# Amphenol® Tri-Start

## Series III - the highest performance

### MIL-DTL-38999 connector

**Tri-Start™ MIL-DTL-38999 Series III  
with Metal Shells - Aluminum, Stainless Steel, Class K Firewall**

**Amphenol® Tri-Start MIL-DTL-38999\* Series III Connectors offer the highest performance capabilities for both general duty and severe environment applications. Meeting or exceeding MIL-DTL-38999 Series III requirements, the Tri-Start connector with standard metal shells (aluminum or stainless steel with several finish options) offers these features:**

- **EMI Shielding** - solid metal to metal coupling, grounding fingers, electroless nickel plating, and thicker wall sections provide superior EMI shielding capability of 65dB minimum at 10 GHz
- **Contact Protection** - recessed pins in this 100% scoop-proof connector minimize potential contact damage
- **Moisture Resistance** - improved interfacial seal design helps prevent electrolytic erosion of contacts
- **Corrosion Resistance** - shells of stainless steel or cadmium over nickel plating withstand a 500 hour salt spray exposure
- **Vibration/Shock** - operates under severe high temperature vibration, through 200°C
- **Firewall Capability** - available in a stainless steel shell, class RK, RS
- **Lockwiring Eliminated** - unique, self-locking, quick coupling connector eliminates lockwiring
- **Quick Coupling** - completely mates and self-locks in a 360° turn of the coupling nut
- **Inventory Support Commonality** - uses standard MIL-DTL-38999 contacts, application tools, insert arrangements
- **Electrostatic Discharge Protection (ESD)** - protection for sensitive circuitry without diodes, varistors, etc., with the use of the Faraday Cage principal which shunts high voltage, high current discharge events (see page 51)
- **Ground Plane Connectors** - with metallic insert for common grounding of coax, triax or twinax contact outer shield (see page 49)

\* MIL-DTL-38999 Series III supersedes MIL-C-38999 Series III.

**Composite Tri-Start,  
Qualified to MIL-DTL-38999, Rev. J**

**MIL-Qualified to MIL-DTL-38999, Rev. K, the Amphenol® Composite Tri-Start Connector offers a lightweight, corrosion resistant connector with the same high performance features as its metal counterpart. The Composite Tri-Start Connector also includes the following features:**

- **Lightweight** - 17% – 70% weight savings (17–40% weight savings vs. aluminum) (60–70% weight savings vs. stainless steel) See Composite weight comparison chart, pg. 47.
- **Corrosion Resistance** - available in standard MIL-DTL-38999 olive drab cadmium (175°C) and electroless nickel plating (200°C), both withstanding 2000 hours of salt spray exposure. The base material is able to withstand an indefinite exposure to salt spray.
- **Durability** - 1500 couplings minimum (in reference to connector couplings, not contacts)
- **Extended Life Contact** - Mil-approved plating process which provides 1500 couplings minimum

**CLUTCH-LOK™ MIL-DTL-38999 Series III  
High Vibration Connector**

**The latest offering from Amphenol in MIL-DTL-38999, the CLUTCH-LOK connector offers:**

**All advantages of stainless steel/Class K firewall Tri-Start connectors plus a unique clutch design that actually tightens itself under vibration.**

**Features include:**

- High degree of differential torque
- No settling back to the next ratchet tooth
- Completely intermateable with all existing MIL-DTL-38999 Series III connectors
- Offers advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection See page 19 for description, 43 and 44 for ordering.

# Amphenol® Tri-Start

offers more versatility & options  
than any other interconnection family

## The Tri-Start Connector is the high performance choice in the D38999 Family.

Originally designed in order to increase the performance levels of MIL-DTL-38999 Series I and II, the Series III was created to meet high performance connector criteria.

Dynamic features for performance and reliability that were needed for military, aerospace and ground vehicle applications were designed into the Series III that include:

- Rapid coupling via a triple-start thread
- Shell-to-shell or metal-to-metal bottoming
- Improved EMI shielding

The Tri-Start Family of connectors has grown and expanded since its original addition to the 38999 series in order to meet ever-evolving interconnection product needs. Today, the Tri-Start family has styles and options that cover a very wide range to meet not only the highest performance needs of space applications, but also general duty connector needs.

## The Tri-Start Connector Series is second to none in terms of versatility and customer options.

The broad portfolio includes Tri-Starts with:

- Aluminum and nickel plated stainless steel shells
- Class K Firewalls
- Composite shells
- Clutch-Lok® high vibration design
- Fiber Optics
- Fail-Safe Lanyard Release connectors
- Variety of contact options: shielded, coax, matched impedance coax, triax, twinax, quadrax, thermocouple, PCB tail and wire wrap
- Ground plane versions and Press-fit® with compliant pins
- ESD (Electrostatic Discharge) protection
- Filter/Transient protection
- Hermetic versions
- Long reach receptacle styles
- Numerous shell geometries, finishes and accessories

See more on Tri-Start specials on pages 48-51.

## shell styles and key design features

### Designed for Performance

Numerous advantages in performance capability are designed into the Amphenol Tri-Start Connector. A positive metal to metal coupling design, grounding fingers, and electroless nickel plating provide superior EMI shielding capability of 65 dB minimum at 10 GHz.

Acme threads provide coupling durability. Thicker wall sections and a greater coupling surface area improve strength and shock resistance. Blunting of the thread on both the coupling nut and receptacle eliminates cross coupling. The connector quickly mates and self locks in a 360° turn of the coupling nut.

Elongated mounting holes permit the Tri-Start Connector to intermount with various existing MIL-spec box or wall mount receptacles, giving it a design replacement advantage.

