## MIL-DTL-38999 Series III Style Connectors

## 38999 Overview

MIL-DTL-38999 connectors are some of the most popular and widely used subminiature circular connectors for military and aerospace applications. With three coupling methods, nine shell sizes, and a wide variety of contact arrangements, the connectors help give you the range of choices you need. What's more, the original aluminum connectors have evolved to include stainless steel and composite shells-supported by a range of finishes.

## 38999-Style Connectors

Because of the widespread popularity of 38999 Series III connectors, the basic design has been adapted to a great many additional configurations. These 38999-style connectors include versions for power, fiber optics, filtering, high-speed networking, commercial interfaces, pc board interfaces, and higher contact densities. As a result, 38999-style connectors offer excellent versatility and flexibility.

## Rugged Reliability

When it comes to taming harsh environments, TE Connectivity (TE) offers 38999 connectors to handle a wide range of applications. We offer a broad array of configurations, materials and finishes to help meet the performance requirements of ground, aerospace, and marine applications. These highly durable subminiature circular connectors are time tested for reliability in some of the toughest environments.

TE helps meet the need for reliable performance with rugged MIL-DTL-389999 connectors having 500 mating cycles, operating temperatures to $200^{\circ} \mathrm{C}$, corrosion-resistant and corrosion-proof connector versions, scoop-proof designs, and a variety of options for excellent electromagnetic interference (EMI) control, such as filtering and fiber optics.

## Designs that Save Space and Weight

The importance of reducing size and weight of components, including MIL-DTL-38999 subminiature connectors, should never be underestimated. Lighter, smaller connectors can make a big difference in terms of contributing to greater performance: longer flight times, greater payload capability, and increased efficiency. Beyond the standard lightweight aluminum connectors, we offer composite connectors to help support greater weight savings.

## Solve Tough Application Issues with TE

We work closely with customers to help meet their most demanding requirements for some of the world's toughest applications. Whether for ground defense, commercial and military aerospace, or marine applications, TE designs and manufactures MIL-DTL-38999 subminiature circular connectors to be ruggedly reliable, fast and easy to install, smaller and lighter, and with more options, materials and configurations to help maximize performance, reliability and efficiency.

## MIL-DTL-38999 Circular Connectors

** Hermetic versions only

## Shell Materials and Finishes

$\left.\begin{array}{lclllll}\text { Class } & \text { Plating/Finish } & \text { Finish Spec } & \begin{array}{c}\text { Temperature } \\ \text { (Max.) }\end{array} & \begin{array}{c}\text { Salt Spray } \\ \text { (Hours) }\end{array} & \text { Series } & \begin{array}{c}\text { Shell-to-Shell } \\ \text { Conductivity } \\ \text { (mV }\end{array} \\ \text { Aluminum Shells } \\ \text { Compliant }\end{array}\right)$

Service Rating

| Service Rating | Suggested Operating Voltage |  |  | Test Voltage at Altitude ( $\mathrm{VACrms}_{\text {) }}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | VAC ${ }_{\text {ms }}$ | VDC | Sea Level | 50,000 Ft | 70,000 Ft. | 100,000 Ft |
| M | 400 | 550 | 1300 | 550 | 350 | 200 |
| N | 300 | 450 | 1000 | 400 | 260 | 200 |
| I | 600 | 850 | 1800 | 600 | 400 | 200 |
| 11 | 750 | 1050 | 2300 | 800 | 500 | 200 |

## Shell Materials

TE 38999 connectors are available with aluminum, stainless steel, and composite shells. In addition, we offer 38999-style connectors in marine bronze.

| Aluminum | Aluminum offers a favorable balance of performance, weight, and cost <br> Most widely used material <br> Light weight <br> Excellent corrosion resistance <br> Available in all finishes <br> Rugged |
| :---: | :---: |
| Stainless Steel | Stainless steel is used for hermetic connectors or for connectors used in <br> high-temperature environments, including engines and firewalls <br> Passivated or nickel finish |
| Composite | Composite shells offer the lightest weight and highest corrosion resistance <br> Weight savings of up to 40\% over aluminum and 70\% over stainless steel <br> Corrosion proof: passes 2000-hour salt spray test <br> 1500-mating-cycle durability |
| Marine Bronze | With excellent corrosion resistance, aluminum nickel bronze is <br> popular for marine applications |
| Unplated marine bronze helps eliminate the danger of wear to plating that could expose |  |
| the underlying material to corrosion. |  |
| See the section on DEUTSCH DTS-B series connectors. |  |

## Space-Grade Connectors

Outgassing-the release of gases trapped in a solid-of polymer materials such as connector inserts, seals, adhesives, or potting materials, is an issue since the gases can degrade performance of charge-coupled-device (CCD) sensors in satellites, thermal radiators, or solar cells. Outgassing is a challenge to creating and maintaining clean high-vacuum environments. The closed environment of spacecraft can make outgassing a greater concern. Our space-grade connectors use low-outgassing materials to help meet requirements for a Total Mass Loss of $1.00 \%$ or less and a Collected Volatile Condensable Material (CVCM) of 0.10\% or less.

Materials can be processed to help meet NASA requirements for low outgassing by oven backout in a thermal vacuum environment.

Aluminum, with an electroless nickel finish, is usually the preferred shell material. Its low magnetic permeability helps prevent it from becoming magnetized.

## Connector Styles

## Plug

Plugs are free-hanging cable-mount halves of a connection. They contain the coupling ring used to secure the plug to the receptacle.

## Jam Nut Receptacle

Jam nuts are the preferred style for creating an environmentally sealed mounting. Single-hole mounting and an integral o-ring allows a sealed mounting with a single hex nut threaded onto the front of the connector to secure it in place. Jam nut receptacles are rear-mount connectors.

## Square Flange Receptacle

These standard receptacles have a relatively large four-hole flange for front or rear mounting to a bulkhead or panel.

Typical Constructions

Insert Pin Front (Interfacial seal)

## Series I Receptacle

## MIL-DTL-38999 Circular Connectors

## Insert Arrangements

The drawings in this section use numeric shell sizes. MIL-DTL-38999 uses letter in place of shell size in the part number system. Thus, 9-35 and A35 describe the same insert arrangement.

| Shell Size | 9 | 11 | 13 | 15 | 17 | 19 | 21 | 23 | 25 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## MIL-DTL-38999 Series I Connectors

DEUTSCH DJT Series Connectors

The DEUTSCH DJT Series connectors from TE Connectivity (TE) are high-performance MIL-DTL-38999 Series I subminiature circular connectors offering a scoop-proof design for easy, reliable mating.
Available in 9 shell sizes and environmentally sealed and hermetic versions, DEUTSCH DJT Series connectors feature a self-locking bayonet coupling system. They are completely intermateable and interchangeable with MIL-DTL-38999 Series I connectors, and are available in a variety of shell materials and finishes.

Designed for rugged reliability, DEUTSCH DJT Series connectors are highly durable, capable of 500 mating cycles. They provide excellent vibration, corrosion and shock resistance, and offer excellent EMI protection and shielding effectiveness from 100 MHz to 10 GHz .

## Specifications

MATERIALS

- Shell Material and Plating:

Aluminum, olive drab cadmium
Aluminum, electroless nickel
Carbon steel, electrodeposited nickel (hermetic only)
Stainless steel, passivated (hermetic only but can be available commercially for standard environment configurations)

- Insert: Thermoplastic and fluorinated silicone elastomer
- EMI Spring Fingers: Nickel or cadmium-plated beryllium copper
- O-Ring: Fluorinated silicone elastomer

## ENVIRONMENTAL

- Temperature Range:
$-65^{\circ} \mathrm{C}$ to $+150^{\circ} \mathrm{C}$ Electrodeposited tin-plated carbon steel (Class D)
$-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$ - Cadmium finish (Class B)
$-65^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$ - Nickel finish (Class F) and stainless steel (Class E)
- Fluid Resistance: Fluid immersion per EIA 364.10, including resistance to MIL-PRF-5606: Hydraulic fluid
MIL-DTL-83133: JP-8 aviation fuel
MIL-PRF-7808: Lubricating oil
MIL-PRF-23699: Lubricating oil
MIL-A-8243: Deicing/defrosting fluid
MIL-C-25769: Aircraft cleaning compound
MIL-PRF-87937: Aircraft cleaning compound MIL-G-3056: Gasoline
- Salt Spray: 48 hours (Nickel finishes)

500 hours (Cadmium, black zinc nickel, nickel PTFE, and passivated finishes)

- Thermal Cycling: $-65^{\circ}$ to $150 / 175 / 200^{\circ} \mathrm{C}$ (max. temperature is class dependent)

## MECHANICAL

- Sine Vibration: Up to 60 g for 36 hr .
- Random Vibration: Up to 41.7 g for 16 hr . at $175^{\circ} \mathrm{C}$ Up to 50 g for 16 hr . at ambient temperature
- Shock: $300 \mathrm{~g}, 3 \mathrm{~ms}$ in the 3 axes
- Durability: 500 mating cycles
- Contact Retention:

Size 22D: 44 N (10 lb.)
Size 20: 67 N ( 15 lb. )
Size 16: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 12: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 10: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 8: $111 \mathrm{~N}(25 \mathrm{lb}$.

