Ty-Rap® Fastening solutions

Easily bundle, secure and
manage your cables

Ty-Rap®

First developed to solve the problem of bundling the miles of wiring found inside commercial aircrafts, Ty-Rap® cable ties can now be found virtually everywhere – from high performance racing engines to backyard tool sheds. Self-fastening and extremely durable in demanding applications, the ground-breaking design of the Ty-Rap® cable tie demonstrates how to solve a complex problem with simple technology.

Ty-Rap®

Fastening solutions, how it all started

When you choose a Ty-Rap® cable tie, you can count on quality, longevity, performance and innovation to make your work easier.

First developed to solve the problem of bundling the miles of wiring found inside commercial aircraft, Ty-Rap® cable ties can now be found virtually everywhere – from high performance racing engines to backyard tool sheds. Self-fastening and extremely durable in demanding applications, the ground-breaking design of the Ty-Rap® cable tie demonstrates how to solve a complex problem with simple technology.

The marine-grade stainless steel locking device inside the tie head provides proven performance for more resilience to the elements and easier installation. Ty-Rap® has a cable tie offering for the most adverse conditions: humidity, heat, cold, UV radiation, aggressive chemicals, radiation and other harsh conditions.

Engineered for labor savings and high performance, Ty-Rap® cable ties are commonly used in a variety of applications.

For the cable tie, the proverbial light bulb came on over Maurus Logan's head while touring a Boeing aircraft manufacturing facility in 1956. Aircraft wiring was a cumbersome and detailed undertaking, involving thousands of feet of wire organized on sheets of 50-foot long plywood and held in place with knotted, waxcoated, braided nylon cord. Each knot had to be pulled tight by wrapping the cord around one's finger which sometimes cut the operator's fingers until they developed thick calluses or 'hamburger hands'. Logan was convinced there had to be an easier, more forgiving, way to accomplish this critical task. For the next couple of years, Logan experimented with various tools and materials.

On June 24 1958, a patent for the longlasting, easy-to-use Ty-Rap® cable tie was issued. The rest, as they say, is history.

“My dad didn't have a lot of formal education, but he was the most ingenious person I have ever met”, said Robert Logan, Maurus' son. “He never thought the customary way of doing things was good enough and when he looked at anything, he thought about ways to improve it. The invention of the cable tie is an excellent example of how he worked.”

Robert Logan, son of Maurus Logan
Ty-Rap® Inventor

Ty-Rap® high performance cable ties

Introduction

First patented in 1958 as a way to bundle wiring in airplanes, the Ty-Rap® cable tie brand remains a benchmark of excellence and innovation in wire management.

ABB's broad offering of Ty-Rap® cable ties makes the task of fastening, bundling, clamping and managing wires easier and quicker for industrial applications, construction, communications, utility and OEM professionals, as well as home improvement specialists and do-it-yourself enthusiasts. When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to Ty-Rap® – the original source for cable ties and accessories.

What gives a Ty-Rap® cable tie its exceptional strength? The corrosion-resistant, non-magnetic stainless steel locking barb in its head grips tightly and allows for a completely adjustable fit. Its raised tail makes it easy to pick up, even with gloved hands. And the easy-grip tail surface makes it easy to pull tight, even in wet or cold conditions.

Engineered for high-performance, Ty-Rap® cable ties are available in standard nylon or in materials that are specially formulated to withstand the most adverse conditions, from UV exposure to extreme cold or heat. They have even been designed to withstand the rigors of space.

Ty-Rap® cable ties – The right choice when performance really matters.

ABB is a leading power and automation technology group, active in more than 100 countries with about 150,000 employees worldwide.

ABB's portfolio includes the following product lines and flagship brands:

- Wire & Cable Management – Ty-Rap® and Ty-Met® cable ties, Shrink-Kon® heat shrink, T&B Cabletray
- Cable Protection Systems – nylon & metallic incl. brands: PMA, Adaptaflex, Kopex, Harnessflex
- Low Power Connection & Control – Furse lightning & surge protection, Elastimold, Joslyn Hi-Voltage
- Emergency lighting – emergency lighting, battery systems incl. VanLien, Kaufel, Emergi-Lite brands
- Hazardous location products – DTS explosion proof light & boxes, Kopex-Ex conduits & fittings

Ty-Rap® the perfect fastening solution where performance really matters
All-in-one tool for fastening, bundling clamping and managing cable.

Environmental considerations

Impact on product life

Chemical resistance

ABB Fastening Products are developed to meet the needs of a variety of demanding environments. Whether a chemical processing facility, nuclear power plant, or the wash-down in food processing, there is a range of material choices that will extend the fastener's life and avoid costly maintenance or the introduction of foreign debris.

Hot / cold resistance

No matter the installation, there is an ABB Fastening Product to meet the need. From the hot chambers in engine compartments to the extreme cold of winter, the unique design and performance of our products offer some of the broadest range of operating temperatures and lowest installation temperatures.

UV resistance

UV radiation is a formidable force that has a damaging effect on nearly everything it touches. ABB Fastening Products are formulated to withstand a variety of conditions from desert to rainforest.

Storage and installation

Impact on product performance

Moisture Resistance

Most fastening products are made with variants of nylon because nylon offers a great combination of flexibility, strength, durability and economical pricing. Nylon, like many materials, absorbs and releases moisture depending on the external relative humidity. This can have a detrimental impact on the durability of cable ties. If the moisture content gets too low, cable ties become brittle and can break during installation.

ABB Fastening Products addresses those challenges by using high grades of nylon and offers products in moisture resistant materials for easier installation and resilience in cold or dry conditions.

Storage

For best results, fastening products should be stored in the sealed packaging until used and should not be stored in direct sunlight or near a heat source. Ideal storage conditions are 23°C and 50% relative humidity.

Installation

For best results, a compatible ABB Cable Tie Installation Tool should be used to fasten and trim cable ties. Installations must always be tested on the application to ensure proper interaction with the bundle as the type of installation and environmental conditions will vary greatly and impact performance. A properly installed cable tie will be tightened and trimmed so the tail remains flush to the cable tie head. If the tail retracts more than 1mm inside the head, the cable tie has been tightened more than recommended and may cause premature failure.

Ty-Rap® high performance cable ties

Features and benefits

When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to the original and the best source for cable ties and accessories. Ty-Rap® fastening systems include a full range of cable ties, identification ties, clamps, mounting bases, harnessing aids and installing tools.

Using Ty-Rap® fastening systems for any bundle application will improve the reliability of the installation, effectively reducing the total cost of ownership. Ty-rap's carefully designed features will also speed installation and provide the highest level of precision, safety and comfort.

Safety and reliability

The oval head with rounded edges protects adjacent bundles and improves product life.

Durability

Solid body construction reduces stress points, increasing durability.

"The Grip of Steel"

Corrosion resistant marine grade stainless steel barb provides secure lock.

Protects bundle

The smooth, rounded body with molded ribs and stipples firmly grips the bundle while protecting conductors from damage.

Easy handling

The turned up tail makes orientation and handling easy, even in blind installations or tight locations.

Easy installation

The specially designed thin tail with grips makes installing the ties easy, even when wearing gloves.

Extensive range of approvals and certifications:

Lloyd's Register of Shipping, DNV-GL, Mil Specification, American Bureau of Shipping (ABS), CE declaration, compliant to the low voltage directive, EN/IEC 62275, UL 62275, CSA 62275, MS3367/3368 and EN45545.

Wide range of size combinations: several lengths up to 1143mm, in 6 typical widths with a tensile strength up to 780N, to fasten cable bundles with a diameter up to 330mm.

Different types of packaging, including the unique "workbench boxes" for fast working without problems or losses. Recyclable packaging for a better contribution to the environment.

Performance Installation Tools: Industry-leading tools tighten and cut the loose end of cable ties with precision for repeatable, consistent installations that leave a safe, clean edge.

Outstanding range of special ties, all with the famous stainless steel locking device: ties with mounting hole or integrated peg/nail, panel mounting ties, identification ties with integrated label.

Most extensive choice of special materials: in addition to Polyamide 6.6 (standard, UV-resistant, heat stabilized, flame retardant, heat stabilized / UV-resistant), Polyamide 4.6 (extra high temperature) and Polyamide 12, the Ty-Rap® ties are available in Polypropylene, Fluoropolymer (ECTFE), Fluoropolymer (ETFE) and the recently introduced Detectable Polyamide 6.6 and Detectable Polypropylene. UL 94 V-0, UL 94 V-2 and UL 94 HB.

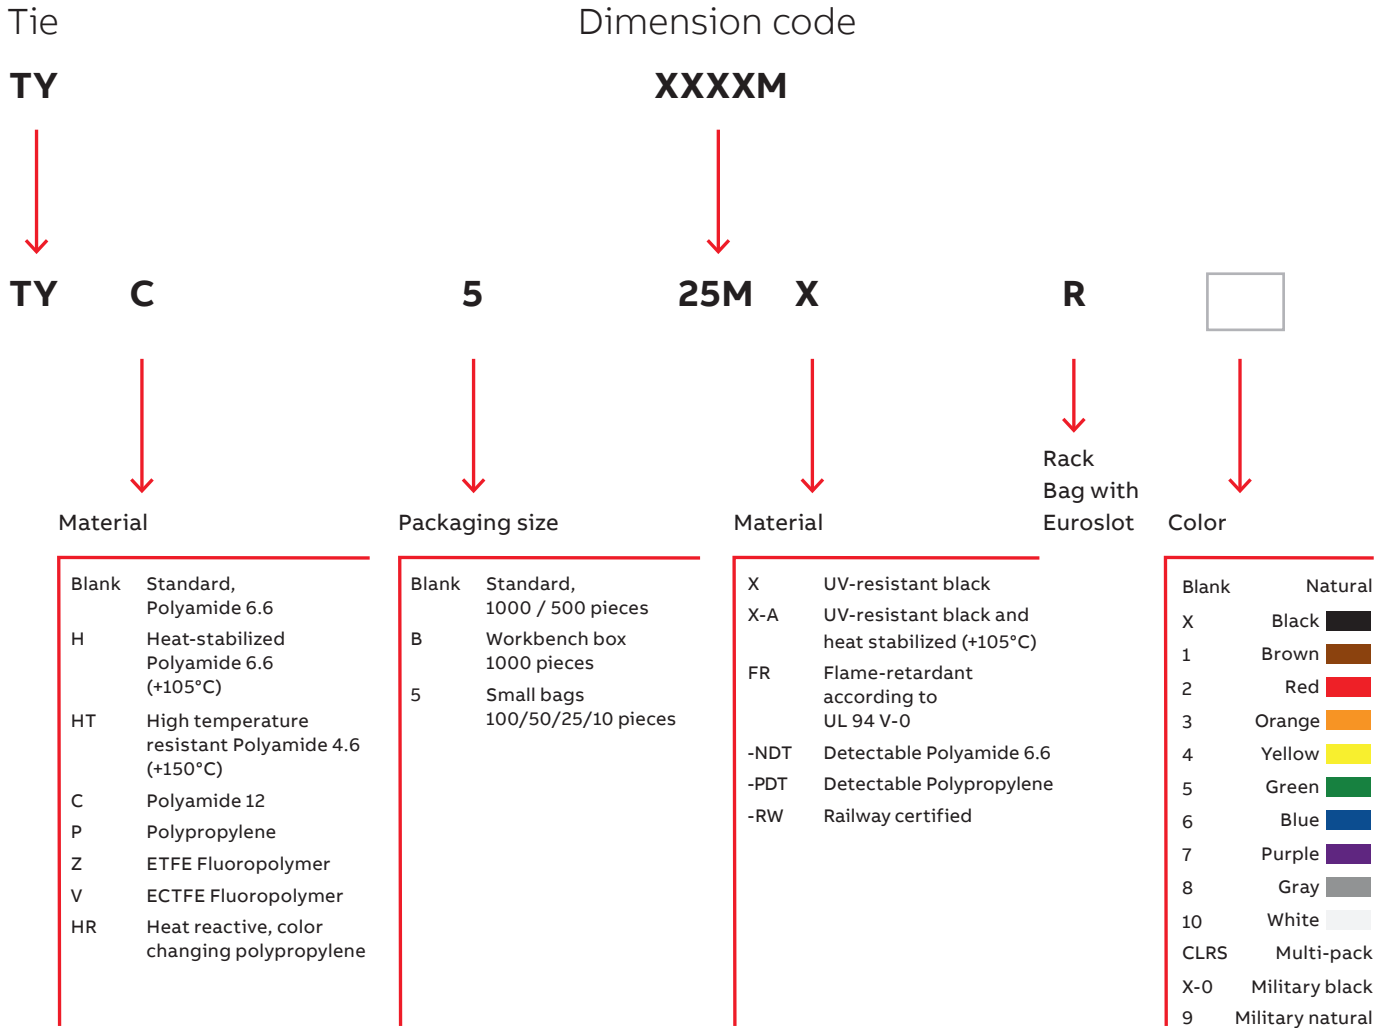

Broad range of mounting bases and accessories. Bundling the wire is just one step. ABB offers a wide range of solutions to mount the bundle to a variety of applications as well as specialty solutions for clamping and protecting wire, cable, tube and hoses.