Shells of stainless steel, or cadmium over nickel plating prevent severe corrosion. Resistance is tested through exposure to a 500 hour salt spray. Composite versions provide protection from salt spray exposure for 2000 hours. Other finish options are available; see how to order Tri-Start metal and Tri-Start Composite.

Recessed pins minimize potential contact damage in this 100% scoop-proof connector. In a blind mating application, mating shells cannot “scoop” the pins and cause a shorting or bending of contacts.

The design of the Amphenol Tri-Start interfacial seal meets the MIL-DTL-38999 Series III requirements for electrolytic erosion resistance.

A rigid dielectric insert with excellent electrical characteristics provides durable protection to the contacts. The socket contacts are probe proof, and all contacts are rear removable. They are plated in the standard 50 micro inches minimum gold, with 100 micro inches as an option and are available in standard Tri-Start insert arrangements and special Pyle® insert arrangements in sizes 10 power, 12, 16, 20 and 22D contacts. Special insert patterns are also available with larger contacts in sizes 4 and 0.

## test data

**TRI-START, SERIES III**  
**TYPICAL SHIELDING EFFECTIVENESS TEST DATA**  
 EMI/EMP SHIELDING EFFECTIVENESS dB  
 TESTING BY TRIAXIAL METHOD

**TRI-START, SERIES III**  
**TYPICAL SHIELDING EFFECTIVENESS TEST DATA**  
 EMI/EMP SHIELDING EFFECTIVENESS dB  
 TESTING BY MODE STIRRING METHOD

Amphenol® Tri-Start connectors provide EMI/EMP shielding capability which exceeds MIL-DTL-38999 Series III requirements.

The TV and CTV Series III connector with standard solid metal to metal coupling, EMI grounding fingers and conductive finishes has proven to be the ultimate in EMI/EMP shielding effectiveness. The charts illustrate shielding effectiveness data which is typical of Tri-Start connectors tested with the nickel finish (Class F-metal, Class M-composite) over a wide frequency range.

The vibration capability of the Tri-Start Series is shown in the chart below. This illustrates the most severe vibration envelope of any qualified connector available today.

These capabilities along with a 200°C temperature rating and superior moisture sealing protection provide the user with a connector that can withstand the most rigorous application.

**TRI-START**  
**VIBRATION CRITERIA**

Test data beyond 2GHz is subject to equipment variation.

\* Dependant on shell finish

NOTE: for test data information on the new Clutch-Lok Tri-Start, high vibration connectors, consult Amphenol Aerospace.

# TV26/MTV26 – crimp, metal CLUTCH-LOK<sup>®</sup> straight plug for high vibration and harsh environment applications

Part number reference.  
See how to order, pages 43, 44  
to complete.

TV26RK-XX-XXX  
TV26RS-XX-XXX

For parts with MS Stamping  
use MTV26( ) part number as  
follow:

MTV26RK-XX-XXX  
MTV26RS-XX-XXX

The latest in MIL-DTL-38999, Series III Connector Technology is the CLUTCH-LOK. Designed for high vibration and harsh environments such as aircraft gas turbine engines, it is also an ideal choice for demanding applications such as aircraft, space and military ground vehicles. The unique clutch design of the Amphenol CLUTCH-LOK means that you don't have to compromise the need for quick, smooth mating of plugs and receptacles in order to get increased uncoupling torque.

The CLUTCH-LOK has proven to not only remain mated and pass all the Series III specification requirements - it also has proven to actually tighten itself under vibration. This is a powerful advantage over the traditionally high vibration application connectors. The CLUTCH-LOK is also a tremendous advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection.

CLUTCH-LOK features and benefits:

- High degree of differential torque
- Infinite free coupling and positive metal-to-metal bottoming with each mating
- No settling back to the next ratchet tooth
- Available with stainless steel shells and Class K firewall inserts
- All the advantages of MIL-DTL-38999 Series III including EMI/RFI shielding, electrolytic erosion resistance and contact protection with recessed pins
- Enhanced connector performance at affordable prices
- Completely intermateable with all existing MIL-DTL-38999 Series III connectors
- Fully QPL'd

# TV Breakaway Fail Safe Connectors

## quick-disconnect with an axial pull of lanyard

**Amphenol Tri-Start Breakaway Fail Safe Connectors provide unequalled performance in environments requiring instant disengagement.**

Designed to provide quick disconnect of a connector plug and receptacle with an axial pull on the lanyard, the "Breakaway" Fail Safe connector family offers a wide range of electrical and mechanical features:

- Instant decoupling and damage free separation
- Completely intermateable with standard receptacles (D38999/20 and /24)
- Inventory support commonality through the use of standard insert arrangements and contacts

Breakaway un-mating is initiated by applying a pull force to the lanyard which causes the operating sleeve on the plug to move away from the receptacle. Coupling segments on the plug then move away from the mating receptacle while expanding, thus releasing the receptacle. After completion of the un-mating sequence, spring compression returns the sleeve and segments to their original positions. Un-mating of the plug may also be accomplished by normal rotation of the coupling ring without affecting the breakaway capability.

**The Tri-Start Breakaway Fail Safe connector features which provide EMI/EMP shielding in excess of MIL-DTL-38999 Series III requirements:**

- Solid metal-to-metal coupling
- EMI grounding fingers
- Conductive finishes

**Amphenol Breakaway Fail Safe connectors are qualified to MIL-DTL-38999/29, /30 and /31 (for MIL-STD-1760 Stores Management applications). In fact, Amphenol offers more qualified Breakaway shell size and insert combinations than any other QPL supplier.**

In addition to standard Breakaway connectors, Amphenol also manufactures custom breakaway connectors including those with:

- Highly durable non-metallic operating sleeves in a variety of lengths and diameters
- Increased pull-force capability
- Low-profile designs
- Custom lanyard lengths and backshells
- Low force separation capabilities
- Low insertion/separation force contacts
- Non-cadmium finishes

Whether you need a standard Breakaway, one of our custom Breakaways or, a unique Breakaway design, please contact your local Amphenol representative.