## ELECTRICAL

- Shell-to-Shell Conductivity: 1.0 mV (nickel finish)
2.5 mV (cadmium finish)
10.0 mV (passivated finish)
- Shielding Effectiveness: >90 dB at $100 \mathrm{MHz},>65 \mathrm{~dB}$ through 10 GHz

Voltage Rating

| Service Rating | Suggested Operating Voltage |  |  | Test Voltage at Altitude (VAC $\mathrm{rms}^{\text {) }}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | VAC $_{\text {rms }}$ | VDC | Sea Level | 50,000 Ft. | 70,000 Ft. | 100,000 Ft. |
| M | 400 | 550 | 1300 | 550 | 350 | 200 |
| N | 300 | 450 | 1000 | 400 | 260 | 200 |
| I | 600 | 850 | 1800 | 600 | 400 | 200 |
| 11 | 750 | 1050 | 2300 | 800 | 500 | 200 |

## Hermetic Connectors

- Hermetic Seal: Sintered glass
- Leakage: $\leq 16 \mathrm{~cm}^{3} / \mathrm{hr}$. ( $0.97 \mathrm{in}^{3} / \mathrm{hr}$.) on mated pairs connected under 2.1 bar ( 4.38 psi )
- Thermal Shock: 10 cycles, $4^{\circ} \mathrm{C}$ max. to $90^{\circ} \mathrm{C}$ min.

## Current Rating

| Contact Size | Test Current (A) | Voltage Drop (mV) |
| :---: | :---: | :---: |
| 22 D | 5 | 73 |
| 20 | 7.5 | 55 |
| 16 | 13 | 50 |
| 12 | 23 | 42 |
| 10 | 33 | 34 |
| $8^{*}$ | 46 | 26 |

## Keying Options

(Viewed from Mating Face of the Receptacle Connector)

| Shell Size | Key Position (Degrees) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{N}$ | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ |
| $\mathbf{0 9}$ | 95 | 77 | - | 123 | 113 |
| $\mathbf{1 1}$ | 95 | 81 | 67 | 127 | 109 |
| $\mathbf{1 3}$ | 95 | 75 | 63 | 129 | 115 |
| $\mathbf{1 5}$ | 95 | 74 | 61 | 125 | 116 |
| $\mathbf{1 7}$ | 95 | 77 | 65 | 125 | 113 |
| $\mathbf{1 9}$ | 95 | 77 | 65 | 125 | 113 |
| $\mathbf{2 1}$ | 95 | 80 | 65 | 121 | 110 |
| $\mathbf{2 3}$ | 95 | 80 | 69 | 110 |  |
| $\mathbf{2 5}$ | 95 |  | 77 |  |  |

Degrees in table above are the distance between Datum E (that bisects first minor keyway) and the center line of the master keyway

Inserts are available in nine shell sizes, with contact arrangements meeting MIL-DTL-1560, along with additional arrangements, to help maximize flexibility in circuit configurations.

## Designed to Perform

1 High-quality silicone seals to help maximize tear resistance and sealing memory

2 Self-locking threaded coupling
3 100\% metal-to-metal bottoming for excellent EMI grounding protection

4 Triple-start threads
5 Grounding fingers providing excellent EMI protection
6 Elongated mounting holes for flexible mounting with standard MIL-DTL-38999 box or wall mount receptacles

7 Contact retention system provides excellent contact retention under severe vibration

## MIL-DTL-38999 Circular Connectors

## MIL-DTL-38999 Series III Connectors

DEUTSCH DTS and ACT Series Connectors

## Specifications

## MATERIALS

- Shell: Aluminum, composite, stainless steel, marine bronze
- Plating: Olive drab cadmium, passivated, electroless or electrodeposited nickel, nickel PTFE, black zinc nickel
- Insert: Thermoplastic and fluorinated silicone elastomer
- EMI Spring Fingers: Nickel or cadmium-plated beryllium copper
- O-Ring: Fluorinated silicone elastomer

## ENVIRONMENTAL

## - Temperature Range:

$-65^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$

- Fluid Resistance: Fluid immersion per EIA 364.10, including resistance to MIL-PRF-5606: Hydraulic fluid MIL-DTL-83133: JP-8 aviation fuel
MIL-PRF-7808: Lubricating oil
MIL-PRF-23699: Lubricating oil MIL-A-8243: Deicing/defrosting fluid MIL-C-25769: Aircraft cleaning compound MIL-PRF-87937: Aircraft cleaning compound MIL-G-3056: Gasoline
- Salt Spray: 48 hours (Nickel finishes) 500 hours (Cadmium, black zinc nickel, nickel PTFE, and passivated finishes)
2000 hours (Composite classes M and J)
- Thermal Cycling: $-65^{\circ}$ to $150 / 175 / 200^{\circ} \mathrm{C}$ (max. temperature is class dependent)

## MECHANICAL

- Sine Vibration: Up to 60 g for 36 hr .
- Random Vibration: Up to 41.7 g for 16 hr . at $175^{\circ} \mathrm{C}$ Up to 50 g for 16 hr . at ambient temperature
- Shock: $300 \mathrm{~g}, 3 \mathrm{~ms}$ in the 3 axes
- Durability: 500 mating cycles ( 1500 cycles for composite connectors)
- Contact Retention:

Size 23: 44 N (10 lb.)
Size 22D: 44 N (10 lb.)
Size 20: $67 \mathrm{~N}(15 \mathrm{lb}$.
Size 16: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 12: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 10: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 8: 111 N ( 25 lb.$)$

## ELECTRICAL

- Shell-to-Shell Conductivity:
1.0 mV (nickel finish)
2.5 mV (cadmium finish)

3 mV (passivated finish)

- Shielding Effectiveness: $>90 \mathrm{~dB}$ at $100 \mathrm{MHz},>65 \mathrm{~dB}$ through 10 GHz

Voltage Rating

| Service Rating | Suggested Operating Voltage |  |  | Test Voltage at Altitude (VAC $\mathrm{rms}^{\text {) }}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | VAC $_{\text {rms }}$ | VDC | Sea Level | 50,000 Ft. | 70,000 Ft. | 100,000 Ft. |
| M | 400 | 550 | 1300 | 550 | 350 | 200 |
| N | 300 | 450 | 1000 | 400 | 260 | 200 |
| I | 600 | 850 | 1800 | 600 | 400 | 200 |
| 11 | 750 | 1050 | 2300 | 800 | 500 | 200 |

## Hermetic Connectors

- Hermetic Seal: Sintered glass
- Leakage: $\leq 16 \mathrm{~cm}^{3} / \mathrm{hr}$. ( $0.97 \mathrm{in}^{3} / \mathrm{hr}$.) on mated pairs connected under 2.1 bar ( 4.38 psi )
- Thermal Shock: 10 cycles, $4^{\circ} \mathrm{C}$ max. to $90^{\circ} \mathrm{C}$ min.

## Current Rating

| Contact Size | Test Current (A) | Voltage Drop (mV) |
| :---: | :---: | :---: |
| 23 | 3 | 73 |
| 22 D | 5 | 73 |
| 20 | 7.5 | 55 |
| 16 | 13 | 50 |
| 12 | 23 | 42 |
| 10 | 33 | 34 |
| $8^{*}$ | 46 | 26 |

## MIL-DTL-38999 Series IV Connectors

## DEUTSCH DIV Series Connectors

DEUTSCH DIV Series connectors from TE Connectivity (TE) are high-performance MIL-DTL-38999 connectors for use in high shock, vibration and EMI environments where reliability is essential.

Qualified to MIL-DTL-38999 specifications, DEUTSCH DIV Series connectors are designed and built using the high-vibration capable breech lock coupling mechanism that only requires $90^{\circ}$ of rotation to engage and disengage.
Special grounding fingers form a 360-degree circle just inside the shell, acting as a shield for excellent EMI protection. The connector is actually grounded when the shells meet, even before the contacts engage.
Inserts are available in 8 shell sizes, with contact arrangements meeting MIL-DTL-1560, along with additional arrangements, to help provide flexibility in circuit configurations.

## MIL-DTL-38999 Circular Connectors

## MIL-DTL-38999 Series IV Connectors

## DEUTSCH DIV Series Connectors

## Specifications

## MATERIALS

- Shell: Stainless steel, aluminum
- Plating: Olive drab cadmium, passivated, and electroless nickel (anodized coupling ring for Class F only)
- Insert: Thermoplastic and fluorinated silicone elastomer
- EMI Spring Fingers: Nickel or cadmium-plated beryllium copper
- O-Ring: Fluorinated silicone elastomer

## ENVIRONMENTAL

## - Temperature Range:

$-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$ (Class W)
$-65^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$ (Classes $\mathrm{C}, \mathrm{F}, \mathrm{Y}$ and N )

- Fluid Resistance: Fluid immersion per EIA 364.10, including resistance to MIL-PRF-5606: Hydraulic fluid
MIL-DTL-83133: JP-8 aviation fuel
MIL-PRF-7808: Lubricating oil
MIL-PRF-23699: Lubricating oil
MIL-A-8243: Deicing/defrosting fluid
MIL-C-25769: Aircraft cleaning compound
MIL-PRF-87937: Aircraft cleaning compound MIL-G-3056: Gasoline
- Salt Spray:

48 hours (Nickel finishes)
500 hours (Cadmium and passivated finishes)

- Thermal Cycling: $-65^{\circ}$ to $150 / 175 / 200^{\circ} \mathrm{C}$ (max. temperature is class dependent)

## MECHANICAL

- Sine Vibration: Up to 60 g for 36 hr .
- Random Vibration: Up to 41.7 g for 16 hr . at $175^{\circ} \mathrm{C}$ Up to 50 g for 16 hr . at ambient temperature
- Shock: $300 \mathrm{~g}, 3 \mathrm{~ms}$ in the 3 axes
- Durability: >500 mating cycles
- Contact Retention:

Size 22D: 44 N (10 lb.)
Size 20: $67 \mathrm{~N}(15 \mathrm{lb}$.
Size 16: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 12: 111 N ( 25 lb.$)$
Size 10: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 8: 111 N ( 25 lb.$)$

## ELECTRICAL

- Shell-to-Shell Conductivity:

Olive Drab Cadmium: 2.5 mV
Passivated: 10.0 mV
Electroless Nickel: 1.0 mV

- Shielding Effectiveness: $>90 \mathrm{~dB}$ at $100 \mathrm{MHz},>65 \mathrm{~dB}$ through 10 GHz

## Hermetic Connectors

- Hermetic Seal: Sintered glass
- Leakage: $\leq 16 \mathrm{~cm}^{3} / \mathrm{hr}$. ( $0.97 \mathrm{in}^{3} / \mathrm{hr}$.) on mated pairs connected under 2.1 bar ( 4.38 psi )
- Thermal Shock: 10 cycles, $4^{\circ} \mathrm{C}$ max. to $90^{\circ} \mathrm{C}$ min.

