## DESCRIPTION

Demonstration circuit 1367A features the LTM ${ }^{\circledR} 4615 \mathrm{EV}$, a triple output $\mu$ Module ${ }^{\circledast}$ regulator consisting of two switch mode outputs and one LDO output. Each LTM4615 DC/DC converter has a separate input and enable pin. The LTM4615 maximum load current is 4A for each switch mode channel and 1.5 A for the VLDO™ channel. However the DC1367A is configured with the LDO input supply connected to the VOUT2 whose maximum output current decreases accordingly. Derating is necessary for certain $\mathrm{V}_{\text {IN }}, \mathrm{V}_{\text {OUT }}$
and thermal conditions. The LTM4615 data sheet must be read in conjunction with this manual prior to working on or modifying DC1367A.
Design files for this circuit board are available at http://www.linear.com/demo

LT, LT, LTC, LTM, $\mu$ Module, Linear Technology and the Linear logo are registered trademarks and VLDO is a trademark of Linear Technology Corporation. All other trademarks are the property of their respective owners.

## PGRFORMAOCE SUMMARY ${\left(T_{A}=25^{\circ}\right)}$

| PARAMETER | CONDITION | VALUE |
| :--- | :--- | :--- |
| Input Voltage Range | Both Switch Mode Outputs $\left(V_{\text {IN1 }}\right.$ and $\left.\mathrm{V}_{\text {IN2 }}\right)$ | 2.5 V to 5.5 V |
| Output Voltage $\mathrm{V}_{\text {OUT1 }}$ | DC Voltage, $\mathrm{V}_{\text {IN1 }}=3.3 \mathrm{~V}, \mathrm{I}_{\text {OUT1 }}=4 \mathrm{~A}$ | $1.8 \mathrm{~V} \pm 2 \%$ |
| Output Voltage $\mathrm{V}_{\text {OUT2 }}$ | DC Voltage, $\mathrm{V}_{\text {IN2 }}=3.3 \mathrm{~V}, \mathrm{I}_{\text {OUT2 }}=2.5 \mathrm{~A}$ | $1.2 \mathrm{~V} \pm 2 \%$ |
| Output Voltage $\mathrm{V}_{\text {O3(LDO) }}$ | DC Voltage, $\mathrm{V}_{\text {IN2 }}=3.3 \mathrm{~V}, \mathrm{I}_{\text {OUT3 }}=1.5 \mathrm{~A}$ | $1.0 \mathrm{~V} \pm 2 \%$ |
| Maximum Continuous Output Current | Note: $\mathrm{I}_{\text {OUT2 }}=4.0 \mathrm{~A}-\mathrm{I}_{\text {O3 }}$ | 4 ADC at $\mathrm{V}_{\text {OUT1 }}, 4 \mathrm{AADC}$ at $\mathrm{V}_{\text {OUT2 }}, 1.5 \mathrm{~A} \mathrm{DC} \mathrm{at} \mathrm{V}_{03}$ |
| Default Operating Frequency | For 2 Switching Mode Channels | 1.25 MHz |
| Efficiency of Channel 1 | $\mathrm{V}_{\text {IN1 }}=5.5 \mathrm{~V}, \mathrm{~V}_{\text {OUT1 }}=1.8 \mathrm{~V}, \mathrm{I}_{\text {OUT1 }}=4 \mathrm{~A}$ | $82.8 \%$, See Figure 3 |
| Efficiency of Channel 2 | $\mathrm{V}_{\text {IN2 }}=5.5 \mathrm{~V}, \mathrm{~V}_{\text {OUT2 }}=1.2 \mathrm{~V}, \mathrm{I}_{\text {OUT2 }}=2.5 \mathrm{~A}$ | $81.7 \%$, See Figure 3 |

## PUICK START PROCEDURE

Demonstration circuit 1367A is an easy way to evaluate the performance of the LTM4615. Please refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

1. Place jumpers in the following positions for a typical $1.8 \mathrm{~V}, 1.2 \mathrm{~V}$ and 1.0 V application:

| TRACK1 | RUN1 | RUN2 |
| :---: | :---: | :---: |
| DISABLED | ON | ON |

2. With power off, preset the loads to $O A$ and $V_{I N}$ supply to be 5 V . Connect the input power supply, load and meters as shown in Figure 1.
3. Turn on the power at the input. The output voltage between V01+ and V01- should be $1.8 \mathrm{~V} \pm 2 \%$, the voltage between $\mathrm{V} 02+$ and $\mathrm{V} 02-$ should be $1.2 \mathrm{~V} \pm 2 \%$, and the voltage between V03(LDO) and GND should be $1.0 \mathrm{~V} \pm 2 \%$.
4. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters. To measure input and output ripple, please refer to Figure 2 for proper setup.
5. VOUT1 can track another supply by connecting TP14, TRACK to the supply rail and setting JP1 to ENABLED. When R8 equals RSET1, VOUT1 is set up for coincidental tracking. VOUT2 is set up to coincidentally track VOUT1 as determined by resistors R6 and R7. Please refer to the circuit schematic and data sheet.
6. VOUT2 is used as the input supply for the 1.5A LDO. Therefore, if the jumper of JP3 (RUN2) is placed at OFF position, both channel 2 and 3 will be turned off.
7. Because DC1367A is designed so VOUT2 tracks VOUT1 automatically, placing the JP2 (RUN1) to OFF position turns offall three outputs. To disable tracking on VOUT2, please remove R6 and R7 and connect TRACK2 to VIN2.
8. VIN1 and VIN2 are shorted on DC1367A through a $1 \mathrm{~m} \Omega$ resistor, R10. If desired, remove R10 to allow separate $\mathrm{V}_{\text {IN1 }}$ and $\mathrm{V}_{\text {IN2 }}$ power supplies.

## DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following AS IS conditions:
This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.
If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).
No License is granted under any patent right or other intellectual property whatsoever. LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.
LTC currently services a variety of customers for products around the world, and therefore this transaction is not exclusive.
Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. Common sense is encouraged.
This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