Contact Amphenol Aerospace for more information on breakaway, quick-disconnect connectors. Other Amphenol cylindrical families (MIL-DTL-38999 Series I & II, MIL-C-26482, MIL-C-83723) also offer breakaway quick-disconnect connectors.

**Amphenol offers a variety of lanyard plug styles including MIL-STD-1760 types 1, 2 and 6 for Stores Management applications.**

**Breakaway with Coax Contacts**

**Special configuration Fail Safe used on space telescope application. Lanyard is replaced by a swivel ring for remote disconnect and "wing arms" have been added for manual actuation accessibility by gloved astronauts.**

# D38999/29 & D38999/30 TV Breakaway Fail Safe

## Lanyard release plug – how to order, cont.

### HOW TO ORDER - BY MILITARY PART NUMBER FAIL SAFE D38999/29 & D38999/30

Ordering procedure for example part number D38999/29FB35EN is shown below:

#### DOD Number Prefix

D38999/ designates MIL-DTL-38999, Series III Tri-Start Connectors

#### Specification Sheet Number

29 designates Lanyard Release Plug with pin contacts  
30 designates Lanyard Release Plug with socket contacts

#### Service Class

F designates electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 48 hour salt spray, 200°C  
W designates corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI –50dB @ 10 GHz specification min., 175°C

#### Shell Size Code

MIL-DTL-38999, Sizes 11 thru 25

A*	B	C	D	E	F	G	H	J	MIL Shell Size
9*	11	13	15	17	19	21	23	25	Amphenol Shell Size

\* Shell size 9 not available

#### Insert Arrangement

MIL-DTL-38999, see insert availability chart on page 29.

#### Lanyard Length Code

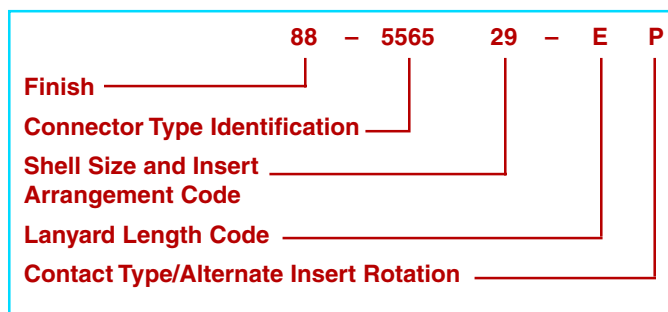

See Table II (page 29) for lanyard length code number.

#### Polarizing Position

For alternate positions of connector (to prevent cross-mating) see alternate positioning on page 8. (N indicates normal)

### HOW TO ORDER - BY PROPRIETARY PART NUMBER FAIL SAFE 88-5565( ) & 91-5565( )

Ordering procedure for example part number 88-556529-EP is shown below:

#### Finish

88 designates corrosion resistant olive drab cadmium plate over nickel, 500 hour extended salt spray, EMI –50dB @ 10 GHz specification min., 175°C

91 designates electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 48 hour salt spray, 200°C

These are standard finishes. Consult Amphenol Aerospace, Sidney, NY for variations.

#### Connector Type Identification

88/91-5565 designates MIL-DTL-38999, Series III Tri-Start Lanyard Release Plug

#### Shell Size and Insert Arrangement Code

Shell sizes are MIL-DTL-38999, Series III from 11 thru 25. The basic part number selected specifies the insert arrangement. See Table I (page 29) for coded part number that correlates to insert arrangement.

#### Lanyard Length Code

See Table II (page 29) for lanyard length code number.

#### Contact Type/Alternate Rotations

P designates pin, S designates socket for normal positioning of contacts. When an alternate position of the connector is required to prevent cross-mating, a different letter (other than P or S) is used. See alternate positioning on page 8, then convert to Amphenol proprietary coding by the following chart.

Pin Contacts		Socket Contacts	
MS Letter	Amphenol Letter	MS Letter	Amphenol Letter
PN	P (normal)	S	S (normal)
PA	G	SA	H
PB	I	SB	J
PC	K	SC	L
PD	M	SD	N
PE	R	SE	T

# D38999/31 for MIL-STD-1760 TV Breakaway Fail Safe for Stores Management applications lanyard release plug – how to order

## HOW TO ORDER - BY MILITARY PART NUMBER FAIL SAFE D38999/31

Ordering procedure for example part number D38999/31WE20PN1 is shown below:

### DOD Number Prefix

D38999/ designates MIL-DTL-38999, Series III Tri-Start Connectors

### Specification Sheet Number

31 designates Lanyard Release Plug for MIL-STD-1760 with pin contacts

### Service Class

F designates electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 48 hour salt spray, 200°C

W designates corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI –50dB @ 10 GHz specification min., 175°C

### Lanyard Length Code

See Table III for lanyard length code number.

### Insert Arrangement

Only 11 or 20 are available contact arrangement numbers. See page 31.

### Contact Style

Only P and A are valid contact style options. P replaces the “no designation” option in the PIN on revision C and earlier revisions of the Mil-Spec. A designates supplied less contacts.

### Polarizing Positions

N is required for normal position.

### Type Number

Type 1, 2 or 6. See drawings on page 31.

For accessories for lanyard release plugs see page 33.