## Current Rating

| Contact Size | Test Current (A) | Voltage Drop (mV) |
| :---: | :---: | :---: |
| 22 D | 5 | 73 |
| 20 | 7.5 | 55 |
| 16 | 13 | 50 |
| 12 | 23 | 42 |
| 10 | 33 | 34 |
| $8^{*}$ | 46 | 26 |

*When commercial power contact replaces twin-ax contact

For Square Flange Receptacle Sealed Version

## Conductive Panel Seals

In addition to improving sealing, conductive panel seals also improve conductivity and reduce resistivity for EMI improvement between the connector shell and the panel of the structure/system.

- Color: Tan
- Elastomer: Fluorosilicone
- Filler: Silver aluminum
- Hardness: $70 \pm 7$ Shore A
- Volume Resistivity: 0.010 ohm-cm, maximum
- Density: $2.0 \pm 0.25 \mathrm{~g} / \mathrm{cm}^{3}$
- Tensile Strength: 200 psi, minimum
-Elongation: 60\%-260\%
- 100\%-300\%: 35 ppi, minimum
- Temperature Range: $-55^{\circ} \mathrm{C}$ to $+160^{\circ} \mathrm{C}$

## MIL-DTL-38999 Hermetic Connectors

Since the early 1960s TE Connectivity has been producing DEUTSCH hermetically sealed glass-to-metal connectors for applications where temperature, pressure, and environmental considerations render standard connectors unusable. Hermetic connectors are used to separate an inert atmosphere or vacuum on one side from wide-ranging high-pressure, high temperature, or corrosive conditions on the other. They are also used to maintain a pressure differential between the two sections. In short, DEUTSCH hermetic connectors are designed to help provide a continuously gas-tight seal while withstanding:

- High pressures
- Extreme temperatures
- High vibration

Hermetic connectors are also an excellent choice when you are not exactly sure of the conditions that will affect your connector's performance. Hermetic connectors may meet many of the most rigid environmental and electrical specifications, which is important when dealing with variables that are unknown.

## Glass-to-Metal Sealing

Standard sealing techniques-such as epoxy potting-are useful in many applications, but they may not provide the degree of sealing that is offered by glass-to-metal hermetic seals. This is especially true of applications with high pressure differentials. Glass is a durable, high-strength material that resists extreme changes in temperature or pressure.
Our glass-to-metal seals create a bond between shell, insulator, and contacts by fusing the glass insulator to the metal components. The bond can maintain a helium leak rate of .01 micron $\mathrm{ft}^{3} / \mathrm{h}$ at 14.7 psi. The hermetic bond helps provide enduring reliability, resists cracking that would compromise the performance, and helps withstand a wide range of harsh conditions.

MIL-DTL-38999 Circular Connectors

## MIL-DTL-38999 Hermetic Connectors

## Compression vs. Matched Seals

DEUTSCH hermetic connectors are produced using both compression seals and matched seals. In a matched seal, the metal and glass have similar coefficients of thermal expansion (CTE). This reduces stress on the glass from thermal expansion and contraction.

In a compression seal, the metal has a higher CTE than the glass. During the firing process the metal expands more than the glass. As the glass and metal then cool, the metal contracts back onto the glass to form an extremely robust bond. Compression seals are used for highpressure applications.

## Controlling Quality from Start to Finish

We design and manufacture all the components in our hermetic connectors. Our shells are made with high-grade materials-from stainless steel bar stock to exotic metals like titanium. We use high-grade silica and binders for the glass and the elastomer materials are carefully matched to the required connector application. When fused with the contacts and the shell, the inserts produce a true hermetic seal. Pin or socket contacts are available with solder pot, eyelet, and extended pin terminations. Our contacts can be made from a variety of materials like nickel iron, Alumel, Chromel, and copper-cored nickel iron. An important consideration in material selection is the ability to withstand the high temperatures of the sealing process. All connectors are fully leak tested by TE to help ensure the integrity of the hermetic seal.

## Materials

Standard materials for hermetic connectors include:

- Shell: Stainless steel
- Insert: Glass
- Contacts: Nickel iron (52 Alloy)

Other materials are used, depending on special requirements for:

- High current
- High voltages
- High pressures
- Extreme temperatures
- Severe corrosion conditions

## Weight-Saving Aluminum Hermetic Connectors

 DEUTSCH aluminum hermetic connectors use an aluminum alloy shell to create connectors that are 60\% lighter than stainless steel counterpartstwo aluminum connectors weigh less than a single stainless steel equivalent.- Up to 60\% lighter
- Higher conductivity: up to 250 A
- Lower contact resistance: less than half that of nickel-iron contacts
- Wide temperature range: $-85^{\circ} \mathrm{C}$ to $+300^{\circ} \mathrm{C}$

## A Full Range of Hermetic Choices

DEUTSCH hermetic connectors are available in a variety of military and commercial styles. Options include a choice of:

Pin or socket contacts: Available with solder pot, eyelet, and extended pin terminations

Rear-release crimp termination to help reduce costs by eliminating soldering processes and potting and by allowing use of standard crimp tools

Feedthroughs provide a single device that can be terminated on both sides

Hermetic assemblies with connectors preinstalled in a mounting fixture to reduce your manufacturing time and speed installation

Custom connectors and configurations for applications not easily accommodated by standard offerings. Hermetic connectors lend themselves well to short production runs.

## MIL-DTL-38999 Hermetic Connectors

PC Tail Contacts and Connectors

TE 38999 connectors are available with PC tail contacts for mounting to pc boards or flex circuits. Alignment disks featured
on the high density PCB connectors provide a fitting pattern on mounting to pc boards or flex circuits. Alignment disks featured
on the high density PCB connectors provide a fitting pattern on the tail side, making installation easier.

## DTS-B Series Bronze Connectors

## 38999 Series III-Style Connectors

DEUTSCH DTS-B threaded connectors are MIL-DTL-38999 Series III and STD CECC 75201-002 styles, but feature a bronze shell with a scoop-proof design, and environmental sealing to help withstand harsh marine environments.

Marine bronze offers excellent corrosion protection. The shell material is robust and inherently resists corrosion, eliminating the need for plating that can wear to expose base materials.

The DEUTSCH DTS-B Series subminiature circular connectors offer a scoop-proof design for easy, reliable mating and a threaded coupling for excellent vibration resistance. Available in nine shell sizes, the connector's arrangements, contacts and tools all conform to standard MIL-DTL 38999 Series III. Excellent corrosion resistance makes them well suited to most marine and military ground vehicle applications.

## DTS-B Bronze Connectors

## 38999 Series III-Style Connectors

## Specifications

## MATERIALS

- Shell: Marine bronze
- Insert: Thermoplastic and fluorinated silicone elastomer
- EMI Spring Fingers: Nickel or cadmium-plated beryllium copper
- O-Ring: Fluorinated silicone elastomer

## ENVIRONMENTAL

- Temperature Range: $-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$
- Fluid Resistance: Fluid immersion per EIA 364.10, including resistance to MIL-PRF-5606: Hydraulic fluid
MIL-DTL-83133: JP-8 aviation fuel
MIL-PRF-7808: Lubricating oil MIL-PRF-23699: Lubricating oil MIL-A-8243: Deicing/defrosting fluid
MIL-C-25769: Aircraft cleaning compound MIL-PRF-87937: Aircraft cleaning compound MIL-G-3056: Gasoline
- Salt Spray: 500 hours
- Thermal Cycling: per MIL-STD-1344 method 1001 test B

## MECHANICAL

- Sine Vibration: Up to 60 g for 36 hr .
- Random Vibration: Up to 41.7 g for 16 hr . at $175^{\circ} \mathrm{C}$

Up to 50 g for 16 hr . at ambient temperature

- Shock: $300 \mathrm{~g}, 3 \mathrm{~ms}$ in the 3 axes
- Durability: 500 mating cycles
- Contact Retention:

Size 23: 44 N (10 lb.)
Size 22D: 44 N (10 lb.)
Size 20: $67 \mathrm{~N}(15 \mathrm{lb}$.
Size 16: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 12: $111 \mathrm{~N}(25 \mathrm{lb}$.
Size 8: $111 \mathrm{~N}(25 \mathrm{lb}$.
ELECTRICAL

- Shell-to-Shell Conductivity: 2.5 mV max.
- Shielding Effectiveness: >90 dB at $100 \mathrm{MHz},>65 \mathrm{~dB}$ through 10 GHz

## DTS-B Bronze Connectors

## Series III Connectors with Integral Accessory

## DEUTSCH DTS Connectors DEUTSCH DTS Firewall Connectors

DEUTSCH connectors with integral accessory help provide space and weight savings over using a separate backshell. One or two knurled areas help support reliable shield termination with a band strap. The connectors also accept a heat-shrink boot or overmolding.

