

1602 I2C

Arduino IIC LCD1602 / I2C interface adapter plate with LCD screen

The Arduino board IO mouth only 20, add some sensors, SD card, relay modules, such as IO mouth is not enough,

1602 screen need seven IO mouth to drive up, we developed the module can save you five IO mouth, we send the arduino function library

Product parameters:

1. The power supply voltage, + 5 v
2. Support the I2C protocol
3. Has the backlight, and contrast to adjust potentiometer
4. 4 line output is simpler.