## universal “header assembly” for flex print or PC board mounting

### Mounts to all MIL-DTL-38999 and MIL-C-26482 Connectors

The use of connectors with printed circuit termination is rapidly gaining popularity due to the rise of high volume, vapor phase or wave solder manufacturing processes. Termination of this style of connector to flex print or a printed circuit board represents a major cost in the manufacturing process for users. When adding flex or printed circuit board assemblies to an expensive filter or filter/transient protection connector, the total cost of a failed solder joint, a bent pin, or an unanticipated electrical failure becomes prohibitive. The universal header assembly from Amphenol will provide for easy separation of the connector from the board on these occasions.

Headers provide easy separation of the connector from the PC board.

### Header Assemblies Provide Cost Savings

Incorporation of the header assembly provides the user with time and cost saving potentials. These header assemblies can be vapor phase or wave soldered to flex or printed circuit boards prior to the receipt of the EMI/EMP connector. Headers can be installed to standard connectors, allowing for electrical testing that would adversely affect the sensitive diodes, MOV's or capacitors in the EMI/EMP connectors. Expensive connector assemblies can be easily removed from and reattached to the header assembly as the manufacturing process dictates.

### Mounting Applications

Shell modifications are recommended, but are not necessary. The header assembly can be attached to connectors with standard flange placement or directly to the circuit board. The ideal application would involve either a single flange moved all the way to the rear of the connector or a double flange. Cinch nuts can be installed in either flange to allow easier mounting to the panel or the header assembly. The forward flange would mount the connector to the panel; the rear flange would be used to mount the header assembly. Various types of captivated or loose attaching screws can be utilized for unique applications.

Amphenol universal headers are slotted to allow mounting to all series of MIL-DTL-38999 or MIL-C-26482 connectors without special alterations. They are of similar dimension as the flange of the mounting connector and would be approximately .185 inches (4.70 mm) thick.

### Incorporates a Shorter Pin/Socket Contact

The heart of the header assembly is a short pin/socket contact. The tail of the contact would accommodate standard through-hole diameters and thickness of the flex or printed circuit board materials. The socket is imbedded in the molded material, making electrical engagement with the printed circuit tail of the connector.

### Cylindrical Configuration

- 3 PCB stickout dimensions are available.
- Size 22D contacts use .175 thick headers
- Size 16 to 20 contacts use .195 thick headers
- Consult Amphenol, Sidney NY for additional configurations.
- Headers for cylindrical connectors accommodate up to 128 pins. Consult Amphenol catalogs for mating connector contact layouts (12-092 and 12-090 for MIL-DTL-38999 and 12-070 for MIL-C-26482)

### Mounting to Rectangular ARINC Connectors

- Headers for ARINC connector arrangements accommodate up to 150 pins
- Consult Amphenol, Sidney, NY for ARINC configurations and detailed dimensions.

### Materials

- Body is molded from Torlon or PPS (Polyphenylene Sulfide)
- Electrical engagement areas of the header contact are plated with .00003 inches minimum of gold over .00005 inches minimum of nickel.

See drawing of standard header on next page.

# Tri-Start – accessories

## universal “header assembly” for flex print or PC board mounting, cont.

The drawing below shows the standard universal adapter for use with MIL-DTL-38999 and MIL-C-26482 connectors. Consult Amphenol Aerospace, Sidney NY for drawings of headers for ARINC configurations.

Assembly Part Number	Shell Size	F Radius	G ± .005	S ± .005	T + .008 - .006	R1 TP†	R2 TP†	TT + .008 - .006

See Suffix Chart

Assemblies containing Size 22 contacts only: .175  
Assemblies containing Size 16 or 20 contacts: .195

† TP designates true position dimensioning.

NOTE:  
Size 22 accepts .018 to .022 dia. PCB tails.  
Size 16 accepts .048 to .064 dia. PCB tails.  
Size 20 accepts .037 to .043 dia. PCB tails.

### HOW TO ORDER INFORMATION

#### For Universal Adapter Used with MIL-DTL-38999 Connectors

Use coded number as follows:

21-9040 XX - XX X

Designates Amphenol Interface Adapter

Shell size designation for MIL-DTL-38999 Series III. See Suffix chart.

Arrangement number - See MIL-STD-1560 or MIL-STD-1669. See insert availability charts on pages 6 and 7.

Contact PCB Stickout designation See Suffix chart.

Universal adapters are also used with MIL-DTL-38999 Series I and II and with MIL-C-26482, Series 1 and 2. For how to order information on adapters to be used with ARINC connectors, consult Amphenol, Sidney NY.

### ASSEMBLY NUMBER SUFFIX CHART

Shell Size Designation*	Arrangement Number Suffix***	Contact PCB Stickout**	
		Suffix	B ± .015 Stickout
08	Insert Arrangement Suffix from MIL-STD-1560 or MIL-STD-1669	1	.120
10		2	.185
12		3	.270
14			
16			
18			
20			
22			
24			

\*Shell size designation for MIL-DTL-38999 Series I, II, III and IV and MIL-C-26482 Series 1 and 2.

Examples: Shell size 9 use 08. Shell size 25 use 24.

\*\* Size 22 contacts available in all 3 stickout lengths.

Size 16 and 20 contacts available only in .185 and .270 lengths.

\*\*\* Insert arrangement 14-97 and 15-97 are not available at this time. Consult Amphenol, Sidney NY for information.

PCB Socket and pin part numbers include finish designation - gold plating over  
suitable underplate in accordance with MIL-C-39029. For other finish variations,  
consult Amphenol, Sidney, NY.  
Note: 22M and 22D contacts are interchangeable.  
For other contact options available for use in Tri-Start connectors (thermocouple,  
fiber optic), consult Amphenol, Sidney, NY.