Ty-Rap® high performance cable ties

Product code structure

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Ty-Rap® cable ties are moisturized to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Natural

Characteristics

- Standard (Polyamide 6.6), to cover most indoor applications
- Several lengths and 6 typical widths with a tensile strength up to 780N, to cover the most demanding applications
- Packaging: OEM bulk quantities in recyclable polythene bags
- Also available in workbench boxes (see page 18)
- R = Rack bag with Euroslot
- Mounting bases available

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C
- Min. Installation Temp.: -20°C
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Tooling

ERG50
For use with 2,3mm to 4,8mm (80N to 220N) cable ties. See page 136.

ERG120
For use with 4,8mm to 7,6mm (220N to 540N) cable ties. See page 136.

WT3D
For use with 4,8mm to 8,2mm (220N to 780N) Cable ties. See page 136.

Dimensions

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Workbench boxes

Characteristics

- An attractive packaging option for high volume manual assembly: 1000 pieces in a workbench box - easy to reach and timesaving
- This user-friendly packaging allows quicker work and easier assembly since all cable ties packed with the heads up for better access
- Mounting bases available

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range:
 - 60°C to +85°C (natural),
 - 60°C to +105°C (black)
- Min. Installation Temp.:
 - 20°C (natural),
 - 30°C (black)
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant (black)

Polyamide 6.6 cable ties – Colored

Characteristics

Ty-Rap® cable ties in Polyamide 6.6 are available in 10 different colors.

- Multi-color packs contain 10 different colors, 10 cable ties of each color
- Standard packaging is 100 pieces

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C
- Min. Installation Temp.: -20°C
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Impact and UV resistance + Heat stabilised

Characteristics

- Heat stabilised + UV-resistant version, for outdoor applications that also require a resistance to high temperature (+105°C)
- For OEM and MRO applications including: transport, lawn (garden/farm), construction equipment, recreational vehicles

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +105°C
- Min. Installation Temp.: -40°C
- Color: Black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, heat stabilised, Halogen free, Silicone free

Polyamide 4.6 cable ties – Extra high temperature

Characteristics

- Extreme continuous temperature rating: -40°C to +150°C (in air)
- For high temperature environments in industrial, OEM, MRO and commercial construction applications such as: metal processing, paper mills, lighting, automotive

Technical information

- Material - Molding: Polyamide 4.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +150°C
- Min. Installation Temp.: -18°C
- Color: natural yellowed, may have a greenish tint
- Flammability rating: UL 94 V-2
- Other properties: Extra high temperature resistant, Halogen free, Silicon free

* ERG120 can not be used with TYHT23M and TYHT24M

Dimensions

Ty-Rap® heat-reactive cable ties

Changes color to warn you of potentially dangerous high temperatures

Features

- Changes color from green to translucent when in contact with high-temperature surface
- Efficacy of heat-reactive polypropylene material lasts at least 24 months under normal operating conditions
- Offers all the convenience and performance benefits of standard Ty-Rap cable ties, including the Grip of Steel® type 316 stainless steel locking barb
- Available in three size options
- Choose the ERG50 or ERG120 Ty-Rap cable tie application tool for easy installation

Applications

Ty-Rap heat-reactive cable ties are ideal for use where visual indication of a hot surface helps identify an unsafe working environment or malfunctioning equipment. Tie may be secured around any surface with normal operating temperature below 40°C, including:

- Piping
- Electrical circuits
- Boiler room surfaces
- Engine compartments
- Kitchen appliances
- Other applications in which hot surfaces may be a concern

Specifications

- Material: Polypropylene
- Operating temperature: -60°C to 85°C
- Heat-activation temperature: 49°C ± 3°C
- Standard color: Green
- Heat-transition color: Translucent
- Color transition life: 1,000 hours above heat activation temperature
- UV resistance: Indoor use only; avoid exposure to UV light
- Tensile strength and installation:
 - 4,8mm wide ties: (135 N), ERG50 setting 2–5
 - 7.9mm wide ties: (265 N), ERG120 setting 3–6

Ty-Rap® heat-reactive cable ties

Product code	GID No.	Length	Width	Thickness	Loop tensile strength	Quantity
		L [mm]	W [mm]		[N]	
TYHR525M-5	7TAG009600R0007	185	4,8	1,3	135	100

TYHR528M-5	7TAG009600R0008	360	4,8	1,6	135	100

WARNING: The Ty-Rap heat-reactive cable tie is a heat indicator only. Use appropriate measuring device to verify actual temperature.

CAUTION: Replace the Ty-Rap heat-reactive cable tie upon the first occurrence of any of the following conditions: operating temperature range is exceeded, exposure to UV light, visible fading of standard green color or 24 months.

Mounting bases overview/segmentation tables see pages 88 to 109.

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Flame retardant

Characteristics

- Flame retardant. Ideal for use in locations where low flammability and low smoke are needed such as public transport, tunnels, etc.

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -20°C to +65°C
- Min. Installation Temp.: -0°C
- Color: White
- Flammability rating: UL 94 V-0
- Other properties: Halogen free, Silicone free

Ty-Rap® high performance cable ties

Fluoropolymer cable ties – ECTFE

Characteristics

- Outstanding performance of flame resistance and low smoke density when burned
- Recommended for applications where smoke generation is a concern, such as plenum areas
- Extreme resistance to UV degradation

Technical information

- Material - Molding: Fluoropolymer ECTFE
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +160°C
- Min. Installation Temp.: -60°C
- Color: Maroon
- Flammability rating: UL 94 V-0
- Other properties: low smoke

Dimensions

Ty-Rap® high performance cable ties

Fluoropolymer cable ties – ETFE

Characteristics

- ETFE Fluoropolymer
- Resistant to chemicals and to radiation
- No outgassing prevents contamination of sensitive areas in a vacuum, zero gravity or radioactive environments
- Typical applications include: nuclear, power plants, space industry, etc.
- Extreme resistance to UV degradation
- Mounting base available

Technical information

- Material - Molding: Fluoropolymer ETFE
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +170°C
- Min. Installation Temp.: -60°C
- Color: Aquamarine
- Flammability rating: UL 94 V-0
- Other properties: Silicone free, inert to most solvents and chemicals, hydrolytically stable, radiation resistant, non-outgassing

Ty-Rap® high performance cable ties

Polypropylene cable ties – Chemical and weather resistant

Characteristics

- Polypropylene weather resistant
- Increased resistance to chemicals
- Resistant against inorganic acids, polyhydric alcohols, neutral and basic salts

Technical information

- Material - Molding: Polypropylene
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +80°C
- Min. Installation Temp.: -40°C
- Color: Black
- Flammability rating: UL 94 HB
- Other properties: UV-resistant, Halogen free, Silicone free

Ty-Rap® high performance cable ties

Polyamide 12 cable ties – UV-resistant

Characteristics

- Polyamide 12 UV-resistant
- Remains flexible in cold & dry environments
- Ages better and has a better chemical resistance than Polyamide 6.6

Technical information

- Material - Molding: Polyamide 12
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +105°C
- Min. Installation Temp.: -40°C
- Color: Black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Dimensions

Ty-Rap® high performance cable ties

Nylon detectable cable ties

Characteristics

The Ty-Rap® detectable cable ties from ABB incorporate a unique compound (patent pending) detectable by X-ray equipment and metal detectors. Bright blue color enhances visual detection. Recommended for applications in food, pharmaceutical and other contamination-sensitive industries using detection systems, where cable tie installation residuals (cut tails) are permitted in the finished product.

- Engineered to provide the highest detectability in metal detectors by size
- Specially formulated metallic particles provide high reflection in X-ray equipment
- Bright blue color for an easy visual detection
- Help achieve the HACCP EU-Directive
- Available in 6 different sizes in convenient small bags
- Mounting bases available

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C
- Min. Installation Temp.: -20°C
- Color: Bright blue
- Flammability rating: UL 94 HB
- Other properties: UV-resistant, halogen free, silicone free

Dimensions

Heavy duty cable strap and accessories

Strap on reel and reel kits, double locking heads & pre-assembled Deltec® cable ties

Characteristics

- Designed to perform a minimum of 20 years outdoors
- Double locking head with corrosion resistant locking barb in copper alloy
- No sharp edges: operator friendly, cable friendly!
- Easy to install, low installation costs
- Extremely robust ties, with high tensile strength (1110N) after fastening
- Available either in pre-cut and pre-assembled lengths, or on reels with separate heads for total flexibility
- Choice of specific spacers and accessories
- Month and year of manufacture stamped into strap material

Technical information

- Material - Strap & head: Toughened weatherable acetal
- Material - Locking barb: Marine grade, corrosion-resistant copper alloy
- Temperature range: -40°C to +85°C
- Flammability rating: UL 94 HB
- Color: Black
- Other properties: UV-resistant, Halogen free, superior resistance to moisture and salt environments

Strap on reel and reel kits

Product code	GID No.	Length per reel L [m]	Width W [mm]	Min. tensile strength [N]	Included heads [pieces]	Reel quantity [pieces]
TYD-50R	7TAA159090R0005	15,2	12,7	1110	0	1
696-41794	7TAA159090R0000	304,8	12,7	1110	0	1
CSS-5K	7TAA159120R0000	15,2	-	-	150	5
CSS-10K	7TAA159130R0001	15,2	-	-	300	5

Note: the recommended maximum continuous static loading for the Deltec® straps is 90 N per strap.

For best results, suggested spacing is 35 to 40cm. It is the responsibility of the user to determine if their installation provides sufficient load support. Reel kits (CSS-5K / CSS-10K) to be assembled with Deltec® strap on reel.

See page 136.

Dimensions

Heavy duty cable strap and accessories

Cable spacers & base and hanger

Characteristics

- Stackable height in 12,7mm increments, for any desired spacing and all cable sizes - no need to stock multiple sizes of individual height spacers
- Designed to retain strap on each side and cradle the cable, providing restricted movement of spacer and preventing damage to cable
- Suitable for coaxial cables
- Can be used for parallel routing or for perpendicular cables

Technical information

- Material: Weather-resistant polypropylene
- Temperature range: -40°C to +85°C
- Flammability rating: UL 94 HB
- Color: Black
- Other properties: UV-resistant, Halogen free

To be assembled with Deltec® strap on reel.

Dimensions

Special ties

Releasable 2-piece lashing ties on reel with separate heads

Characteristics

- Heavy-duty lashing ties on reel with separate heads
- Also available in cut lengths with pre-assembled heads (see page 37)
- UV-resistant Polypropylene, ideal for applications where chemical resistance is important (heads in weatherable rigid Polyamide 6.6)
- Extremely robust (670N)
- Easily releasable and reusable
- 2 types of head:
 - type A: no mounting hole,
 - type B: with mounting hole
- Typical applications: Indoor and outdoor fastening of cables, pipes and other parts in industry, shipbuilding, chemical industry etc.
- Product code 696-41563: lashing tie on reel (300m), in weatherable Polypropylene

- Product code 696-41562: separate head, type A (no mounting hole), weatherable Polyamide 6.6 (200 pieces)
- Product code 696-41614: separate head, type B (with mounting hole), weatherable Polyamide 6.6 (200 pieces) Mounting hole: Ø 6.9mm
- Product code TY4100PX: kit containing 30m of lashing tie on reel + 50 separate heads, type A

Technical information

- Material - Tie: Weatherable Polypropylene
- Material - Head: Polyamide 6.6
- Temperature range:
 - Head: -40°C to +85°C
 - Tie: -55°C to +110°C
- Color: UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free

Special ties with steel locking barb

Integrated mounting hole cable ties

Characteristics

- Can be mounted directly onto a support with screws, bolts or rivets
- Mounting and bundling in one maintenance-friendly assembly: mounts cables, tubes and part in all types and sizes of machines and installations
- Typical application: cable harness manufacture and pre- and end- mounting of bundles and parts
- indoor and outdoor

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special ties with steel locking barb

Panel mounting cable ties

Characteristics

- Provides both fastening and clip-mounting
- Fast pre- or on-site-assembly for a range of panel thickness up to 4,0mm
- Fast and secure installation

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special ties with steel locking barb

Blind mounting cable ties

Characteristics

- Suitable for hard-to-reach areas
- Fast hidden mounting on walls and vehicle chassis
- Twist off the locking head
- Pull the tie end through the fastening hole
- Place locking head on tie end
- Pull tight and cut off excess
- In the locked state, head neatly covers the mounting hole

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special ties with steel locking barb

Cable ties with identification tag

Characteristics

- Identification ties with incorporated label for durable marking and tying
- Label forms onto the bundle for types TY512M, TY51M and protrudes for ties TY532M and TY53M
- Series 51M is MIL (MS-3368-5) approved
- Trouble-free installation
- All edges are rounded to make installation easier
- Available in bulk packaging (500/1000 pieces) or in small packaging (100 pieces)

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Special ties with steel locking barb

Cable ties with identification tag

Characteristics

- Identification ties with incorporated label for durable marking and tying
- Label forms onto the bundle
- 5 different versions, up to 4 straps, in bulk and small packaging
- 4 versions (up to 3 straps) are Mil-specified
- Trouble free installation
- Labelling of bundles up to 102mm diameter
- All edges are rounded and surfaces smoothed to make installation easier

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C
- Color: Natural
- Approvals: MIL: MS-3368 -1, -2, -3, -4
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Ty-Met™ stainless steel cable ties

Stainless steel cable ties

Ty-Met™ stainless steel ties are the ultimate solution to install your cables in extreme conditions and hazardous areas, indoor and outdoor, such as the petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments.