The connectors are available in aluminum with a variety of finishes or in stainless steel for Class K engine and firewall applications.

## DTS-HC High-Current Connectors

## 38999 Series III-Style Connectors

DEUTSCH DTS-HC high-current circular connectors provide power connections in the familiar 38999 form factor. They are optimized for use in harsh high-vibration environments where space is at a premium.

With integral power and signal wires in some configurations, the connectors also help save space and give you a variety of versatile contact termination options.
Rated to $175^{\circ} \mathrm{C}$, DTS-HC connectors are the rugged choice for high-temperature applications. In addition, interfacial sealing helps provide protection from dust and aggressive fluids, while shielding fingers at the mating interface provide excellent EMI and RFI protection.

## Specifications

## MATERIALS

- Shell/Coupling Ring: High-strength aluminum alloy
- Plating: Nickel (standard), olive drab cadmium, or zinc cobalt
- Insulators: High-performance thermoplastic
- Seals: Fluorinated silicone
- Contacts: Gold-plated copper alloy

## ENVIRONMENTAL/MECHANICAL

- Temperature: $-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$
- Vibration: Random, 50-2000 Hz, $5 \mathrm{~g}^{2} / \mathrm{Hz}$ (per MIL-DTL-38999)
- Dielectric Withstand Voltage: 1500 VAC
- Insulation Resistance: $5000 \mathrm{M} \Omega$ min., 500 VDC,
- Durability: 500 mating cycles
- Altitude: 30,000 m (100,000 ft.) max.

CURRENT RATING, CONTINUOUS

- Size 00 Contact: 300 A
- Size 4 Contact: 150 A
- Size 20 Contact: 7.5 A

POWER CABLE CONDUCTOR TYPE

- Size 4: 4 AWG, $8 \mathrm{~mm}^{2}, 16 \mathrm{~mm}^{2}$ and $25 \mathrm{~mm}^{2}$ conductor
- Size 00: 70 mm²

## CONFIGURATIONS

- Size 21 Shell: 2 Size 4 power contacts
- Size 23 Shell: 1 Size 00 power contact
- Size 23 Shell: 2 Size 4 power contacts and 3 Size 20 contacts
- Size 25 Shell: 4 Size 4 power contacts and 4 Size 20 contacts

## POLAMCO High-Power Connectors

38999-Style Connectors for Harsh Military Environments
The POLAMCO high-power connector family provides a simple and effective way of terminating power cables in a harsh environment military connector system.

POLAMCO high-power connectors are optimized for cable sizes ranging from $50 \mathrm{~mm}^{2}$ up to $240 \mathrm{~mm}^{2}$, and are available in shell sizes 19 through 25, depending on the cable being terminated.
Rated to $175^{\circ} \mathrm{C}$, these high-power MIL-DTL-38999 Series I and IIIstyle connector systems give you a variety of versatile options including threaded termination or a screened crimp, with straight or $90^{\circ}$ orientation.

## Specifications

## MATERIALS

- Shell: High-strength aluminum alloy, nickel aluminum bronze, or stainless steel
- Contact Body: Silver-plated copper alloy
- Seals: Silicone elastomer
- Insulators: Thermoplastic: PPS-GL40, UL94V-0
- Plating Finishes:

Olive drab cadmium
Black zinc nickel
Electroless nickel
Zinc cobalt
(Contact TE for additional finishes)

| Plating Code | Plating Description | RoHS <br> Compliant | Environmental Protection <br> Conductivity |
| :---: | :---: | :---: | :---: |
| $\mathbf{B}$ | Olive drab cadmium (5-10 $\mu \mathrm{m})$ QQ-P-416, Type II, | No | 500 hours salt spray |
| Class 3 over electroless nickel |  |  |  |

## ELECTRICAL

- Voltage: 1800 VAC / 60 Hz (service rating 1)
- Shell Continuity: $<5 \mathrm{~m} \Omega$
- Current Rating (Approx. @ $40^{\circ} \mathrm{C}$ ambient): Shell Size 25: $1000 \mathrm{~A},<22 \mu \Omega$ Shell Size 23: $800 \mathrm{~A},<25 \mu \Omega$ Shell Size 21: $600 \mathrm{~A},<30 \mu \Omega$
Shell Size 19: $400 \mathrm{~A},<38 \mu \Omega$
- Contact Resistance (Approx. @ $40^{\circ} \mathrm{C}$ ambient): Shell Size 25: <22 $\mu \Omega$
Shell Size 23: $<25 \mu \Omega$
Shell Size 21: $<30 \mu \Omega$
Shell Size 19: <38 $\mu \Omega$

## ENVIRONMENTAL/MECHANICAL

- Durability: 500 mating cycles
- Vibration: 6 hours in 3 axis, full current load
(Def-Stan 0035)
- Shock: $500 \mathrm{~m} / \mathrm{s}^{2}, 11 \mathrm{~ms}$ half sine
- Temperature: $-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$
- Sealing: IP68 ( 2 m for 0.5 hour)
- Salt Spray: Up to 500 hours (depending on material/finish)

## DEUTSCH Lanyard-Release Connectors

## 38999 Series III Plug Connectors for MIL-STD-1760 Aircraft/Store Electrical Interconnection Systems

DEUTSCH lanyard-release plugs are high-reliability electrical interconnections featuring common interfacing capability for the operation and employment of stores on aircraft.

Advanced aluminum and composite technology applied to mission-critical MIL-STD-1760 (AEIS) systems helps ensure higher performance in terms of corrosion resistance, weight savings, and durability.

Our lanyard-release connectors provide reliable interfaces for controlling and monitoring aircraft stores and other aircraft subsystems. With a variety of high-performance accessories, we help reduce assembly time, increase cost savings, and accommodate the severe environment of the MIL-STD-1760 system.

## MATERIALS

- Shell: Composite or aluminum alloy
- Finish: Olive drab cadmium or electroless nickel
- Lanyard Ring: Black anodized aluminum alloy
- Lanyard Cover: PTFE, natural
- Lanyard: Aramid yarn, natural
- Snap Rings and Wafer Spring: Passivated stainless steel
- Resilient Insert: Silicone elastomer
- Plastic Inserts: Thermoplastic

ENVIRONMENTAL/MECHANICAL

- Temperature: $-55^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$
- Durability: 500 mating cycles
- Vibration: As per MIL-DTL-38999
- Thermal Shock: As per MIL-DTL-38999

Contact TE for the latest information and design specifications.

## SPACE AND WEIGHT SAVINGS

- Almost double the contact density of MIL-DTL-38999 connectors
- Lightweight materials

## RUGGED

- Threaded anti-vibration coupling
- Scoop-proof interface
- Aggressive fluid resistance and dust ingress prevention

## RELIABLE

- Fully sealed cable and mating interface
- EMI screening as per MIL-DTL-38999 Series III
- RFI mating interface band

## VERSATILE

- Multiple keying options
- Various plating and material options
- Backshell or cable braid/boot rear feature that help eliminate need for backshell
- Rear-removable crimp and PCB contacts (consult TE for PCB details)

## DEUTSCH Wildcat 38999-Style Connectors

## Higher Contact Densities in a Familiar MIL-DTL-38999 Form Factor

Combine high reliability and high contact density in a familiar MIL-DTL-38999 format with Wildcat 38999 connectors. With higher contact density than mil-spec high-density inserts and nearly double the contact density of standard inserts, Wildcat 38999 connectors offer extreme temperature, vibration, and corrosion resistance, and durability of 500 mating cycles in a space-saving design.

The easy-grip coupling ring and triple-start thread make mating and unmating fast and simple.
A variety of material and plating options means versatile choices to match the demands of your application.

## ELECTRICAL

- Dielectric Withstand Voltage: 1000 VAC
- Current Rating: 3 amps/contact

## ENVIRONMENTAL

## - Temperature:

$-65^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$ (cadmium)
$-65^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$ (nickel)

- Durability: 500 mating cycles min.
- Vibration: MIL-DTL-38999 Series III
- Thermal Shock: MIL-DTL-38999 Series III
- Shock: $300 \mathrm{~g}, 3 \mathrm{~ms}$ in 3 axes
- Fluid resistance: Withstands a wide range of military and aerospace fluids
- Salt spray resistance:

500 hours (cadmium finish) per MIL-STD-1344 Method 100 B and NFC93422.
48 hours (nickel finish)

- Sealing: Up to 30,000 m/100,000 ft. altitude

## MATERIALS

- Shell and Coupling Ring: Aerospace grade aluminum alloy as standard
- Plating: Olive drab cadmium, RoHS electroless nickel, black zinc nickel (other finishes available on request)
- Seals: Fluorinated silicone
- Insulators: High-performance thermoplastic
- Contacts: Gold-plated machined copper alloy
- Wire Size: 28 to 24 AWG

## 38999-Style HDJ Series Connectors

DEUTSCH HDJ/JN1003 Medium and High Density Connectors
The HDJ Series connectors are bayonet coupling connectors specifically designed for Eurofighter use. The range comprises plugs, receptacles, and cable accessories.

The series is intermateable and intermountable with connectors conforming to LN29729, EN3372, VG 96912 and the DEUTSCH AS range. The connectors are qualified in accordance with J 62.017.