# Tri-Start

## application tools

The following data includes information pertaining to the application tools which have been established for crimping, inserting, and removing contacts incorporated in the TV, CTV and MIL-DTL-38999 Series III connectors. For additional information on coax, twinax and triax contact tools see catalog 12-130.

All crimping tools included are the "full cycling" type and when

used as specified in the installation instructions (L-624 and L-844) covering the TV, CTV and MS series connectors, will provide reliable crimped wire to contact terminations. There is a possibility of additional crimping tools other than those included being available at present or in the future for this specific application.

### CRIMPING TOOLS

Contact Size/Type	Crimping Tool	Turret Die or Positioner
12 Pin and Socket	M22520/1-01	M22520/1-04
16 Pin and Socket	M22520/1-01 M22520/7-01	M22520/1-04 M22520/7-04
20 Pin and Socket	M22520/1-01 M22520/2-01 M22520/7-01	M22520/1-04 M22520/2-10 M22520/7-08
22D Pin	M22520/2-01 M22520/7-01	M22520/2-09 M22520/7-07
22D Socket	M22520/2-01 M22520/7-01	M22520/2-07 M22520/7-05
8 Twinax Center Pin and Socket	M22520/2-01	M22520/2-37
8 Twinax Intermediate Outer Pin & Socket	M22520/5-01	M22520/5-200

Where 2 or 3 tools are listed for a contact size, only one tool and its die or positioner are required to crimp the contact.

The above crimping tools and positioners are available from the approved tool manufacturer.

Contact Size/Type	Crimping Tool	Turret Die or Positioner
8 Coaxial Inner Pin and Socket	M22520/2-01	M22520/2-31
8 Coaxial Outer Pin and Socket	M22520/5-01	M22520/5-05 Die Closure B
	M22520/5-01	M22520/5-41 Die Closure B
	M22520/10-01	M22520/10-07 Die Closure B
16 Coaxial Inner Pin and Socket	M22520/2-01	M22520/2-35
16 Coaxial Outer Pin and Socket	M22520/4-01	M22520/4-02
12 Coaxial Inner Pin and Socket	M22520/2-01	M22520/2-34
12 Coaxial Outer Pin and Socket	M22520/31-01	M22520/31-02
10 (Power)	TP201423	1716P-1

The M81969/8, 11-8674, 11-8675, and 11-8794 metal contact insertion and removal tools will accommodate wires having the maximum outside diameter as follows: Contact size 12: dia. is .155, size 16: dia. is .109, size 20: dia. is .077, size 22D: dia. is .050. When wire diameters exceed those specified, the plastic tools must be used.

\* Double end insertion/removal tool.

\*\* Twinax insertion tools are available only in a straight type, metal version.

† To be determined.

†† Contact Daniels Manufacturing Co. for availability.

# Tri-Start

how to order – (Amphenol® TV, metal)

how to order – (Amphenol® TV26 CLUTCH-LOK®)

## Proprietary Part Number

Amphenol® Tri-Start Connectors (metal) can be ordered by coded part number. Ordering procedure is illustrated by part number TVPS00RF-9-35P B (XXX) as shown below:

### Connector Type

- TV designates Tri-Start Series Connector
- TVP designates back panel mounted receptacle
- TVS designates 200°C rated
- TVPS designates back panel mounted, 200°C rated receptacle

### Shell Style

- 00 designates wall mount receptacle
- 01 designates line receptacle
- 02 designates box mount receptacle
- 06 designates straight plug
- 26 designates proprietary CLUTCH-LOK high vibration straight plug (available in service classes RK and RS only)
- 07 designates jam nut receptacle
- 09 designates flange mounted plug
- I designates solder mounted receptacle, hermetic only
- IY designates weld mounted receptacle, hermetic only

### Service Class

- RX alternate finish, requires special variation suffix. Example: non-conductive, anodic coated aluminum is defined by variation suffix 005. Consult Amphenol, Sidney NY for details, options and availability of non-cadmium or nickel finishes.
- RF electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10GHz specification min., 48 hour salt spray, 200°C
- RGF\*\* electroless nickel plated ground plane aluminum, 200°C
- RGW\*\* olive drab cadmium plated ground plane aluminum, 175°C
- RK\* corrosion resistant stainless steel, firewall capability, plus 500 hour salt spray resistance, EMI –45 dB @ GHz specification min., 200°C
- RW corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI –50 dB @ 10 GHz specification min., 175°C

- RQF same as RF except with Quadrax contacts
- RGQF same as RGF except with Quadrax contacts
- RGQW same as RGW except with Quadrax contacts
- RQK same as RK except with Quadrax contacts and not firewall capable
- RQW same as RW except with Quadrax contacts
- Y hermetic seal, passivated stainless steel, 200°C
- RS\* (non-hermetic connectors), nickel plated stainless steel, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 500 hour salt spray, 200°C, firewall barrier
- YN (hermetic connectors), nickel plated stainless steel, 200°C

### Shell Size

MIL-DTL-38999, Sizes 9-25.

A	B	C	D	E	F	G	H	J	MIL Shell Size
9	11	13	15	17	19	21	23	25	Amphenol Shell Size

### Insert Arrangement

MIL-DTL-38999, see insert arrangement charts, pgs. 6 & 7.

### Contact Type

- P designates pin contacts
- S designates socket contacts

### Alternate Positions

Locksmith keying - rotation of minor keys. See page 8. "N" not required for normal position.

### Special Variations

Consult Amphenol Aerospace, Sidney, NY for variations.