Ty-Met™ stainless steel ties provide a high mechanical strength combined with chemical durability and temperature resistance.

They are available in several different types:

- Ball-lock type: quick and reliable self-locking mechanism
- Ladder type: easy application and strong locking system
- Strap type: either pre-assembled or on reel with separate heads
- Releasable type: can be unfastened for re-use
- Identification system: durable in tough environments and extreme conditions
- Band on reel with separate heads, for a cost saving installation without waste

Ty-Met™ cable ties have international approvals such as UL, Germanischer Lloyd, Lloyd's Register and Det Norske Veritas.

All types are available in 316 grade (marine grade) stainless steel, for extra corrosion resistance.

Available in uncoated version (for high temperature applications) or in fully coated version with non-toxic, halogen free coating, for superior protection of cables and installer's hands and for an improved insulation between dissimilar materials.

A range of dedicated hand tools completes the product offering.

Ty-Met™ the ultimate solution to install your cable ties

Ideal for extreme conditions, hazardous areas and aggressive environments.

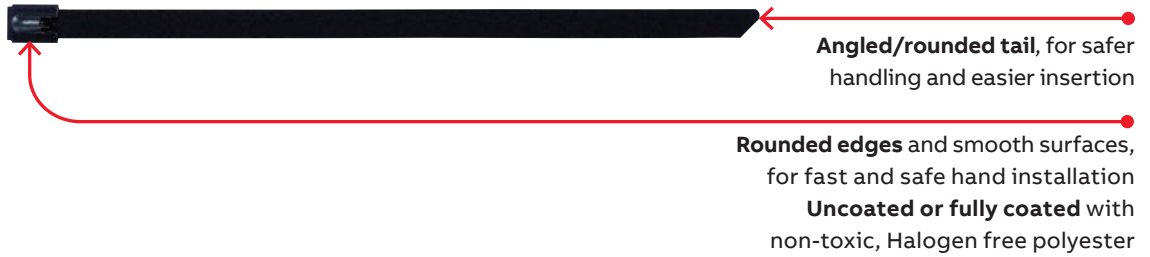

Ty-Met™ stainless steel cable ties

Features and benefits

Ball-lock type

Easy application and strong self-locking mechanism (steel ball), with low insertion force

Ball-lock retained tension type

Wave-form spring crimp eliminates movement – even in high-vibration applications

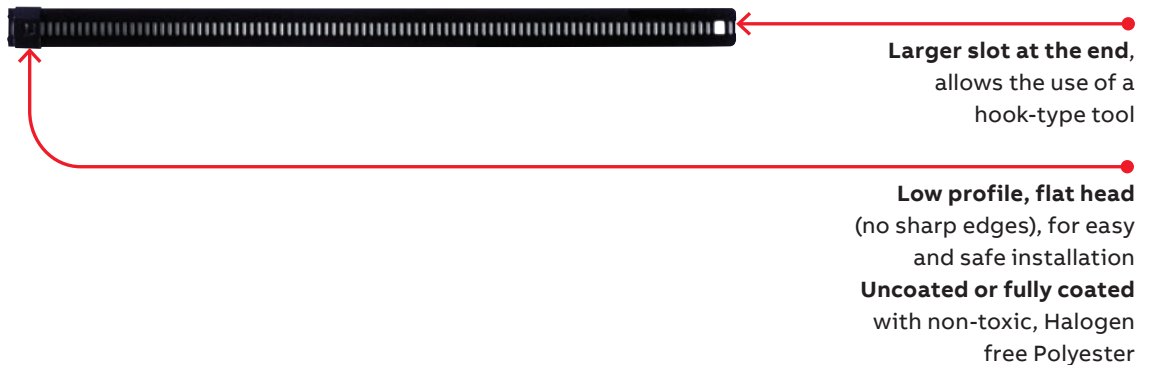

Dual lock ties

304 & 316 grade stainless steel construction, with two-piece design for fast and easy installation

Ladder type

Self-locking mechanism (pawl and ratchet)

Releasable type

The unique buckle design allows the tie to be unfastened for re-use

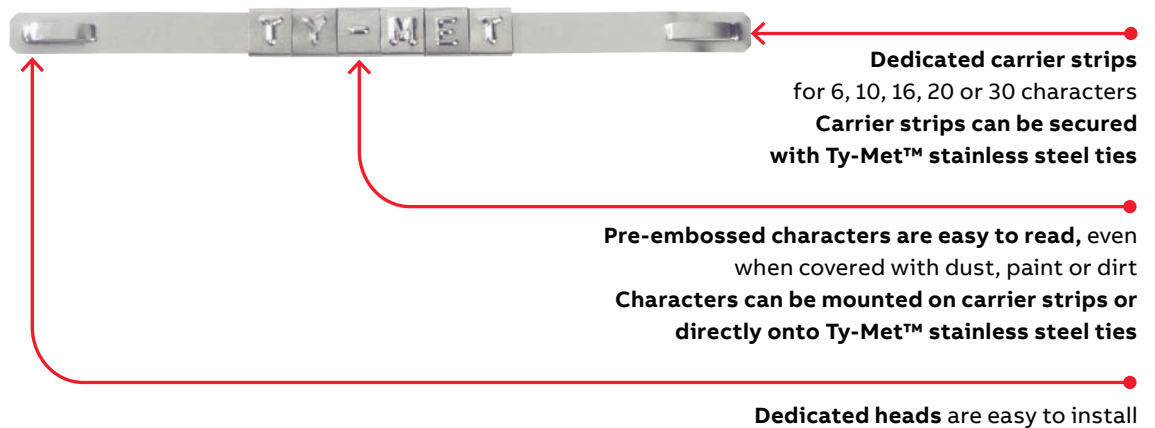

Bands on reel with separate heads

Bands and separate heads are made of corrosion resistant 316 grade stainless steel, for high mechanical and chemical durability

ID system

Durable identification system for tough environments and extreme conditions, indoor and outdoor

Ty-Met™ stainless steel cable ties

Ty-Met™ stainless steel cable ties

Ball-lock type – Standard widths, uncoated

Characteristics

The ball-lock type stainless steel ties from ABB are self-locking and require no time consuming crimping or folding operations

- Strong self-locking mechanism (stainless steel ball), with low insertion force
- Fast, easy and reliable installation
- Standard widths (4,6mm & 7,9mm, suitable for most applications, indoor and outdoor)
- Uncoated version, suitable for high temperature environments
- 2 grades of non-magnetic stainless steel: 304 grade for standard applications and 316 grade (marine grade) for extra corrosion resistance

- Applications: installation of cables and pipes in extreme conditions and hazardous areas, such as: petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments

Technical information

- Material: A. 304 grade non-magnetic stainless steel; B. 316 grade non-magnetic stainless steel
- Temperature range: -60°C to +300°C
- Color: Metallic
- Extremely high flame and UV resistance
- Strap thickness: 0,26mm

Ball-lock type – Standard widths, uncoated

- Standard widths (4,6mm & 7,9mm, suitable for most applications, indoor and outdoor)
- Uncoated version, suitable for high temperature environments
- 2 grades of non-magnetic stainless steel: 304 grade for standard applications and 316 grade (marine grade) for extra corrosion resistance

- Applications: installation of cables and pipes in extreme conditions and hazardous areas, such as: petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments

Technical information

- Material: A. 304 grade non-magnetic stainless steel; B. 316 grade non-magnetic stainless steel
- Temperature range: -60°C to +300°C
- Color: Metallic
- Extremely high flame and UV resistance

Ball-lock type – Standard widths, uncoated

Dimensions

Ty-Met™ stainless steel cable ties

Ball-lock type – Standard widths, fully coated

Characteristics

The ball-lock type stainless steel ties from ABB are self-locking and require no time consuming crimping or folding operations

- Strong self-locking mechanism (stainless steel ball), with low insertion force
- Fast, easy and reliable installation
- Standard widths (4,6mm & 7,9mm, suitable for most applications, indoor and outdoor)
- Corrosion resistant 316 grade stainless steel (marine grade) for high mechanical and chemical durability
- Fully coated version with non-toxic, halogen free Polyester coating, for a superior protection of cables and installer's hands and for an improved insulation between dissimilar materials

- Applications: installation of cables and pipes in extreme conditions and hazardous areas, such as: petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments

Technical information

- Material: 316 grade non-magnetic stainless steel
- Coating: Polyester
- Temperature range: -40°C to +165°C
- Color: Black
- Extremely high flame and UV resistance
- Strap thickness: 0,36mm

Dimensions

Ty-Met™ vibration-resistant stainless steel cable ties

Wave-form spring crimp eliminates movement – even in high-vibration applications

Ty-Met vibration-resistant stainless steel cable ties from ABB combine the convenience of a ball-lock fastening mechanism with a spring crimp that maintains tension after installation. This feature helps to ensure that the ties won't slide down the cable bundle after they're installed – making them the ideal choice for high-vibration applications.

Features

- Specially formed spring crimp creates consistent tension for firm positioning
- High wave-form crimp provides positive clamping in high-vibration applications
- Crimp channel offers a path for a trace wire with protection from crushing and shorts
- Ball-lock mechanism is easy to assemble and adjust for tension

- Ties available in both type 304 stainless steel and type 316 marine-grade stainless steel for extended life in highly corrosive environments
- Install with ABB DAS-250 application tool

Applications

- Shipbuilding
- Industrial
- Oil and gas
- Heavy equipment and trucking
- Wind power and solar energy

Specifications

- Material: A. 304 grade non-magnetic stainless steel; B. 316 grade non-magnetic stainless steel
- Operating temperature: -80°C to 300°C
- Certifications/compliances: UL/EN/CSA62275 type 2S rated for AH-1 plenum
- Minimum bundle diameter for all lengths: 26mm

Ty-Met™ stainless steel cable ties

Dual-lock stainless steel cable ties

Characteristics

- Proprietary installation system provides a positive crimp lock for precise installation
- Tool provides a customizable tension, automatic crimp and cuts the remaining tail
- Standard offering is 304 grade stainless steel
- Also available in 316 grade stainless steel (See local sales representative for MOQ, pricing and lead time)

Technical information

- Material: corrosion resistant 304 grade stainless steel (marine grade), for high mechanical and chemical durability
- Operating temperature: -40°C to +300°C
- Min. installation temperature: 0°C
- Flammability class: absolutely fireproof

0,38mm Thickness

Note: Other lengths available on special request

Add suffix -316 for 316 Stainless Steel

After wrapping the object to be tied, insert the free end of the tie through the buckle and into the tool.

Squeeze the handle of the tool to create the dual lock and cut off the tail. The cable tie forms a low-profile dual lock.

The tail is formed into a fold lock behind the buckle. The tool forces a dimple in the band into a hole in the buckle.

Tooling

WTA250
For use with 180 mini series Dual Lock cable ties. See page 137.

WTA290
For use with 250 series Dual Lock cable ties. See page 137.

