22N] (max.) per contact
Unmating Force (Receptacle Assemblies): . 75 oz . [0.21N] (min.) per contact
Durability: Tested to 200 cycles (min.) for . 000030 [0.00076] gold plated contacts

Notes: 1. Tyco Electronics recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add $.020[0.51]$ (not including the post lead in chamfer) to
the maximum point-of-contact dimension, and .062 [1.57] for recommended board thickness if used in bottom entry application. specified. Values in brackets are metric equivalents.

Dimensions are shown for reference purposes only. Specifications subject to change.

Electronics

## Product Facts

- Two-Piece reliability

■ Two- and three-row systems available
■ Short signal path for VLSI applications
■ Receptacles employ dual cantilever beams and builtin anti-overstress to provide reliable connections

- Built-in guides provide alignment before contact engagement
- Closed entry receptacle housings provide lead-in ramp for positive mating of contacts
- Shrouded headers provide full pin protection

■ Polarized headers

- Vertical headers available with ACTION PIN posts or . 025 [0.64] square solder posts
- Repairable ACTION PIN posts
■ Simple seating tooling for headers with ACTION PIN posts
- Recognized under the Component Program of Underwriters Laboratories Inc., -1 File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

 specified. Values in brackets are metric equivalents.

South America: 55-11-3611-1514 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-141-810-8967

Two-Piece Printed Circuit Board Connectors

AMPMODU Two-Piece Printed Circuit Board connectors are designed to reliably and economically meet the packaging and interconnection requirements of today's sophisticated electronics.
The double row system is produced in 10 thru 200 positions in the vertical headers and horizontal receptacles, and 10 thru 160 positions in the right angle headers and vertical receptacles.

## Performance

Specifications
Current Rating: 3 amperes
max. for single contact;
2 amperes max. per contact for fully energized connector
Voltage Rating: 250 VAC
Dielectric Rating: 750 VAC rms between contacts for one minute

The AMPMODU three-row connector system is produced in 30 through 300 positions (straight post headers and mating horizontal receptacles).
Both two- and three-row vertical headers are available with press-fit ACTION PIN posts or standard . 025 [0.64] square solder posts. There is a simple seating tool for headers with ACTION PIN posts.

## Termination Resistance:

12 milliohms max. at 100 milliamperes test current, and 50 millivolts open circuit voltage
Insulation Resistance: 1000
megohms after temperature/humidity cycling
Temperature Rating:
Headers; $-65^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$
(black thermoplastic housings)
Receptacle Assemblies; $-65^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ (brown or black thermoplastic housings)

A board retention feature is offered in the two-row horizontal receptacles, two-row right angle headers and two- and three-row vertical headers. Built-in guides assure accurate header and receptacle alignment before contact engagement.
Closed entry receptacle housings provide a lead-in ramp for positive mating of contacts.

Durability (Tested to): 200
cycles for . 000030
[0.00076] gold plating;
75 cycles for . 000015
[0.00038] gold plating
Mating Force: 8 oz. [2.22N]
maximum per contact
Unmating Force: . 75 oz .
[0.2N] minimum per contact during third mating cycle
tyco

## Material:

Black polyester

Technical Documents (page 294):

The barrier insert can be used on double row headers (. $100 \times .100$ [ $2.54 \times 2.54]$ centers), including shrouded versions-3 and 4 sides, as well as unshrouded straight post headers. With one barrier insert several configurations can be obtained, providing headers with capabilities of accepting various combinations of polarized and non-polarized AMPMODU connectors

For unshrouded headers, the barrier insert is used to establish polarization and to compartmentalize the header. For shrouded headers, the barrier insert is used to compartmentalize the header, while maintaining polarization. The barrier insert itself is notched to facilitate cutting off the ends with a simple tool such as tin snips or scissors to achieve the desired configuration.

Accessories: Barrier Insert, Part No. 87743-1

Barrier Insert Cutoffs

Fig. 1
Partial Cutoff (Left and Right Sides)

Fig. 2 Partial Cutoff (Left Side) Complete Cutoff (Right Side)

Fig. 3
Complete Cutoff (Left Side) Partial Cutoff (Right Side)

## Typical Barrier Insert Applications

## For Unshrouded Double-Row, Straight Post Headers,

 $.100 \times .100$ [2.54 x 2.54] Centers

Note: All configurations of barrier inserts compartmentalize headers and maintain polarization, except bar (Fig. 4) configuration, which is used primarily for compartmentalizing headers.

For Shrouded Double-Row, 3 and 4 Sided Headers, $.100 \times .100$ [2.54 2.54 ] Centers

5

Low Profile Headers used withpages 152-157

The snap-in polarizer provides military polarization for low profile headers. Installation of the polarizer is as follows:

Orient the polarizer so that the polarizer latch is on the same side as the inner wall (post side) of the header housing.

Slide the polarizer over the polarizing slot of the housing until the latch engages the hole. Snap off the tab at the break line next to the housing. Using the remaining polarizer, repeat the process for the other housing location.

Note: For Post Shunts, contact TYCO ELECTRONICS.

[^0]:    Notes: 1. Approximate Posts per reel-20,000.
    *Point of measurement for plating thickness.
