Min Insulating Bushings

Micro Plastics bushings provide economical protection for wire, cable, tubing, and hose from sharp, uneven drilled or punched holes in sheet metal.

The tough, resilient heat stabilized nylon bushings are easily and positively snapped into position without tools.

The bushings are the economical solution to insulate wire, cables, etc. from raw edges in compact designs where internal clearances are critical. Miniature bushings accommodate panels up to 1/16" thickness and require only 1/8" clearance. Standard bushings meet Underwriters Laboratories and Canadian Standards Association temperature and pull-out tests.

- Material Heat Stabilized Nylon UL 94V2
- Temperature Index 105° C
- Stocked In Standard Black
- Colors Available on Request
- Packaged 1000 pcs. Per Bag - Must Be Ordered In Packaged Quantity