The connectors are based on MIL-DTL-38999 Series I coupling interface lengths and Series II diameters.

## Specifications

## MATERIALS

- Shell: Aluminum alloy, plated olive drab cadmium
- RFI Ring: Beryllium copper, plated nickel/cadmium
- Inserts: Thermoplastic and fluorinated silicone elastomer
- Contacts: Copper alloy, plated gold

## MECHANICAL

- Vibration: Per J62.017 para. 2.11
- Durability: 500 mating cycles

## ENVIRONMENTAL

- Service Temperature: $-55^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$
- Thermal Shock: As per J62.017 para. 2.4
- Sealing: Up to $30,000 \mathrm{~m}$ (100,000 ft.) altitude
- Salt Spray Resistance: per MIL-DTL-38999

## 38999-Style HDJ Series Connectors

## ELECTRICAL

- Insulation Resistance: $\geq 100,000 \mathrm{M} \Omega @ 20^{\circ} \mathrm{C}$

## Insert Arrangements

SIZE 22

SIZE 24

SIZE 24

```
APPLICATION FLEXIBILITY
- Available in various shell sizes:
    9 (1Q1), 17 (2Q2), 19 (4Q4),
    21 (4Q4) and 25 (8Q8)
    - Accepts standard backshells
```

## RUGGED

```
- Designed for use with wire seal boots for sealing and optimized alignment
- Front metal-shell design provides a full ground plane
```

## SAVES WEIGHT

- Lightweight composite rear shell available in size 19
*Metal ground plane only
The connectors in this section are unique for metal ground plane Quadrax applications and are only inter-mateable with connectors of the opposite gender in this catalog section.

## Quadrax Connectors

## Custom 38999-Style Series III Connectors

TE Connectivity (TE) offers the highly versatile Quadrax multi-signal contact system consisting of two differential pairs (matched impedance) used with quadraxial Ethernet and Fiber Channel cables.*

## Specifications

## ELECTRICAL

- Bandwidth: Up to 3 GHz
- Data Rate: >2 Gb/s
- Characteristic Impedance: $100 \Omega( \pm 10 \Omega)$
- Maximum Voltage Rating: 500 Vrms @ sea level
- Dielectric Withstanding Voltage:

1000 VACrms between any two contacts @ sea level 500 VAC $_{\text {rms }}$ between any contact and outer shell @ sea level

## MATERIALS

- Contacts, Shells, Ferrules:

Copper alloy with gold over nickel finish
One-piece thermoplastic dielectric

## MECHANICAL/ENVIRONMENTAL

- Maximum Mating Force: 2.75 Ibf .
- Minimum Unmating Force: 1.25 Ibf .
- Durability: 500 mating cycles

## APPLICATIONS

- Commercial Avionics Systems
- Aircraft Data Networks
- Military Communications
- In-Flight Entertainment
- Space

STANDARDS AND TEST REPORTS

- TE Product Specification: 108-2199
- TE Test Reports: 501-660
- Application Specifications: 114-13163

## FAST, EASY ASSEMBLY

- One-piece dielectric inserts for
easy assembly and to help lower applied cost
- Crimp type, screw machined,

24 AWG contacts

- Quadrax size 8 shells are keyed per

ARINC 600 for correct orientation

- Asymmetric standoff leg provides built-in keying for direct attach to PC board

## HIGH PERFORMANCE

- TE's Quadrax contacts support $100 \Omega \mathrm{GbE}$ and $150 \Omega$ Fibre Channel
- Available silicone seal boots
are rated for $50,000 \mathrm{ft}$. altitude
immersion

## VERSATILE

- Compatible with a wide range of rectangular and circular connectors
- Cable-applied crimp contacts and PC tail contacts for boardmount soldering

## Solid Seal Boot

Part No. 1811633-1

## RUGGED

- MIL-DTL-32546 style
- Zero bit error rate
- Proven AS39029 crimp contacts
- Uses 38999-style shell

## FAST AND QUIET

- 1 G or 10 GbE data delivery
- Excellent impedance matching and minimal crosstalk
- Size 25 shell supports up to four Ethernet channels

## HIGH PERFORMANCE

- Designed for use in rugged environments
- Ideal choice for 10G Ethernet, IEEE 1394, USB 2.0 and other high-speed protocols
- Optimized shielding arrangement for superior signal integrity

## CONVENIENT

- Fast field assembly, termination, and repair
- Available with aluminum or composite shells with a variety of finishes
- Install/repair using standard insertion/removal and crimping tools
- Range of inserts available for Size 25 shell for other connectivity needs

## CeeLok FAS-X Connectors

## The High-Performance, Rugged Solution for High-Speed Networks

CeeLok FAS-X connectors with AS39029 contacts were designed for rugged environments and help to provide reliable, consistent high-speed performance.

RJ45 connectors in 38999 shells are much larger than the CeeLok FAS-X connector (shell size 19 versus shell size 11 ). Additionally, the insulation displacement crimp technology may be unsuitable for use in certain harsh environments for which the M39029 crimp contacts used in the CeeLok FAS-X connector were intentionally designed.

RJ45
One Ethernet Channel
Size 19 Shell
38.35 mm [1.51"] Dia.

CeeLok FAS-X Connector One Ethernet Channel Size 11 Shell 24.89 mm [0.98"] Dia.

CeeLok FAS-X Connector Four Ethernet Channels (Equivalent to four RJ45s)

Size 25 Shell 47.75 mm [1.88"] Dia.

## CeeLok FAS-X Connectors

## Performance Characteristics

## APPLICATIONS

- Military and Aerospace High-Speed Networking
- Gigabit Ethernet and 10G Ethernet Networks
- IEEE 1394b I/O
- Fibre Channel Networks
- Modular 38999

## MECHANICAL/ENVIRONMENTAL

- Temperature Rating: $-65^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$
- Mating Cycles (Min.): 500
- Plug Diameter: 0.984" and 1.889 " (24.99 mm and 47.98 mm )
- Sealing IP Rating: IP67
- Sealing Altitude Immersion: 50,000'

## ELECTRICAL DATA

- Dielectric Withstanding Voltage: 1300 VAC
- Contact Current Rating (Amps/Contact): 5

MATERIALS

- Shells: Aluminum or composite, nickel plated
- Contact Finish: Gold

## STANDARDS AND TEST REPORTS

- TE Qualification Test Reports: 10065 and 20101203

## Excellent Signal Integrity at Gigabit Rates

## Excellent Impedance Matching

CeeLok FAS-X connectors are designed to maintain a highly matched 100-ohm impedance, with excellent signal integrity.

## More High-Frequency

 HeadroomThe design and close impedance matching of the CeeLok FAS-X connector helps give you more performance margin to tolerate noisy environments that are sensitive to harmful interference.

## Zero Bit Error Rate (BER) under Rugged Testing

The CeeLok FAS-X connector was tested by TE for bit errors for a high speed signal (1.0625 $\mathrm{Gb} / \mathrm{s}$ ) while simultaneously being subjected to random vibration and temperature cycling between $-65^{\circ} \mathrm{C}$ and $+200^{\circ} \mathrm{C}$. No bit errors were detected.

For more information, request Test Reports 10065 and 20101203 from TE.

*12331-22 and 12333-22 are high-durability contacts rated for 1500 mating cycles. 38941-22x and 38943-22x are standard durability contacts rated for 500 mating cycles. The $L$ suffix indicates localized plating; otherwise plating is standard.

## POLAMCO USB Connector Systems

USB 2.0 and 3.038999 Series III-Style Connectors for Harsh Environments
The POLAMCO high-speed USB connector system incorporates a MIL-DTL-38999 Series III-style metal shell with full $360^{\circ}$ shielding and mechanical protection.

These USB connector systems have been designed to help meet the requirements of high-speed data connections where reliability through environmental sealing and full mechanical protection are required.

Each USB connector is designed to help handle high levels of shock, vibration and mechanical impact, and is sealed to IP68 standards to help resist fluids and dust for long-term reliable performance.
Three styles using 38999 shells are available:
USB 2.0 Type A
USB 2.0 Type B
USB 3.0 Type A
The USB 2.0 connectors achieve data rates to $480 \mathrm{Mb} / \mathrm{s}$, while USB 3.0 connectors are capable of $5 \mathrm{~Gb} / \mathrm{s}$ data rates.

## MIL-DTL-38999 Circular Connectors

## Specifications

## SHELL MATERIALS

- Shell: Aluminum, marine bronze, stainless steel
- Finishes:
(Over aluminum with electroless nickel underplating unless noted):
Electroless nickel Olive drab cadmium Olive drab zinc cobalt
Black zinc cobalt
Passivated black zinc nickel Passivated (Stainless steel shell) Unplated (Nickel aluminum bronze shell)
- Seal: Silicone elastomer, fluorosilicone
- O-Ring: Silicone
- Insulator: Polyphenylene sulfide, UL 94, black
- Potting: Clear silicone encapsulant

## USB MATERIALS

- Contacts:

USB 2.0: Nickel, selectively gold plated at $30 \mu$ USB 3.0: Nickel, selectively gold plated at $0.76 \mu \mathrm{~m}$

- Shielding: Nickel-plated brass
- Body: Polyamide, UL 94V-O
- PCB: FR4, UL 94V-O (PCB termination only)

DATA TRANSMISSION

- USB-A 2.0: $480 \mathrm{Mb} / \mathrm{s}$
- USB-B: $60 \mathrm{Mb} / \mathrm{s}$
- USB 3.0: Up to $5 \mathrm{~Gb} / \mathrm{s}$

ELECTRICAL

- Voltage: 30 VAC
- Current Rating: 1 A max. per contact (1.8 A max. USB 3.0 pins 1 and 4 )

## ENVIRONMENTAL/MECHANICAL

- Temperature Ranges: $-40^{\circ} \mathrm{C}$ to $+120^{\circ} \mathrm{C}$
- Fluid Resistance: IP68 (mated)
- Cable Retention: >100 N (22.4 lbs.) axial force
- Durability:

USB 2.0: >500 mating cycles
USB 3.0: 5000 mating cycles

## POLAMCO RJ45 Series Connectors

POLAMCO Cat 5 and Cat 6a 38999-Style Connectors for Harsh Environments
The POLAMCO high-speed RJ45 connector system incorporates a MIL-DTL-38999 Series III-style metal shell with full 360-degree shielding and mechanical protection.