Ty-Met™ stainless steel cable ties

Ladder type – Uncoated

Characteristics

The ladder type stainless steel ties from ABB have a flat, low profile head for easy application

- Strong self-locking mechanism (pawl and ratchet), requires no time consuming crimping or folding operations
- Flat and low profile head (no sharp edge), for easy installation
- Corrosion resistant 316 grade stainless steel for high mechanical and chemical durability
- Uncoated version for high temperature applications
- Increased usable length (slots up to the end of the tail), allows larger bundle diameters with the same tie length
- Larger slot at the end, allows the use of a hook-type tool

- Applications: Installation of cables and pipes in extreme conditions and hazardous areas, indoor and outdoor, such as: petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments

Technical information

- Material: 316 grade stainless steel
- Coating: Uncoated
- Temperature range: -40°C to +300°C
- Color: Metallic
- Extremely high flame and UV resistance

Ladder type – Uncoated

Ty-Met™ stainless steel cable ties

Ladder type – Fully coated

Characteristics

The ladder type stainless steel ties from ABB have a flat, low profile head for easy application

- Strong self-locking mechanism (pawl and ratchet), requires no time consuming crimping or folding operations
- Flat and low profile head (no sharp edge), for easy installation
- Corrosion resistant 316 grade stainless steel for high mechanical and chemical durability
- Fully coated version with non-toxic, Halogen free Polyester coating, for a superior protection of cables and installer's hands and for an improved insulation between dissimilar materials
- Increased usable length (slots up to the end of the tail), allows larger bundle diameters with the same tie length

- Larger slot at the end, allows the use of a hook-type tool
- Applications: Installation of cables and pipes in extreme conditions and hazardous areas, indoor and outdoor, such as: petrochemical and food processing industries, power stations, mining, shipbuilding, offshore and other aggressive environments

Technical information

- Material: 316 grade stainless steel
- Coating: Polyester
- Temperature range: -60°C to +165°C
- Color: Black
- Extremely high flame and UV resistance

Ladder type – Fully coated

Ty-Met™ stainless steel cable ties

Releasable type

Characteristics

The releasable type stainless steel ties from ABB have a unique buckle design that allows the ties to be unfastened for re-use

- Releasable and re-usable
- Corrosion resistant 316 grade stainless steel for high mechanical and chemical durability
- Fully coated version with non-toxic, Halogen free Polyester coating, for a superior protection of cables and installer's hands and for an improved insulation between dissimilar materials
- Fast, easy and reliable installation - can be installed by hand and if necessary, the slots at the end of the tie allow the use of a hook-type tool
- The additional ears can be bent back over the fastened tie to increase the tensile strength

- Applications: Installation of cables and pipes in extreme conditions and hazardous areas, indoor and outdoor, such as: petrochemical and food processing industries, power stations, mining, ship-building, offshore and other aggressive environments

Technical information

- Material: 316 grade stainless steel
- Coating: Polyester
- Temperature range: -60°C to +165°C
- Color: Black
- Extremely high flame and UV resistance
- Strap thickness: 0,61mm

Ty-Met™ stainless steel cable ties

Bands on reel with separate heads

Characteristics

A new range of stainless steel band on reel with separate heads, for a cost saving installation without waste

- Bands and heads are made of corrosion resistant 316 grade stainless steel, for high mechanical and chemical durability
- Bands are fully covered with a non-toxic, halogen free black Polypropylene sheath, for a superior protection of cables and installer's hands, and for an improved insulation between dissimilar materials

- Cost saving and flexible: the 25-metre reels allow a customized installation (no waste) around all sizes and shapes of objects
- Dedicated separate heads are easy to install
- Available in 5 widths up to 19,1mm, to suit a wide range of applications

Technical information

- Material: 316 grade non-magnetic stainless steel
- Coating: Polypropylene
- Temperature range: -25°C to +90°C
- Color: Bands & Heads: metallic; Coating: black
- Other properties: UV-resistant, Halogen free, non-toxic

Ty-Met™ stainless steel cable ties

Stainless steel ID system

Characteristics

A new durable identification system, ideally suited for tough environments and extreme conditions, indoor and outdoor

- Sleeves with pre-embossed characters (letters, digits and symbols)
- Pre-embossed characters are raised above the surface of the sleeve, which makes them easy to read even when covered with dust, paint or dirt
- Dedicated strips can carry 6, 10 or 16 sleeves

- The sleeves can be mounted onto the carrier strips (which will be secured by Ty-Met™ stainless steel ties) or directly onto Ty-Met™ stainless steel ties having a width up to 7,9mm

Technical information

- Material: corrosion resistant 316 grade stainless steel (marine grade), for high mechanical and chemical durability
- Operating temperature: -40°C to +300°C
- Flammability class: absolutely fireproof

Stainless steel ID system - Sleeves with pre-embossed characters, uncoated

Dimensions

All plastic cable ties

Ty-Fast[®], Col-Ty[™] and Ty-Grip[™]

ABB offers a complete range of all plastic cable ties to cover even the most demanding applications.

Ty-Fast[®] all plastic ties

The all-plastic cable ties are available in lengths from 112mm to 1214mm and widths from 2,4mm to 13,2mm, offering a loop tensile strength up to 1120 N. These cable ties will satisfy bundling requirements up to 381mm. Made of halogen and silicone free Polyamide 6.6, these cable ties are available in 12 different colors.

Ty-Fast[®] cable ties meet shipbuilding classification such as Germanischer Lloyd/ DNV-GL, Lloyd's Register of Shipping, Bureau Veritas and are also Mil Specification and QPL. Ty-Fast[®] cable ties have a CE declaration, supported by compliance to the low voltage directive and EN/IEC 62275 and UL 62275.

State-of-the-art robotic and raw material handling equipment assures product and material integrity throughout the manufacturing process. The integrally formed Polyamide pawl combines low insertion and high locking strength.

A rounded, low-profile head makes for less snags. Tails have improved two-sided finger grip design that helps the operator grasp and pull ties snug. The Sure Grip tab keeps the tail from popping out while being threaded, then holds it securely for final tightening by hand or tool.

Ty-Fast cable ties for demanding applications
Ideal for use in shipbuilding, construction and hazardous environments.

Heavy duty installation ties

Col-Ty[™] - the heavy installation tie - is mainly used for securing and bundling of cables in the utility and construction industries.

Col-Ty[™] is ideal for hazardous environments, low temperatures and humidity. Col-Ty[™] has a low profile double locking head with serration on the outer side of the tie, which eliminates the risk of damage to the cable.

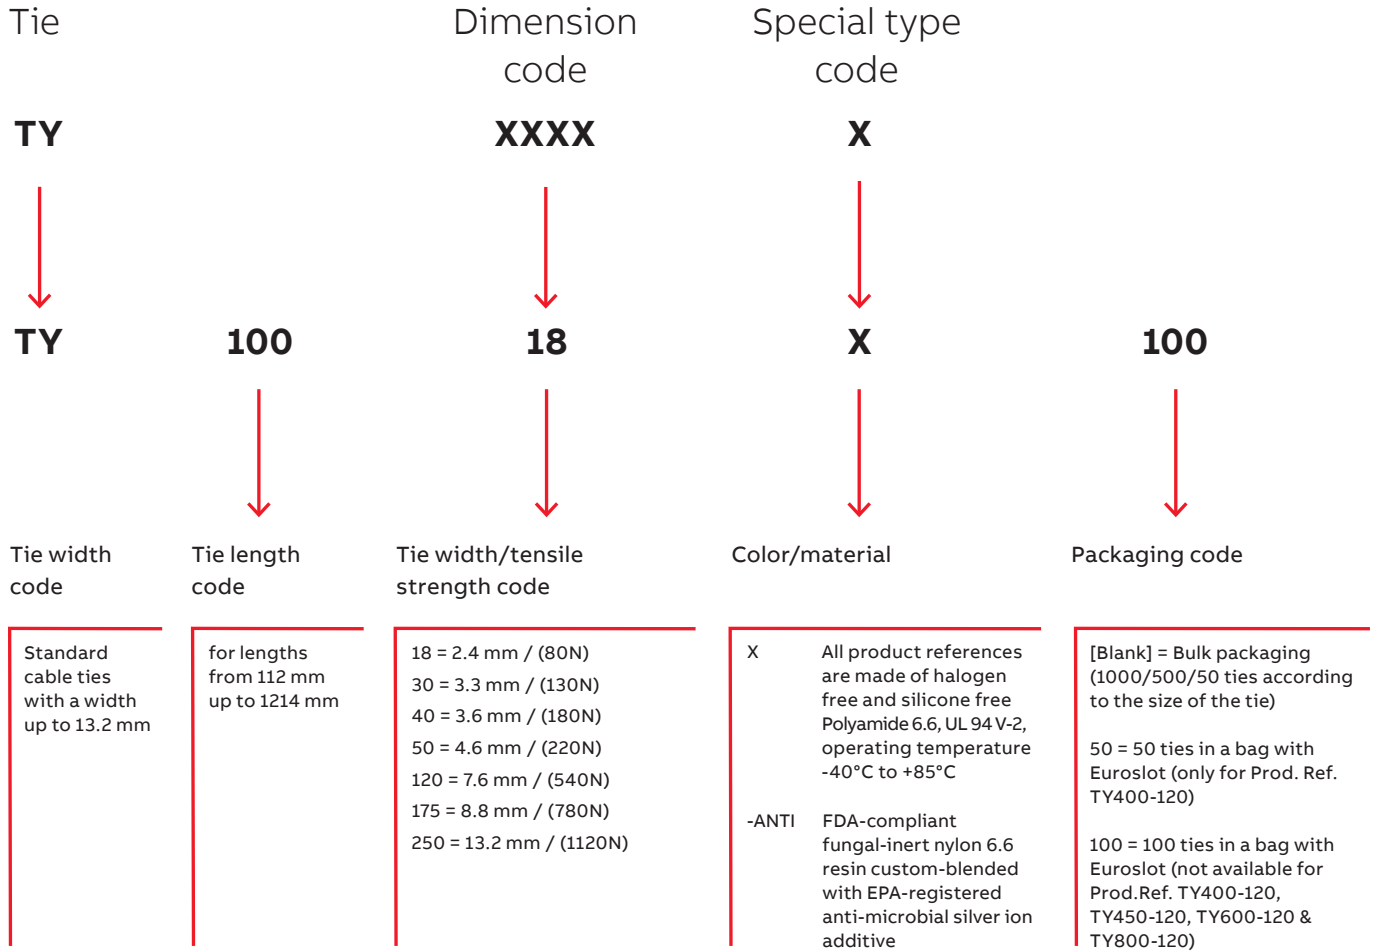

Hook & loop fasteners

Ty-Grip[™] cable ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required. There is no risk of over-tightening the cables, which makes the Ty-Grip[™] hook & loop fasteners ideal for specific applications in fiber optics, computer network wiring, telecom cables, etc.

All plastic cable ties

Ty-Fast® product code structure

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Ty-Rap® cable ties are moisturized to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

*This color is only available in select countries. Please contact your local sales office for details.

All plastic cable ties

Standard cable ties – Natural

Characteristics

- The integrally formed Polyamide pawl combines low insertion and high locking strength
- A rounded, low-profile head makes for less snags
- Tails have improved two-sided finger grip design that helps the operator grasp and pull ties snug
- Sure Grip tab keeps the tail from popping out while being threaded, then holds it securely for final tightening by hand or tool
- Quick and easy pull through increases productivity, reduces operator fatigue

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Colour: Natural
- Min. Installation Temp.: -20°C
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Standard cable ties – Natural

All plastic cable ties

Standard cable ties – UV-resistant black

Characteristics

- The integrally formed Polyamide pawl combines low insertion and high locking strength
- A rounded, low-profile head makes for less snags
- Tails have improved two-sided finger grip design that helps the operator grasp and pull ties snug
- Sure Grip tab keeps the tail from popping out while being threaded, then holds it securely for final tightening by hand or tool
- Quick and easy pull through increases productivity, reduces operator fatigue

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +105°C
- Colour: Black
- Min. Installation Temp.: -20°C
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Dimensions

All plastic cable ties

Standard cable ties – Jar

Characteristics

- Ty-Fast® cable ties packed in a convenient plastic jar
- Ideal product for distribution market
- Different dimensions in the same packaging: 112mm x 2,4mm, 141mm x 3,6mm and 186mm x 4,7mm
- Tensile strength from 80N to 220N
- Available in 3 different packaging configurations: 1 in natural cable ties and 2 in black cable ties
- Ideal product when small volumes are needed for various applications

Technical information

- Material: Polyamide 6.6
- Temperature range:
 - 40°C to +85°C (natural)
 - 40°C to +105°C (UV-resistant black)
- Min. Installation Temp.: -20°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black)
Halogen free, Silicone free

Dimensions

All plastic cable ties

Heavy duty cable ties

Characteristics

- Extremely long ties (up to 1214mm)
- Robust construction (778N - 1120N), for demanding applications where superior tensile strength is required
- The extra long Ty-Fast® ties are available in natural color for indoor applications and in UV-resistant black for outdoor applications
- Heavy duty cable ties are available in natural color for indoor applications and in UV-resistant black for outdoor applications

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

All plastic cable ties

UL 94 V-0 flame retardant cable ties

Characteristics

- Similar to our Ty-Rap® range of flame retardant ties, these all-plastic ties are made from low smoke flame retardant Polyamide 6.6 and meet the requirements of UL 94 V-0
- Ideal for use where low flammability and low smoke are needed such as public transport / buildings, tunnels etc.