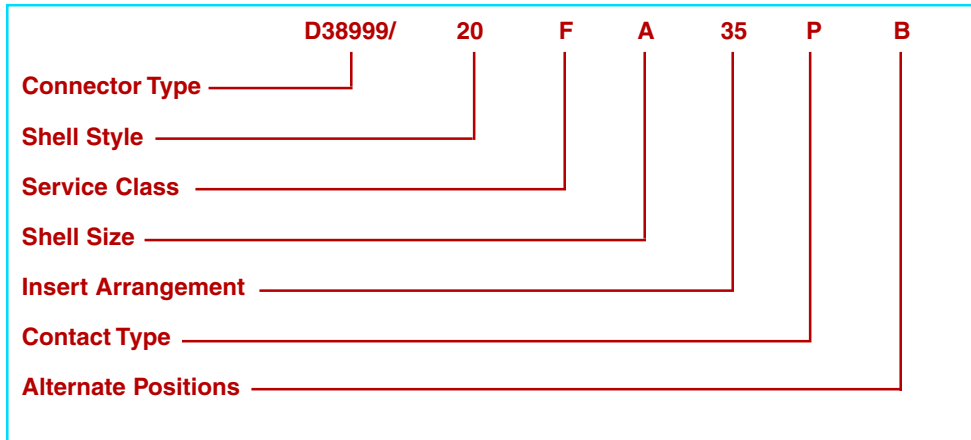

\* Coaxial arrangements are not available in these classes.  
 \*\* For more information on Coax/Triax/Twinax Ground Plane Connectors see page 49.

# Tri-Start

## how to order – (D38999, TV military, metal) how to order – (MTV26 CLUTCH-LOK®)

### Military Part Number

To more easily illustrate ordering procedure of Tri-Start Connectors (metal) by military designation, part number D38999/20F A 35 P B is shown as follows:

#### Connector Type

D38999/ designates MIL-DTL-38999 Series III Connector  
MTV designates military D38999/26 CLUTCH-LOK high vibration straight plug (available in service class RK only)

#### Shell Style

- 20 designates wall mount receptacle
- 21 designates box mount receptacle, hermetic
- 23 designates jam nut receptacle, hermetic
- 24 designates jam nut receptacle
- 25 designates solder mount receptacle, hermetic
- 26 designates straight plug
- 27 designates weld mount receptacle, hermetic

Lanyard Release Connectors (See pages 28-32 for ordering)

- 29 designates lanyard release plug with pin contacts
- 30 designates lanyard release plug with socket contacts
- 31 designates lanyard release plug for MIL-STD-1760 with pin contacts

Protection Caps (See page 40 for ordering MS protection caps)

- 32 designates plug protection cap
- 33 designates receptacle protection cap

#### Service Class

- C non-conductive, anodic coated aluminum, 500 hour salt spray, 200°C
- F electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10GHz specification min., 48 hour salt spray, 200°C
- G space grade, electroless nickel, 48 hour salt spray, 200°C
- K corrosion resistant stainless steel, firewall capability, plus 500 hour salt spray resistance, EMI –45 dB @ GHz specification min., 200°C
- L corrosion resistant steel, electrodeposited nickel, 48 hour salt spray, 200°C

W corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI –50 dB @ 10 GHz specification min., 175°C

Y hermetic seal, passivated stainless steel, 200°C

S (non-hermetic connectors), nickel plated stainless steel, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 500 hour salt spray, 200°C

N (hermetic connectors), nickel plated stainless steel, 200°C

#### Shell Size

MIL-DTL-38999, Sizes 9-25.

A	B	C	D	E	F	G	H	J	MIL Shell Size
9	11	13	15	17	19	21	23	25	Amphenol Shell Size

#### Insert Arrangement

MIL-DTL-38999, see insert arrangement charts, pgs. 6 & 7.

#### Contact Type

- P designates pin contacts
- S designates socket contacts
- A designates same as “P” except supplied less pin contacts
- B designates same as “S” except supplied less socket contacts (A & B designates non-standard contact applications)
- X designates eyelet contacts, hermetics only

#### Alternate Positions

Locksmith keying - rotation of minor keys. See page 8.  
“N” not required for normal position.

#### Special Variations

Consult Amphenol Aerospace, Sidney, NY for variations.

# Tri-Start

## how to order – (Amphenol® CTV, composite)

### Proprietary Part Number

Amphenol® Tri-Start Composite Connectors can be ordered by coded part number. Ordering procedure is illustrated by part number CTVPS00RF-9-35P B as shown below:

#### Connector Type

CTV designates Tri-Start Series Connector  
CTVP designates back panel mounted receptacle  
CTVS designates 200°C rated  
CTVPS designates back panel mounted, 200°C rated receptacle

#### Shell Style

00 designates wall mount receptacle  
01 designates line receptacle  
02 designates box mount receptacle\*  
06 designates straight plug  
07 designates jam nut receptacle

#### Service Class

RF electroless nickel plated composite, 200°C  
RW olive drab cadmium plated composite, 175°C  
RGF\*\* electroless nickel plated ground plane composite, 200°C  
RGW\*\* olive drab cadmium plated ground plane composite, 175°C  
RQF same as RF composite except with Quadrax contacts  
RQW same as RW composite except with Quadrax contacts  
RGQF same as RGF composite except with Quadrax contacts  
RGQW same as RGW composite except with Quadrax contacts

#### Shell Size

9 thru 25 available

#### Insert Arrangement

MIL-DTL-38999, see insert arrangement charts, pgs. 6 & 7.

#### Contact Type

H designates 1500 cycle pin contacts  
J designates 1500 cycle socket contacts  
P designates 500 cycle pin contacts  
S designates 500 cycle socket contacts

#### Alternate Positions

Locksmith keying - rotation of minor keys. "N" not required for normal position, see page 8.