These connectors have been designed to help meet the requirements of high-speed data connections where reliability through environmental sealing and full mechanical protection are required.

Tested by TE to $10 \mathrm{~Gb} / \mathrm{s}$ data rates, the connector shells are available in your choice of aluminum, nickel aluminum bronze, and stainless steel for rugged, reliable performance.
The connectors are fully grounded from the shielded RJ45 plug to the 38999-style connectors. Each is designed to help handle high levels of shock, vibration and mechanical impact, and sealed to IP68 standards to help resist fluids and dust for longterm reliable performance.

## Specifications

## SHELL MATERIALS

## Fiber Optic Connectors

## 38999 Series III Style

As a trusted leader in optical technology with over 40 years of experience in supplying optical solutions for harsh environments, TE offers high-performance 38999-style connector solutions that are also easy to maintain in the field. Our products are designed to operate reliably in harsh and challenging environments, and the company's technical specialists have an in-depth understanding of application requirements.

- MC801 Connectors: Industry-standard 1.25-mm ARINC 801 termini Up to 32 fibers
- MC3 Mk II Connectors: DEUTSCH 2.5-mm termini 5, 8, 12 fibers
- MC4 Connectors: DEUTSCH 2.5-mm termini 2 fibers in a size 9 shell
- MC5 Connectors: DEUTSCH 1.25-mm termini 1, 2, 4, 6, 8, 10, 18, 24, 30 fibers
- MC6 Connectors: Single MT ferrule in size 11 shell 2, 4, 8, 12, 24, 48 channels
- AviMT Connectors: Four MT ferrules in size 21 shell Up to 96 fibers
- Qualified Connectors: MIL-T- 29504/4 and /5 termini Fit standard size 16 cavities
- PRO BEAM Connectors: Use PRO BEAM EB inserts

1, 2, 4, 8 fibers in size 11 or 15 shell

- EB16 Termini: EB termini

Fit standard size 16 cavities

## MIL-DTL-38999 Circular Connectors

## Physical Contact (PC) Connectors

A PC connection uses optical ferrules that are mated within an alignment sleeve and holder to help ensure minimal optical losses and repeatable alignment. The termini can be incorporated into standard circular and rectangular connector to offer multi-channel solutions. PC connections offer

- Low insertion loss
- Low reflection
- High density

While most PC connectors use a ceramic ferrule for a single fiber, the MT ferrule is a multifiber variation typically holding 12 or 24 fibers.

PC solutions offer a higher optical density (Number of channels) and can be used in conjunction with EB interconnects to minimize system losses.
The majority of termini solutions available from TE are spring loaded to help prevent optical discontinuities under shock and vibration.

## Expanded Beam (EB) Connectors

EB connectors expand and re-focus light at the fiber end faces and allow an air gap in the optical pathway. The EB concept uses optical lenses (typically a 3 -mm ball lens for dedicated inserts or $1.25-\mathrm{mm}$ lens for EB16 termini) to expand and collimate the beam emitted from the launch fiber.

The expanded beam remains collimated across the mechanical interface until the receiving lens focuses the beam onto the receiving fiber.

Standard channel counts for EB-specific connectors are 1, 2, 4 and 8 . Since these connectors are used in rugged and tactical environments, they are usually terminated on robust ruggedized, metal-tubed, and avionics/ flight-grade cable.

The EB16 optical termini employs the same technology from the well-established dedicated inserts into a termini that can be used in 38999 Series III size 16 cavities to allow for flexibility and higher fiber counts.

The absence of physical fiber contact makes EB connectors very useful in demanding environments. They offer:

- Sealed optical interface
- High vibration and shock resistance
- High mating-cycle durability
- Tolerance to dirt and debris
- Easy cleaning

## Comparison of PC and EB Connector Technologies

MC801 Connectors

## 38999 Series III-Style Fiber Optic Connectors

The MC801 connector combines the high performance of ARINC 801 optical termini with the convenience of a familiar D38999 Series III connector style.

The connector's threaded coupling and the termini's springloaded design make an excellent solution for high-vibration applications. The compact $1.25-\mathrm{mm}$ ferrule provides a highdensity solution-with up to 32 fibers in a size 25 shell. The 38999-style connector offers scoop-proof mating, a wide selection of materials and finishes, six keying options, and compatibility with standard 38999 backshells and hardware.

Optical alignment is achieved with a thermoplastic insert containing precision zirconia alignment sleeves. Inserts, which are available for use with either the plug or receptacle, are removable to simplify cleaning. Stainless steel dowel pins also aid alignment during mating.

MC801 Connectors
38999 Series III-Style Fiber Optic Connectors

## Specifications

MATERIALS

- Shell: Aluminum, stainless steel, marine bronze, and composite
- Finishes: Nickel, black zinc nickel, passivated, olive drab cadmium
- Insert and Alignment Sleeve Holder: Thermoplastic
- Alignment Dowel Pins: Stainless steel
- Alignment Sleeve: Zirconia
- Ferrule: Zirconia
- Terminus Body and Crimp Sleeve: Nickel-plated copper
- Spring: Stainless steel

## OPTICAL PERFORMANCE

- Insertion Loss: 0.10 dB multimode
0.20 dB single mode (APC finish)
- Return Loss: Up to -65 dB (single mode, APC finish)
- Insertion loss tested against a reference patchcord: IEC 61300-3-4 Method B; also described in ARINC 805 Return Loss: IEC 61300-3-6; also described in ARINC 805

## ENVIRONMENTAL/MECHANICAL PERFORMANCE

- Temperature Range: $-65^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
- Durability: 100 mating cycles
- Random Vibration: No discontinuities $>1 \mathrm{~dB}$ in excess of $1 \mu \mathrm{~s}$ (TIA/EIA-455-32 Test Condition B)
- Mechanical Shock: No discontinuities $>1 \mathrm{~dB}$ in excess of $1 \mu \mathrm{~s}$ ( $100 \mathrm{~g}, 6 \mathrm{~ms}$ half-sine pulse)
- Altitude Immersion: 50,000 ft. (15,200 m)

## DEUTSCH MC3 Mkll Fiber Optic Connectors

## MIL-DTL-38999 Series III Style Connectors

The DEUTSCH MC3 MkII Series ruggedized connectors incorporate individual rear-insertable optical contacts. The removable socket insert helps support easy access to the optical faces to help simplify cleaning and maintenance.

The MC3 MkII Series uses a removable alignment insert for easy cleaning (can be specified in both plug and receptacle shells), and is suitable for use with most single mode and multimode optical fibers with core diameters from 5 to $200 \mu \mathrm{~m}$. $5,8,12$ optical channels are accommodated in the MIL-DTL-38999 Series III-style connector shells.

Featuring spring-loaded optical contacts, tri-start threads and anti-vibration couplings, MC3 MkII connectors are a rugged choice for use in many severe environments and tough application conditions.

## Specifications

FIBER TYPE

- Channels: 5, 8 and 12 optical channels
- Cable Size: 1.5 mm to 3.0 mm , outer jacket

MATERIALS

- Shell: Aluminum, stainless steel, marine bronze
- Finishes: Nickel, olive drab cadmium, or black zinc nickel (aluminum shell)
- Contact Body: Arcap, Titanium
- Ferrule: Zirconia
- Alignment Sleeve: Zirconia
- Alignment Pin:
- Seals: Fluorosilicone or nitrile

OPTICAL PERFORMANCE

- Insertion Loss: 0.25 dB typical*
- Return Loss: 40 dB typical*
- Repeatability: 0.1 dB with $50 / 125-\mu \mathrm{m}$ fiber
*Fiber and polishing process dependent.

## ENVIRONMENTAL

- Temperature Range: $-65^{\circ} \mathrm{C}$ to $+155^{\circ} \mathrm{C}$
- Fluid Resistance: Fluid immersion per EIA 364.10,
including resistance to
MIL-PRF-5606: Hydraulic fluid
MIL-DTL-83133: JP-8 aviation fuel

## SPACE SAVING

- Two optical channels in a size 9 shell

## HIGH PERFORMANCE

- Compact $2.5-\mathrm{mm}$ precision zirconia ceramic ferrules
- Lightweight aluminum shells
- MIL-DTL-38999 Series III antivibration coupling mechanism and tri-start thread

EASY TO USE

- Simple termination process and tooling
- Purpose designed inserts, and insert-to-insert keying aid precision alignment
- Identical spring loaded optical contacts help maintain contact under severe shock and vibration

## DEUTSCH MC4 Duplex Connectors

## MIL-DTL-38999 Style Series III Connectors

The MC4 Duplex optical fiber connector is based upon shell size 9 Mil-C-38999 Series III making this an extremely compact environmentally sealed 2-way connector. The MC4 is suitable for use with most multimode fibers with core diameters of 50 to $200 \mu \mathrm{~m}$. Simplex and duplex cable constructions can be accommodated with suitable connector backshells.
Precision ceramic ferrules and alignment sleeves help support optimum performance and reliability over the service life of the connector.