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Milky white
- Flammability rating: UL 94 V-0
- Other properties: Limited fire hazard (low smoke), Halogen free, Silicone free

Dimensions

Special all-plastic cable ties

Integrated mounting hole cable ties

Characteristics

- Cable tie can be directly mounted onto a support with screws, bolts or rivets
- Mounting and bundling in one maintenance-friendly assembly
- Cable harness manufacture and pre- and end-mounting of bundles and parts
- UV-resistant version, especially recommended for outdoor applications
- Offered in Europe only

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special all-plastic cable ties

Standard and releasable panel mounting cable ties

Characteristics

- Fastening and clip-mounting in one, both fastens and clip mounts
- Fast pre- or on-site-assembly for a range of panel thickness up to 2,7mm
- Fast and secure clip-mounting
- For use in 6,35mm mounting hole
- Product codes containing xxx-PMR-xxx are releasable
- Offered in Europe only

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Description of materials and properties: see pages 144 to 159.
For tooling specifications: see pages 136 to 143.

Dimensions

Special all-plastic cable ties

Cable ties with identification tag

Characteristics

- Identification ties with incorporated label for durable marking and tying
- Simple marking on the roughened writing surface

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable ties with identification tag

For tooling specifications: see pages 136 to 143.

Tooling

ERG50

For use with 2,5mm to 4,7mm (80N to 220N) cable ties. See page 136.

Dimensions

Special all-plastic cable ties

Special double-headed ties

Characteristics

- The double-headed ties allow the parallel routing of two bundles of cable with one single tie
- Available in 3 different lengths

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Description of materials and properties: see pages 144 to 159.
For tooling specifications: see pages 136 to 143.

Tooling

ERG50
For use with 4,8mm (220N) cable ties.
See page 136.

Dimensions

Special ties

Blind mounting cable ties

Characteristics

- Suitable for hard-to-reach areas
- Fast hidden mounting on walls and vehicle chassis
- Ideal for mounting on vehicle chassis and can still be released before final tensioning
- In the locked state, the locking head neatly covers the mounting hole

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Tooling

ERG120

For use with 5,7mm
(300N) cable ties.
See page 136.

Dimensions

Special ties

Releasable lashing ties with incorporated fastener

Characteristics

- For temporary but strong bundling, such as during control box wiring
- Very simple application
- Available in 2 lengths for different applications
- May be re-used many times
- No tooling necessary

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Dimensions

Insert the cable tie tail into the lower slot in the head. Tighten the tie and pull it back. Slide in the tie under the catch from the side until it snaps into position.

Special cable ties

Col-Ty™ Heavy-duty double headed installation ties

Characteristics

- For securing and bundling of cables in the utility and construction industries
- Low profile double locking head*
- Serrations on the outer side of the tie eliminate the risk of damage to the cable
- Ideal for hazardous environments, low temperatures and humidity

Technical information

- Material: Polyamide 12
- Temperature range: -40°C to +80°C
- Color: Black
- Flammability rating: UL 94 HB
- Other properties: UV-resistant

Polyamide 6.6 Twist Tail® cable tie

All plastic cable tie – no tool needed

Characteristics

- Quick and easy to install, no tools required
- Strong, made of Polyamide 6.6, with 130N minimum tensile strength
- Safe, tail breaks off neat and clean, with no sharp edges
- General purpose applications, indoor and outdoor
- Available in 3 different lengths and 2 colors (white and UV-resistant black)

Technical information

- Material: Polyamide 6.6
- Operating temperature: -40°C to +85°C
- Min. Installation Temp.: 0°C
- Color: Natural or UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Special cable ties

Ty-Grip™ hook & loop fasteners

FO series loop ties are ideal for wrapping pre-determined bundle diameters due to the convenient slotted head.

FOL series buckle ties provide added strength and stability due to the high performance polyamide buckle.

Characteristics

These handy ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required.

- Quick bundling and re-adjustable tension
- Ideal for specific applications in fibre optics, computer network wiring, telecom cables, etc.
- Available in buckle straps, overlap straps and headless strips to suit many applications
- Screw-mount and self-adhesive mounting bases provide multiple mounting options
- Multiple colors available for identifying specific bundles

Technical information FO Series

- Material hook side: Polyamide
- Material loop side: Low density Polyethylene
- Temperature range: -20°C to +104°C
- Color: Standard color: black
- Flammability rating: UL 94 HB*
- Peel-off strength: 0.8N/cm

Technical information FOL Series

- Material hook side: Polyamide
- Temperature range: -20°C to +93°C
- Color: Standard color: black - see note after table
- Flammability rating: UL 94 HB
- Peel-off strength: 0.8N/cm
- Other properties: Halogen-free, Silicone free

* Suffix FR is Flame Retardant version.

For use with mounting bases TC368 and TC368A. See page 90 for details.

Additional colors available through special order. See sales representative for pricing, lead time and MOQ.

Dimensions

Special cable ties

Ty-Grip™ hook & loop fasteners

FOS series strip ties are pre-cut which makes bundling easy.

FOR series rolled hook and loop allows customers to conveniently cut pieces to desired lengths, eliminating waste.

Characteristics

These handy ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required.

- Quick bundling and re-adjustable tension
- Hook and loop fasteners are gentle on cables making them ideal for specific applications in fibre optics, computer network wiring, telecom cables, etc.
- Available in pre-cut strips and rolls for a variety of applications
- Screw-mount and self-adhesive mounting bases provide multiple mounting options

Technical information FOS and FOR Series

- Material hook side: Polyamide
- Material loop side: Low density Polyethylene
- Temperature range: -20°C to +104°C
- Color: Standard color: black*
- Flammability rating: UL 94 HB
- Peel-off strength: 0,8N/cm
- Other properties: Halogen-free, Silicone free

Ty-Rap® and Ty-Fast® Accessories

To complement the range of premium cable ties, ABB has developed an extensive range of mounting bases, cable clamps and other fastening accessories, to provide a professional solution to the most demanding applications in cable management.

— 01 TC345 4-way entry mounting base.

— 02 ULNY series adjustable ladderstyle clamp.

— 03 TC86 re-openable spring clamp.

— 04 TC375 multi-bundle mounting strip.

— 05 CPS series braided sleeving.

— 06 SRPE series.

ABB Installation Products invented the cable tie in 1958 and has spent the subsequent decades perfecting both the cable tie itself and a full complement of cable tie mounting bases. With an extensive variety of configurations, materials and mounting methods, our complete portfolio of mounting bases, clips, clamps and cable protection includes a solution for all your wire and cable fastening needs.

Features

- Standard nylon 6.6 material
- UV-resistant black nylon 6.6 for outdoor use
- Other materials for special environments
- Low-profile designs
- Easy to install with self-adhesive, screws or glue
- Many models are UL recognised

Applications

- Aircraft wiring
- Automation and control panels
- Machine control devices
- Building wiring
- Solar panel installations
- Vehicle wiring harnesses
- Wiring closets
- Office equipment and home appliances
- Lighting and electronic equipment
- Other indoor and outdoor wire and cable fastening applications

Typical surfaces

- Plastic
- Glass
- Wood
- Metal
- Paper
- Painted surfaces
- Ceramics

Mounting bases

2-way entry

Characteristics

- Versatile design allows one mount to be used for heavy duty ties up to 7,6mm width in a two-way style or tie up to 4,8mm width in a four-way style
- Choice of 3 materials: standard Polyamide 6.6 (natural), UV-resistant Polyamide 6.6 (black), Polyamide 6.6 flame retardant and ETFE Fluoropolymer (aquamarine)
- Supplied on either a rubber based (synthetic polymer) closed cell foam adhesive (installation: self-adhesive and/or screw) or without self-adhesive (installation: screw and/or 2-component glue)

Technical information

TC347, TC347A, TC5347AR, TC347X and TC5347AX

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (Self-adhesive version: 0°C to +65°C)
- Flammability rating: UL 94 V-2

- Color: (see table)
- Other properties: UV-resistant (black), Halogen free, Silicone free

TC347FR (Flame retardant)

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Flammability rating: UL 94 V-0
- Color: Natural
- Other properties: Halogen free, Silicone free

TCZ347 (Fluoropolymer)

- Material: ETFE Fluoropolymer
- Temperature range: -46°C to +150°C
- Flammability rating: UL 94 V-0
- Color: Aquamarine
- Other properties: Silicone free, inert to most solvents and chemicals, hydrolytically stable, radiation resistant

Dimensions

Mounting bases

4-way entry - high performance

Characteristics

- Design & materials, for increased performance
- Low profile shape (height: 5,1mm, to save space and reduce the torque forces on the mounting base)
- Ramped cable tie entries, for easier insertion of the cable tie
- Longer struts (up to the edges of the base), for better adhesion
- Special adhesive formulation (specifically for Nylon mounting bases) for high pull-off strength
- 2 kinds of self-adhesive material:
 - rubber-based, for immediate adhesion (15 minutes set-up time)
 - acrylic based, to have the possibility of repositioning the mounting base initially (set-up time: 24 to 72 hours)

- Two holes to have the ability or potential to use additional screws, for even stronger installations when required
- Supplied on two-up lining, for easy removal of the lining

Technical information

- Material - Molding: Polyamide or UV-resistant Polyamide
- Material - Self-adhesive: Rubber based
- Temperature range: -60°C to +85°C
Self-adhesive version: 0°C to +70°C
- Flammability rating: UL 94 V-2
- Colors: Natural or UV-resistant black
- Other properties: UV-resistant black, Halogen free, Silicone free

Dimensions

Mounting bases

4-way entry - extra large

Characteristics

- Supplied on either a rubber based (synthetic polymer) closed cell foam adhesive or without self adhesive (installation: screw and/or 2 component glue)
- Available in standard Polyamide 6.6 (natural)
- For use with wide cable ties such as hook and loop ties and lashing ties

Technical information

- Material: Polyamide 6.6
- Temperature range:
Glue version: -40°C to +85°C
Self-adhesive version: 0°C to +70°C
- Flammability rating: UL 94 V-2
- Colors: Natural
- Other properties: Halogen free, Silicone free

Self-adhesive mounting cradle

Characteristics

- Accepts cable ties to 7,6mm width
- Supplied “two-up” on closed cell foam with synthetic polymer “rubber” based adhesive
- Use M3.5 self-tapping screw for added strength if desired

Technical information

- Material: Polyamide 6.6
- Temperature range: 0°C to +65°C
- Color: Natural or UV-resistant black
- Mounting method: Self adhesive and/or screw
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant black, Halogen free, Silicone free

Mounting bases

Saddle support

Characteristics

- Tie mounting bases with supporting saddle
- For screw- or rivet-mounting
- The prism-shape of the saddle prevents twisting around the fixture
- High strength through compact design
- Non-conductive, non-corrosive, resistant to fuels, lubricants and most chemicals
- Available in natural nylon, UV-resistant nylon or heat stabilized black version

Technical information

- Material: Polyamide 6.6 or heat stabilized Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural or UV-resistant black
- Mounting method: Screw
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant black

Mounting bases

Weather resistant - Heavy-duty

Characteristics

- Tie mounting base for outdoor installation
- A strong, weatherproof and durable outdoor fastening solution for pipes, hoses, cables, etc.
- For screw-fastening
- Ergonomically shaped for ease of installation

Technical information

- Material: UV-stabilized Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Black
- Mounting method: Screw (for product code TC5355 to TC5357 only)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Mounting bases

Saddle-type mounting base

Characteristics

The saddle-type mounting bases allow 3 possible cable mounting:

- the cables can be attached to a flat surface on which the base is screwed
- the cable bundles can be mounted in parallel
- the cable bundles can be mounted crosswise

Can also be used for the mounting of cylindrical objects having a diameter between 12,7mm and 31,8mm.

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural
- Mounting method: Screw
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

* Surface preparation: surface should be cleaned with alcohol-based cleaner before application.
Installation: Surface must be clean and dry prior to application of accessory.
Allow 15-minute setting time for maximum adhesion performance of synthetic rubber adhesive (SRA).