\* Consult Amphenol Aerospace, Sidney, NY for availability.

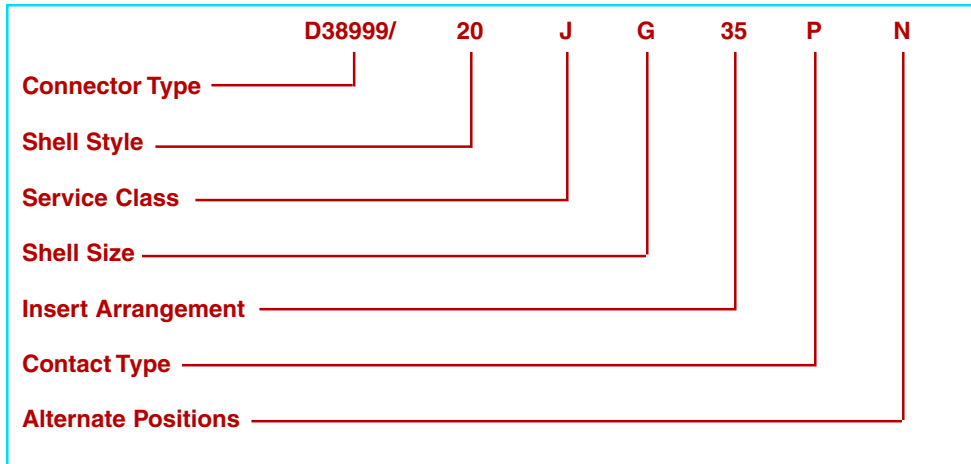

\*\* For more information on Coax/Triax/Twinax Ground Plane Connectors see page 49.

# Tri-Start

## how to order – (D38999, CTV military, composite)

### Military Part Number

To more easily illustrate ordering procedure of Tri-Start Composite Connectors by military designation, part number D38999/20JG35PN is shown as follows:

#### Connector Type

D38999/ designates MIL-DTL-38999 Series III Connector

#### Shell Style

20 designates wall mount receptacle  
 24 designates jam nut receptacle  
 26 designates straight plug  
 (Consult Amphenol Aerospace for availability of composite box mount receptacles)

#### Service Class

J olive drab cadmium plate (175°C),  
 2000 hrs. dynamic salt spray  
 M electroless nickel plate (200°C),  
 2000 hrs. dynamic salt spray

#### Shell Size

MIL-DTL-38999, Sizes 9-25

A	B	C	D	E	F	G	H	J	MIL Shell Size
9	11	13	15	17	19	21	23	25	Amphenol Shell Size

#### Insert Arrangement

MIL-DTL-38999, see insert arrangement charts, pg. 6 & 7.

#### Contact Type

H designates 1500 cycle pin contacts  
 J designates 1500 cycle socket contacts  
 P designates 500 cycle pin contacts  
 S designates 500 cycle socket contacts  
 A designates same as "P" except supplied less pin contacts  
 B designates same as "S" except supplied less socket contacts  
 (A & B designate non-standard contact applications)

#### Alternate Positions

Locksmith keying - rotation of minor keys. See page 8.  
 (Use N for normal)

# weight comparisons (composite vs. metal)

Depending on the shell style, shell size and contact count, weight savings can range from 17% to 40% compared to standard aluminum product.

## Tri-Start Weight in ounces (includes contacts)

# Tri-Start – specials

## fiber optics, filter protection, PCB applications

### FIBER OPTIC

Amphenol multi-channel fiber optic connectors offer a precision optic interconnect system within the high performance MIL-DTL-38999 Series III connector. The metal-to-metal feature of the Tri-Start connector provides protection from damage in severe environmental and physical conditions. Optical performance is optimized utilizing the ceramic alignment features employed by the termini. Insertion losses are typically .8dB and can range from .5 to 1.5 dB, depending on test conditions.

Ask for publication 12-352 for complete information on Fiber Optic Connectors.

### TRANSIENT PROTECTION

EMI/EMP protection devices can be integrated into the MIL-DTL-38999 Series III connector to provide a cost effective alternative to discrete devices mounted inside the box. These unique, high performance designs provide weight and space savings necessary for modern electronic systems.

Ask for publication 12-120 for complete information on Amphenol Filter/Transient Protection Connectors.

### FLEX TERMINATION ASSEMBLIES FOR PRINTED CIRCUIT BOARD APPLICATIONS

Amphenol provides flex termination assemblies for printed circuit board attachment through Amphenol ACT, Advanced Circuit Technology. Flex circuits are available for MIL-DTL-38999 connectors in flat or sculptured styles. Sculptured® Flexible Circuits with built-in terminations eliminate the failures associated with crimped or solder-on contacts, and they are designed to geometrically fit the tight space requirements within a unit. They plug into a printed circuit board and create a self-locking terminal pad which eliminates the need for an additional interconnect to the PCB.

### TRI-START CONNECTORS WITH PC TAIL CONTACTS

Printed circuit tail twinax contacts are currently supplied in 8, 12 and 16 coax type, 8, 10 and 12 twinax type, and 8 triax socket type. These provide a cost effective packaging solution for limited space applications where connectors are attached to printed circuit boards.

Ask for catalog 12-170, Amphenol Cylindrical Connectors for PCB Applications and catalog 12-130, Amphenol High Frequency Contacts for Multi-pin Connectors.