The optical termini are spring loaded in both the plug and receptacle shells. This helps provide an axial load equalization so that the contact can be maintained even when the connector is subjected to vibration levels in excess of 30 g .

The coupling nut has a built in antivibration clicker mechanism to help prevent inadvertent uncoupling under adverse vibration conditions.

## DEUTSCH MC4 Duplex Connectors

## MIL-DTL-38999 Style Series III Connectors

Specifications
OPTICAL

- Attenuation: Less than $0.4 \mathrm{~dB}(50 / 125 \mu \mathrm{~m})$
- Repeatability: Better than 0.2 dB
- Fiber Types: $x / 125,100 / 140,200 / 280 \mu \mathrm{~m}$
- Cable Types:
2.5 mm tight jacketed
4.5 mm duplex

## DEUTSCH MC5 Connectors

## MIL-DTL-38999 Style Series III Connectors

The DEUTSCH MC5 high-density fiber optic multiway connector series from TE Connectivity (TE) is capable of sustained performance over a wide range of tough environmental conditions.
The MC5 connector uses precision ceramic ferrules and lightweight MIL-DTL-389999 Series III connector shell materials, combined with purpose-designed inserts to help ensure the optical performance meets the requirements of high reliability optical systems.

Compact spring-loaded precision optical contacts are individually insertable/removable for ease of assembly and maintenance, and the color band indicates full mating. The alignment sleeves provide highly reliable, repeatable optical performance.
The MC5 Series connectors provide excellent performance under some of the most demanding environmental conditions, including military aircraft.

## DEUTSCH MC5 Connectors

## MIL-DTL-38999 Style Series III Connectors

## MC5 Optical Termini (ordered separately)

Optical termini are supplied with a profile formed optical end face and are available for single-mode or multimode fibers. Contacts are available in either spring-loaded or rigid versions, depending upon application. Rigid contacts should be used in bulkhead receptacles only.

Note: A crimp sleeve is not included for terminating $900-\mu \mathrm{m}$ buffered cable.

Ordering Information

## Tooling

- Crimp Tool: Part No. 471716
- Crimping Dies: 457440

## MC5 Backshells for Multifiber Cables (ordered separately)

A variety of backshells are available for multifiber cables, with peripheral strain relief (for $900-\mu \mathrm{m}$ buffered cable) and central strain relief. Consult TE.

## DEUTSCH MC6 Fiber Optic Ribbon Cable Connectors

## 38999 Series III-Style Connectors

The DEUTSCH MC6 high-density fiber optic connector series is rugged, versatile, and easy to install and maintain. The connectors are compatible with standard MT ferrule inserts.

The MT ferrule inserts accommodate 2 to 72 channels and can be supplied pre-terminated, if required. The MC6 connector uses the compact MIL-DTL-38999 Series III, shell size 11 body, which is also used on the DEUTSCH MC5 connector.

MC6 connectors have a lightweight, corrosion resistant, metal-plated composite shell, which helps provide high strength and durability combined with excellent EMC shielding. MC6 connector shell are also available in aluminum and Marine Bronze materials
The result is a very compact, rugged, environmentally sealed solution for a wide range of applications, such as avionics, data bus and in-flight entertainment systems.

## DEUTSCH MC6 Fiber Optic Ribbon Cable Connectors

AviMT Connector

D38999 Series IIII Style Connector with Four MT Ferrules
The AviMT connector from TE Connectivity (TE) holds four MT ferrules-for up to 96 fibers-in a compact size 21 shell. The connector is well suited to applications requiring high fiber counts, such as UAV-based video surveillance, C5ISR, avionics, fiber backbone, radar and IFE systems.

## Fast, Simple Assembly

The connector is very easily assembled, requiring only a screwdriver to fasten the ferrule retainer into place. The simple assembly contrasts dramatically with many connectors in the industry, which require special tools and fixtures to assemble multiple parts and subassemblies.

## Specifications

## MATERIALS

- Shell: Nickel-plated aluminum (Consult TE for other shell finishes)
- Insert: Thermoplastic
- Front Retainer Ring: Passivated stainless steel
- Interfacial Seal: Rubber
- Ferrule Retainer: Passivated stainless steel

## 38999-Style Connectors

Expanded beam inserts for 38999-style connectors use the same reliable insert technology as our PRO BEAM connectors. Available to accommodate 2 or 4 optical channels in a size 11 shell or 8 channels in a size 15 shell, the inserts give you many of the advantages of expanded beam interfaces in the familiar 38999 form factor.

Connector kits are available to accommodate popular fiber optic cable styles used in the military and aerospace industryincluding tactical cable, 1.8 and $2.2-\mathrm{mm}$ avionics cable, and buffered-only cable.

Expanded beam technology, which physically expands and collimates the transmission signal into an optical beam over 14 times its original diameter for multimode fiber and over 45 times for single-mode fiber. The beam is then refocused back down onto the core of the receiving fiber. This approach provides ease of alignment and low sensitivity to thermal changes and contamination.

## INDUSTRY STANDARDIZATION

PRO BEAM EB16 Optical Termini

Bring Rugged Optical Performance to Mil-Standard Connectors

Leveraging our industry-accepted PRO BEAM expanded beam technology, the PRO BEAM EB16 termini are adding rugged, reliable optical performance to familiar Mil Spec connectors. The EB16 termini are a size 16 optical contact, fit-form compliant to MIL-DTL-38999 Series III size 16 cavities. These termini are a drop-in replacement for the M29504/4 and /5 physical contact termini used in many ruggedized circular connector systems.

## Non-Contacting Interface

The non-contacting interface typically results in less wear and tear overall, especially in high-mating cycle or highvibration applications.
The termini's ball lens physically expands and collimates the optical signal into an optical beam well beyond its original size to help provide easier optical alignment, lowers sensitivity to contamination, and helps provide consistent performance over thermal changes. The beam is then refocused back down onto the core of the receiving fiber.
The beam area is expanded 30 times between lenses. The signal will not deteriorate by airborne contamination particles of the same size that affect the performance of the PC connection. The termini's endface is easily cleaned.

## MIL-DTL-38999 Circular Connectors

## PRO BEAM EB16 Optical Termini

## Specifications

## MATERIALS

- Terminus Body and Crimp Sleeve: Nickel-plated brass
- Ferrule and Split Sleeve: Zirconia
- Ball Lens: Glass, with antireflection coating
- Spacer: Stainless steel
- Spring: Stainless steel
- Protective Cap: Vinyl

## MECHANICAL/ENVIRONMENTAL

- Durability: >1000 mating cycles
- Operating Temperature: $-65^{\circ} \mathrm{C}$ to $+165^{\circ} \mathrm{C}$ (Cable dependent)
- Sinusoidal Vibration: TIA/EIA-455-11C, Test Condition IV
- Random Vibration: TIA/EIA-455-11C, Test Condition VI-J
- Mechanical Shock: TIA/EIA-455-14A, Test Condition C
- Thermal Cycling: TIA/EIA-455-3B, Test Condition C-2
- Thermal Shock: TIA/EIA-455-71, Schedule C-O (5 cycles)

## OPTICAL

- Insertion Loss: 1.5 dB max. @ 850/1300 nm (Multimode fiber)

## STANDARDS

- Industry Standards: SAE AS3 AS6250, AS6251, and ARINC 845
- TE Application Specification: 108-127013
- TE Instruction Sheet: 408-32132
- TE Qualification Test Report: 501-32028

## APPLICATIONS

- Radar and Sensor Systems
- Rugged Network Applications
- Fixed Wing and Rotary Aircraft
- Unmanned Systems
- Commercial Aviation

## MIL-T-29504 Style Optical Termini

Widely used in rotary and fixed-wing aerospace applications, our rugged optical termini is rated for 500 mating cycles and feature spring-loaded socket contacts to help ensure consistent mating pressure and performance levels. They are designed for use in any MIL-DTL-38999 Size 16 cavity, and manufactured to meet MIL-T-29504/4 and/5 requirements.

## Specifications

FIBER TYPES

- Single Mode: 9/125 $\mu \mathrm{m}$
- Multimode: 50/125, 62.5/125, 200/280 $\mu \mathrm{m}$
- Cable Size: $1.8 \mathrm{~mm}, 2.5 \mathrm{~mm}$

OPTICAL PERFORMANCE
(Depends on fiber type and finish)

- Insertion Loss: 0.6 dB typical
- Return Loss: -40 dB typical
- Repeatability: 0.2 dB typica

## MATERIALS

- Ferrule: Zirconia
- Alignment Sleeve: Ceramic zirconia
- Spring: Stainless steel
- Terminus Assembly: ARCAP alloy
- Heat Shrink Sleeve: PVDF

ENVIRONMENTAL/MECHANICAL

- Temperature Range: $-55^{\circ} \mathrm{C}$ to $+150^{\circ} \mathrm{C}$
- Durability: 500 mating cycles
- Vibration: 20 g, 20 to 2000 Hz

## MIL-T-29504 Style Optical Termini

## Socket (457462)

## Pin (457463)

Part Numbering

## POLAMCO BT Series Banding Backshells

BT Series backshells terminate the shield with a stainless steel band strap. Additional strain relief can be obtained with a heatshrink boot.