Mounting bases

Detectable mounts

Saddle support

Characteristics

- Detectable with metal and X-ray detection equipment
- Saddle support mounting base provides a saddle for the wire run. Ty-Rap tie is threaded under bundle and tied in a usual manner

Technical information

- Material: Detectable Polyamide 6.6 and Polypropylene
 - Temperature range: -60°C to +85°C
 - Color: Blue
 - Mounting method: 2 screws or 2 rivets
 - Other properties: Detectable with metal and X-ray detection equipment
 - Flammability rating UL94: V-2
- Polypropylene:
- Temperature range: -40°C to +85°C
 - Flammability rating UL94: HB

Mounting bases

Screw-mounted strips for multiple bundling

Characteristics

- Tie mounting strips for up to 6 bundles simultaneously
- When mounted, the tie is guided through the clamp for fast assembly

Product code TC1101 to TC1117

- Simple and strong flat mounting beams for fixing multiple cables, bundles or components

Product code TC375 and TC376

- For vertical and double-side mounting

Product code TC101 and TC103

- Elongated fastening hole on one end allows greater flexibility during mounting

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural
- Mounting method: 2 screws (1 screw for product code. TC376 & TC375)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Mounting bases

Weather resistant - Heavy-duty

Characteristics

- Tie mounting base for outdoor installation
- A strong, weatherproof and durable outdoor fastening solution for pipes, hoses, cables, etc.
- Ergonomically shaped for trouble-free installation

Technical information

- Material: UV-stabilized Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Black
- Mounting method: Installs simply by tapping into a drilled hole.
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Rivet-mounted bases

Characteristics

- Low profile mounting base with integrated rivet
- Easy to install into normal or blind holes: just hammer in the expanding harbour
- Parts are color-coded according to hole diameter to avoid confusion

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: See table
- Mounting method: Rivet mounted
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free
- For tie width up to 4,8mm

Stud mounting system

Characteristics

- A fast and simple harnessing method for neat, versatile wire management
- Great for harnessing wires, cables and hoses to truck and trailer chassis
- Fast, easy installation, using standard 3/8" power drill and application tool or simply hammer on
- Unlimited harnessing flexibility using conventional T&B cable ties
- Custom drill bit quickly installs base to proper torque – won't crack or break mounting base as a result of being overtightened
- Unique 4-way multi-directional design

- 10-position harness capability
- Available for 3/8", 1/2", 5/8", and 3/4" stud/bolt sizes
- Self-tapping thread design for reliable installation onto stud
- High pull-out strength of 500+ lbs.

Technical information

- Material: Nylon 6.6, UV stabilized
- Color: Black
- Weather resistant
- Flammability rating: UL94-V2
- Halogen and silicon free

The stud mount cable fastening system includes a range of bases and the custom drill bit that mounts all sizes.

During installation, the custom Stud Mount drill bit application tool ejects itself from mounting base, ensuring proper torque and preventing cracking or breaking of the mount from being overtightened.

Virtually unlimited harnessing flexibility is provided in the unique 10-position harness design of the Stud Mount base.

Mounting bases

Ty-Rap® solar clip

Characteristics

- Perfect to manage cable on large and small solar projects
 - Specially engineered design provides the ability to quickly slip the cables in and out of the clip for easy removal, re-adjustment, or other maintenance
 - No tools required
 - Lightweight construction
- Fits frame thickness range from 1.5 to 3 mm
For installation of up to 8 control cables with 6 mm² conductor cross-section

- Metal-free construction reduces the need for grounding
- Keeping a clean professional look through panel rotation, environmental changes and vibration

Technical information

- Material: Weather resistant Acetal
- Temperature range: -65°C to + 90°C
- Color: black
- Other properties: UV-resistant
- Material: Heat stabilised polyamide 6.6
- Temperature range: -40°C bis +105°C
- Color: black
- Other properties: UV-resistant

Accessories for flat cables

Clips with flexible leg

Characteristics

- Low profile clip for single or multiple layers of flat ribbon cable
- Flexible centre leg allows for easy removal and replacement of desired cable
- Non-conductive, non-corrosive, resistant to fuels, lubricants and most chemicals
- FANY supplied “two-up” on a rubber based closed cell foam adhesive
- FSNY type has an additional mounting hole for screw mounting (M4 screw)

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range: -40°C to +85°C
Self-adhesive version: 0°C to +65°C
- Color: Natural
- Mounting method: Self-adhesive or screw
- Flammability rating: UL 94 V-2 (clip)
- Other properties: Halogen free, Silicone free

Cable clamps

Adjustable, ladder style clamps

Characteristics

- Ladder style fastener is easily released and refastened
- Supplied “single-cut” on a rubber based closed cell foam adhesive
- Can also be mounted with a screw, for improved pull off or out strength

Technical information

- Material: Polyamide 6.6
- Temperature range: 0°C to +65°C
- Color: Grey
- Mounting method: Self adhesive and / or screw-mounting
- Flammability rating: UL 94 V-2 (clamp)
- Other properties: Halogen free, Silicone free

Cable clamps

Latching clamps

Characteristics

- Re-usable tie mounting clamps
- For self-adhesive and / or screw- or rivet mounting
- One-piece design with integrated releasable lock
- The inner profile protects sensitive cables, fibre optics etc
- Desired height can be set in 3 or 6 ratchet steps
- The large base surface area and the strong adhesive film guarantee a high adhesive strength
- The self-adhesive film is foam backed (0,8mm) which allows durable fixing on a variety of materials

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
Self-adhesive version: 0°C to +65°C
- Color: Natural
- Mounting method: Self adhesive or screw-mounting
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable clamps

Accessories for flat cables

Characteristics

- This system allows the secure and neat fixing of between 1 and 25 ribbon cables
- Clamp height adapts accurately to the desired number of ribbon cables
- Suitable for ribbon cables up to 60 conductors with a pitch of 1,27mm (76,2mm wide)
- Can be re-opened for later addition or removal of a cable
- Very strong hold
- All versions can be mounted with countersunk-head screws or rivets
- Some versions have an additional self-adhesive foam to aid fast mounting

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range: -40°C to +85°C
Self-adhesive version: 0°C to +65°C
- Color: Natural
- Mounting method: Self-adhesive and / or for screw- or rivet-mounting
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable sleeves and spiral wraps

Bind-It®

Cable Protection Systems (CPS) from ABB captures different products: Wrap-around woven sleeving, braided sleeving, spiral wrap & extruded grommeting.

The wrap-around sleeving – better known under the name Bind-It® – is a tough but lightweight sleeve used to bundle and protect wires and cables from abrasion, sharp edges and chafing. Bind-It® is a self-wrapping sleeve that is very quick and easy to install and remove. Bind-It® is also available in a flame retardant version. No heat is necessary to seal the ends of this product. The ends can be secured by using Ty-Rap® cable ties.

The braided sleeving of ABB is used for bundling and protecting cables. The braided sleeving is a closed sleeve available in a flame and a non-flame retardant version. This product is mainly used inside cabinets and enclosures. To stop the end of the sleeving fraying it is necessary to heat seal the ends using a “hotwire” device.

Spiral wrap is mainly used for protection of bundles. This product is available in a natural and UV-resistant version and supplied in a Euroslot bag, ideal for the distribution market.

Finally, the extruded grommeting of ABB is used to line panel edges and knock-outs where the chafing of passing wires is a concern. In most applications, grommeting will grip tightly by itself.

Cable sleeves and spiral wraps

Wrap-around woven sleeving

Characteristics

- Offers excellent protection for cable assemblies against abrasion
- No heat is required to seal the ends of this product as compared to traditional braided sleeving
- With its wrap-around design, it can be installed on assemblies where the wires are already terminated or wires need to be broken-out
- Bind-It® is available in nominal sizes from 5mm to 38mm

Technical information

- Material: Mono and multifilaments of polyester
- Temperature range: -70°C to +125°C
- Melt temperature: +255°C
- Automotive temperature: T3 class
- Color: Black
- Flammability rating: Self-extinguishing, type B (FMVSS-302 Test method D45 1333)
- Abrasion resistance: PSA D44 1722 : R8
- Dielectric strength: from 1kVAC

Cable sleeves and spiral wraps

Wrap-around woven sleeving – flame retardant

Characteristics

- Wrap-around sleeving manufactured from flame-retardant polyester monofilaments and multifilaments
- Designed for mechanical protection and maintenance of wire and cable bundles
- Its construction with 100% covering ratio provides excellent cut-through and abrasion resistance
- No heat is required to seal the ends of this product as compared to traditional braided sleeving
- With its wrap-around design, it can be installed on assemblies where the wires are already terminated or wires need to be broken-out
- Bind-It® is available in nominal sizes from 5mm to 50mm

Technical information

- Material: Mono and multifilaments of polyester
- Temperature range: -50°C to +125°C
- Melt temperature: +240°C
- Automotive temperature: T3 class
- Color: Black
- Fire behaviour: According to EN 45545-2 : HL3
According to NF F 16 101 : I2-F1
- Ignitability test: According to NF-EN-ISO 11925-2
- Abrasion resistance: PSA D44 1722: R8
- Smoke opacity: NFX 10-702-1; 10-702-2: Pass; Smoke index: 12
- Index oxygen: According to EN 45545-2 : 37.5%
- Dielectric strength: from 1kVAC
- Other properties: Halogen free

Cable sleeves and spiral wraps

Braided sleeving

Characteristics

- Standard color – black or gray
- Non-flame retardant Polyester rated at UL 94 V-2
- Available in nominal diameters from 3 to 50mm to cover bundle diameters of 1 to 66mm, giving flexibility when adding to or removing cables from wire looms
- For use in temperature ranges from -50°C to +150°C
- Good chemical resistance
- Halogen free
- For protecting and bundling cables and wires inside cabinets and enclosures
- To stop the ends of the sleeving fraying it is necessary to heat seal the ends using a “hotwire” device. (Product code WT-HSG)

Technical information

- Material: Polyester
- Temperature range: -50°C to +150°C
- Color: Black or grey
- Flammability rating: UL 94 V-2

Cable sleeves and spiral wraps

Braided sleeving - flame retardant

Characteristics

- Braided sleeving manufactured from flame-retardant polyester monofilaments
- Flame retardant polyester, conform to UL 94 V-0, mainly used in the railway industry
- Available in diameters from 3 to 50mm to cover bundle diameters of 2 to 60mm
- Recommended in applications such as public transportation, aircraft industry, telecommunications, underground cables, etc.

Technical information

- Material: Flame retardant polyester monofilaments (PET FR)
- Temperature range: -50°C to +150°C
- Melt temperature: +250°C
- Color: Black or grey
- Tested according to:
 - NF F 16 101
 - I2-F1
 - EN45545-2 2013
 - HL3
- Other properties: Halogen free

Cable sleeves and spiral wraps

Spiral wrap

Characteristics

- For protection of bundles from 4mm to 130mm
Install gapped for greater flexibility or butted for maximum abrasion resistance, insulation and rigidity
- Counter-clockwise cut
- Delivered in bags with Euroslot
- Available in natural and UV-resistant black Polyethylene

Technical information

- Material: Polyethylene
- Temperature range: -30°C to +80°C
- Color: Natural and UV-resistant black
- Flammability rating: UL 94 HB
- Other properties: UV-resistant black, Halogen free, Silicone free

Dimensions

Cable sleeves and spiral wraps

Extruded grommeting

Characteristics

- Used to line panel edges and knock-outs where the chafing of passing wires is a concern
- Available in 8 stock sizes in 30,5m lengths for panels from 1mm to 6,35mm
- In most applications, grommeting will grip tightly by itself, if not, a drop of Epoxy will keep it in place

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C
- Color: Natural or black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable tie tooling

Ty-Rap® and Ty-Met™ tooling

ABB offers a comprehensive range of tooling to complement the full range of cable ties. The range includes low-cost tools for maintenance and small batch requirements, as well as robust and ergonomic tools with tension setting and automatic cutting, now also in pneumatic versions.

In particular, the ERG50 and ERG120 hand tools, as well as the new pneumatic tool, provide a superior level of reliability and performance, combined with enhanced ergonomics and comfort of use.

These ergonomic tools, with adjustable tension and automatic cutting, are ideally suited for efficiently installing all kinds of plastic cable ties in industrial (Original Equipment Manufacturers, Maintenance and Repair Organizations, etc) and construction applications.