## coax, twinax and triax contacts, ground plane connectors, press fit connectors

Amphenol MIL-DTL-38999 Series III connectors are the most commonly used connectors for incorporation of shielded contacts along with traditional crimp contacts and also with contacts for data bus, LAN and coax/triax/twinax transmission lines with conductive inserts that ground the outer conductor of the coax, triax, twinax contact to the shell. These connectors are sold “less contacts”. They will accommodate size 8 coax, triax or twinax contacts or size 12 and 16 coax contacts.

The insert availability chart on pages 6 and 7 indicates the patterns that are available in a ground plane version, (see those designated with a star symbol), and consult how to order pages for ordering procedures.

### CONNECTORS WITH SHIELDED COAX CONTACTS

For shielded wire applications, coaxial contacts can be incorporated into MIL-DTL-38999 connectors. Designed-in crimp or solder types are available to fit various RG and special cables. High performance coaxial contacts eliminate discontinuities or impedance variations due to movement of parts under axial load.

### CONNECTORS WITH CONCENTRIC TWINAX CONTACTS

The size 8 concentric twinax contact was developed for use in MIL-STD-1553 Airborne multiplex data bus applications which require high performance interconnect characteristics in multi-pin connectors. Ideal for this application need is the high performance Tri-Start connector with its fully scoop-proof feature of recessed pins. The concentric twinax contact is crimp terminable to twisted-shielded cable.

### SHIELDED TRIAX CONTACTS

Triax contacts have three conductors and are offered in sizes 8, 10 and 12. They provide additional shielding when terminated to triax cable having solid or stranded center conductors. Each of the three conductors of the triax contact is separated by dielectric insulation to isolate ground planes and to improve shielding effectiveness.

High speed data transmission quadrax contacts are now available for use in MIL-DTL-38999 connectors.

### PRESS FIT CONNECTORS

Tri-Start connectors are also designed for the application of solderless mounting to printed circuit boards. The Press Fit connector performances are compatible with Series III

**Concentric Twinax Contacts  
Qualified to M39029/90 and /91**

**Shielded Coax Contacts**

**38999 Series III Connector  
with Twinax Contacts and  
Standard Contacts**

**Ground Plane Connector with Twinax  
Contacts and Insulated Power/Signal  
Contacts**

**MIL-DTL-38999 Series III  
Connectors with Compliant Pin  
Contacts for Solderless Mount-  
ing on Printed Circuit Boards**

Consult the following Amphenol literature for further information:  
Product Data Sheet 139 for Ground Plane Connectors.  
Product Data Sheet 188 for Press Fit Connectors.  
Catalog 12-130 for High Frequency Contacts for Multi-pin Connectors.

## quadrax and differential twinax contacts

### SIZE 8 HIGH SPEED QUADRAX AND DIFFERENTIAL TWINAX CONTACTS FOR USE IN MIL-DTL-38999 CONNECTORS

**Quadrax Contacts** consist of an outer contact with four strategically spaced inner contacts forming two 100 or 150 Ohm matched impedance differential pairs.

**Differential Twinax Contacts** consist of an outer contact with two inner contacts spaced to form one 100 or 150 Ohm matched impedance differential pair.

Both contacts can be used in connectors for Ethernet 100 Base-T-100 Ohm, Fibre-Channel-150 Ohm and IEEE 1394B FireWire-110 Ohm applications.

#### TYPICAL ELECTRICAL PERFORMANCE

- Bandwidth: Up to 3 Gigahertz
- Data rate: Exceeding 2 Gbits/sec.
- Voltage rating: 500 Vrms max. @ sea level
- Dielectric withstanding voltage:
  - 1000 VACrms between all inner contacts @ sea level
  - 500 VACrms between inner and outer contacts @ sea level

Quadrax contacts are also available in ARINC 600 Rectangular connectors. See photo on right; consult Amphenol Aerospace for further information.

Also available are Quadrax and Twinax Transition Adapters which provide a method of launching from the high speed connectors to PCB boards.

Consult Amphenol Aerospace, Sidney NY for ordering information for MIL-DTL-38999 Series III connectors with quadrax and differential twinax contacts. Below is a chart

# Tri-Start – specials

deep reach and stand-off shells, connectors with integral strain reliefs, ESD protection, RJ Field

## OTHER SPECIALS WITHIN THE TRI-START FAMILY OF CONNECTORS:

- **Deep Reach Shells** – for increased panel thicknesses.
- **Stand-off Flange Shells** – for attachment to printed circuit boards
- **Connectors with Integral Strain Reliefs** – cost savings through integration of strain relief to the shell.
- **Electrostatic Discharge (ESD) Protection** – Amphenol has developed a design feature for the Tri-Start connector which will protect sensitive components from Electrostatic Discharge without diodes, varistors, gas tubes, or “experimental” semiconductive materials. These connectors utilize the Faraday Cage principal to shunt electrostatic discharge events to the conductive enclosure on which the connector is mounted, thus never allowing the high voltage, high current discharge event to reside on any contacts. The ESD protected connectors have the same physical envelope as their standard counterparts, and do not require special mounting or terminating techniques. All of the contacts remain fully functional, and electrical characteristics such as capacitance are not effected. For more information on ESD protected connectors, ask for Product Data Sheet 171. Also publication L-2075, “ESD Attenuation Test Procedure for Connectors with Faraday Cage Protective Structures” is available as a reference document.

## RJ FIELD CONNECTORS

Amphenol Socapex offers the RJF TV within the MIL-DTL-38999 connector shell for Ethernet connection. The RJ Field is designed for use where it is necessary to go beyond the protected office environment of most Ethernet applications, to the harsher environments of industrial and even mil-aero applications. Allows use of Ethernet Class D/Cat. 5e connection for 10 BaseT, 100 BaseTX, or 1000 Base T networks.

Consult Amphenol Socapex for further information.