## Part Numbering System

## POLAMCO BT Series Banding Backshells

SLOT OPTION - SL (Pigtail Termination)

POLAMCO 70 Series Memory Ring Adapters

The 70 Series adapters help provide a high-reliability, low profile shield termination using magna-form memory ring technology. The adapters are available with an optional pre-terminated braid sock.

POLAMCO 91 Series Spring Adapters

The 91 Series adapters use a constant-force spring to help provide a fast, reliable shield termination without tools.

POLAMCO 96 Series Strain Relief Adapters

The 96 Series adapters provide stain relief in an open-frame cable clamp. The backshell is machined from solid aluminum alloy to support strength, reliability, and low weight.

POLAMCO 97 Series Heat-Shrink Boot Adapters

The 97 Series adapters are designed to help provide high performance when used with an optional heat-shrink boot to provide strain relief. Many shell sizes are available from stock, providing an easy alternative to M85049/62 backshells.

[^8]
## HIGH PERFORMANCE

- Mesh tape bundle creates
windowless EMI barrier, even without overall screen braid
- $360^{\circ}$ termination of multiple or individual screens
- Optional heat-shrink boot available for sealing and strain relief

EASY TO USE

- Tool-free termination
- Reworkable

KMA Series Mesh Tape Backshells

The KMA Series backshells are a mesh tape bundle system that creates a windowless EMI barrier, even without overall screen braid by using $360^{\circ}$ termination of multiple individual screens.

## INDUSTRY STANDARD

- Meets AS85049 NAVAIR standards

## RELIABLE

- Self-coupling locking nut provides excellent mechanical protection against loosening under vibration
- Corrosion resistant stainless steel

## EASY TO USE

- Band straps available flat for side entry or precoiled for end entry
- Side-entry band straps allow easier installation and repair

## VERSATILE

- Three band strap widths

Part Numbering System

Raychem AS85049 Band Straps

The AS85049 industry standard is used on most military circular connectors, including M38999. The band strap termination system provides ease of installation and repair. TE offers the corrosion-resisting steel bands in three styles to help meet your shield termination needs and termination tool of your choice.

## APPLICATION TOOLING

- M85049/128-7 \& 8 AS81306/1-02
- M85049/128-3 \& 4 AS81306/1-01
- M85049/128-1 \& 2 AS81306/2-01

## CONFIGURATION

1 Flat, 6.22 (0.245) Width
2 Precoiled, 6.22 (0.245) Width
3 Flat, 6.35 (0.250) Width
4 Precoiled, , 6.35 (0.250) Width
7 Flat, 3.05 (0.120) Width
8 Precoiled, 3.05 (0.120) Width

Raychem AS85049 Adapters and Bandstraps

Meeting NAVAIR requirements, Raychem AS85049 adapters help provide a reliable termination of shielded cables. The detented self-locking coupling nut helps provide mechanical protection against loosening under vibration and provides audible indication of proper engagement.

## MATERIALS

- Adapters: Aluminum
- Plating: Olive drab cadmium, electroless nickel, or black zinc nickel

## Part Numbering System

Raychem HexaShield EMC Adaptors

## High-Performance EMC Protection for Harsh Military and Commercial Environments

Raychem HexaShield high-performance adaptors help provide excellent EMC protection and reliability in a variety of military and commercial applications.
Easy to install, maintain and repair, HexaShield adaptors help provide outstanding shielding effectiveness by providing 360-degree EMC shielding on the termination area of each individual cable. They are available for circular connectors in a variety of angles, plus swept and long body configurations.
HexaShield adaptors outperform traditional pigtail terminations, especially in HIRF application. They provide excellent EMC protection with minimal degradation of shielding performance. The adaptors also help provide excellent mechanical and environmental protection.

## Specifications

## MATERIALS

- Shell: Aluminum alloy
- Platings: Electroless nickel (MIL-DTL-26074) or olive drab cadmium (QQ-P-416 Type II, Class 3)

## INSTALLATION PROCEDURES

- RPIP-696-00: HEX-A-O2X and HET-A-O4X
- RPIP-696-03: HET-O3X

GENERAL PROCEDURES

- RPIP-696-07: Cylindrical connectors, right-angle body
- RPIP-696-04: Cylindrical connectors, straight body

## ACTOO Lightweight Composite Tie-Style Strain Relief Adapters

ACTOO strain relief adapters offer composite bodies to help provide a simple, lightweight strain relief for cable uses in lightduty application. Cable can be secured to the body adapter with a tie wrap. Body adapters are available with various conductive platings to help support grounding, while a secondary grommet provides wire sealing.
The adapters are available with inserts to match the insert arrangement of the connector on which it is used.

## MATERIALS

- Coupling Nut and Body Adapter: Composite
- Body Adapter Finish: Nickel, tin, or olive drab cadmium
- Secondary Grommet: Silicone elastomer

## MIL-DTL-38999 Circular Connectors

Metal Protective Covers for 38999 Series III
POLAMCO Protective Caps - Lanyard Options

## POLAMCO Connector Savers

## 38999-Style Series III and Series IV Connectors

POLAMCO Connector Savers help protect connectors that are mated and unmated frequently. The one-piece connectors use plug interface on one end and a receptacle interface on the other to allow them to serve as an intermediary between plug and receptacle connector. This helps allow the connector saver to take the wear and tear of repeated mating cycles. In particular, this helps allow box-mounted receptacles to be more protected from wear and the eventual need to be replaced.

POLAMCO connector savers are available in both MIL-DTL-38999 Series III and IV styles. Options include aluminum, stainless steel, or marine bronze shells with a wide range of plating options.

- Shell Material: Aluminum, stainless steel, or nickel aluminum bronze
- Finish: See part numbering description
- Seals: Silicone elastomer
- Insert: Thermoset plastic
- Contacts: Copper alloy, gold plated

## POLAMCO Connector Savers

## 38999-Style Series III and Series IV Connectors

## DEUTSCH CBC Series Circuit Board Connectors

## 38999 Series III Style Connectors with Bussed Contacts

DEUTSCH CBC connectors contain an internal printed circuit board used to bus contacts. A number of bussing arrangements are available. The lightweight connectors are available with either composite or aluminum shells. They offer an integrated solution for bussing needs by eliminating the need for external components.

## Specifications

- Current: Traces and sockets carry current levels up to the threshold of a: MS22073-3 circuit breaker for contact size 22 MS22073-5 circuit breaker for contact size 20 MS22073-7.5 circuit breaker for contact size 16
- Conformal Coating: per MIL-I-46058 and able to withstand 100 VDC for two seconds
- Insulation Resistance: greater than 100 megohms when tested at 45 VDC
- Applicable Specifications: IPC-600C
IPC 0-275
MIL-P-55110
MS22073
MIL-I-46058
MIL-STD-1560
- Frequency: maximum of 3200 Hz (analog circuit) and $100 \mathrm{~kb} / \mathrm{s}$ (for ARINC 429 signals)
- Circuit-to-Circuit Crosstalk Rejection: minimum of 60 dB , nominal 80 dB
- Temperature: $125^{\circ} \mathrm{C}$ maximum continuous operating temperature for finished circuit board

## Assembly Instructions

## Contact Crimping

1 Burn through the insulation with a hot wire stripper or use other approved stripping method. Do not remove the insulation at this point. This will help protect the wire strands from splaying. Refer to contact information sheet for proper wire insulation strip length.

3 Drop the contact into the crimping tool with the contact crimp barrel facing up.

5 Insert the bare wire into the open end of the contact and squeeze the handles of the tool together. The crimping tool will not release until the full crimping cycle has been performed. Remove the crimped contact and wire from the tool.

2 Set the dial of the crimp to the proper setting for wire gage and contact as noted on the contact information sheet or on the tool. Be sure that the proper locator is used. See contact information sheet for proper locator.

4 Remove the small piece of insulation from the wire. Do not pinch the insulation with the fingernails during this procedure. The wire is now ready to be crimped to the contact.

6 Two series of 4 indents grip the wire and secure the contact to the wire. Visibility of the wire in the contact inspection hole (arrow) indicates that the wire is crimped into the contact at the proper depth. Inspect to make sure there are no loose or nicked strands.

## Assembly Instructions

Contact Insertion

1 Hold the insertion half of the tool between the thumb and forefinger and lay the wire against the slot of the tool, then snap the wire into the slot.

3 Holding the connector with the rear grommet facing you, slowly push the contact straight into the grommet cavity. Do not twist the tool. Note: Some wire constructions may not require the use of an insertion tool.

2 After the wire snaps into the tool, seat the retention shoulder against the tip of the tool.

4 A firm stop will be evident when the contact positively seats in the connector. Remove the tool by sliding it back on the wire. The contact will now be securely locked in place.

## Assembly Instructions

## Contact Removal

1 With the rear of the connector facing you, lay the wire of the contact along the slot of the tool, leaving about $1 / 2$ " from the end of the tool to the rear of the connector. Squeeze the wire firmly into the tool between the thumb and forefinger about $1 / 2$ " from the tip and quickly pull the tool away from the connector.

3 Press the wire of the contact against the serrations of the plastic tool and pull both the tool and the contact/wire assembly out of the connector.

Caution: When using minimum diameter wire, the tool may have a tendency to stop against the rear of the contact crimp barrel. If this should occur, careful manipulation of the tool will help permit it to ride over the crimp barrel and into the proper position to unlock the contact.

Notes

## LET'S CONNECT

We make it easy to connect with our experts and are ready to
provide all the support you need. Just call your local support number or visit www.te.com/industrial to chat with a Product Information Specialist.