ERG50 & ERG120

Superior reliability and performance

- Developed to meet the market needs for a more rugged and longer lasting tool
- Designed to integrate the greatest number of features in the market

Enhanced ergonomics and comfort of use

- First class design and materials, for maximum convenience
- The operator is subject to less stress, less fatigue and less risk of trauma due to long term use (such as Carpal Tunnel Syndrome).0

Increased efficiency

- Exclusive features for quick set-up and fast installation
- Confidence to achieve a highly professional result, installation after installation

Cable tie tooling

Selection guide

Tooling for plastic ties

	Product code	GID No.	Features	Tensioning	Cutting	For cable ties
	ERG50	7TAA131790R0001	Ergonomic hand tool with superior level of reliability and performance	Adjustable	Automatic	2.4mm - 4.8mm
	ERG120	7TAA131790R0000	Ergonomic hand tool with superior level of reliability and performance	Adjustable	Automatic	4.8mm - 7.6mm
	WT1-TB	7TAA131800R0004	Basic tensioning tool, intended for maintenance and small batch use	Basic	Twist cut	2.4mm - 4.8mm
	WT2-TB	7TAA131800R0007	Basic tensioning tool, intended for maintenance and small batch use	Basic	Twist cut	4.8mm - 7.6mm
	L300-FR	7TCA131810R0001	Rugged construction tool for Col-Ty™ installation ties	Basic	Manual	Col-Ty™ - 9mm
	WT3D	7TAA131800R0008	Robust metal body with plastic hand-grips, designed for tensioning and cutting heavy-duty cable ties	Basic	Twist cut	7.6mm - 12.7mm
	L-500-EU	7TCA131140R0022	Rugged metallic construction	Adjustable	Automatic	4.7mm - 13.3mm

Cable tie tooling

Selection guide

Tooling for Ty-Met™ stainless steel ties

	Product code	GID No.	Features	Tensioning	Cutting	For cable ties
	DAS-250	7TAA131800R0000	Heavy duty metallic hand tool	Basic	Manual	Ball-lock type & ladder type. Width up to 7,9mm
	CT2-TB	7TCA131140R0005	Basic hand tool	Basic	No cutting	Releasable, ladder type & strap type
	WT3S	7TAA131810R0002	A robust metallic hand tool with rubber grips	Basic	No cutting	Ladder type & strap type
	CT3	7TCA131990R0206	Economic tensioning tool	Basic	Manual	Ladder type, strap type & ball-Lock type. Width up to 12mm
	CT4-TB	7TCA131140R0007	Bantam tool, unique 3-way handle can be used in various positions. Especially useful in tight areas with minimal access	Basic	Manual	Releasable, ladder type & strap type
	CT7	7TCA131140R0009	Tensioning and cutting tool, ratchet type	Basic	Manual	Ball-lock type. Width: 12mm & 16mm
	CT8	7TCA131140R0010	Tensioning and cutting tool, ratchet type	Basic	Manual	Bands on reel (all widths)
	WTA290	7TAA131810R0003	Hand tool to apply mini standard stainless steel dual lock cable ties	Basic	Manual	Stainless steel 4.5mm
	WTA250	7TAA131800R0009	Hand tool to apply standard stainless steel dual lock cable ties	Basic	Manual	Stainless steel 6.35mm

Cable tie tooling

Tools for plastic cable ties: ERG50 and ERG120

These ergonomic tools from ABB provide a superior level of reliability and performance, combined with enhanced ergonomics and comfort of use. With their adjustable tension and automatic cutting, they are ideally suited for efficiently installing all kinds of plastic cable ties in industrial (Original Equipment Manufacturers,

Maintenance and Repair Organizations, etc) and construction applications. They are available in hand tool version (ERG50 and ERG120) and in pneumatic version for higher volumes of installation without muscle strain. All ERG tools have been calibrated before selling.

Cable tie tooling

Tools for heavy duty plastic cable ties

Product code: WT3D

GID No.: 7TAA131800R0008

Characteristics

- Designed for tensioning and cutting heavy-duty cable ties
- Robust metal body with plastic hand-grips

Technical information

- Tool type: Hand tool for Deltec® ties, Col-Ty™ installation ties and other wide cable ties
- For type of cable tie: Plastic ties
- For tie width: 7,6mm - 12,7mm
- Features: Tensioning, manual cutting (by twisting the tool)
- Weight: 225g
- Dimensions [L x W x H]: 178 x 112 x 20mm

Product code: L-500-EU

GID No.: 7TCA131140R0022

Characteristics

- Rugged metallic construction makes this tool ideal for use with our 4,7mm to 13,3mm wide ties
- Set tension adjuster to give desired tie tightness
- Pull trigger and tie is automatically tensioned and cut

Technical information

- Tool type: Hand tool
- Color: Red
- For type of cable tie: Plastic ties
- For tie width: 4,7mm - 13mm
- Features: Tensioning, automatic cutting
- Weight: 320g
- Dimensions [L x W x H]: 220 x 90 x 25mm

Product code: L300-FR

GID No.: 7TCA131810R0001

Characteristics

- Rugged construction makes this tool ideal for Col-Ty™ installation ties
- Pull tie to desired tension and pull trigger to cut excess flush at cable tie head
- Field proven durability

Technical information

- Tool type: Hand tool for Col-Ty™ installation ties
- Color: White
- For type of cable tie: Plastic ties
- Features: Tensioning, manual cutting
- Weight: 330g
- Dimensions [L x W x H]: 195 x 100 x 25mm

Cable tie tooling

Tools for plastic cable ties

Product code: WT1-TB

GID No.: 7TAA131800R0004

Characteristics

- Twist-and-cut tensiing tool in plastic, intended for maintenance and small batch use

Technical information

- Tool type: Low-cost hand tool
- Color: Orange
- For type of cable tie: Plastic ties
- For tie width: 2,4mm - 4,8mm
- Features: Basic tensiing, twist cut
- Weight: 28,4g
- Dimensions [L x W x H]: 134 x 55 x 27mm

Product code: WT2-TB

GID No.: 7TAA131800R0007

Characteristics

- Twist-and-cut tensiing tool in plastic, intended for maintenance and small batch use

Technical information

- Tool type: Low-cost hand tool
- Color: Black
- For type of cable tie: Plastic ties
- For tie width: 4,8mm - 7,6mm
- Features: Basic tensiing, twist cut
- Weight: 28,4g
- Dimensions [L x W x H]: 134 x 55 x 27mm

Cable tie tooling

Tools for stainless steel ties

Product code: CT2-TB

GID No.: 7TCA131140R0005

Characteristics

- Cable tie tensioner suitable for releasable type, ladder type & strap type ties
- Tensions the ties to their optimum holding power with a simple squeeze: a flick of the wrist and they're locked tight

Technical information

- Tool type: Hand tool
- For type of cable tie: Releasable type, ladder type & strap type stainless steel ties
- For tie width: Up to 12mm
- Features: Tensioning, no cutting
- Weight: 300g
- Dimensions [L x W x H]: 195 x 90 x 30mm

Product code: WT3S

GID No.: 7TAA131810R0002

Characteristics

- A robust metallic hand tool with rubber grips designed for tensioning ladder type & strap type stainless steel ties
- After tensioning, the stainless steel ties can easily be cut with side-cutters

Technical information

- Tool type: Hand tool
- For type of cable tie: Ladder type & strap type stainless steel ties
- For tie width: Up to 12mm
- Features: Tensioning, no cutting
- Weight: 225g
- Dimensions [L x W x H]: 178 x 112 x 20mm

Cable tie tooling

Tools for stainless steel ties

Product code: DAS-250

GID No.: 7TAA131800R0000

Characteristics

- Heavy duty metallic hand tool
- Tensioning tool with side cutters

Technical information

- Tool type: Hand tool
- For type of cable tie: Ball-lock type & ladder type stainless steel ties, coated and uncoated
- For tie width: Up to 7,9mm
- Features: Tensioning tool with side cutters

Product code: CT3

GID No.: 7TCA131990R0206

Characteristics

- Cost-effective tensioning tool
- Cut-off by hand-activated lever

Technical information

- Tool type: Hand tool
- For type of cable tie: Ladder type, strap type & ball lock type stainless steel ties, coated and uncoated
- For tie width: Up to 12mm
- Features: Tensioning, manual cutting
- Weight: 550g
- Dimensions [L x W x H]: 210 x 155 x 35mm

Product code: CT4-TB

GID No.: 7TCA131140R0007

Characteristics

- Bantam tool, suitable for releasable type, ladder type & strap type stainless steel ties
- Unique 3-way handle can be used in various positions. Especially useful in tight areas with minimal access

Technical information

- Tool type: Hand tool
- For type of cable tie: Releasable type, ladder type & strap type stainless steel ties
- Features: Tensioning, manual cutting
- Weight: 1180g
- Dimensions [L x W x H]: 156 x 180 x 80mm

Cable tie tooling

Tools for stainless steel ties

Product code: CT7

GID No.: 7TCA131140R0009

Characteristics

- Tensioning and cutting tool, ratchet type
- Suitable for coated and uncoated ball-lock type stainless steel ties, having a width of 12mm and 16mm

Technical information

- Tool type: Hand tool, ratchet type
- Weight: 1300g
- Dimensions [L x W x H]: 270 x 170 x 60mm

Product code: CT8

GID No.: 7TCA131140R0010

Characteristics

- Tensioning and cutting tool, ratchet type
- Suitable for the bands on reel, in all widths
- The long nose leaves an excess of 45mm after the tie is cut, for an easy installation of the band on reel

Technical information

- Tool type: Hand tool, ratchet type
- For type of cable tie: Bands on reel
- For tie width: All widths (up to 19,1mm)
- Weight: 1570g
- Dimensions [L x W x H]: 310 x 200 x 60mm

Product code: WTA290

GID No.: 7TAA131810R0003

Characteristics

- Easy to use tool applies tension, locks tie with the dual lock and cuts off band flush with top surface of buckle

Technical information

- Tool type: Hand tool
- For type of cable tie: Mini standard stainless steel dual lock cable ties
- For tie width: Up to 4,5mm
- Features: Tensioning automatic cutting
- Weight: 594g
- Dimensions [L x W x H]: 173 x 25 x 157mm

Product code: WTA250

GID No.: 7TAA131800R0009

Characteristics

- Easy to use tool applies tension, locks tie with the dual lock and cuts off band flush with top surface of buckle

Technical information

- Tool type: Hand tool
- For type of cable tie: Standard stainless steel dual lock cable ties
- For tie width: Up to 6,35mm
- Features: Tensioning automatic cutting
- Weight: 522g
- Dimensions [L x W x H]: 173 x 25 x 157mm

Material specifications

Material selection and specifications

General

There are a number of factors to be considered when choosing the proper materials for a specific environment. It is extremely difficult to provide data on all the possible combinations or conditions to which products may be subjected; therefore, it is recommended that this information be used as a guideline only and that the user conduct sample tests in any intended application to determine suitability.

How to use the table

For applications in an extremely cold environment, three materials are appropriate: ETFE Fluoropolymer, Polyamide 12 and stainless steel.

For applications that also require high tensile strength, stainless steel is the optimum material choice. If high strength is not required, Polyamide 12 may be a less costly option.

This information is based on data provided by material manufacturers and is provided only as a general guide. No specific recommendation is intended. As each application may vary, testing should be conducted by the user in the intended application and environment.

Table 1 provides relative performance ratings of the different product materials. Chemical resistance is shown in Table 2.

Table 1: Information on cable tie materials

Material code	Polyamide 6.6 weather resistant *****						
	Polyamide 6.6	Polyamide 6.6 heat-stabilised	Polyamide 6.6 heat-stabilised UV resistant	Polyamide 6.6 flame retardant	Polyamide 4.6 high temperature	Detectable Polyamide 6.6

** Ty-Fast® ties in standard Polyamide 6.6 are available in natural color and in a wide range of colors Ty-Rap® ties in standard Polyamide 6.6 are available in natural color only.

*** Ty-Fast® ties in weather resistant Polyamide 6.6 are available in black color only (with 2% carbon for military specifications).

Ty-Rap® ties in weather resistant Polyamide 6.6 are available in black color (with 2% carbon for military specifications) and in a wide range of colors (except natural).

**** Heat stabilized Polyamide 6.6 may have a greenish tint.

***** The installation temperature may vary based on size and material. The type-specific installation temperature can be found in the respective technical data sheet.

***** 2% carbon for military specifications.

Certifications

IEC 62275, UL, CSA and CE

The National Electrical Manufacturers Association (NEMA) is the consortium of manufacturers that agree to the parameters of product testing and direct the IEC standards.

The International Electrotechnical Commission (IEC) is the agency that sets quality standards and technical requirements for products in the electrical industry. IEC 62275 is the unified standard for cable ties adopted in 2013.

Underwriters Laboratory (UL) is the leading standards agency for the US. Products listed as cULus are also recognized in Canada. UL 62275 is the quality and test standard unified with IEC 62275 for positioning devices. UL 62275 supersedes UL 1565.

CSA Group is the leading standards agency for Canada. CSA C22.2 No. 62275 is the quality and test standard unified with IEC 62275 for cable ties and is fully harmonized with UL 62275.

Conformité Européenne (CE) is the accepted standards agency for the European Economic Area and is adopted by most European countries. CE 62275 is the quality and test standard unified with IEC 62275 for cable ties and is a self-certified standard.

Type certifications

Type 1	Retains 100% declared loop tensile strength when tested in the as-received condition, and at least 50% of declared loop tensile strength after being subjected to specified test conditions
Type 11	Type 1 with additional pre-qualification to long-term performance characteristics of nonmetallic molding materials (Not recognized for CE standards)
Type 2	Retains 100% declared loop tensile strength, or mechanical strength for fixing device, after being subjected to specified test conditions
Type 21	Type 2 with additional pre-qualification to long-term performance characteristics of nonmetallic molding materials (Not recognized for CE standards)
Type 21S	Type 2 or Type 21 with additional qualification for suitability to support flexible metal conduit and cables in building construction in accordance with the requirements in relevant installation codes (fixing devices with 50lbs/220N or higher loop tensile strength)

Packaging markings

Flammability Ratings (as tested after ignition and flame removed)	UL94-HB		Slow burning on a horizontal specimen; burning rate < 76 mm/min for thickness < 3 mm or burning stops before 100 mm
	UL94-V2		Self-extinguishing on horizontal and burning stops within 30 seconds on a vertical specimen; drips of flaming particles are allowed
	UL94-V0		Self-extinguishing on horizontal and burning stops within 10 seconds on a vertical specimen; non-inflamed drips of particles allowed
Outdoor rating	UV		Survives 1000 hours of UV exposure in an approved UV testing apparatus and passes follow up testing per type requirements
Plenum rating	AH-2		Suitable for use in Air Handling Spaces (plenums) in accordance with Section 300.22 (C) and (D) of the National Electrical Code, and Rules 12-010 (3), (4), and (5), and 12-020 of the Canadian Electrical Code, Part I
Mechanical performance rating	Minimum loop tensile strength		The mechanical performance rating for cable ties is expressed in terms of "minimum loop tensile strength" defined as: A reference mechanical characteristic of a cable tie with its locking mechanism engaged. The term "loop tensile strength" comes from a standard based on the US military specifications for cable tie use in aircrafts. The loop tensile strength test on cable ties exert the force from the inside out more or less equally with an attempt to stress the locking mechanism.

Material specifications

UL flammability ratings

—
Nylon 6.6 = Polyamide
6.6 is Halogen-free
and Silicone-free.

Flammability ratings for selecting cable ties

Note: Flammability ratings of cable tie materials per UL are intended to serve as a preliminary indication of acceptability with respect to flammability for particular applications.

UL 94 vertical burn test procedures

Test specimens of the material, with dimensions 127 x 12,7mm, with the thickness intended for use in the end product, are tested in both the manufactured condition and in the aged state. The test requires that the specimen be supported in a vertical fixture and a precisely controlled flame applied for a 10 second period. The flame is removed and the duration of flaming is noted. If the flame extinguishes, a second exposure to flame for 10 seconds is applied and duration of flaming is again noted. It is observed and recorded whether or not test specimens drip flaming particles that ignite a cotton swab.

Materials classed 94 V-0:

A material classed 94 V-0 shall:

- A. Not have any specimens that burn with flaming combustion for more than 10 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 50 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture
- D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 304,8mm below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 30 seconds after the second removal of the test flame

Materials classed 94 V-1:

A material classed 94 V-1 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture

- D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 304,8mm below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame.

Materials classed 94 V-2:

A material classed 94 V-2 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture
- D. Be permitted to have specimens that drip flaming particles that burn only briefly, some of which ignite the dry absorbent surgical cotton placed 304,8mm below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame

UL 94 horizontal burn (HB) test procedures

The test uses a 12,7mm x 127mm specimen held at one end in a horizontal position with marks at 25,4mm and 127mm from the free end. A flame is applied to the free end for 30 seconds or until the flame front reaches the 25,4mm mark. If combustion continues the duration is timed between the 25,4mm mark and the 127mm mark. If combustion stops before the 127mm mark, the time of combustion and the damaged length between the two marks are recorded. A set of three specimens are tested.

Materials classed 94 HB

A material that is less than 3mm in thickness will be classified 94HB if it has a burning rate of less than 76,2mm per minute or stops burning before the 127mm mark. If one specimen from the set of three fails to comply, then a second set of three are tested. All three of this second set must comply. HB rated materials are considered "self-extinguishing". This is the lowest (least flame retardant) UL94 rating.

Material specifications

Adhesive material specifications

Installation instructions for self-adhesive mounting bases

- Mounting surfaces should be cleaned with alcohol based (IPA) cleaner before application
- The self-adhesive mounting bases have a double-sided adhesive tape made of synthetic foam, covered by a protecting foil
- To install the self-adhesive mounting base, remove the protecting foil and press the

mounting base onto the cleaned surface

- The thickness of the self-adhesive foam (0,8mm) compensates the irregularities of the application surfaces and allows installations on structured surfaces of cabinet doors, on sheet metal, on machines, etc
- The adhesion is achieved immediately during the installation, which means that later repositioning is not possible

Adhesive material specifications

Property	Method	Unit of measure	Rubber based (self-adhesive)
Coated sides	–	each	2
Foam density	–	Kg/m ³	96,9
Peel adhesion	PSTC 1	N/cm width	10,9
	ASTM D 1000	Average	
Shear adhesion	Natural	15,0	15,0
22°C (71.6°F) 50% RH	PSTC 7	Hours	100 +
22°C (71.6°F) occasional wetting		N/m ²	68971
Tensile strength	ASTM D 412	PSI	100
Tear resistance	ASTM D 624	N/cm	52,6
Elongation at break	–	%	400
Service temperature	–	°C/°F Min	-18
	–	°C/°F Max	+66
Flammability	ASTM D 624		Slow burn

01 Thoroughly clean the surface on which you plan to mount the base with a clean cloth and a 50% isopropyl alcohol/50% water solution to remove dust, oil and any other impurities.

02 Allow the clean surface to air dry completely.

03 Peel off the protective backing from the base without touching the self-adhesive surface.

04 Press the base down firmly onto the mounting surface with your thumb and hold in place for several seconds.

05 Allow the specified set-up time to elapse (15 minutes for synthetic rubber or 72 hours for acrylic) before using the installed base to mount cable ties and bundles of cable.

How to mount self-adhesive bases

Application temperature range for both types of self-adhesive is 18 °C to 37 °C (65 °F to 100 °F). The product package will be stamped with an expiration date for the adhesive, and installation after that date is not recommended for best performance.

Material specifications

Material selection and specifications

Selecting the right material for your applications

ABB offers cable ties and accessories in a wide variety of materials, each suited for specific environments. The purpose of this document, therefore, is to assist in choosing the best material for a particular application.

The effects of weathering, flame, chemicals, extreme temperatures and radiation on the different materials is presented in tabular form to facilitate the selection of the desired material for the application.

Having determined the most suitable material, one can choose from the wide variety of cable ties, identification ties, mounting bases, lashing ties, etc., offered by ABB.

Polyamide 6.6

- Thermoplastic material used in cable ties for universal applications in the industry
- Excellent resistance to shocks, chemicals, oils and temperature fluctuations
- High surface hardness and a small coefficient of friction
- Flammability rating: UL 94 V-2
- Halogen free and Silicone free
- Indoor applications
- Ty-Fast® ties in standard Polyamide 6.6 are available in natural color and in a wide range of colors
- Ty-Rap® ties in standard Polyamide 6.6 are available in natural color only

Material specifications

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Polyamide 6.6 cable ties are moisturised to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags containing moisture and should remain sealed until ready for use.

Polyamide 6.6, weather resistant

- Similar to Polyamide 6.6, but recommended for outdoor applications
- UV-resistant
- Halogen free and Silicone free
- Ty-Fast® ties in weather resistant Polyamide 6.6 are available in black color only (with 2% carbon for military specifications)
- Ty-Rap® ties in weather resistant Polyamide 6.6 are available in black color (with 2% carbon for military specifications) and in a wide range of colors (except natural)
- Flammability rating: UL 94 V-2

UV-resistant

Weather-proof

Material specifications

Material selection and specifications

Polyamide 6.6, heat stabilized

- Similar to Polyamide 6.6, but increased operating temperatures, up to 105°C
- Excellent tensile strength
- High temperature resistance
- Color: natural (may have a greenish tint)
- Flammability rating: UL 94 V-2

Polyamide 6.6, flame retardant

- Excellent flammability rating: UL 94 V-0
- Ideal in areas where human life is at risk
- Color: white

Polyamide 6.6, heat stabilized and UV-resistant

- Similar to Polyamide 6.6, but recommended for outdoor applications and/or high temperature applications, up to 105°C
- Combines the features & benefits of Polyamide 6.6, weather resistant and Polyamide 6.6, heat stabilized
- Color: black
- Flammability rating: UL 94 V-2

Polyamide 6.6, detectable

- Similar to Polyamide 6.6, but contains a compound detectable by metal detectors and X-ray equipment
- Color: bright blue, also contributes to visual detection
- Especially recommend for the food industry, and for any other contamination sensitive industry using detection equipment
- Halogen free and silicone free
- Flammability rating: UL 94 V-2

Polyamide 4.6, extra high temperature (150°C)

- Similar to Polyamide 6.6, but outstanding resistance to high temperatures up to 150°C
- Halogen free and silicone free
- Color: light green
- Flammability rating: UL 94 V-2

Polyamide 12, weather resistant

- Extremely flexible, also at low temperatures
- Ages better than Polyamide 6.6
- UV-resistant and weatherproof
- Better chemical resistance than Polyamide 6.6
- Color: black
- Flammability rating: UL 94 V-2

Material specifications

Material selection and specifications

Polypropylene, weather resistant

- Resistant against inorganic acids, polyhydric alcohols, neutral and basic salts
- Resists a number of other chemicals
- UV resistant
- Lower tensile strength than Polyamide 6.6
- Color: black
- Flammability rating: UL 94 HB

UV-resistant

Weather-proof

Chemical resistant

Polypropylene, detectable

- Similar to standard Polypropylene, but contains a compound detectable by metal detectors (tested and rated at 1,5mm diameter ferrous sphere setting) and X-ray equipment
- Color: bright blue, also contributes to visual detection
- Especially recommend for the food industry, and for any other contamination sensitive industry using detection equipment
- Halogen free and silicone free
- Flammability rating: UL 94 HB

Detectable

ETFE Fluoropolymer

- Tensile strength slightly lower than Polyamide 6.6
- ETFE Fluoropolymer is inert to most solvents and chemicals, hydrolytically stable, UV and weather resistant
- Radiation resistant (meets IEEE383) and approved for nuclear plant use
- Non-outgassing properties for zero gravity applications
- Very high temperature resistance
- Flammability rating: UL 94 V-0
- The best all around plastic material for cable ties
- Color: aquamarine

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof

Radiation resistant

Chemical resistant

ECTFE Fluoropolymer

- Similar to ETFE Fluoropolymer in performance
- Outstanding characteristic: lower smoke density when burnt
- Recommended for applications where smoke generation is a concern, such as plenum areas
- Color: maroon
- Flammability rating: UL 94 V-0

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof

Low smoke

Chemical resistant

Material specifications

Material selection and specifications

Toughened weatherable acetal

- Excellent resistance to a wide variety of solvents, esters, oils, greases, gasoline and other petroleum hydrocarbons
- Resistant to weak acids and bases
- Excellent resistance to UV (weatherable acetal)
- Limited self-extinguishing properties
- Color: black
- Flammability rating: UL 94 HB

UV-resistant

Weather-proof

Chemical resistant

302/304 Stainless Steel, 316 Stainless Steel

- Superior corrosion resistance
- Excellent tensile strengths at extreme temperatures
- High resistance to chemicals, acids and radiation
- 316 grade has a better resistance to saltwater corrosion and can be supplied with a halogen free coating
- Extensively used in offshore, rail and petrochemical industries

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof

Radiation resistant

Chemical resistant

Heat Reactive Polypropylene

- Material: Polypropylene
- Heat Activation Temperature: 49°C (+/- 3°C)
- Standard Color: Green
- Heat transition color: Translucent (Natural)
- Operating temperature: -40°C to 80°C
- Color transition life: 1000 hours above heat activation temperature
- UV Resistance: Indoor use only, avoid exposure to UV light
- Used for visual indication of high or dangerous temperatures

Chemical resistant

Colour change
